Corn and Ethanol Intel

Week of August 13, 2026
Market data through: August 12, 2026
Narrative created: August 20, 2026

Weekly review of corn, ethanol, energy, co-product, policy, and related public-company performance for commodities risk managers at U.S. ethanol plants.

In the News

1. Executive view

- **USDA tightened the corn balance sheet, but not enough to create scarcity.** The first survey-based yield estimate fell 2.3 bushels to 180.7 bushels per acre; higher acreage still produced a 16.013-billion-bushel crop. Stronger exports reduced projected 2026/27 ending stocks by 137 million bushels to roughly 1.7 billion. Corn procurement risk increased for the next one to three months. (USDA, *World Agricultural Supply and Demand Estimates*, Aug. 12, 2026) (esmis.nal.usda.gov)
- **Ethanol output rose faster than end-use indicators.** Production increased 10,000 barrels per day to 1.117 million while stocks climbed 274,000 barrels to 24.798 million—9.5% above last year. Near-term ethanol basis and inventory risk deteriorated. (EIA, *Weekly Petroleum Status Report*, Aug. 12, 2026) (eia.gov)
- **Gasoline demand remained seasonally adequate but unimpressive:** four-week product supplied averaged 8.996 million barrels per day, 0.5% below last year, despite refinery utilization near 96%. (EIA, *Weekly Petroleum Status Report*, Aug. 12, 2026) (eia.gov)
- **Energy exposure became more asymmetric.** Crude rebounded as Hormuz negotiations stalled, supporting gasoline values, while EIA cut its third-quarter Henry Hub forecast by $0.50 to $2.87/MMBtu—favorable for plant energy costs. (EIA, *Short-Term Energy Outlook*, Aug. 11, 2026; DTN, *Oil Stays in Red as Demand Worries Cap Hormuz Crisis*, Aug. 13, 2026) (eia.gov)
- **45Z moved from forecast to reported operating economics.** Green Plains recognized $58.7 million of net 45Z value in the quarter, materially exceeding its $34.6 million of base-business adjusted EBITDA. The earnings divide between qualifying and nonqualifying gallons is widening. (Green Plains, *Second Quarter 2026 Financial Results*, Aug. 6, 2026) (investor.gpreinc.com)

- **Export demand improved structurally:** USDA raised both old- and new-crop U.S. corn exports by 75 million bushels, partly because Black Sea disruption constrained Ukraine. (USDA, *WASDE*, Aug. 12, 2026) (esmis.nal.usda.gov)

Overall margin and risk environment: broadly unchanged, but more volatile. Lower prospective natural-gas costs and export support offset firmer corn and accumulating ethanol stocks; 45Z eligibility increasingly determines plant-level outcomes.

2. Risk dashboard

Exposure	Current signal	Weekly change	Horizon	Confidence	Main driver
Corn procurement	Moderately adverse	Weaker	1–3 months	High	Lower yield, exports
Ethanol selling	Soft	Weaker	1–4 weeks	High	Production and stocks up
Natural gas	Favorable	Improved	1–6 months	High	Record production/storage outlook
DDGS/co-products	Neutral	Unchanged	1–2 months	Medium	Feed demand versus high run rates
Regulatory credits	Mixed-positive	More uncertain	2026–27	Medium	45Z value; SRE precedent
Domestic blending	Neutral	Little change	1–2 months	High	Gasoline demand slightly below 2025
Export demand	Positive	Improved	1–6 months	High	U.S. corn competitiveness
Transportation	Mixed	Little change	1–3 months	Medium	High diesel; no verified river shock
Overall margin	Mixed	Broadly unchanged	1–3 months	Medium	Corn/ethanol pressure offset by gas and credits

3. Major strategic developments

1. Lower yield matters more than the headline crop increase

What happened: USDA cut yield to 180.7 bushels per acre, but added 1.2 million harvested acres, leaving production 13 million bushels above July. **Why it matters:** export revisions—not production—created the tighter stocks outlook. **Risk implication:** avoid treating the report as outright supply rationing; basis may soften around harvest even if futures retain risk premium. **Direction/horizon:** corn firm, ethanol neutral, margins negative over 1–3 months. **Watch:** September field data and harvest basis. (esmis.nal.usda.gov)

2. Ethanol supply is testing demand capacity

What happened: output rose to 1.117 million barrels per day and inventories reached 24.798 million barrels. **Why it matters:** stocks increased despite gasoline inventories falling and summer blending activity continuing. **Risk implication:** protect prompt ethanol length and storage capacity; high industry utilization requires exports or stronger blending to clear supply. **Direction/horizon:** corn supportive, ethanol negative, margins negative over 1–4 weeks. **Watch:** whether stocks reverse before Labor Day. (eia.gov)

3. Crude supports gasoline, but natural gas offers cost relief

WTI settled at $81.08 on August 13 after an approximately 10% five-session rebound, while EIA expects record October gas inventories of 3,985 Bcf. **Implication:** gasoline cracks retain geopolitical upside, but plants have an opportunity to reduce forward gas-cost risk. **Direction/horizon:** corn neutral; ethanol positive via gasoline; margins positive via gas over 1–6 months. **Invalidation:** rapid Hormuz normalization or renewed LNG feedgas demand. (rigzone.com)

4. 45Z is becoming a current-margin differentiator

Green Plains reported 88% utilization, $93.3 million adjusted EBITDA and $58.7 million of recognized 45Z value. **Implication:** carbon-intensity documentation, qualified-sale controls and credit monetization terms now deserve the same governance as physical crush hedges. **Direction/horizon:** ethanol neutral; qualifying margins strongly positive through the credit period. **Watch:** audit treatment, transfer discounts and DOE emissions updates. (investor.gpreinc.com)

5. Small-refinery exemptions reintroduced RIN-demand uncertainty

EPA's August 3 action granted one full and two partial exemptions for 2023–24 petitions and found three petitions ineligible. **Implication:** direct volume is limited, but the decision establishes implementation precedent for additional petitions; exempt refineries benefit while RIN holders and biofuel producers bear demand dilution risk. **Direction/horizon:** corn and ethanol slightly negative; margins mixed over 3–12 months. **Watch:** additional decisions and litigation. (EPA, *Decisions on Petitions for Small Refinery Exemptions*, Aug. 3, 2026) (epa.gov)

6. Export competition shifted toward the United States

USDA raised 2026/27 U.S. corn exports to 3.3 billion bushels as Ukraine's logistics deteriorated and EU crop prospects weakened. **Implication:** Gulf and PNW basis can strengthen even with a large harvest, limiting how deeply interior corn prices decline. **Direction/horizon:** corn positive, ethanol margins negative through procurement, 2–6 months. (esmis.nal.usda.gov)

4. Market and margin scoreboard

Market	Current status	Weekly/monthly change	Interpretation
Dec. corn	$4.72/bu., Aug. 13	+$0.11 weekly; +$0.09 monthly	Export-led tightening
Nov. soybeans	$11.83/bu.	+$0.06 weekly; –$0.12 monthly	Larger acreage offsets demand
Dec. soybean oil	68.76¢/lb., Aug. 12	+1.39¢ weekly; roughly flat monthly	Energy-supported, volatile
Ethanol	1.117 mb/d production; 24.798m bbl stocks	+10 kb/d; +274,000 bbl	Bearish prompt supply signal
Gasoline	NYH spot $2.970/gal., Aug. 7	–25.6¢ weekly	Still historically expensive
WTI crude	$81.08/bbl., Aug. 13	Roughly +$6 from Aug. 6	Hormuz premium persists
Natural gas	EIA 3Q forecast $2.87/MMBtu	–$0.50 versus July forecast	Margin-positive
DDGS/DCO/D6 RIN/LCFS	Reliable public values unavailable	—	Require proprietary marks
Representative spot crush	Reliable public value unavailable	—	Company results indicate constructive Q2
Managed-money corn	Net long 144,821 contracts, Aug. 4	+18,045 weekly	Crowded long raises liquidation risk

Market sources: CKNX, *Closing Markets*, Aug. 6 and 13, 2026; CFTC, *Commitments of Traders*, published Aug. 7, 2026; Barchart market data, Aug. 12, 2026. (cknewstoday.ca)

5. Agriculture and weather

Corn condition held at 61% good/excellent, versus 72% last year, while 61% had reached dough and 16% dent. Midwest moderate-or-worse drought expanded roughly five percentage points to 24.7%, but forecasts called for heavy rain from central Iowa into western Indiana. The market remains sensitive to whether rain stabilizes grain fill or arrives after irreversible damage. (USDA, *Crop Progress*, Aug. 10; U.S. Drought Monitor, Aug. 13, 2026) (esmis.nal.usda.gov)

6. Ethanol supply, demand and operating economics

High run rates, rising stocks and only marginal gasoline-demand growth argue against aggressively extending unpriced prompt production. Conversely, lower natural gas and still-elevated gasoline values protect variable margins. The principal operational risk is an autumn overlap of full tanks, harvest corn movement and sustained industry utilization.

7. Company signals

Green Plains provides the clearest read-through: base operations were profitable despite maintenance, but 45Z supplied most reported adjusted EBITDA. Aemetis separately reported 113% nameplate utilization and $8.6 million of 45Z benefit; treat those figures as company-reported rather than representative industry economics. (Motley Fool, *Aemetis Q2 2026 Earnings Call Transcript*, Aug. 13, 2026) (fool.com)

8. Regulation and policy

Section 45Z applies to qualifying transportation fuel produced from January 1, 2025, subject to producer registration, qualified-sale and emissions-value requirements. It benefits low-CI producers immediately and supports CCS and efficiency investment, but documentation, monetization discounts and final emissions treatment remain material uncertainties. (IRS, *Internal Revenue Bulletin 2026-09*, Feb. 23, 2026) (irs.gov)

9. International and trade outlook

USDA reduced Brazil's 2025/26 corn exports by 0.5 million tonnes to 42.5 million and China's imports by 1 million tonnes to 4 million, while increasing U.S. exports by 3 million tonnes. Ukraine and EU constraints are more consequential for U.S. corn than Brazil this week. Reliable current barge, ocean-freight and Brazilian ethanol values were unavailable; diesel costs remain an elevated logistics exposure. (apps.fas.usda.gov)

10. Four-to-twelve-week scenarios

- **Base case:** harvest confirms a large but sub-July-trend crop; ethanol stocks remain manageable after seasonal maintenance. Confirm with stable basis and stocks below 25 million barrels.
- **Margin-positive:** rain fails to translate into higher yields, gasoline remains supported and gas stays below prior forecasts. Earliest signals: falling crop ratings, ethanol-stock draws and stronger Gulf exports.
- **Margin-negative:** harvest basis stays firm while ethanol production remains above 1.1 million barrels per day and gasoline demand weakens after Labor Day. Earliest signals: consecutive stock builds and softer prompt ethanol basis.

11. Four-week catalyst calendar

- **Aug. 14:** CFTC positioning; August soybean-complex contract expiration.
- **Aug. 17, 24, 31; Sept. 8:** USDA Crop Progress.
- **Aug. 19, 26; Sept. 2, 9:** EIA petroleum/ethanol reports.
- **Aug. 20, 27; Sept. 3, 10:** USDA Export Sales.
- **Sept. 9:** EIA September Short-Term Energy Outlook.
  No exact EPA/Treasury, UNICA or watchlist-company event date was verified at the August 13 cutoff; avoid calendar assumptions. (esmis.nal.usda.gov)

12. Bottom line

The week's key change was USDA's export-led tightening of corn supplies. Closest attention belongs on prompt ethanol inventory exposure, while the next EIA stock report is the event most likely to change the near-term margin view.

Notable Changes

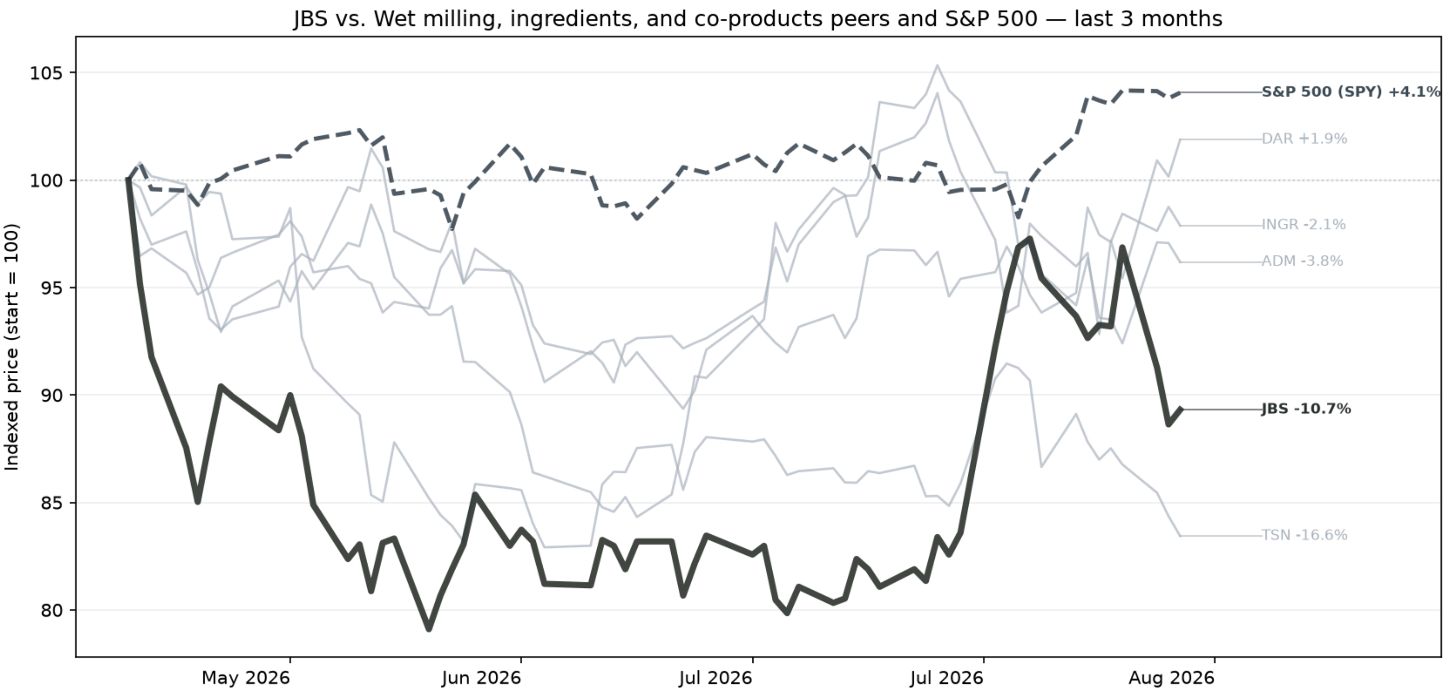
JBS (JBS) -10.7%

Reported: August 11, 2026 · Google Finance earnings page



Earnings Call Summary

JBS announced that Global CEO Gilberto Tomazoni will transition leadership to Wesley Batista Filho, effective January 2027. Tomazoni highlighted that the company's long-term strategy, priorities, and operations will remain unchanged following this planned succession from a position of strength.

At a Glance

- **JBS Misses EPS Despite Revenue Growth:** JBS reported an adjusted EPS of $0.20, falling short of the estimated $1.659, even as reported revenue grew to $121,942,929,080, beating expectations.
- **Margin Squeeze Impacts Global Protein Portfolios:** The company's IFRS adjusted EBITDA margin compressed to 6.0% from 8.4% last year, heavily pressured by tight cattle supplies and negative margins in the North America beef segment.
- **Capital Expenditures Revised Lower in Guidance:** JBS adjusted its forward outlook by reducing its planned full-year 2026 capital expenditures by $400 million to a new target of $2.0 billion.
- **Major Structural Shakeup and Leadership Changes:** The earnings release was paired with a significant succession announcement, naming Wesley Batista Filho as incoming Global CEO effective January 2027.
- **Cash Flow Rebounds into Positive Territory:** Free cash flow improved substantially year-over-year to a positive $130 million, primarily driven by optimized working-capital movements and advanced customer payments.

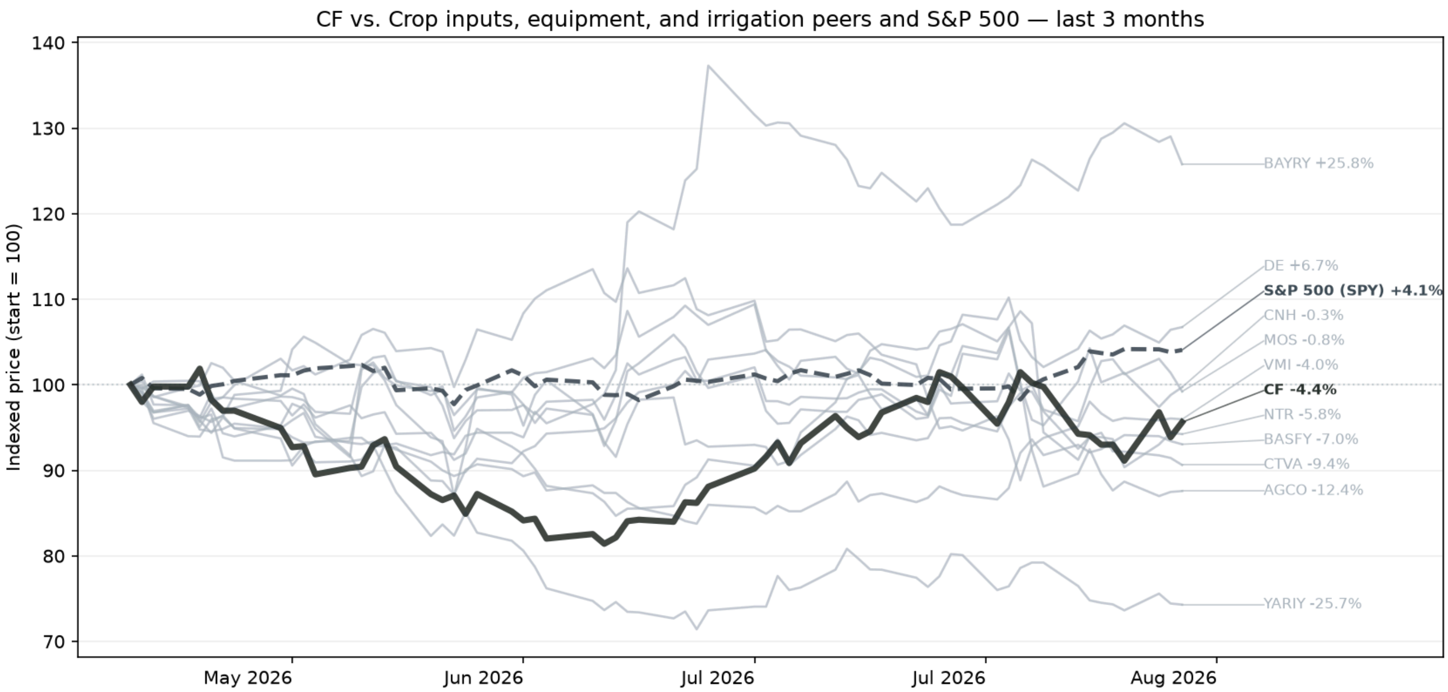
Key Moments from the Call

- **1m 39s — CEO Succession and Continuity Plans:** The announcement of Wesley Batista Filho succeeding Gilberto Tomazoni as Global CEO in January 2027 provides a clear transition timeline, reassuring investors of strategic continuity and operational stability.
- **14m 13s — Mexican Border Reopening Boosts Outlook:** The anticipated reopening of three Mexican border ports of entry will restore historical cattle flows, adding over 1 million head of heavier cattle to alleviate tight U.S. beef slaughter capacity by 2027.

- **15m 37s — U.S. Reporting and Index Inclusion:** Voluntary compliance as a U.S. domestic company and inclusion in the Russell 1000 and 3000 indexes will please investors by expanding the shareholding base and accelerating global liquidity and market visibility.
- **16m 39s — Non-Recurring Financial Charges Depress Earnings:** A net loss of $102M and negative $0.10 EPS may disappoint, but underlying adjusted net income remains positive at $218M ($0.20 EPS) when isolating non-recurring liability management costs and antitrust settlements.

CF Industries (CF) -4.4%

Reported: August 6, 2026 · Google Finance earnings page



Earnings Call Summary

CF Industries reported robust H1 2026 results, generating $2.2 billion in adjusted EBITDA. The performance was supported by strong operational utilization, reaching nearly 98% of available ammonia capacity, and a tight global nitrogen supply-demand balance that was further strained by geopolitical conflict in the Middle East.

