Weekly Corn and Ethanol Intel Report

Week of August 20, 2026
Market data through: August 19, 2026
Narrative created: August 21, 2026

Weekly review of corn, ethanol, energy, co-product, policy, and related public-company performance for commodities risk managers at U.S. ethanol plants.

Strategy Narrative

- 1. Central Corn Belt rain reduced the next corn-yield downgrade risk
- 2. Lower production did not prevent another ethanol inventory build
- 3. Early winter-grade gasoline adds supply, not necessarily ethanol demand
- 4. Weekly corn sales did not validate a more aggressive export assumption
- 5. Midwest natural-gas storage preserved the input-cost buffer

Executive View

- **Corn yield risk eased across the central and eastern Corn Belt.** Heavy rain removed dryness from Indiana, Ohio and Kentucky and improved Iowa and Illinois, partially reversing last week's drought-driven procurement concern. Upper Midwest supply risk remains localized.
- **The ethanol supply correction was insufficient.** Production fell 28,000 barrels per day, but inventories increased another 323,000 barrels to 25.121 million because the run-rate reduction did not fully offset domestic and export disappearance.
- **Domestic blending improved at the margin.** Refiner and blender ethanol inputs increased 11,000 barrels per day to 926,000, preventing the weekly ethanol balance from being more bearish.
- **Gasoline remains physically tight, but policy may weaken its price umbrella.** Inventories rose modestly yet remained about 5% below the five-year average, while the administration