At a Glance

- **Earnings Miss Wall Street Expectations:** CF Industries reported a Q2 2026 Adjusted EPS of $4.73 on revenue of $2.22 billion, missing analyst estimates of $5.614 per share and $2.45 billion in revenue.
- **Strong Ammonia Capacity Utilization Sustained:** The company sustained exceptional operational performance, achieving a 98% ammonia capacity utilization rate across its available assets during the first half of 2026.
- **Upward Revision in Mid-Cycle Expectations:** Management raised its baseline mid-cycle outlook to approximately $2.9 billion of EBITDA and $1.7 billion of free cash flow, supported by a tighter multi-year structural outlook for global nitrogen markets.
- **Higher Prices Mitigate Volume Declines:** A 15% decline in sales volumes caused by softer customer buying and maintenance outages was heavily offset by a surge in average global nitrogen selling prices.
- **Shareholder Returns Boost Investor Narrative:** CF Industries highlighted robust capital allocation programs, increasing its quarterly dividend by 20% to $0.60 per share and deploying $958 million in share repurchases over the trailing twelve months.
- **Strategic Project and Outage Adjustments:** Construction on the low-carbon Blue Point project is set to begin in August 2026, while management announced a delay in the restart of the Yazoo City facility to the first half of 2027.

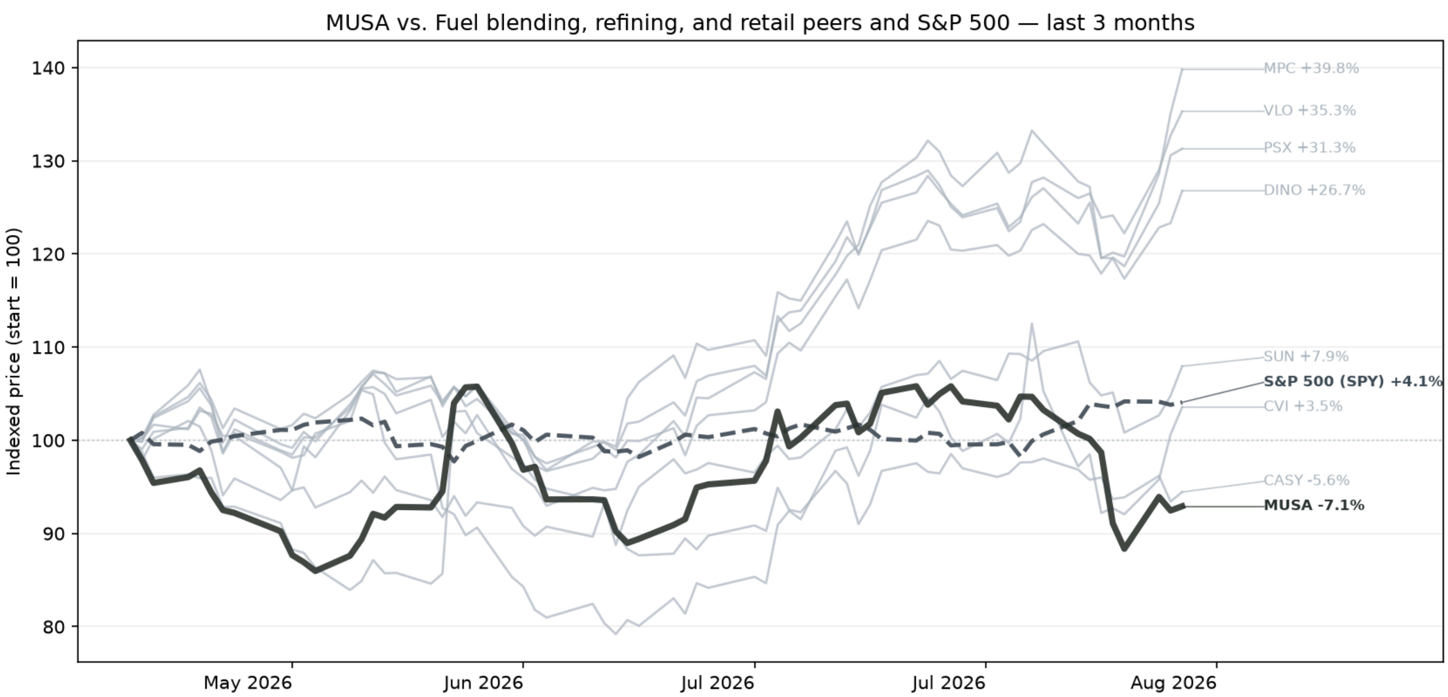
Key Moments from the Call

- **3m 52s — Raised Baseline Mid-Cycle Guidance:** CF Industries raised its baseline mid-cycle EBITDA guidance to $2.9 billion and free cash flow to $1.7 billion. This revision pleases investors as it reflects structural changes, including higher global capital costs that elevate the required incentive price for new capacity, rather than just temporary geopolitical windfalls.

- **23m 31s — Yazoo City Restart Timeline Delayed:** The resumption of operations at the Yazoo City complex was adjusted to the first half of 2027 due to extended procurement timelines for electrical gear. While the delay could disappoint investors, management is reconfiguring the site for more lucrative products and expects insurance recoveries to fully offset construction costs.
- **30m 23s — New DEF Project Evaluation:** CF Industries is initiating a front-end engineering and design (FEED) study for a new Diesel Exhaust Fluid (DEF) upgrade project at its Courtright facility. This strategic pivot will please investors by upgrading lower-margin ammonia into high-margin DEF to serve a rapidly expanding North American market.
- **44m 28s — Addressing Peer Valuation Disconnect:** CEO Chris Bohn addressed a persistent valuation disconnect, arguing that the market treats the stock like an over-leveraged fertilizer company from a decade ago. Investors will be pleased by management's commitment to aggressive share repurchases, utilizing their low working capital and robust free cash flow conversion to exploit this undervaluation.

Murphy USA (MUSA) -7.1%

Reported: August 6, 2026 · Google Finance earnings page



Earnings Call Summary

CEO Mindy West noted that the 2026 fuel margin forecast is intentionally conservative due to heightened macro volatility and ongoing global crises. However, the company is observing a higher floor for retail margins as competitors remain rational, with pricing reflecting the needs of marginal retailers to maintain required returns.

At a Glance

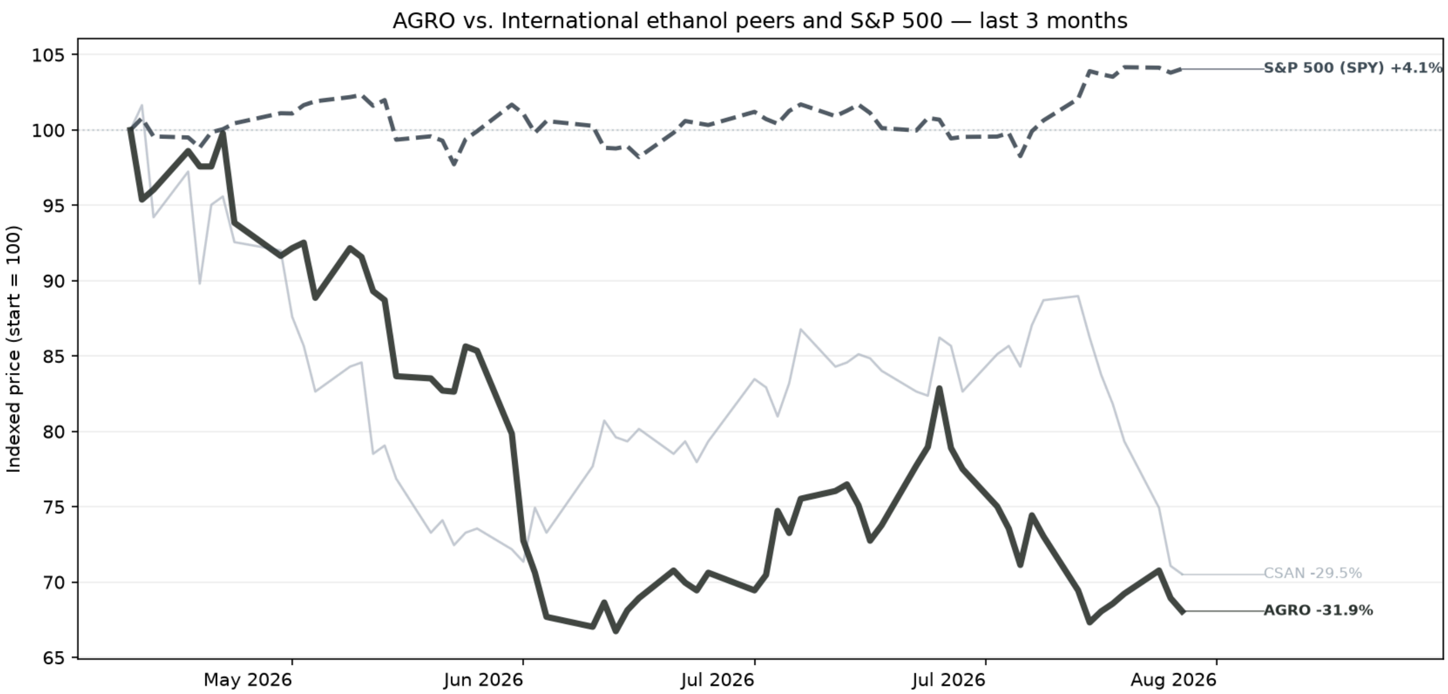
- **Murphy USA Beats Earnings Expectations:** Murphy USA reported a Reported Adjusted EPS of 11.27, beating the Estimated Adjusted EPS of 10.021, and posted a Reported Revenue of $6,201,700,000, which also cleared the estimated $6,031,478,560.
- **Fuel Margins Drive Record Growth:** Total fuel contribution surged 32% year-over-year to 40.6 cents per gallon, expanding from 32.0 cents per gallon last year, while total retail fuel volume grew 3.9% and same-store volume returned to positive territory at 0.5%.
- **Conservative Second Half Guidance Maintained:** Management forecasts full-year net income of approximately $636 million and adjusted EBITDA of $1.25 billion based on a conservative 35-cent per gallon fuel margin expectation for the second half of 2026.
- **Board Approves Significant Dividend Hike:** Following the strong quarterly results, Murphy USA declared a quarterly cash dividend of $0.65 per share, representing a 23% increase over the Q3 2025 payout.
- **Merchandise Mix Shows Muted Variance:** Total merchandise contribution rose 4.0% to $227.4 million on solid unit margins of 20.1%, though performance was bifurcated by a 2.4% same-store sales increase in nicotine offsetting a 1.4% drop in non-nicotine categories.

Key Moments from the Call

- **11m 17s — Loyalty Program Sign-ups Expand Top of Funnel:** Monthly loyalty program sign-ups accelerated past 600,000 in Q2, with 46% representing new or lapsed customers. This surge expands the loyalty funnel, enabling targeted promotions like pump-to-store discounts that effectively drive higher frequency inside-store transactions and sticky consumer behaviors.
- **16m 46s — CapEx Raised for Growth and Life Cycle Investments:** Murphy USA raised capital spending toward the high end of its range. The additional capital is being deliberately deployed into future growth via land bank expansion and proactive life cycle asset replacements—such as dispensers, safes, and HVAC units—to improve structural efficiency rather than conducting repeating repairs.
- **27m 59s — Rising Fuel Margin Floors Sustainable Long-Term:** Executives tracking structural dynamics confirmed that breakeven equilibriums continue to move higher for marginal retailers who pass rising operating costs to consumers. This ongoing virtuous cycle solidifies a higher baseline retail fuel margin floor, making a $0.35 all-in margin achievable for the back half of the year.
- **38m 18s — Conservative Full-Year Volume Guidance Justification:** Management maintained its conservative same-store gallon guidance of down 1% to down 3% for the second half of 2026. The company chooses not to bake in prolonged wholesale price declines, though they noted that historical downward trends allow them to differentiate on price, capture market share, and outperform these base assumptions.

Adecoagro (AGRO) -31.9%

Reported: August 12, 2026 · Google Finance earnings page



Earnings Call Summary

Adecoagro achieved record consolidated adjusted EBITDA of $258 million year-to-date and $173 million for Q2 2026. This strong operational performance was heavily driven by the fertilizer segment, which benefited from higher production volumes, elevated prices, and cost efficiencies, compensating for softer results in other business segments.

At a Glance

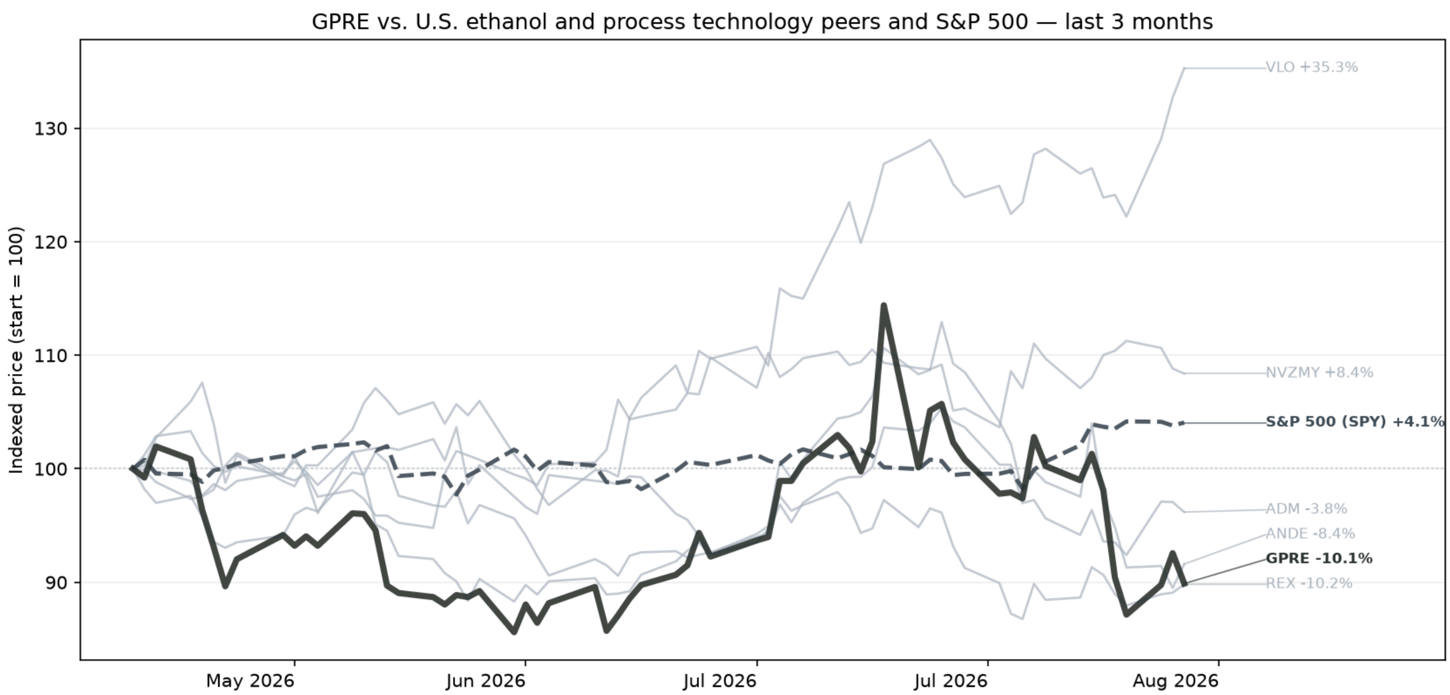
- **Adecoagro Misses Estimates Significantly:** Adecoagro reported a Q2 2026 adjusted EPS of $0.12, missing the estimated $0.494, and reported revenue of $538,501,000, which fell short of the estimated $602,008,310.
- **Fertilizers Drive Record EBITDA Results:** Despite missing top-line expectations, consolidated adjusted EBITDA reached a record $173 million for the quarter, driven by a 22% year-over-year surge in urea production.
- **Management Reaffirms Key Full-Year Targets:** Management reaffirmed its full-year sugarcane crushing and deleveraging targets while anticipating long-term productivity and capacity gains across core operational segments.
- **Strategic Inventory Buildup in Ethanol:** The company ended the quarter storing approximately 41% of its year-to-date ethanol production to avoid selling into depressed domestic prices and capture better margins later.
- **Expansion via Caarapo Mill Acquisition:** Adecoagro expects to close the acquisition of the Caarapó Mill in the coming weeks, a move projected to expand long-term crushing capacity without disrupting year-end leverage goals.

Key Moments from the Call

- **7m 9s — Ethanol Inventory Building Strategy:** Adecoagro intentionally stored 41% of its year-to-date ethanol production in inventory during Q2, capitalizing on industrial flexibility to defer sales during a sharp domestic price decline. This strategy allows the company to secure higher margins in Q4 2026 and Q1 2027 as market demand recovers.
- **9m 27s — Fertilizer Segment Outperformance:** The fertilizer segment's adjusted EBITDA more than doubled year-over-year, driven by a 22% increase in urea production and soaring global prices near $800 per ton. This outperformance comfortably mitigated softer results in the sugar, ethanol, and agriculture segments, prompting management to raise full-year segment expectations.
- **22m 48s — Caarapó Mill Operational Synergies:** The upcoming Caarapó Mill acquisition presents significant potential to eventually double its effective crushing volumes. Synergies include an immediate diversion of 500,000 to 1,000,000 tons of surplus cluster cane, a 2% improvement in industrial efficiency, and enhanced G&A cost dilution across the Mato Grosso do Sul cluster.
- **24m 50s — Sugar and Ethanol Cost Reductions:** Management maintains a target of 10% unit production cost reductions for the current crop cycle. Efficiencies are driven by a projected 10% increase in crushing volumes, lower leasing costs tied to Consecana prices, and operational headcount reductions from implementing two-row harvesting technologies.

Green Plains (GPRE) -10.1%

Reported: August 6, 2026 · Google Finance earnings page



Earnings Call Summary

Green Plains reported strong operational execution for Q2 2026, delivering adjusted EBITDA of $93.3 million, up from $71.5 million in Q1 and a substantial improvement from $16.4 million in Q2 2025, driven by operational excellence, its carbon business, and favorable ethanol, corn oil, and protein demand.

At a Glance

- **Bottom-Line Beat Despite Top-Line Miss:** Green Plains reported an adjusted EPS of $0.83, significantly beating the estimated $0.635, while quarterly revenue of $446.22 million missed the projected $542.44 million.
- **Crush Margins Drive Segment Performance:** The company's consolidated ethanol crush margin improved significantly to $95.1 million compared to $26.3 million in the prior year quarter, even though ethanol production volumes fell to 160.7 million gallons due to a plant divestiture.
- **Utilization Targets Maintained for 2026:** Green Plains maintained its full-year 2026 capacity utilization target of approximately 95%, expecting a recovery in the second half of the year following planned spring maintenance that pulled Q2 utilization down to nearly 90%.

- **Carbon Platform Backs EBITDA Growth:** The company's low-carbon platform served as a significant core earnings driver, contributing $58.7 million in 45Z production tax credit value toward the total adjusted EBITDA of $93.3 million.
- **Negative Post-Earnings Stock Market Reaction:** Despite the substantial bottom-line earnings beat, the market reacted with disappointment as shares of Green Plains declined by nearly 3% immediately following the announcement.

Key Moments from the Call

- **5m 44.759999999999999s — Earnings Beat Performance:** Green Plains delivered a strong financial performance, reporting an EPS of $0.83, significantly beating analyst estimates of $0.635, driven by a highly profitable commercial environment and robust $59 million EBITDA contributions from its 45Z carbon platform.
- **18m 32.039999999999964s — Temporary Utilization Dip from Extended Maintenance:** Capacity utilization averaged 90% in Q2 due to planned spring maintenance and an infrequent 8-to-10-year molecular sieve bed change-out at the Madison facility. Management expects a rebound back to 95% in Q3, reassuring investors on full-year targets.
- **25m 58.819999999999936s — Potential Share Repurchases Evaluated:** Addressing analyst focus on capital allocation, management revealed they are actively considering share repurchases alongside internal projects and debt reduction. While no buybacks are officially announced yet, the prospect introduces positive long-term optionality for shareholders.
- **29m 18.119999999999989s — Carbon Credit Monetization Patient Strategy:** Management confirmed they have yet to monetize any 2026 45Z carbon credits. While it has not yet announced a partner, the company is progressing through complex audit and compliance requirements to ensure predictable, long-term cash flow rather than rushing a deal.

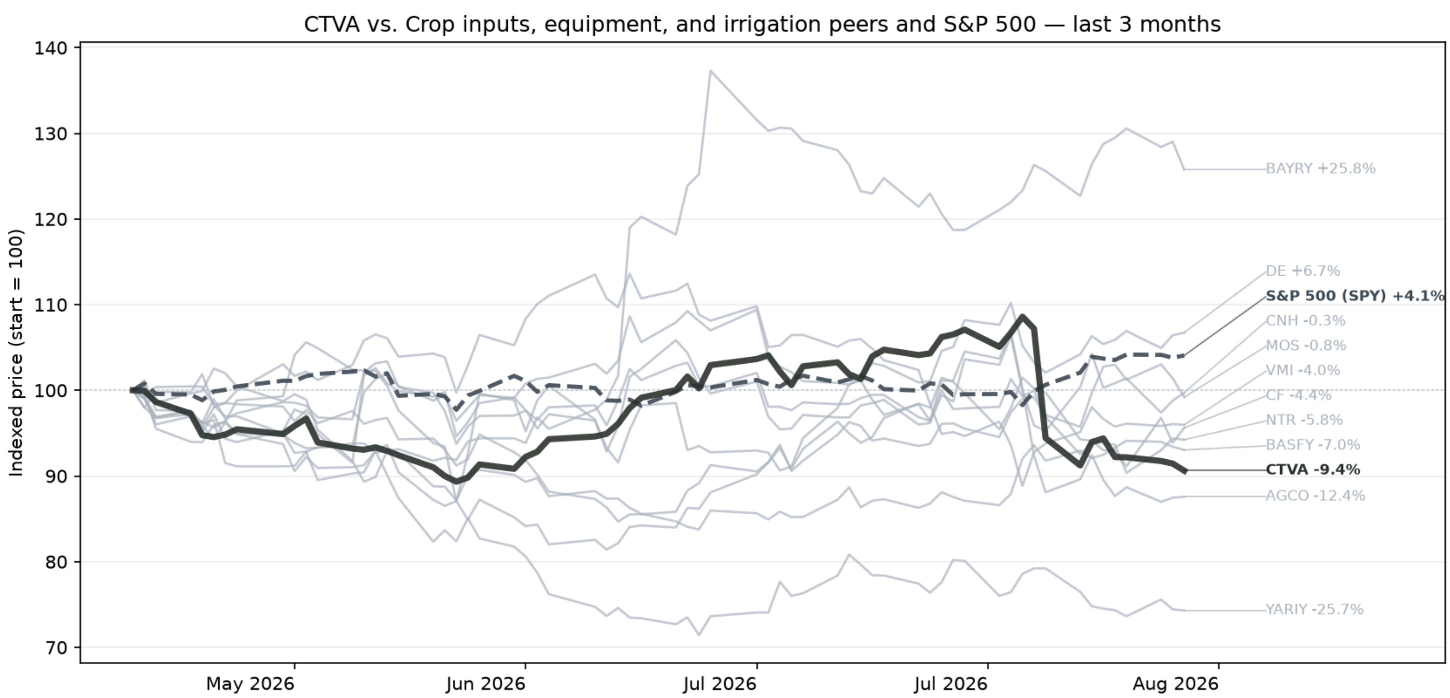
Company Overviews

Corteva (CTVA)

Crop inputs, equipment, and irrigation · $52.4B · 3m -9.4% · 12m +4.4% · 24m +40.9%

Google Finance

Largest U.S. corn-seed franchise (Pioneer) and a primary input cost for Corn Belt acres.



Corteva is an agricultural inputs pure play that was formed in 2019 when it was spun off from DowDuPont. The company is a leader in the development of new seed and crop protection products. Seeds generate the majority of profits with the remainder coming from crop protection products. Corteva plans to spin off its seeds business in late 2026. The seeds business will be named Vylor, while the crop protection business will retain the Corteva name and be a pure-play crop protection company following the divestiture. Corteva operates globally, but around half of revenue comes from North America.

Bayer (BAYRY)

Crop inputs, equipment, and irrigation · n/a · 3m +25.8% · 12m +77.9% · 24m +77.4%

[Google Finance]

Dekalb and former Monsanto corn-seed brands; together with Corteva dominates U.S. corn seed.

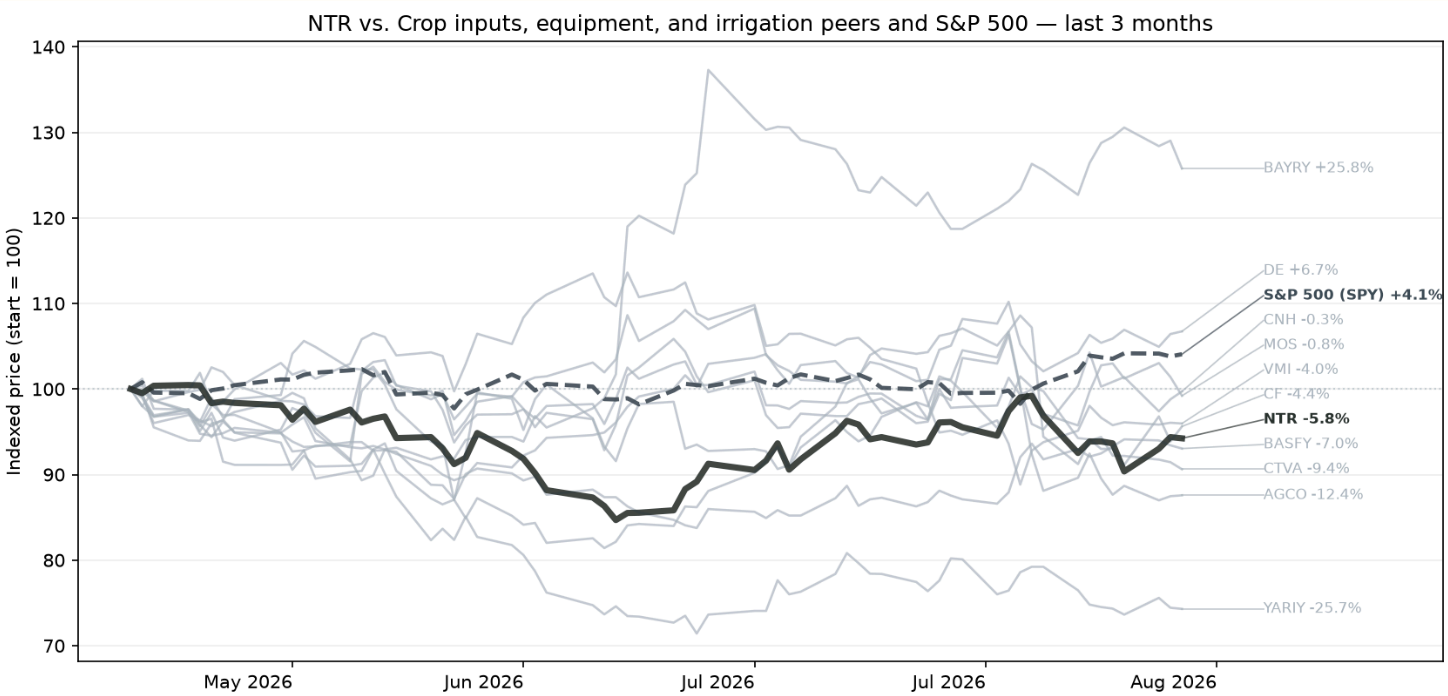
BASF SE S/ADR

Nutrien (NTR)

Crop inputs, equipment, and irrigation · $33.6B · 3m -5.8% · 12m +18.1% · 24m +43.5%

[Google Finance]

Largest North American agricultural retailer and a major potash and nitrogen producer.



Created in 2018 as a result of the merger between PotashCorp and Agrium, Nutrien is the world's largest fertilizer producer by capacity. Nutrien produces the three main crop nutrients—nitrogen, potash, and phosphate—although its main focus is potash, where it is the global leader in installed capacity with a roughly 20% market share. The company is also the largest agricultural retailer in North America and Australia, selling fertilizers, crop chemicals, seeds, and services directly to farm customers through its brick-and-mortar stores and online platforms.

CF Industries (CF)

Crop inputs, equipment, and irrigation · $18.0B · 3m -4.4% · 12m +38.9% · 24m +49.9%

Google Finance

Nitrogen fertilizer producer; corn is the crop that most moves UAN and urea demand.

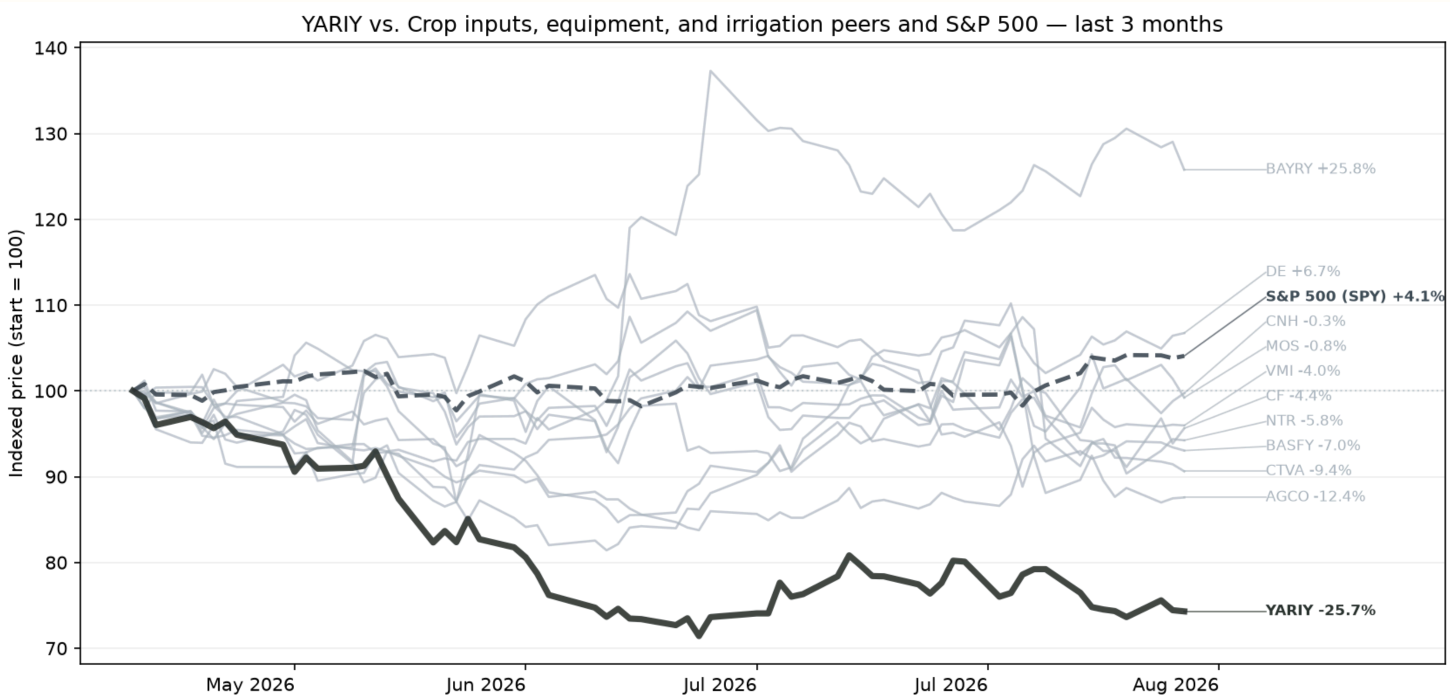
CF Industries is a leading producer and distributor of nitrogen, which is primarily used in fertilizers. The company operates nitrogen manufacturing plants primarily in North America. CF also produces nitrogen in the United Kingdom and holds a joint venture interest in a nitrogen production facility in Trinidad and Tobago. CF makes nitrogen primarily using low-cost US natural gas as its feedstock, making the company one of the lowest-cost nitrogen producers globally. It is also investing in carbon-free blue and green ammonia, which can be used as an alternative fuel to hydrogen or as a means to transport hydrogen.

Yara International (YARIY)

Crop inputs, equipment, and irrigation · n/a · 3m -25.7% · 12m +20.8% · 24m +54.3%

Google Finance

Global nitrogen producer that sets the international urea and ammonia reference.



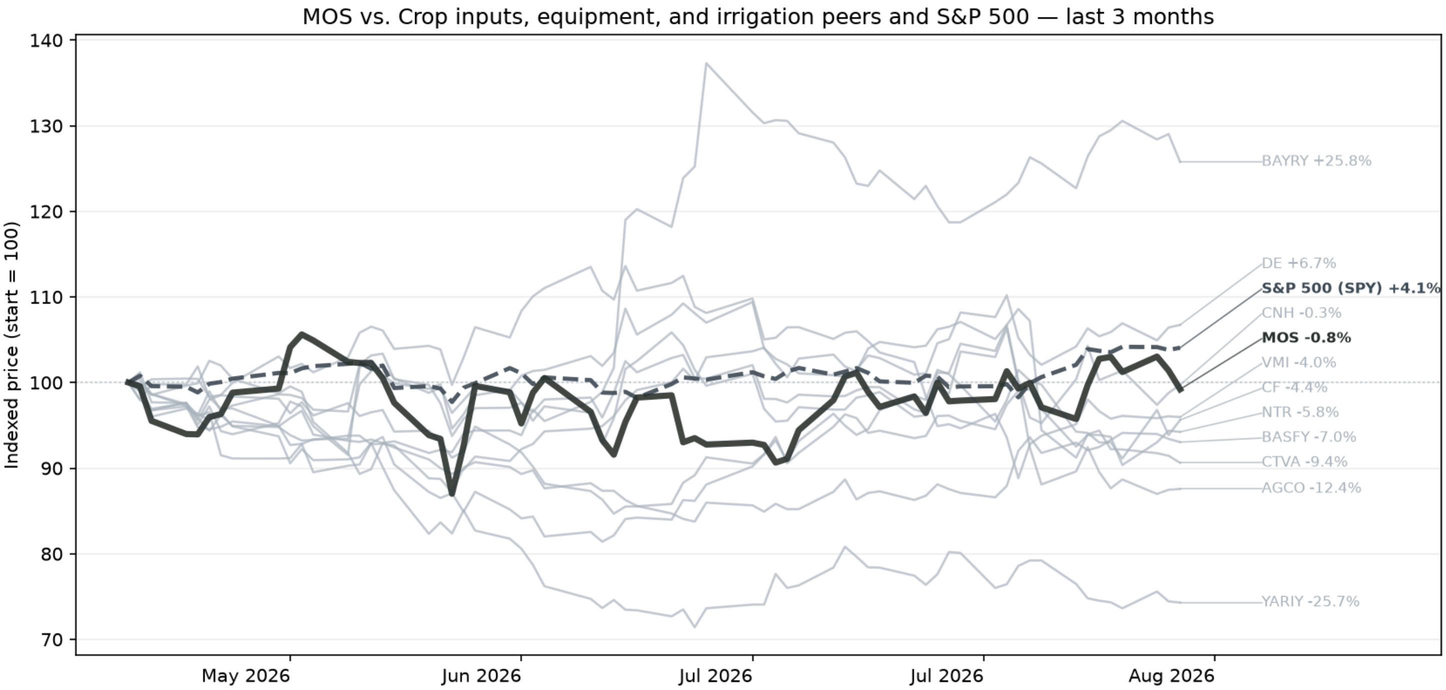
YARA INTL ASA S/ADR

Mosaic (MOS)

Crop inputs, equipment, and irrigation · $7.1B · 3m -0.8% · 12m -29.8% · 24m -17.1%

Google Finance

Phosphate and potash producer that completes corn production budgets.



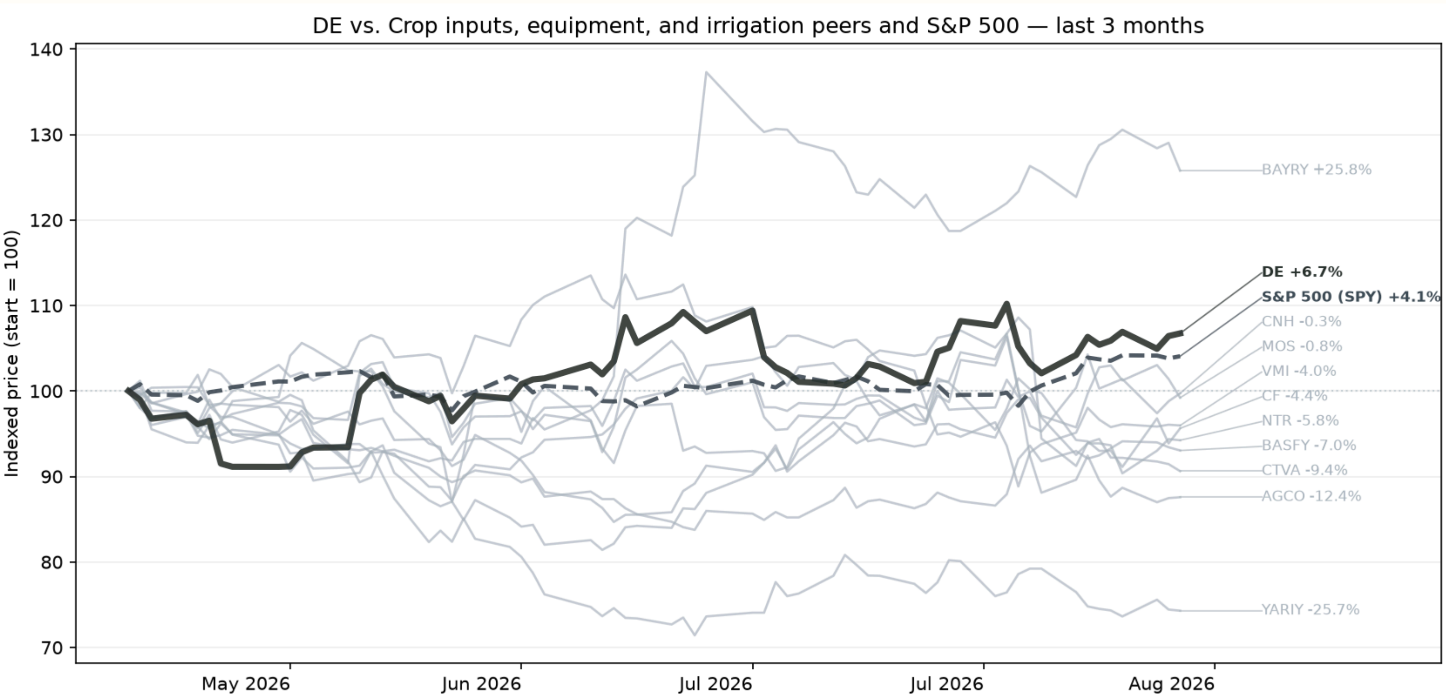
Mosaic is one of the largest phosphate and potash producers in the world. The company's assets include phosphate rock mines in the US and potash mines in Canada. Mosaic also runs a large fertilizer distribution operation in Brazil through its Mosaic Fertilizantes business.

Deere (DE)

Crop inputs, equipment, and irrigation · $156.7B · 3m +6.7% · 12m +20.7% · 24m +66.3%

Google Finance

Dominant North American farm-equipment maker for corn planting, harvest, and grain handling.



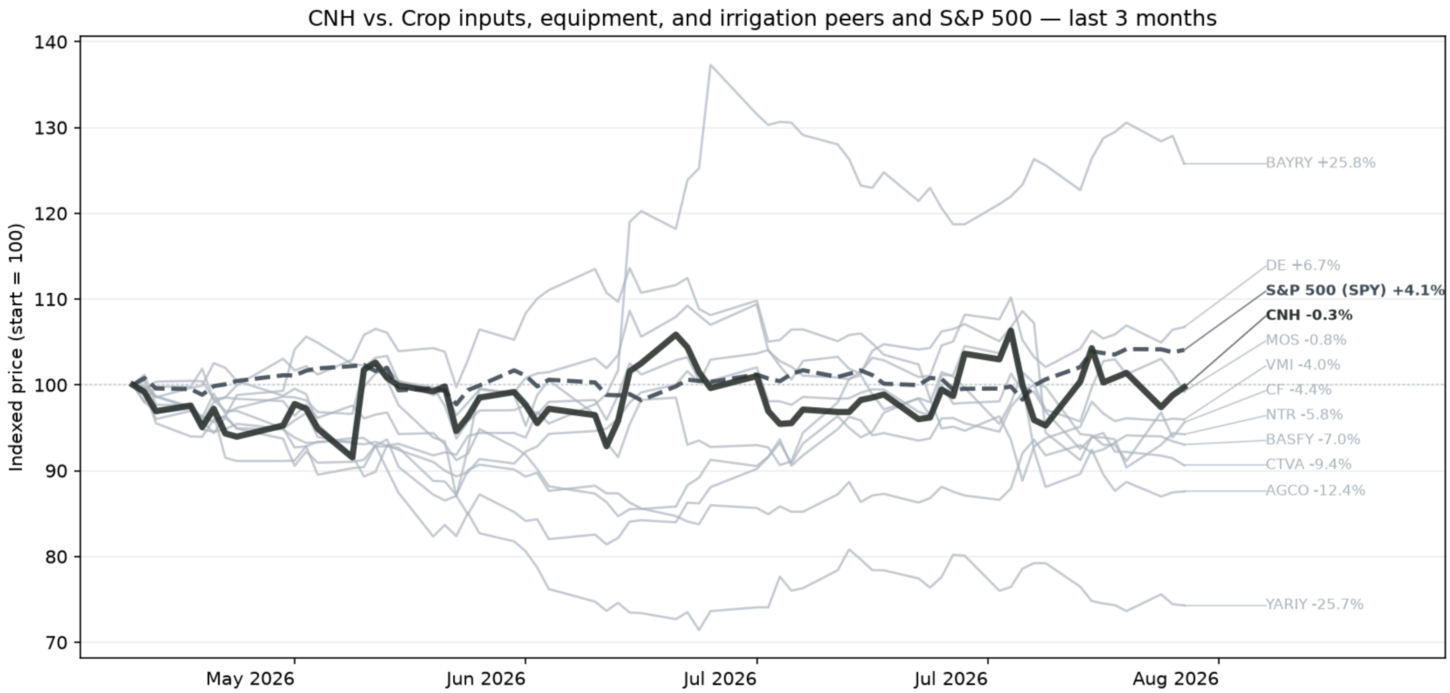
Deere is the world's leading manufacturer of agricultural equipment and a major producer of construction machinery. The company is divided into four reporting segments: production & precision agriculture, or PPA, small agriculture & turf, or SAT, construction & forestry, or CF, and financial services, or FS, its captive finance subsidiary. The core PPA business is the largest contributor to sales and profits by far. Geographically, Deere sales are 60% US/Canada, 17% Europe, 14% Latin America, and 9% rest of the world. Deere goes to market through a robust dealer network that includes over 2,000 dealer locations in North America with reach into over 100 countries. John Deere Financial provides retail financing for machinery to its customers and wholesale financing for dealers.

CNH Industrial (CNH)

Crop inputs, equipment, and irrigation · $16.5B · 3m -0.3% · 12m -16.4% · 24m +9.6%

Google Finance

Case IH and New Holland farm equipment serving corn growers.



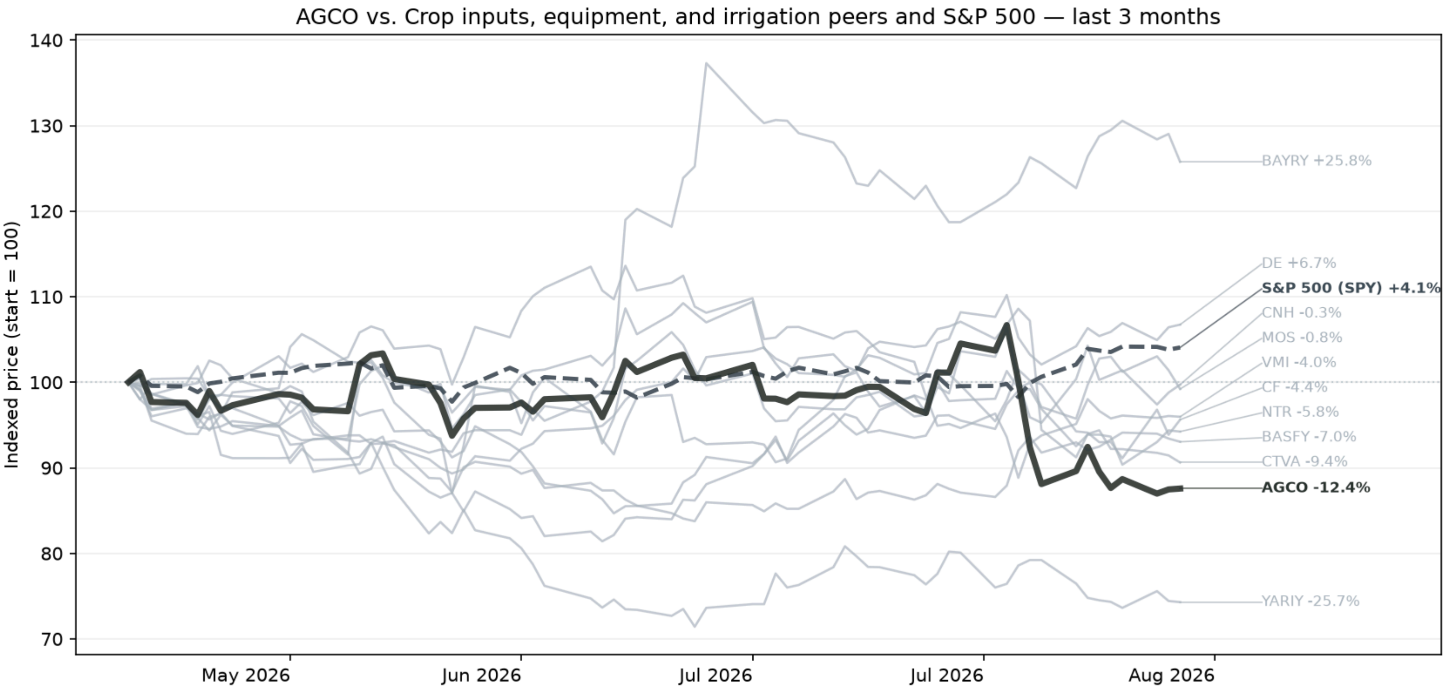
CNH Industrial is the world's second largest manufacturer of agricultural machinery (82% of industrial net sales) as well as a major player in construction equipment (18% of industrial net sales). Its Case and New Holland brands have served farmers for generations. Geographically, agricultural sales are 40% in North America, 32% in Europe, the Middle East, and Africa, 18% in South America, and 10% in Asia-Pacific. CNH's products are available through a robust independent dealer network, which includes over 2,600 dealer and distribution locations and reach into 164 countries. The construction business leverages over 400 dealers. The company's captive finance arm provides retail financing to its customers and wholesale financing to dealers to maintain inventory, thereby supporting sales.

AGCO (AGCO)

Crop inputs, equipment, and irrigation · $7.0B · 3m -12.4% · 12m -12.0% · 24m +14.4%

Google Finance

Fendt, Massey Ferguson, and Challenger farm equipment with Corn Belt exposure.



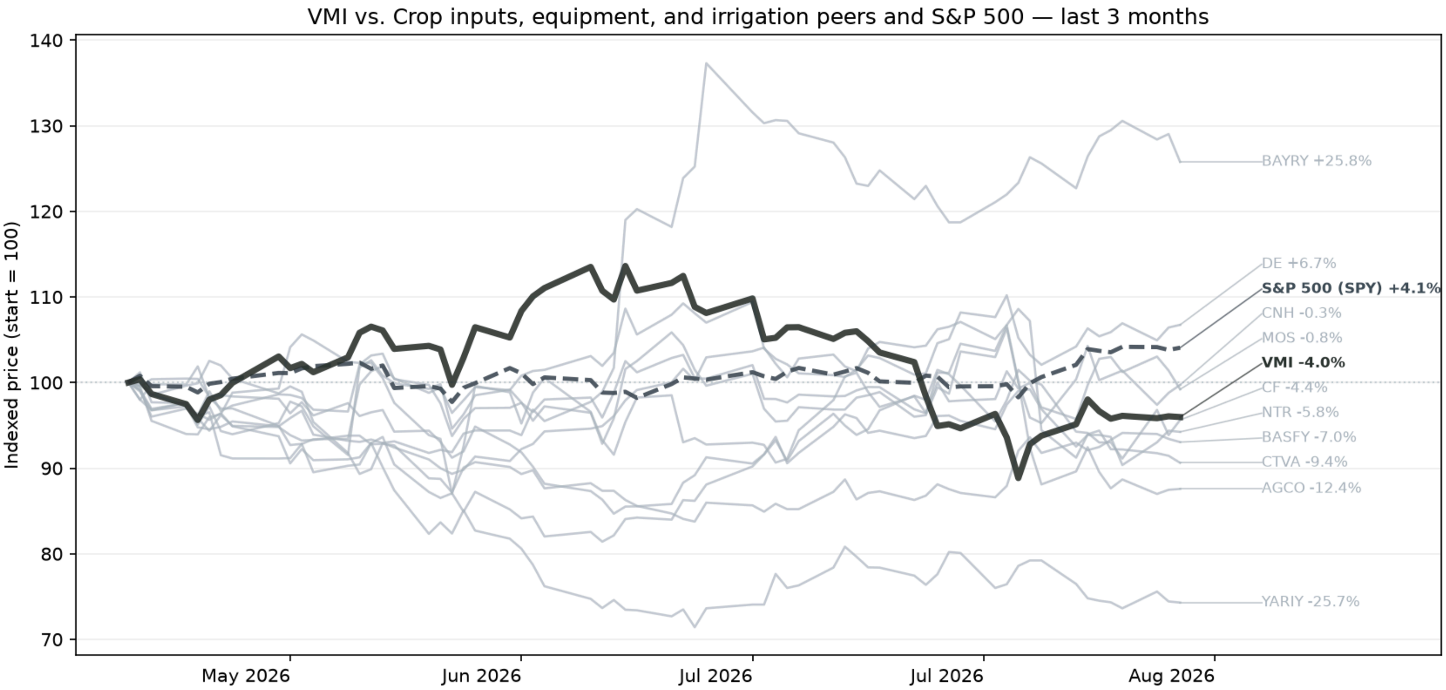
Agco is a global manufacturer of agricultural equipment. Its main machine brands are Fendt, Massey Ferguson, and Valtra; its initiatives in precision agriculture have been organized under the PTx umbrella following a series of acquisitions. While a global business, Agco's sales skew heavily toward Europe/Middle East, representing 50%-60% of sales and even more of operating profits. The company is trying to increase its exposure to the larger North and South American markets. Its products are available through a global dealer network, which includes over 3,000 dealers and distribution locations and reaches into over 140 countries. Additionally, Agco offers retail and wholesale financing to customers through its partnership with Rabobank of the Netherlands, having exited their JV in 2026.

Valmont Industries (VMI)

Crop inputs, equipment, and irrigation · $9.3B · 3m -4.0% · 12m +29.4% · 24m +75.5%

Google Finance

Center-pivot irrigation (Valley) used on irrigated High Plains corn.



Valmont Industries Inc, along with its subsidiaries, operates as a manufacturer of products and services for infrastructure and agriculture markets. Its reportable segments are Infrastructure and Agriculture. The company generates maximum revenue from the Infrastructure segment, which includes the manufacturing and distribution of products and solutions to serve the infrastructure markets of utility, solar, lighting, transportation, and telecommunications, along with coatings services to protect metal products. The Agriculture segment provides irrigation equipment components, including aftermarket parts and tubular products, and technology solutions for precision agriculture. Geographically, it derives key revenue from the United States, followed by Australia, Brazil, and other regions.

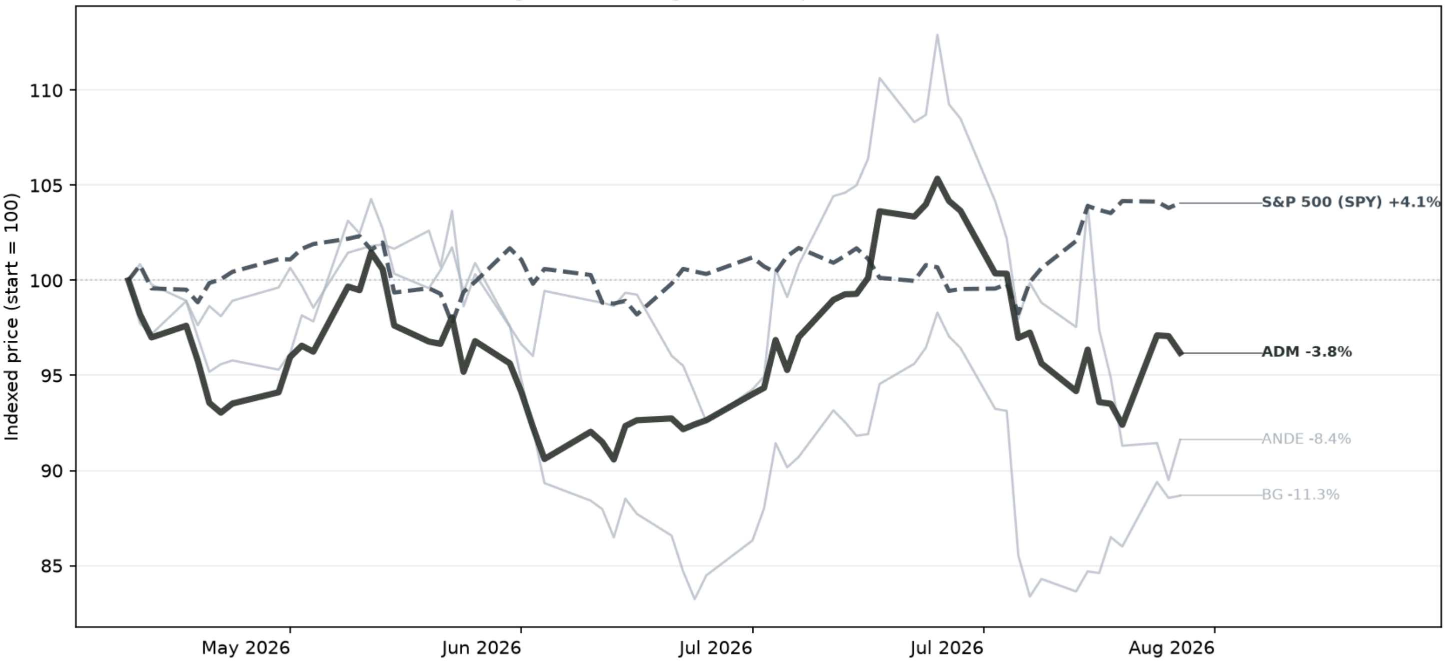
Archer Daniels Midland (ADM)

Grain origination and agribusiness, U.S. ethanol and process technology, Wet milling, ingredients, and co-products · $38.9B · 3m -3.8% · 12m +33.3% · 24m +35.1%

[Google Finance]

Global grain trader, top U.S. ethanol producer, and major corn wet miller.

ADM vs. Grain origination and agribusiness peers and S&P 500 — last 3 months



Archer-Daniels-Midland is a major processor of oilseeds, corn, wheat, and other agricultural commodities. The company is also one of the largest grain merchandisers through its extensive network of logistical assets to store and transport crops around the globe. ADM also runs a nutrition business that focuses on both human and animal ingredients and is a large producer of corn-based sweeteners, starches, and ethanol.

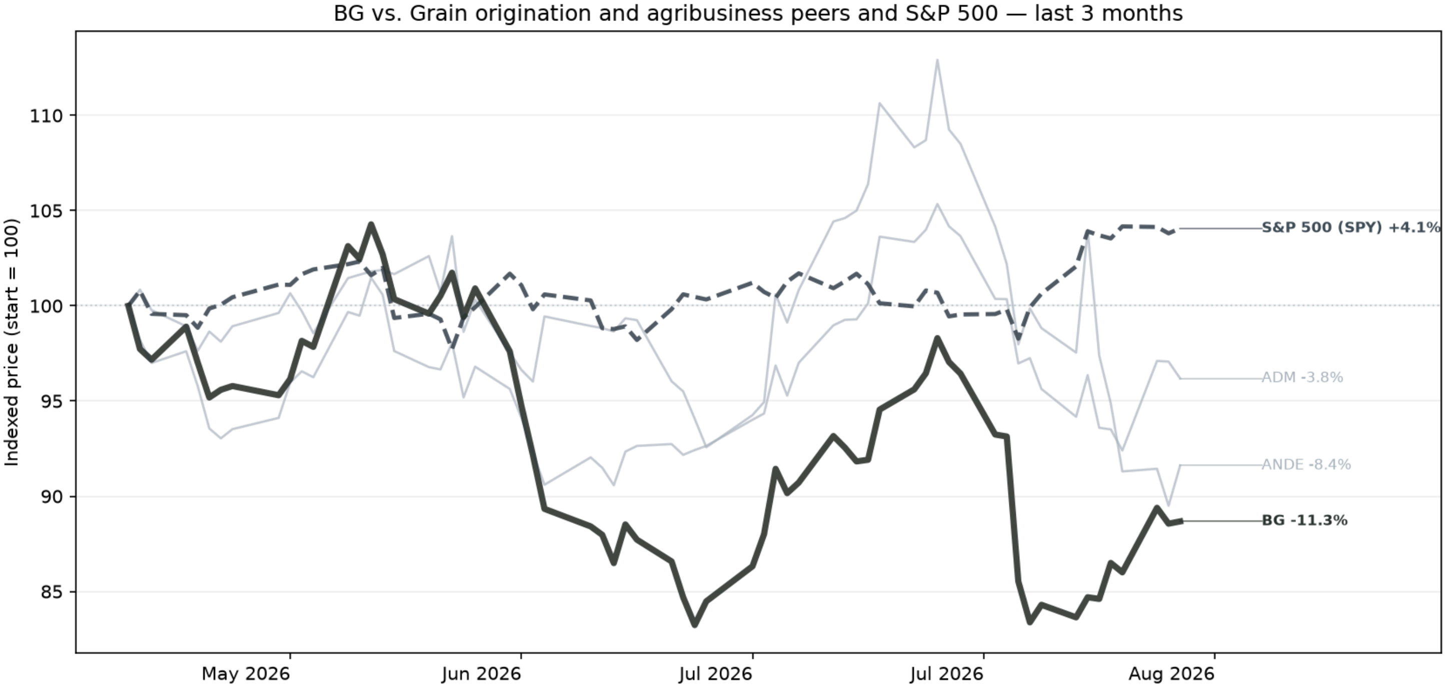
Bunge (BG)

Grain origination and agribusiness · $21.9B · 3m -11.3% · 12m +34.3% · 24m +17.4%

[Google Finance]

Global grain and oilseed merchant after the Viterra combination; competitor for corn origination.

BG vs. Grain origination and agribusiness peers and S&P 500 — last 3 months



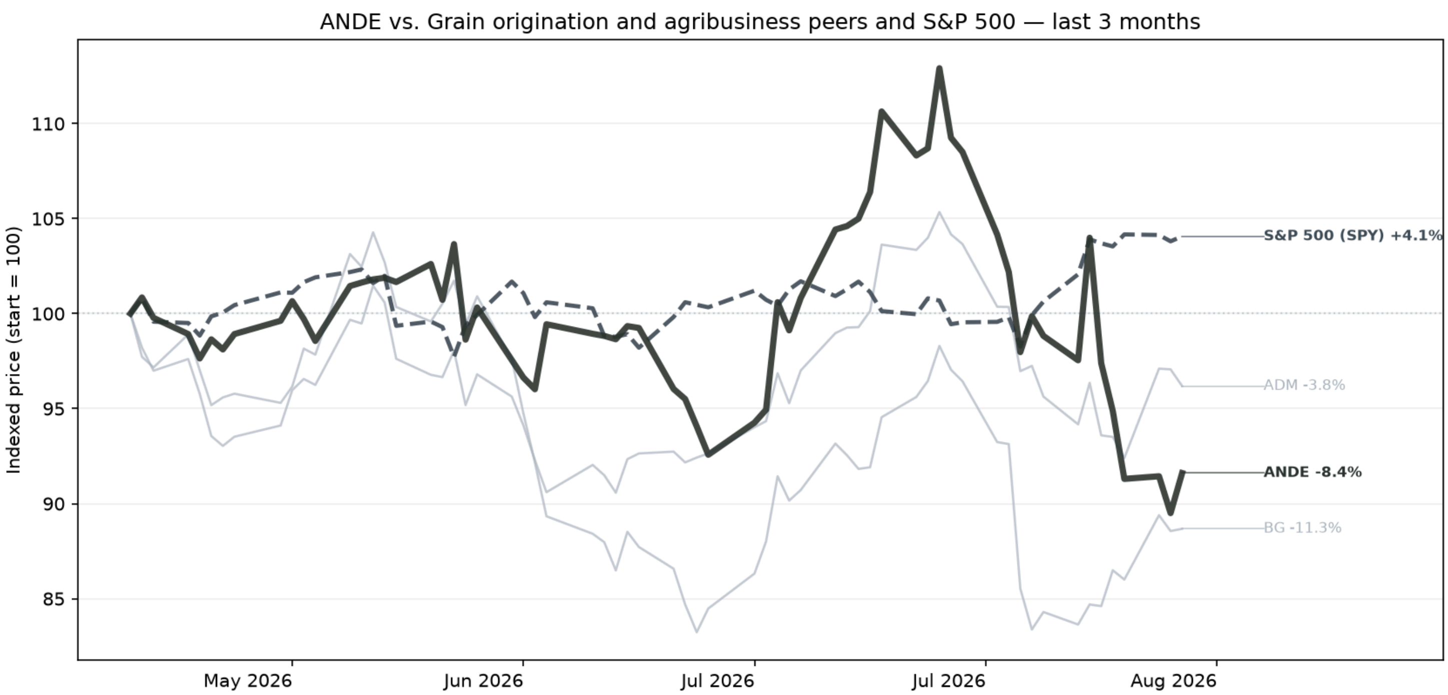
Bunge Global SA is an agribusiness solutions company, connecting farmers to consumers and delivering essential food, feed and fuel to the globe. The company segments include Soybean Processing and Refining; Softseed Processing and Refining; Other Oilseeds Processing and Refining; Grain Merchandising and Milling; and Corporate and Other. It generates maximum revenue from the Soybean Processing and Refining segment, which includes integrated business principally involved in the purchase, storage, transportation, processing, distribution, refining, marketing, and sale of soybeans and soybean related products, as well as biodiesel and fertilizer production and distribution. Geographically, the company operates in United States, Switzerland, Netherlands, and Rest of the World.

The Andersons (ANDE)

Grain origination and agribusiness, U.S. ethanol and process technology · $2.3B · 3m -8.4% · 12m +63.0% · 24m +34.6%

Google Finance

Grain elevators plus four wholly owned ethanol plants totaling about 500 million gallons a year.



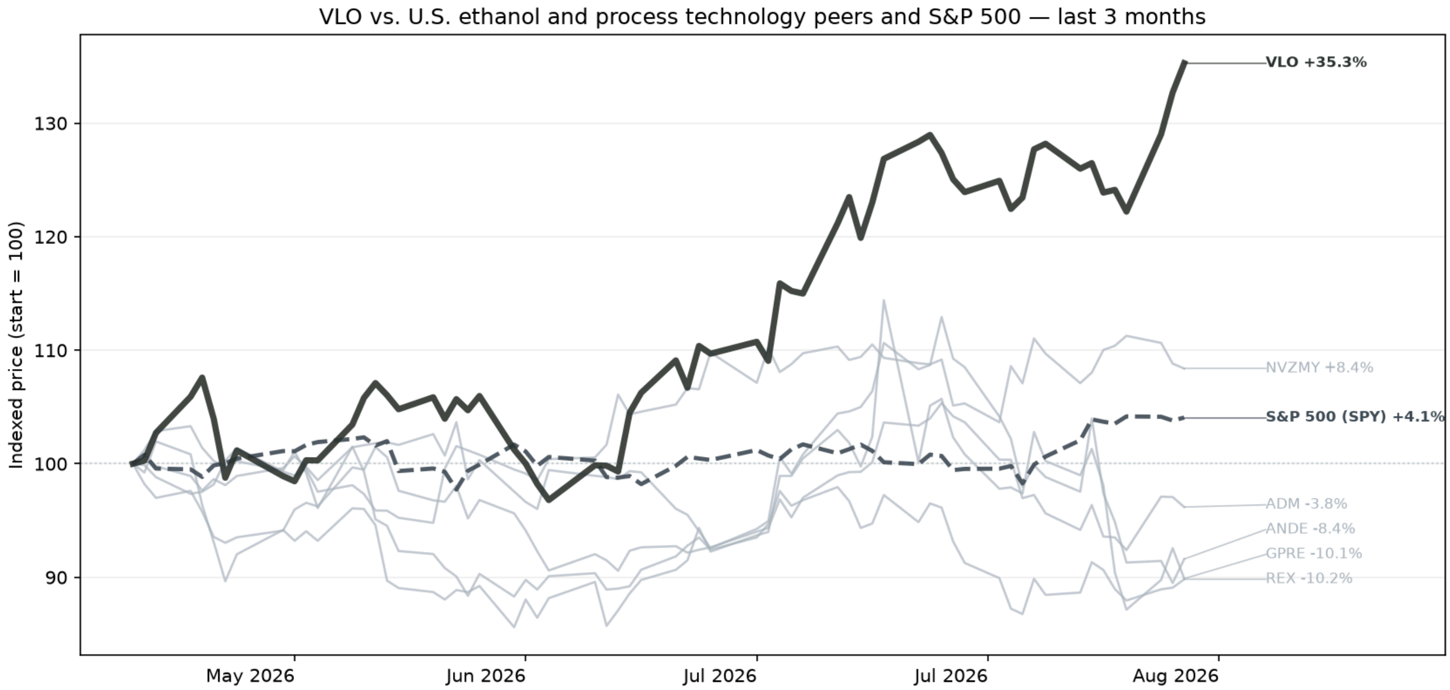
Andersons Inc is an agriculture and renewable fuels company. Its operations are classified into two reportable business segments: Agribusiness, which generates maximum revenue, and Renewables. The Agribusiness segment includes merchandising and managing logistics across various commodities, as well as being a manufacturer, distributor, and retailer of agricultural and related plant nutrients. The segment specializes in the movement of physical commodities such as whole grains, grain products, feed ingredients, and domestic fuel products, among other agricultural commodities. The Renewables segment mainly produces, purchases, and sells ethanol and co-products. Geographically, the company generates maximum revenue from the United States, followed by Canada, Mexico, and other markets.

Valero Energy (VLO)

U.S. ethanol and process technology, Fuel blending, refining, and retail · $99.7B · 3m +35.3% · 12m +142.5% · 24m +133.8%

Google Finance

World's second-largest corn-ethanol producer with a distinct Ethanol segment and a major blender.



Valero Energy is one of the largest independent refiners in the United States. It operates 15 refineries, with a total throughput capacity of 3.2 million barrels a day in the US, Canada, and the United Kingdom. Valero also owns 12 ethanol plants with capacity of 1.6 billion gallons a year and holds a 50% stake in Diamond Green Diesel, which can produce 1.2 billion gallons per year of renewable diesel.

Green Plains (GPRE)

U.S. ethanol and process technology · $1.1B · 3m -10.1% · 12m +64.1% · 24m +12.3%

Google Finance

Largest U.S. ethanol pure play, with high-protein feed, corn oil, and Nebraska carbon-capture work.

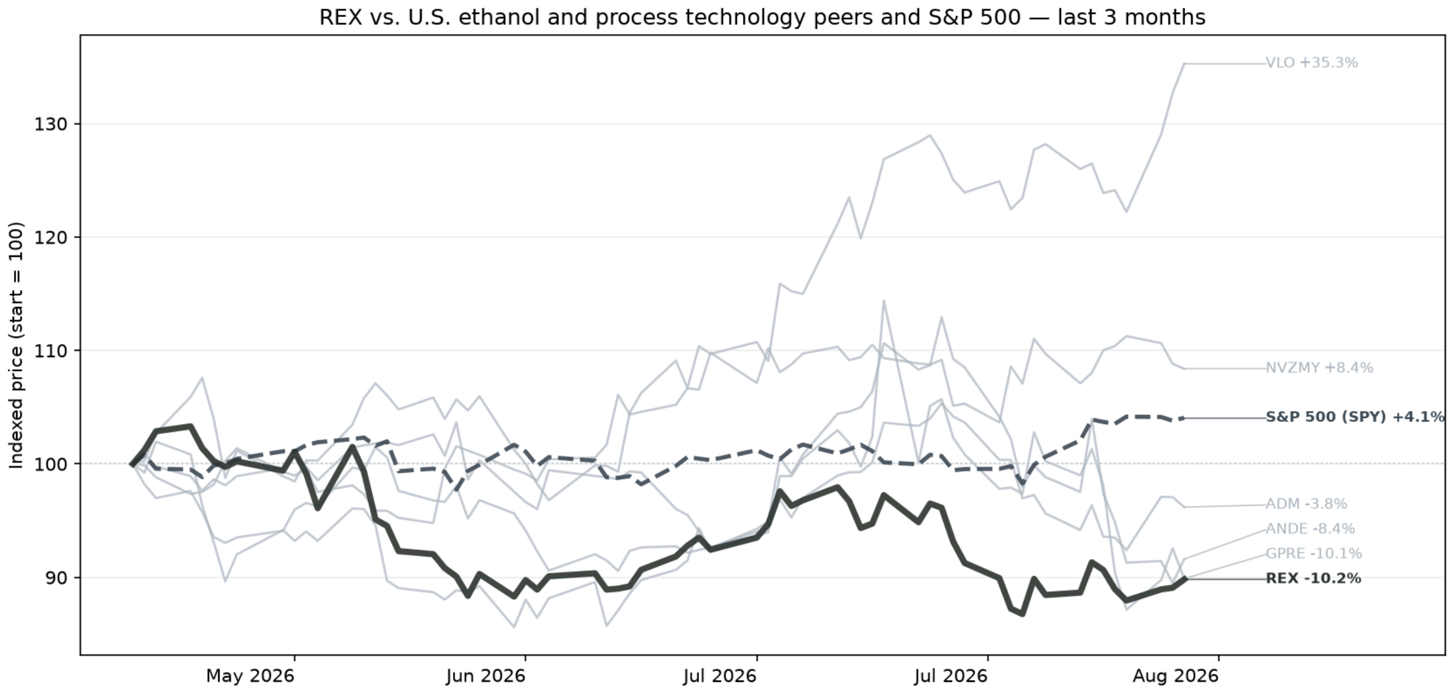
Green Plains Inc manufactures and sells ethanol and ethanol byproducts in two segments based on function. The ethanol production segment, which generates the majority of revenue, includes the production of ethanol, distillers grains, Ultra-High Protein and renewable corn oil. The agribusiness and energy services segment includes grain handling and storage, commodity marketing and merchant trading for company-produced and third-party ethanol, distillers grains, Ultra-High Protein, renewable corn oil, natural gas and other commodities.

REX American Resources (REX)

U.S. ethanol and process technology · $1.4B · 3m -10.2% · 12m +59.5% · 24m +90.3%

Google Finance

Holding company with interests in six Corn Belt ethanol plants; cleanest public crush-margin equity.



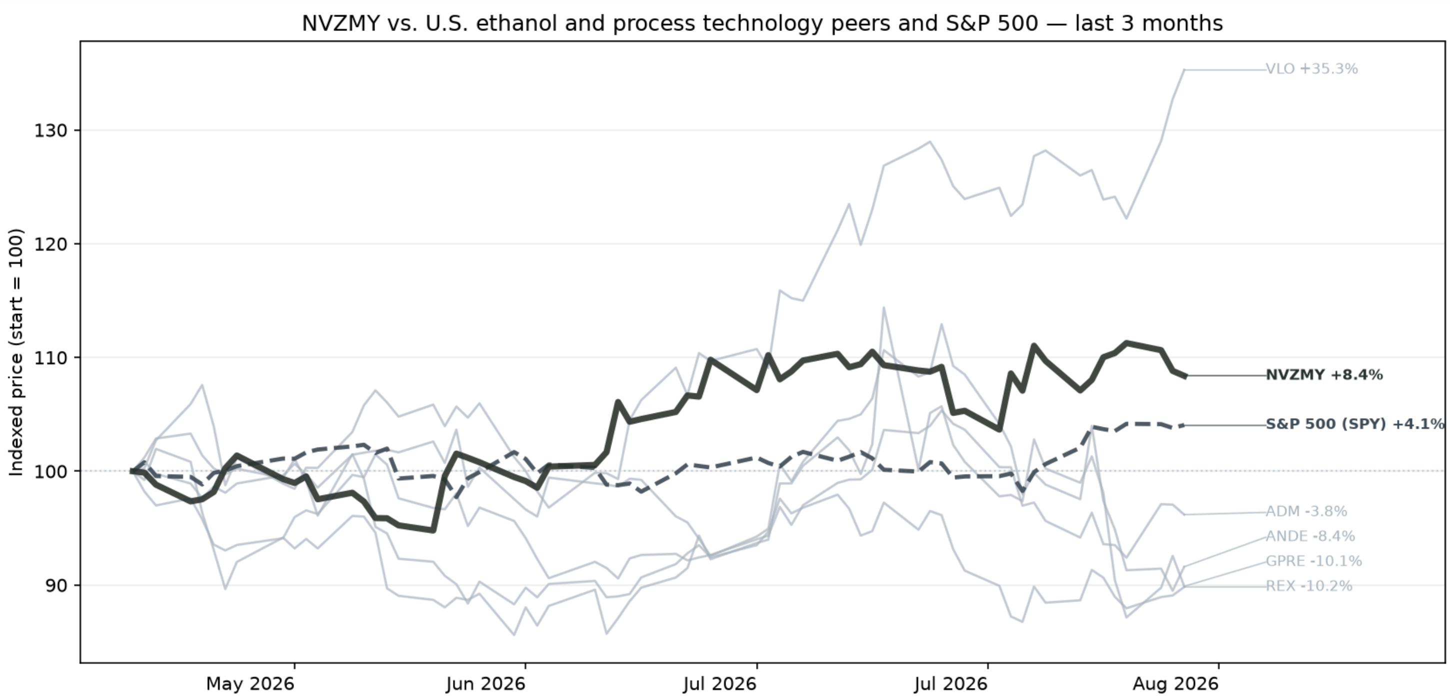
REX American Resources Corp operates as a holding company that engages in investments in alternative energy and ethanol production entities. Its operating segments include Ethanol and By-Products. Its products include Ethanol, dried distillers grains, modified distillers grains, Distillers corn oil, Modified distillers grains, and Other.

Novonesis (NVZMY)

U.S. ethanol and process technology · n/a · 3m +8.4% · 12m -2.4% · 24m -2.5%

[Google Finance]

Dominant supplier of enzymes used in dry-mill ethanol fermentation.



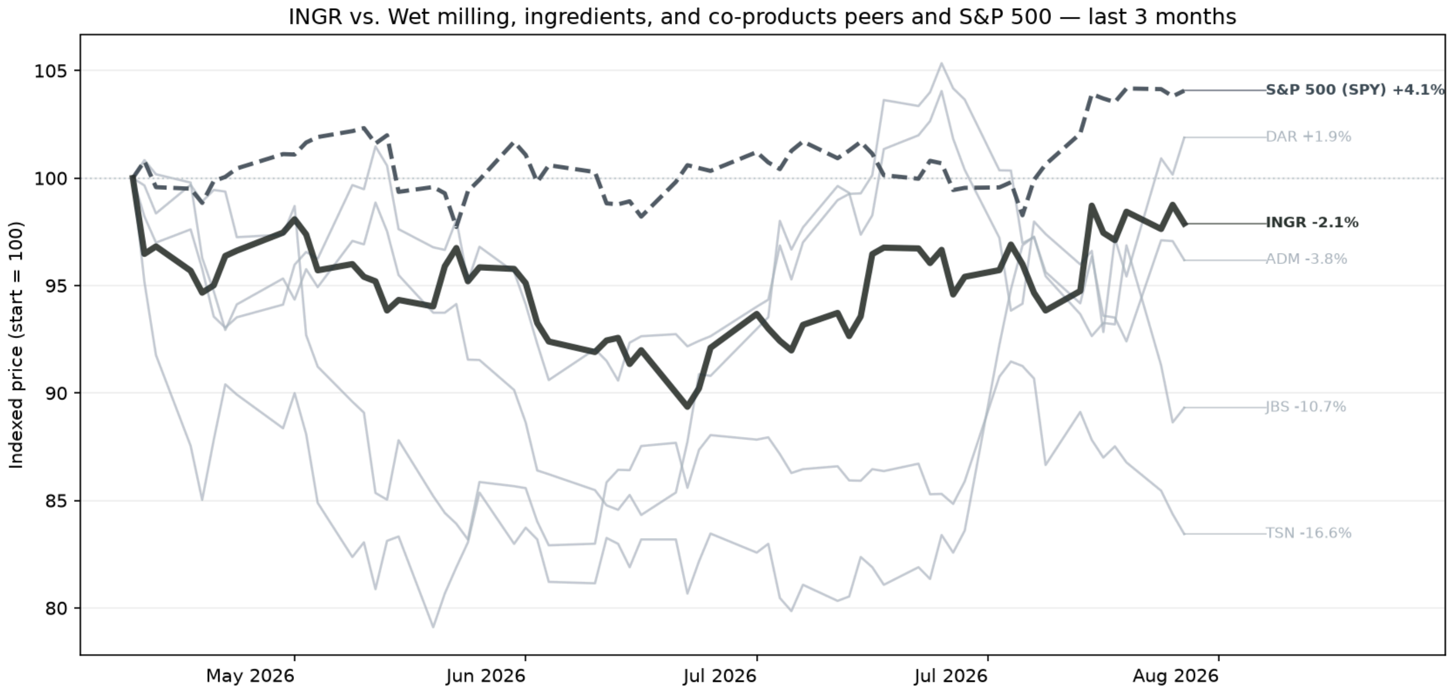
NOVONESIS B UNSP/ADR

Ingredion (INGR)

Wet milling, ingredients, and co-products · $6.8B · 3m -2.1% · 12m -18.9% · 24m -21.3%

Google Finance

Major corn wet miller producing sweeteners, starches, and specialty ingredients.



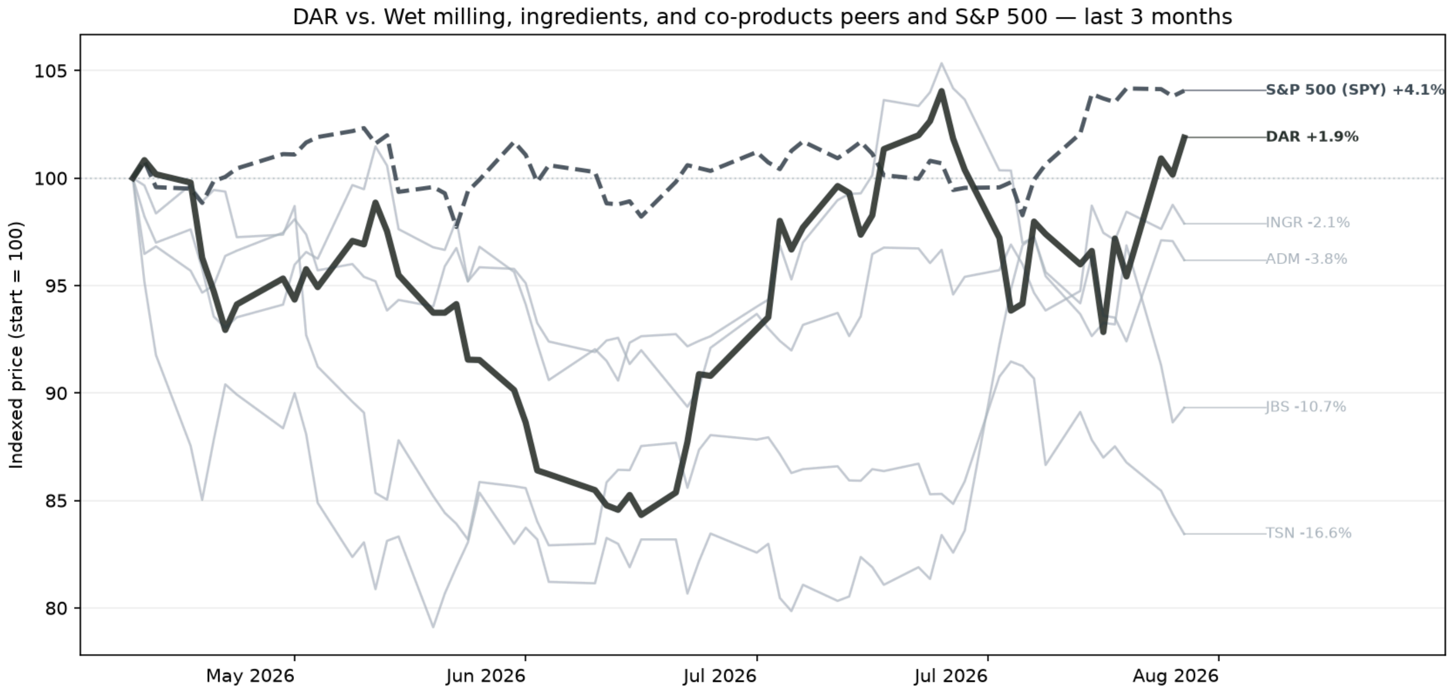
Ingredion is an ingredients provider for the food, beverage, brewing, and animal nutrition industries. The company processes corn, tapioca, potatoes, stevia, grains, fruits, gums, and vegetables into value-added ingredients. The company sells specialty ingredients that include starch-based texturizers and natural alternative sweeteners such as stevia. Ingredion also sells commodity ingredients that include sweeteners, such as high-fructose corn syrup, and starches, such as those used for sustainable packaging, as well as plant-based proteins. The company plans to acquire Tate & Lyle in an all-cash deal that should close in 2027.

Darling Ingredients (DAR)

Wet milling, ingredients, and co-products · $10.6B · 3m +1.9% · 12m +97.9% · 24m +62.4%

Google Finance

Rendering and used cooking oil; 50/50 owner of Diamond Green Diesel with Valero.



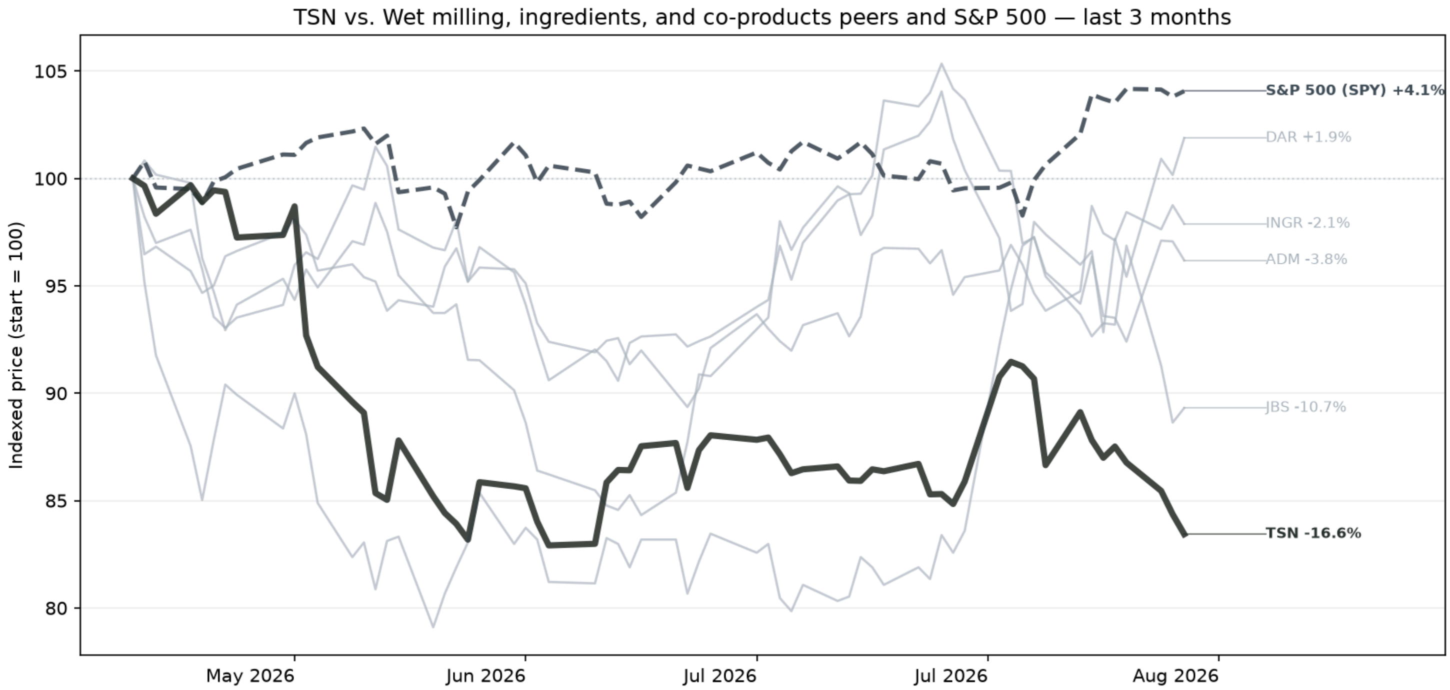
Darling Ingredients Inc is a developer and producer of sustainable natural ingredients from edible and inedible bio-nutrients, creating a wide range of ingredients and customized specialty solutions for customers in the pharmaceutical, food, pet food, animal feed, industrial, fuel, bioenergy and fertilizer industries. It processes by-products from the animal agriculture and food industries into ingredients and products for human nutrition, animal feed, crop inputs, and renewable energy applications. The company operates processing facilities across multiple countries and produces collagen, including gelatin and hydrolyzed collagen, as well as renewable energy products.

Tyson Foods (TSN)

Wet milling, ingredients, and co-products · $20.6B · 3m -16.6% · 12m -3.3% · 24m -10.6%

Google Finance

Largest U.S. protein company and a primary domestic sink for distillers grains.



Tyson Foods is a protein-focused food producer, selling raw chicken, beef, pork, and prepared foods. Chicken and beef are its two largest segments, composing about 40% and 30% of sales, respectively. Prepared foods constituted 18% of fiscal 2025 sales and include brands like Tyson, Jimmy Dean, Hillshire Farm, Ball Park, and Sara Lee. However, most of these are in product categories rife with competition where Tyson does not have a massive market share lead. Tyson sells some products overseas, but the international segment accounts for just 4% of total revenue. The company is an active acquirer, with more recent years' purchases focused on international and food-service markets.

JBS (JBS)

Wet milling, ingredients, and co-products · $45.2B · 3m -10.7% · 12m -9.8% · 24m n/a

Google Finance

World's largest protein company and a major DDGS buyer in the U.S. and Brazil.

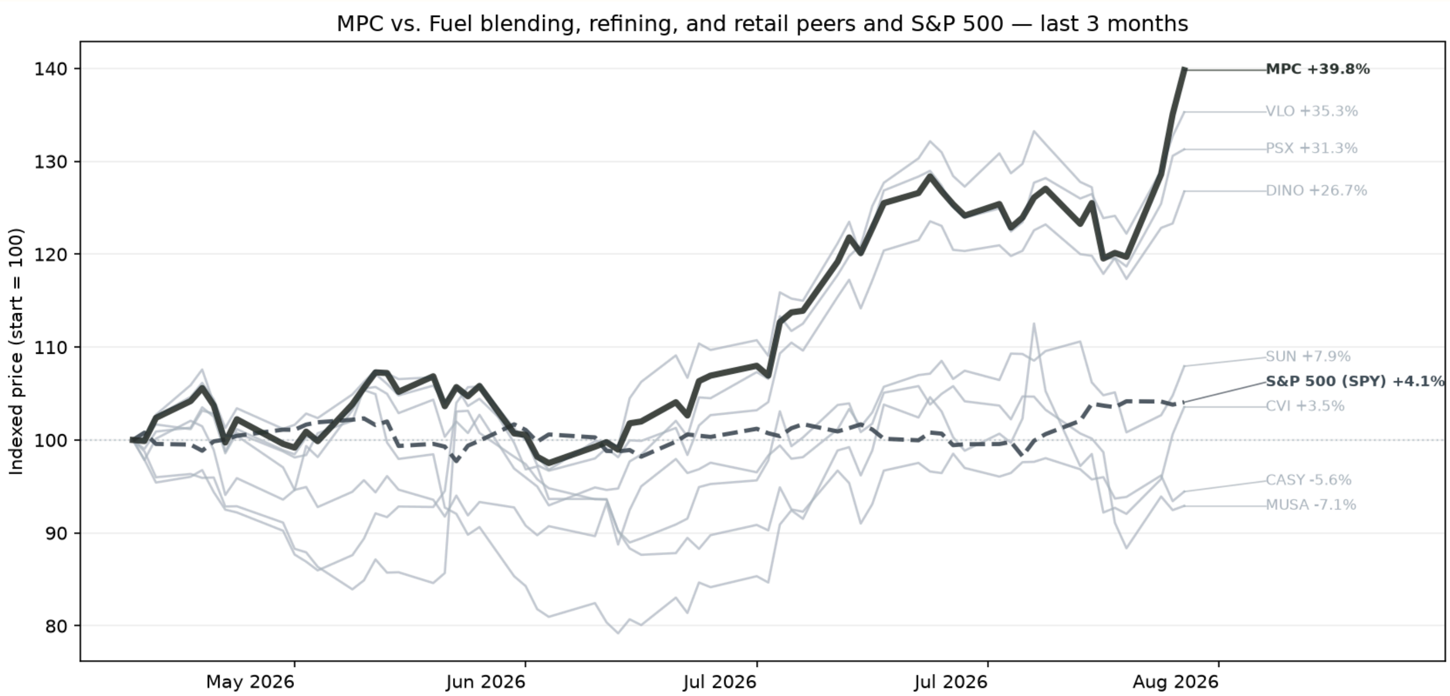
JBS NV is a protein food company, selling protein products, which include fresh and frozen cuts of beef, pork, lamb, fish, whole chickens, and chicken parts, to retailers, and foodservice companies. The food products are marketed under different brands such as Swift, Just Bare, Pilgrim's Pride, Sunnyvalley, Reserva Friboi, Great Southern, etc., globally. The company's reportable segments are Beef North America, which generates maximum revenue, Brazil, Seara, Pork USA, Pilgrim's Pride, Australia, and Others. Geographically, it derives majority of its revenue from United States of America.

Marathon Petroleum (MPC)

Fuel blending, refining, and retail · $101.3B · 3m +39.8% · 12m +115.3% · 24m +102.9%

Google Finance

Largest U.S. independent refiner and a major Midwest ethanol blender.



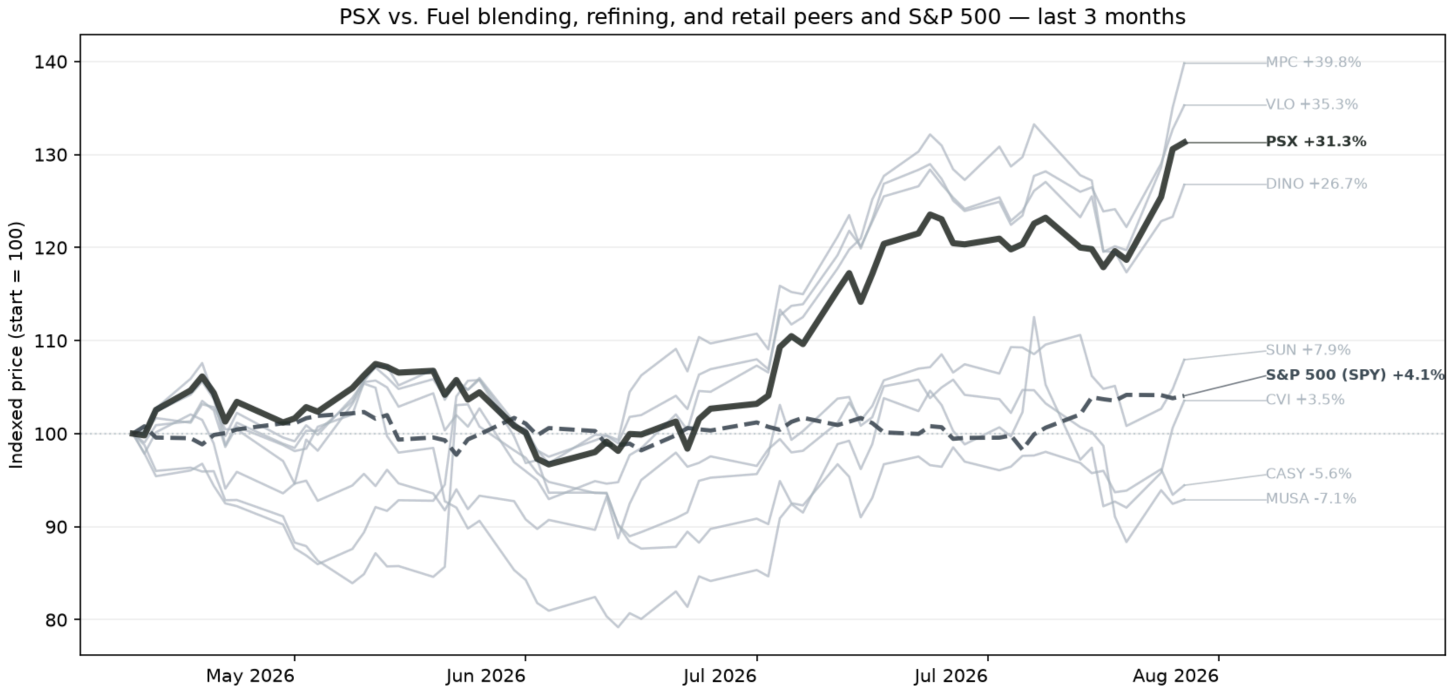
Marathon Petroleum is a leading integrated downstream and midstream energy company that operates 13 refineries in the Gulf Coast, Mid-Continent, and West Coast regions of the United States with an aggregate crude oil refining capacity of 3.0 million barrels per day. The company is one of the largest producers of renewable diesel in the US; its Dickinson, North Dakota facility has the capacity to produce 184 million gallons per year, and its Martinez, California, joint venture facility (a 50/50 partnership with Neste) reached its full capacity of 730 million gallons per year in late 2024. Marathon also owns the general partner and approximately 64% of MPLX LP, a large-cap master limited partnership that owns and operates midstream energy infrastructure and logistics assets.

Phillips 66 (PSX)

Fuel blending, refining, and retail · $96.7B · 3m +31.3% · 12m +84.0% · 24m +70.4%

Google Finance

Large blender and marketer with West Coast renewable-diesel capacity.



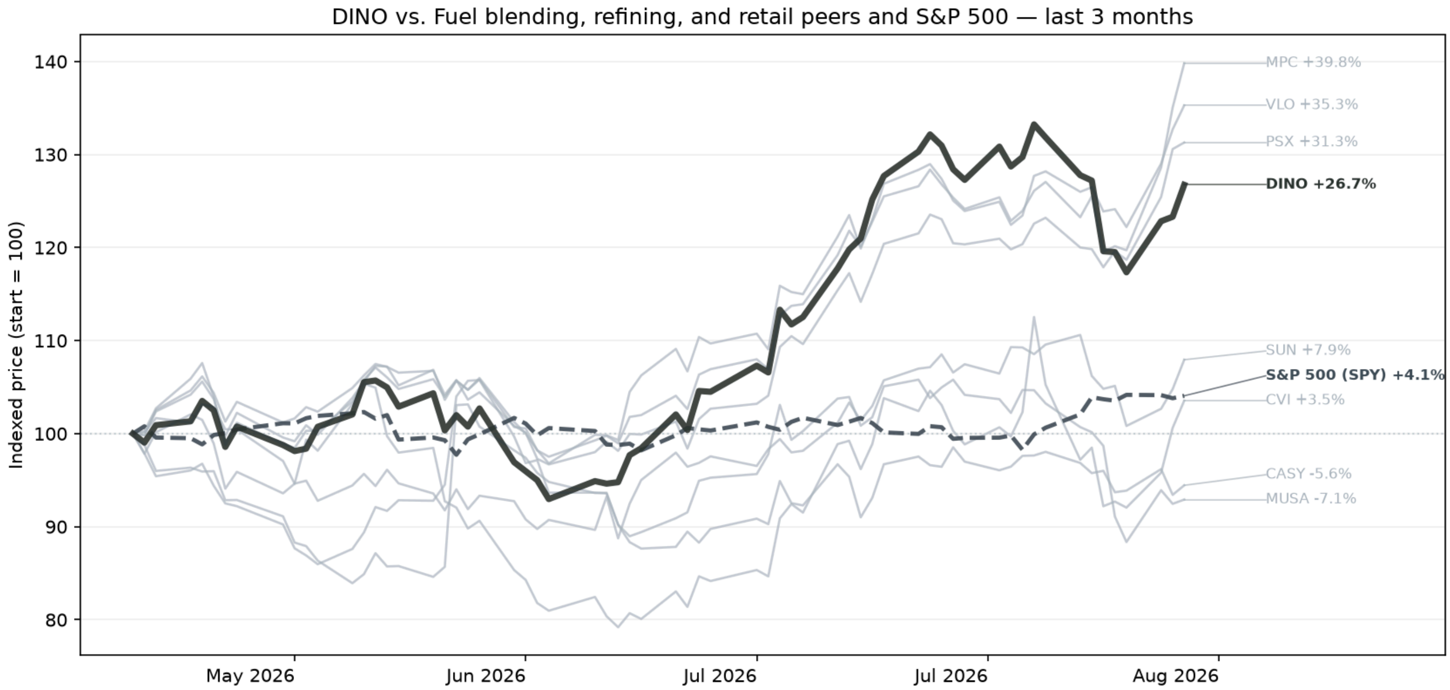
Phillips 66 is an independent refiner that owns or holds interest in 10 refineries with a total crude throughput capacity of 2.0 million barrels per day, or mmb/d, at the end of 2025. The midstream segment comprises extensive transportation and NGL processing assets. It includes 70,000 miles of crude oil, refined petroleum product, NGL and natural gas pipeline systems, and a comprehensive set of refined petroleum product, NGL and crude oil terminals, gathering and processing plants and fractionation facilities and various other storage and loading facilities. Its CPChem chemical joint venture operates facilities primarily in the United States and the Middle East and produces olefins and polyolefins.

HF Sinclair (DINO)

Fuel blending, refining, and retail · $16.8B · 3m +26.7% · 12m +95.1% · 24m +86.0%

Google Finance

Independent Mid-Continent and Rockies refiner with renewable diesel and RFS blending obligations.



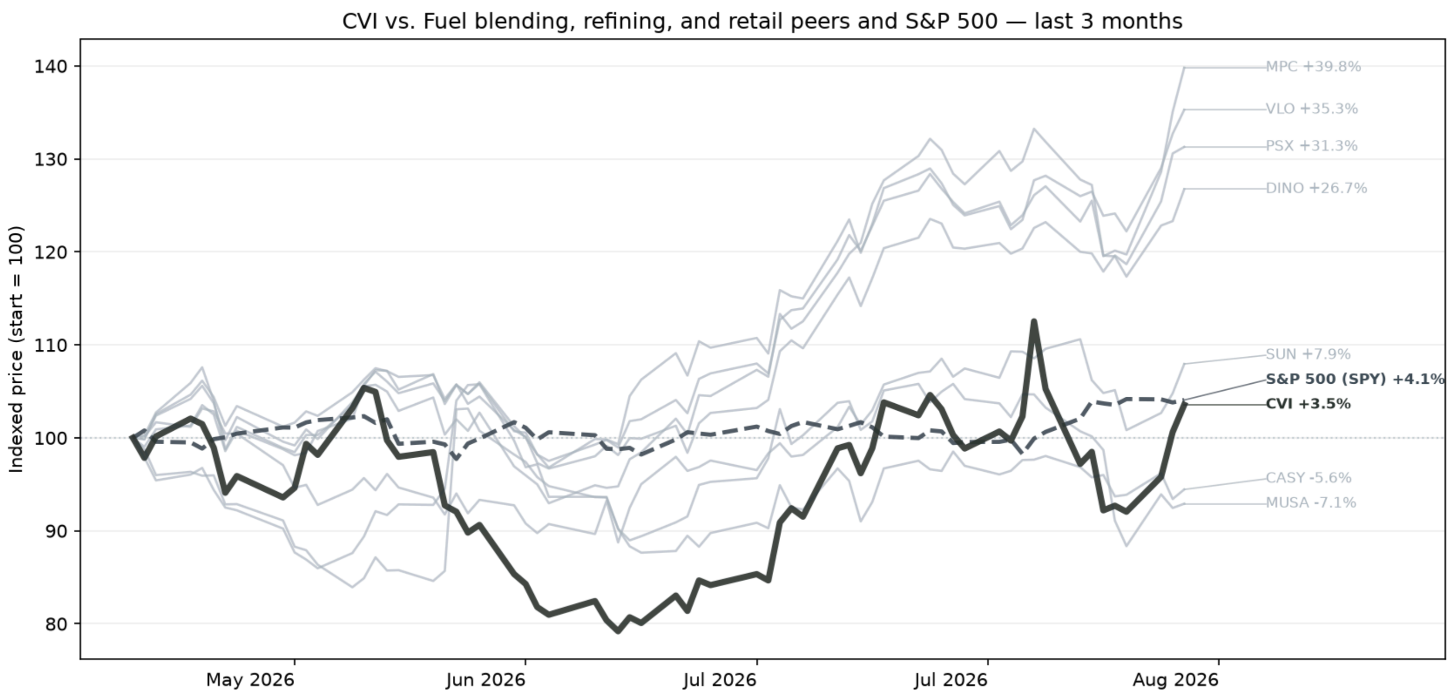
HF Sinclair is an integrated petroleum refiner that owns and operates seven refineries serving the Rockies, midcontinent, Southwest, and Pacific Northwest, with a total crude oil throughput capacity of 678,000 barrels per day. It can produce 380 million gallons of renewable diesel annually. It operates a marketing business with over 350 distributors and 1,700 branded wholesale sites across 30 states. It also owns and operates 4,500 miles of petroleum product pipelines and terminals principally in the Southwestern United States.

CVR Energy (CVI)

Fuel blending, refining, and retail · $3.7B · 3m +3.5% · 12m +30.2% · 24m +43.9%

Google Finance

Coffeyville, Kansas refiner in the corn complex with renewable diesel and a nitrogen affiliate.



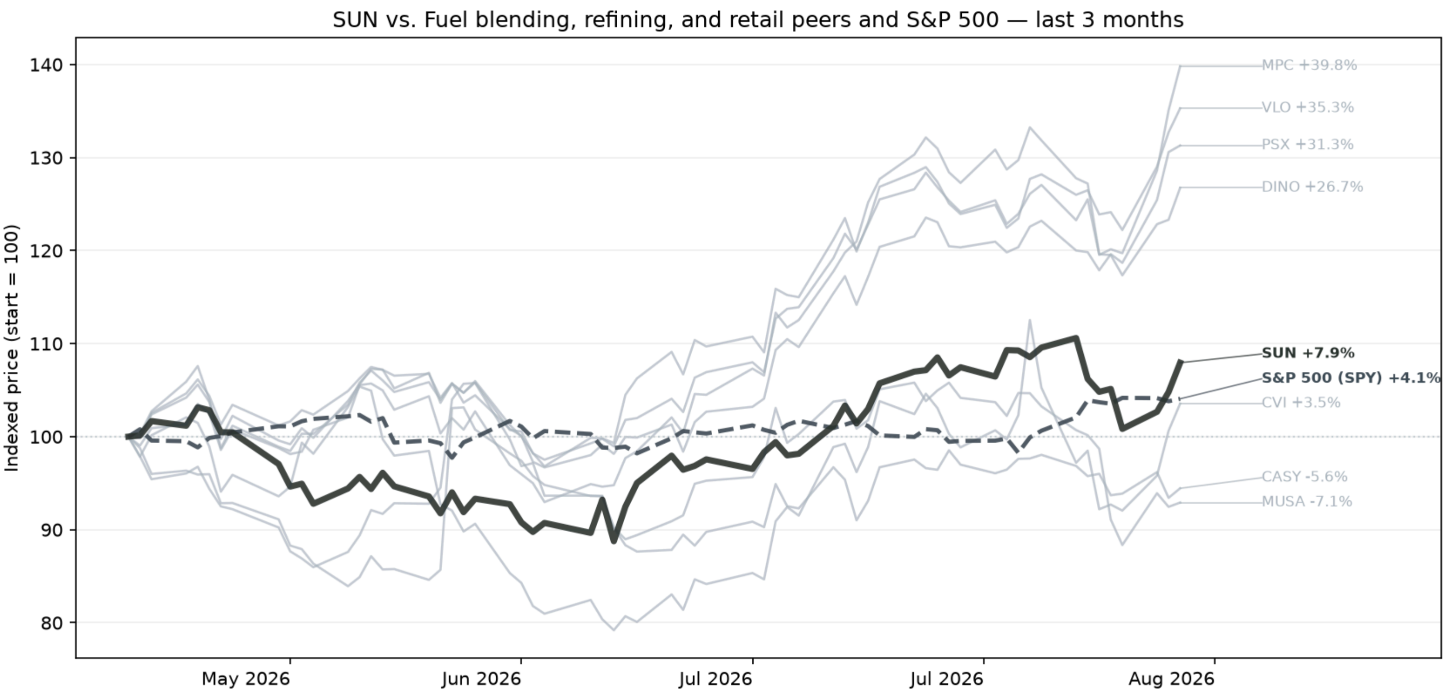
CVR Energy Inc is a holding company that engages in petroleum refining and nitrogen fertilizer manufacturing through its subsidiaries. Subsidiaries include several complex, full-coking crude oil refineries, along with a crude oil gathering system, pipelines, storage tanks, and marketing and supply. The company's refineries can process blends of a variety of crude oil ranging from heavy sour to light sweet crude oil. Crude oil for CVR's refineries is supplied through its wholly-owned gathering system and pipeline. From its refineries, CVR supplies products through tanker trucks directly to customers located in close geographic proximity and customers at throughput terminals. The company's customers include retailers, railroads, and farm cooperatives.

Sunoco LP (SUN)

Fuel blending, refining, and retail · $14.5B · 3m +7.9% · 12m +44.2% · 24m +43.7%

Google Finance

Fuel distributor and terminal operator that moves finished gasoline and ethanol.



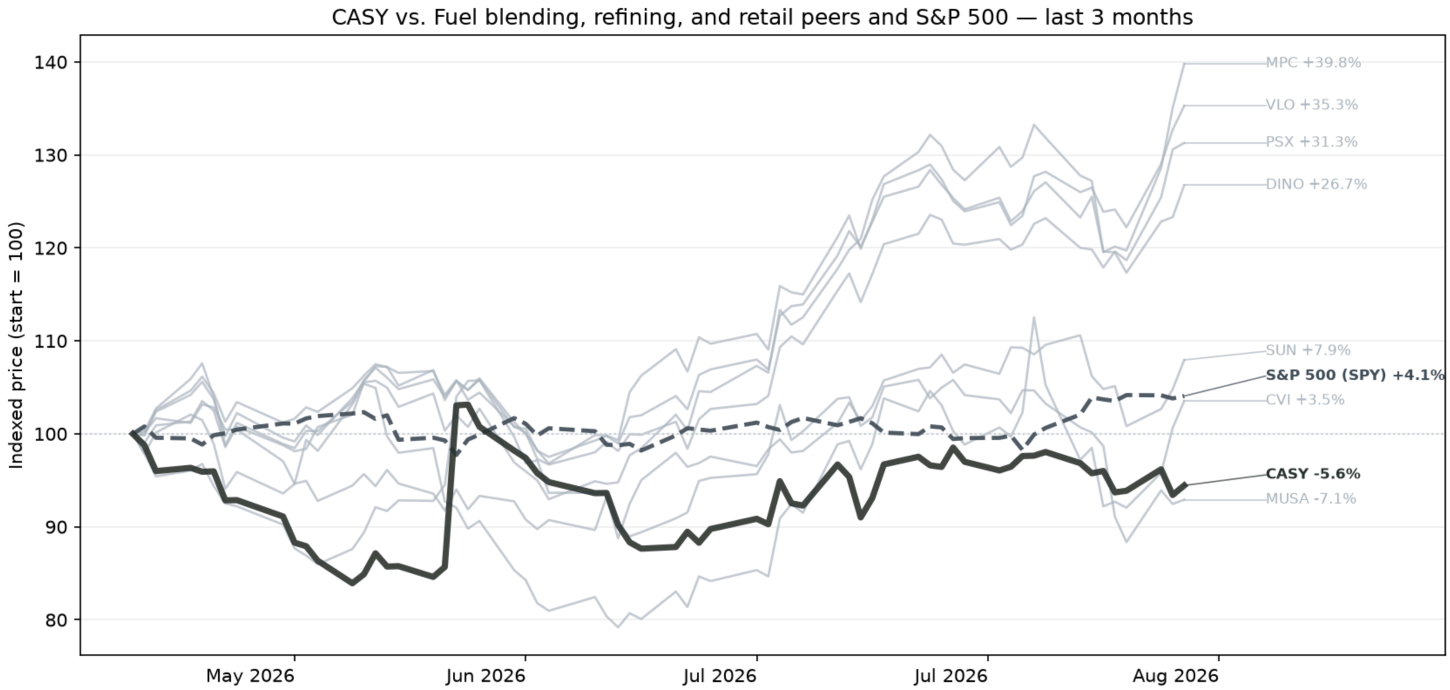
Sunoco LP is engaged in the distribution of motor fuels to independent dealers, distributors, and other commercial customers as well as the distribution of motor fuels to end-use customers at retail sites operated by commission agents. It is a growth-oriented master limited partnership (MLP) that operates as a wholesale and retail fuel distributor in the United States. The firm operates through the Fuel Distribution; Pipeline Systems; Refinery and Terminals segments. It generates the majority of its revenue from the Fuel Distribution segment. It distributes motor fuel to convenience stores, dealers, and commercial customers in various states.

Casey's General Stores (CASY)

Fuel blending, refining, and retail · $30.9B · 3m -5.6% · 12m +62.9% · 24m +123.8%

Google Finance

Corn Belt convenience-store chain with high E10/E15/E85 exposure.



Casey's General Stores Inc, along with its subsidiaries, operates convenience stores mainly under the names Casey's, GoodStop (by Casey's), and Casey's General Store throughout various states in the USA, approximately half of which are located in Iowa, Missouri, and Illinois. These stores offer a broad selection of food items (which includes prepared foods such as regular and breakfast pizza, donuts, hot breakfast items, and hot and cold sandwiches), beverages, tobacco and nicotine products, groceries, health and beauty aids, automotive products, and other non-food items. The majority of the company's revenue is mainly derived from the retail sale of fuel and the products offered inside its stores.

Murphy USA (MUSA)

Fuel blending, refining, and retail · $10.4B · 3m -7.1% · 12m +38.5% · 24m +7.2%

Google Finance

High-volume fuel retailer and national ethanol blender.

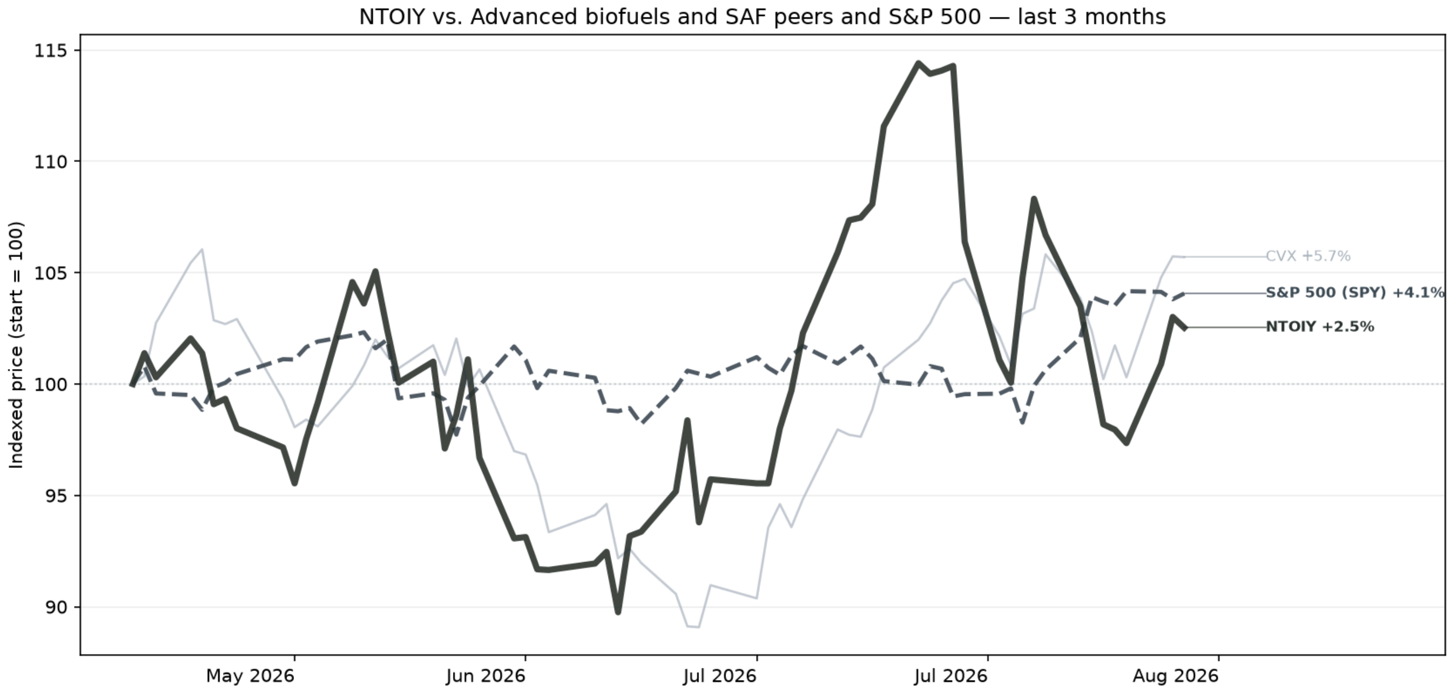
Murphy USA Inc is mainly engaged in the marketing of retail motor fuel products and convenience merchandise through a network of several retail stores in the Southwest, Southeast, Midwest, and Northeast United States. The majority of Murphy USA's stores are located in proximity to Walmart Supercenters, but it also operates standalone stores that market gasoline and other products under the Murphy USA, Murphy Express, and QuickChek brands. In addition, the company also markets fuel to unbranded wholesale customers through a mixture of company-owned and third-party product distribution terminals and pipeline positions. The firm generates maximum revenue through retail sales of petroleum products, and the rest from merchandise sales and wholesale of petroleum products.

Neste (NTOIY)

Advanced biofuels and SAF · n/a · 3m +2.5% · 12m +101.8% · 24m +54.8%

Google Finance

Largest global producer of renewable diesel and SAF; sets the price umbrella for corn oil.



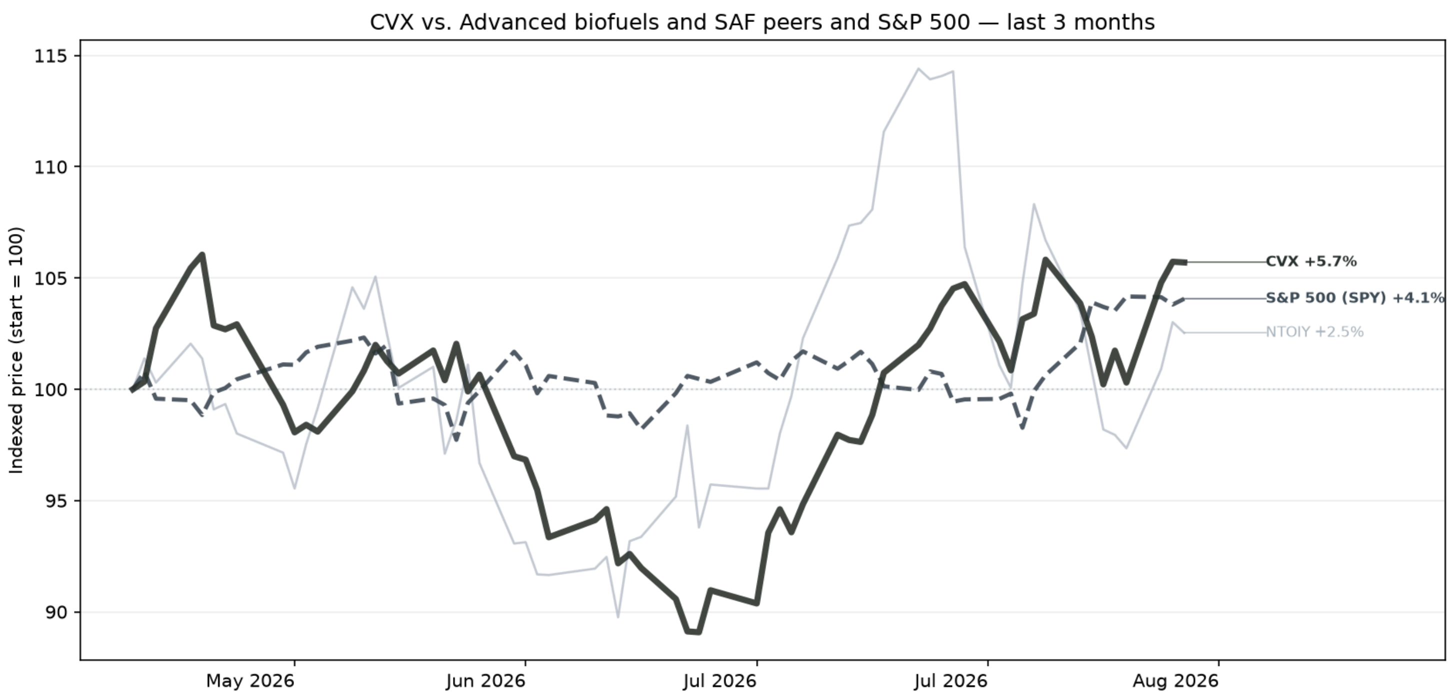
NESTE OYJ UNSP/ADR

Chevron (CVX)

Advanced biofuels and SAF · $403.6B · 3m +5.7% · 12m +26.1% · 24m +35.9%

Google Finance

Owner of Renewable Energy Group biodiesel and renewable-diesel plants that take corn oil at the margin.



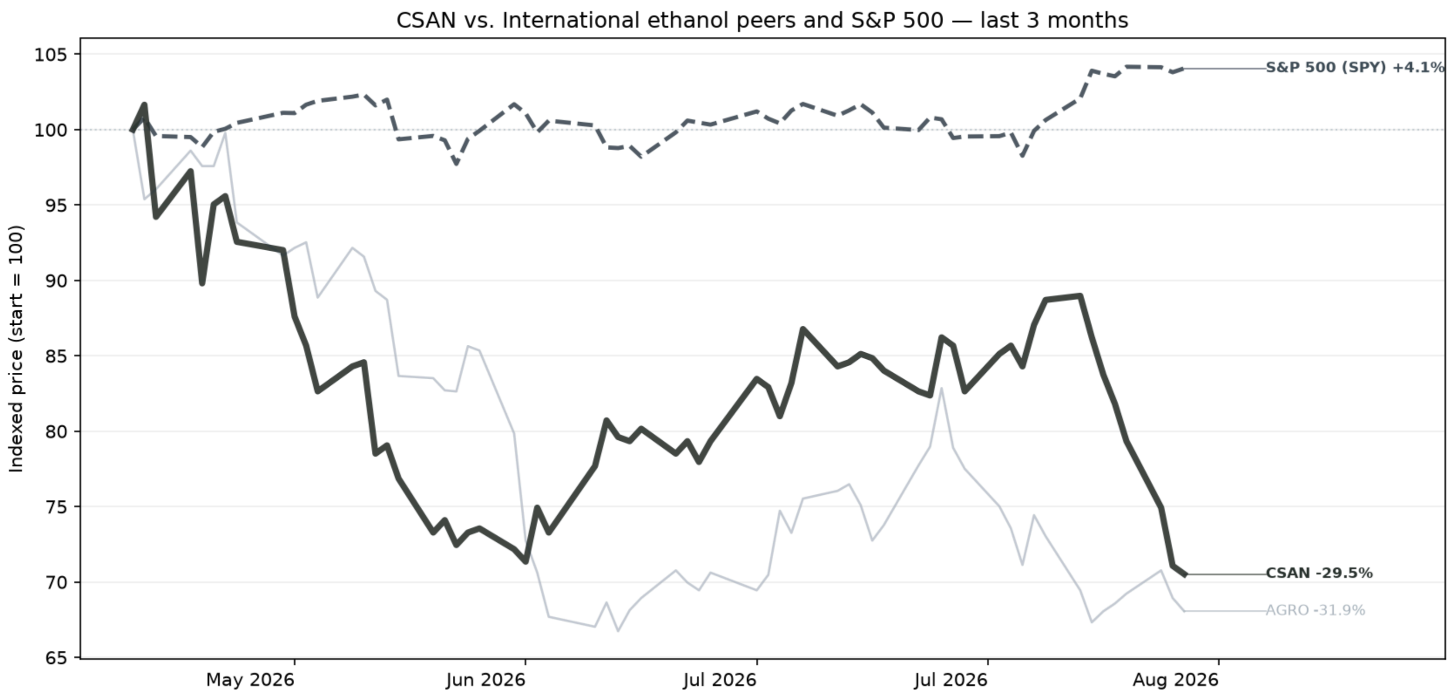
Chevron is an integrated energy company with exploration, production, and refining operations worldwide. It is the second-largest oil company in the United States with 2025 worldwide net oil-equivalent production of 3.7 million barrels per day, including 8.5 billion cubic feet per day of natural gas and 2.3 million barrels of liquids per day. Production takes place in North America, South America, Europe, Africa, Asia, and Australia. The company's refining networks arelocated in the United States and Asia, with a total worldwide refining capacity of 1.8 million barrels of oil a day at year-end 2025. Net proved reserves at year-end 2025 stood at 10.6 billion barrels of oil equivalent, consisting of 5.7 billion barrels of liquids and 29.2 trillion cubic feet of natural gas.

Cosan (CSAN)

International ethanol · $2.5B · 3m -29.5% · 12m -40.2% · 24m -74.7%

Google Finance

Brazilian holding company and the liquid U.S.-listed proxy for sugarcane ethanol via Raizen.



Cosan SA engages in several services throughout the energy and logistics sectors. Its reportable segments are Raizen, Compass, Moove, Rumo, and Radar. It generates the majority of its revenue from Raizen which operates in the production, commercialization, origination, and trading of ethanol, bioenergy, resale, and trading of electricity, renewable sources, marketing, origination, and trading of sugar and fuels, and lubricant.

Adecoagro (AGRO)

International ethanol · $1.5B · 3m -31.9% · 12m +0.7% · 24m -15.9%

Google Finance

South American farmland and sugar/ethanol producer with U.S.-listed equity.

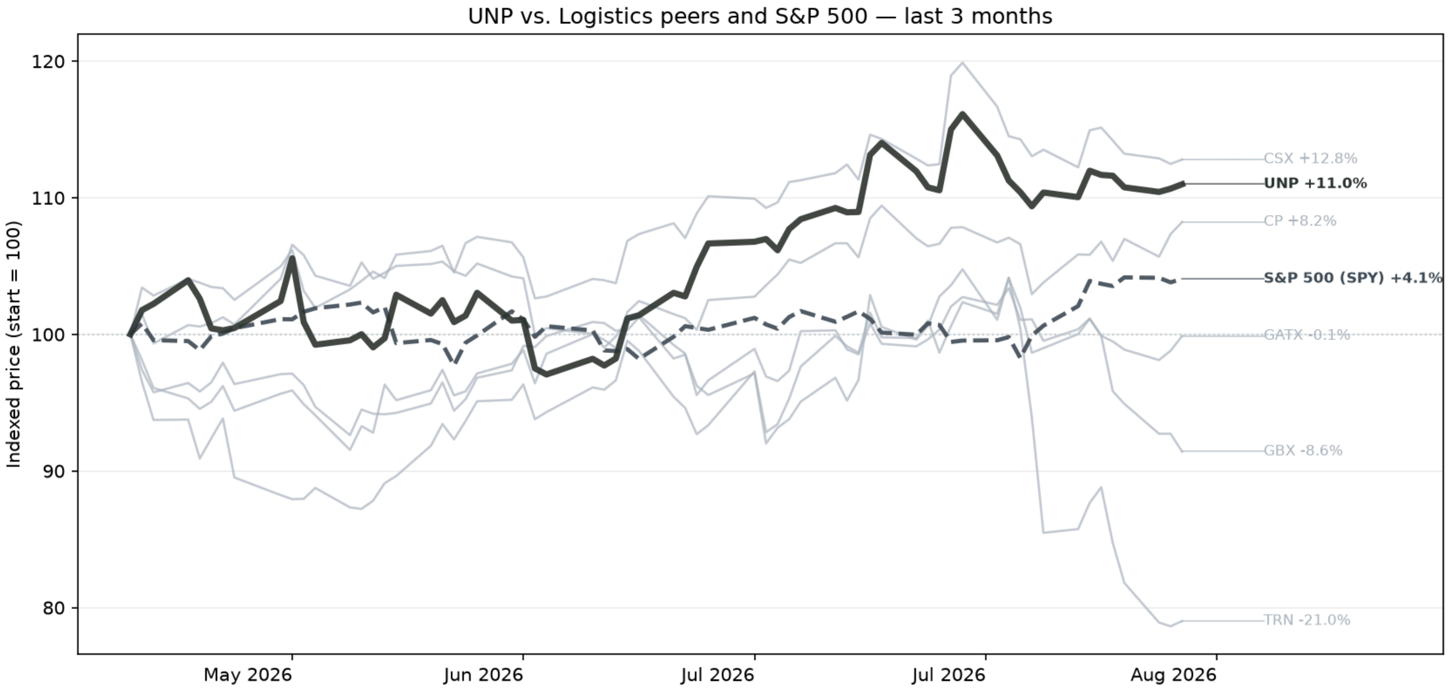
Adecoagro SA is a Luxembourg-based agricultural company. It is involved in a wide range of businesses, including farming crops and other agricultural products, dairy operations sugar, ethanol, energy production, and land transformation. The group operates in two lines of business, namely, Farming and Sugar, Ethanol and Energy. The Farming is further comprised of three reportable segments: Crops, Rice and Dairy. Sugar, Ethanol and Energy Segment, consists of cultivating sugarcane, which is processed in owned sugar mills, transformed into ethanol, sugar and electricity, in addition to biomethane and then marketed.

Union Pacific (UNP)

Logistics · $179.3B · 3m +11.0% · 12m +31.6% · 24m +19.2%

Google Finance

Primary western Class I for Corn Belt corn, ethanol unit trains, DDGS, and corn oil.



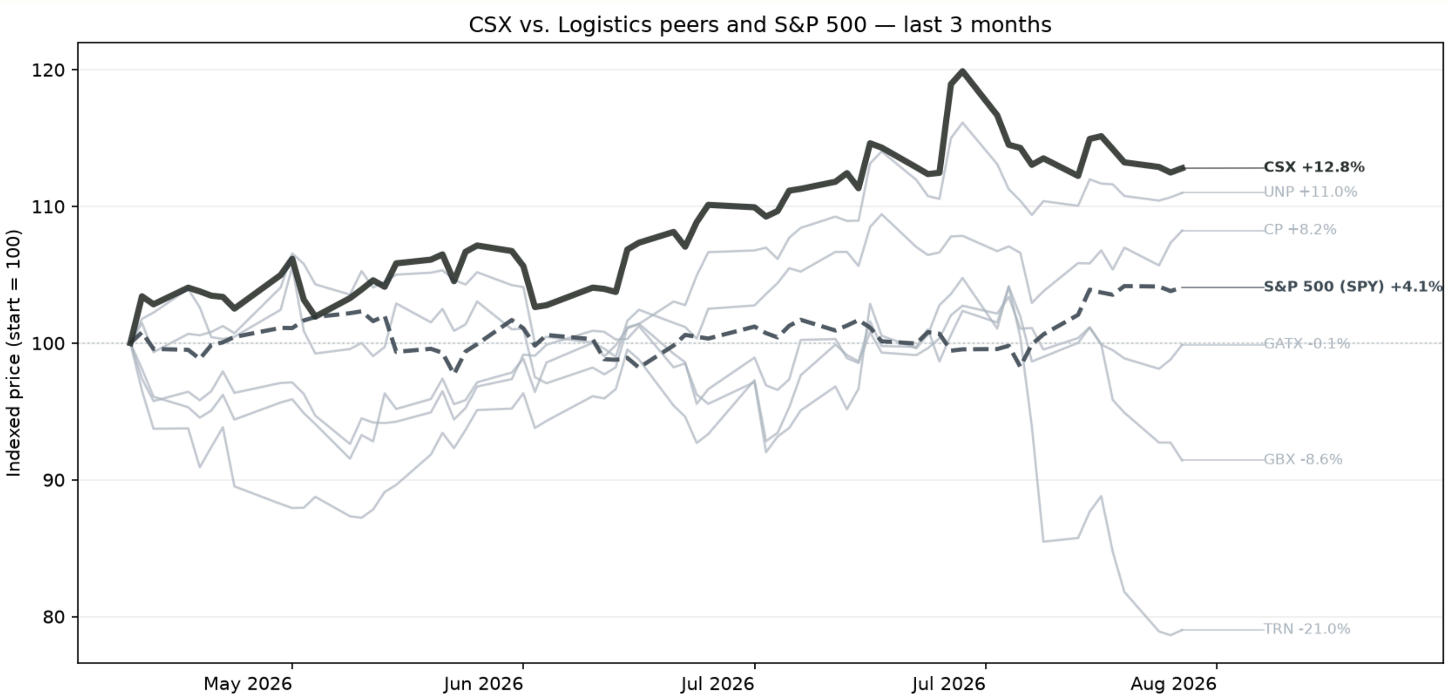
Omaha, Nebraska-based Union Pacific is the largest public railroad in North America. Operating on more than 30,000 miles of track in the western two-thirds of the US, Union Pacific generated $24.5 billion of revenue in 2025 by hauling coal, industrial products, intermodal containers, agricultural goods, chemicals, fertilizers, and automotive goods. Union Pacific owns about one-fourth of Mexican railroad Ferromex and historically derives roughly 10% of its revenue hauling freight to and from Mexico.

CSX (CSX)

Logistics · $93.9B · 3m +12.8% · 12m +38.8% · 24m +49.1%

Google Finance

Primary eastern Class I into Northeast and Southeast gasoline markets for ethanol unit trains.



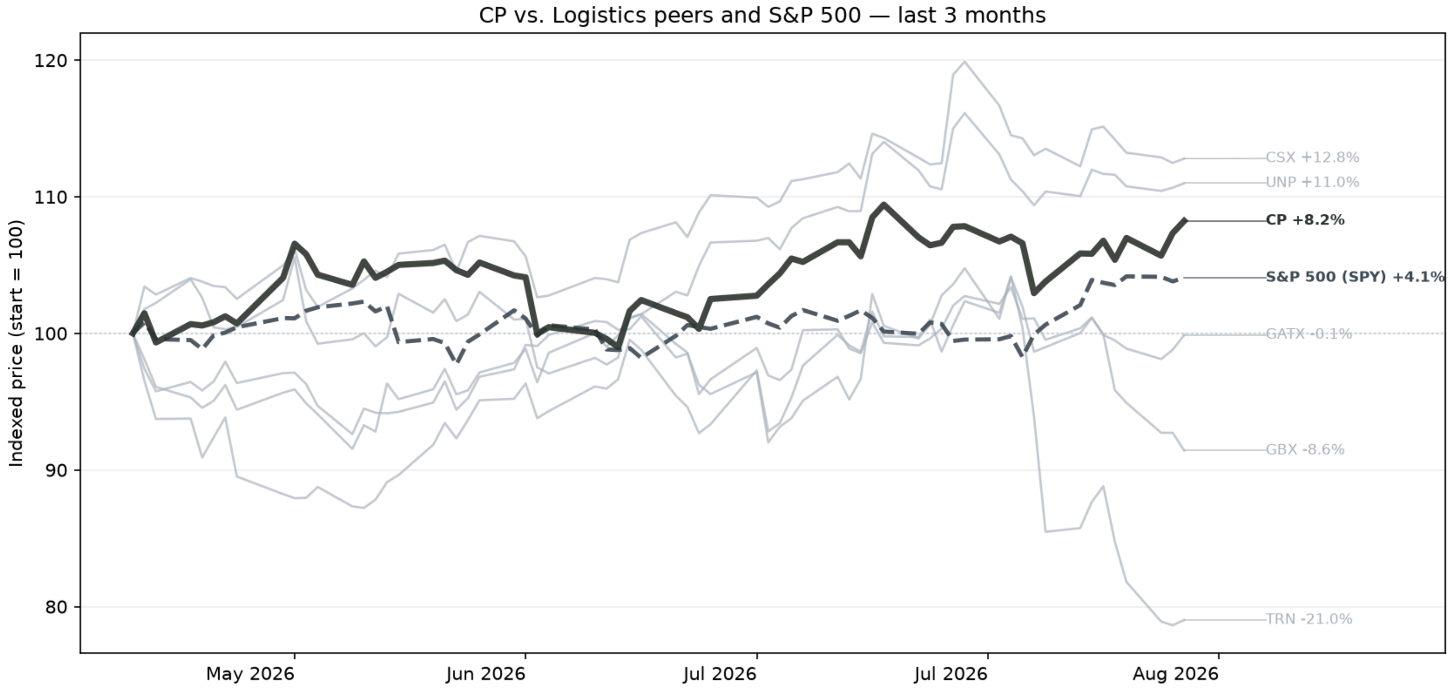
Operating in the Eastern United States, Class I railroad CSX generated revenue of nearly $14 billion in 2025. On its more than 21,000 miles of track, CSX hauls shipments of coal (16% of consolidated revenue), chemicals (17%), intermodal containers (16%), automotive cargo (7%), and a diverse mix of other bulk and industrial merchandise.

Canadian Pacific Kansas City (CP)

Logistics · $83.0B · 3m +8.2% · 12m +22.6% · 24m +16.9%

Google Finance

North-south railroad for Midwest corn and ethanol to the Gulf and Mexico.



Canadian Pacific Kansas City is a Class I railroad operating on tracks that span most of Canada and into parts of the Midwestern and Northeastern United States. Following the April 2023 Kansas City Southern merger, CPKC operates new single-linehaul services from Canada and the Upper Midwest down through Texas, the Gulf of Mexico, and into Mexico. It also hauls cross-border and intra-Mexico freight via operating concessions on more than 3,000 miles of rail in Mexico. CPKC hauls shipments of grain, intermodal containers, energy products (like crude and frac sand), chemicals, plastics, coal, fertilizer and potash, automotive products, and a diverse mix of other merchandise.

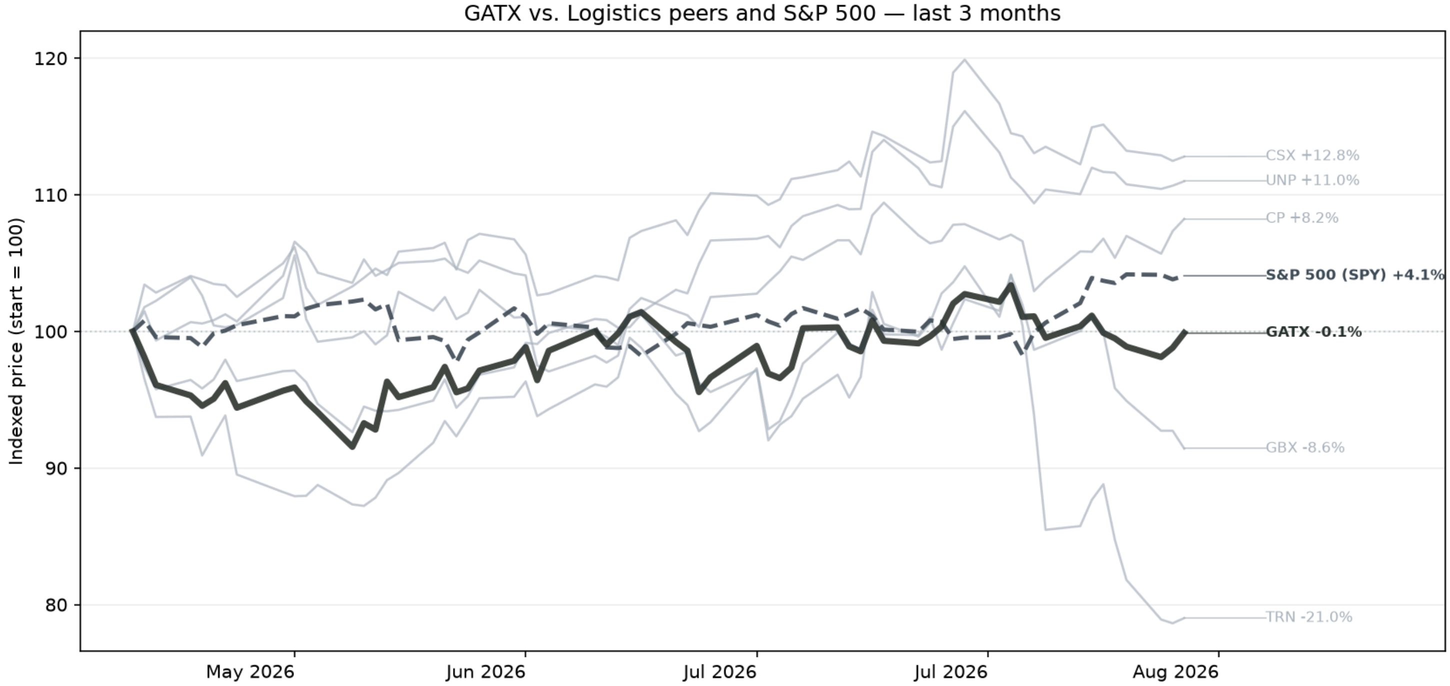
GATX (GATX)

Logistics · $6.2B · 3m -0.1% · 12m +12.5% · 24m +29.6%

Google Finance

Largest public railcar lessor of ethanol tank cars and grain/DDGS hoppers.

GATX vs. Logistics peers and S&P 500 — last 3 months



GATX Corp leases transportation assets, including railcars, aircraft spare engines, and tank containers, to customers in North America, Europe, and India. The company's reportable business segments are: Rail North America, Rail International, Engine Leasing, and Other. The majority of its revenue is generated from the Rail North America segment, which is composed of the company's operations in the United States, Canada, and Mexico. This segment mainly provides railcars pursuant to full-service leases under which it maintains the railcars, pays ad valorem taxes and insurance, and provides other ancillary services.

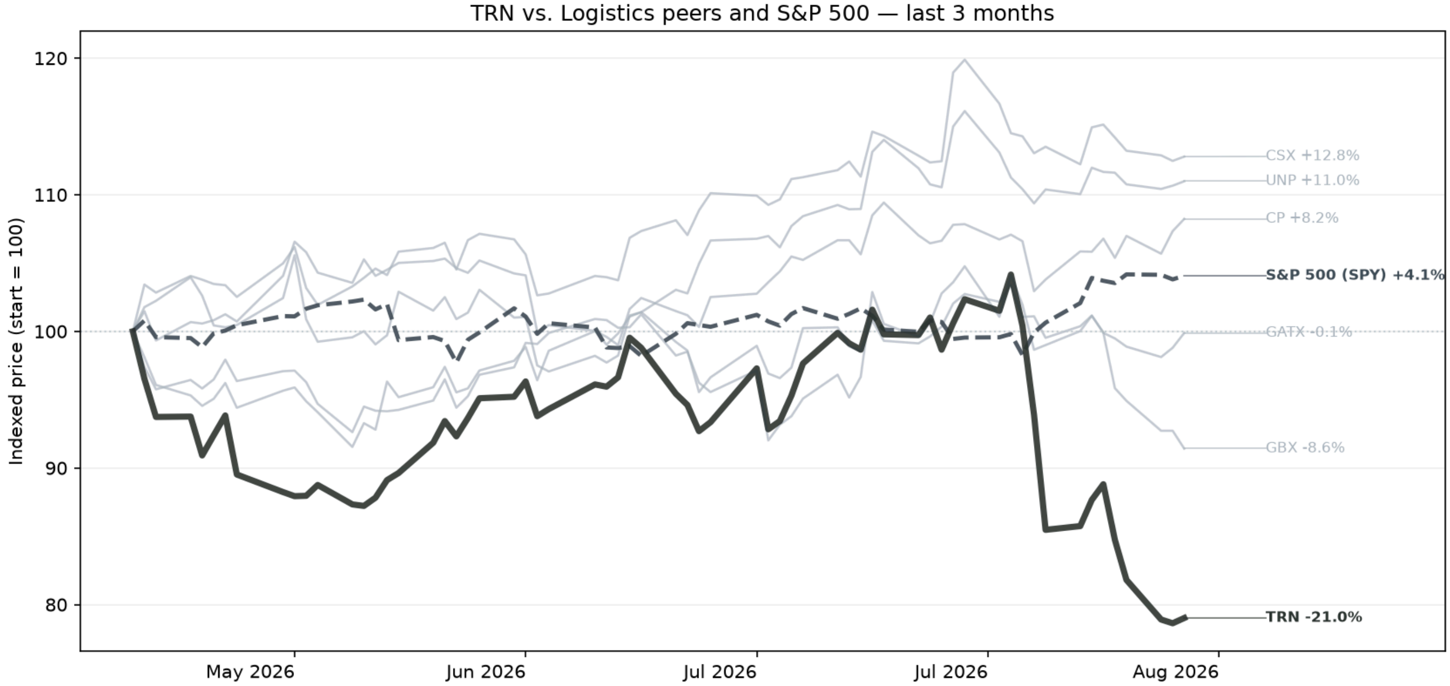
Trinity Industries (TRN)

Logistics · $2.4B · 3m -21.0% · 12m +0.0% · 24m -9.6%

Google Finance

Builds and leases covered hoppers and tank cars used for grain, DDGS, and ethanol.

TRN vs. Logistics peers and S&P 500 — last 3 months



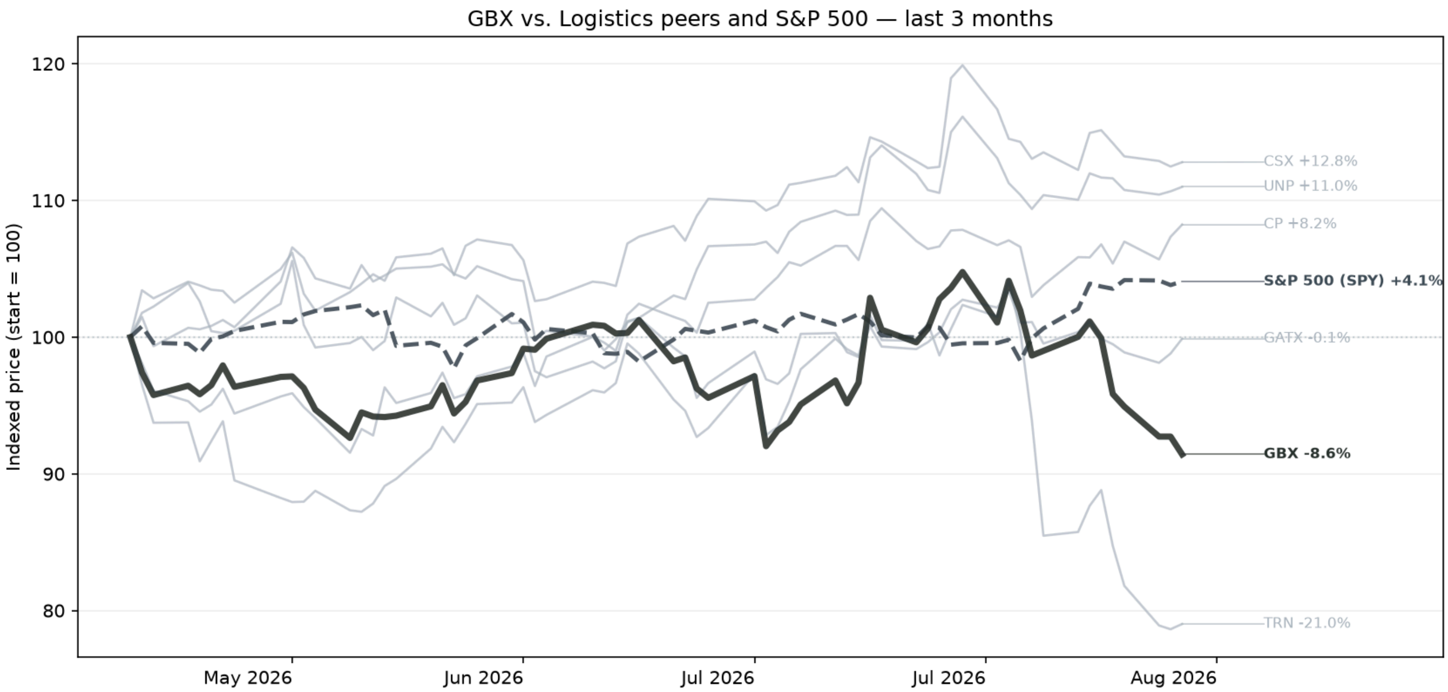
Trinity Industries Inc sells and leases railroad products and railcar maintenance services in North America. The company operates under the name TrinityRail in two main segments: railcar leasing and management services, which owns railcars and provides fleet management and administration services; rail products, which builds, sells, and modifies freight and tank railcars and their components; and all other, which sells highway products such as guardrail and other highway barriers. Customers include railroads, leasing companies, and shipping companies in agriculture, construction, consumer products, energy, and chemicals.

Greenbrier (GBX)

Logistics · $1.4B · 3m -8.6% · 12m -4.5% · 24m -2.0%

[Google Finance]

Builds tank cars used for ethanol, renewable fuels, and CO2.



Greenbrier Companies Inc supplies equipment and services to international freight transportation markets, designing and marketing freight railcars in North America, Europe, and Brazil through subsidiaries and joint ventures. It provides railcar wheel services, parts, maintenance, and conversion services in North America. The company owns a lease fleet sourced mainly from its manufacturing operations and offers railcar management, regulatory compliance, and leasing services to railroads and owners. It operates two segments: Manufacturing and Leasing & Fleet Management, with the majority of revenue from Manufacturing. The company operates in the U.S. and internationally, with the majority of revenue from the U.S. market.
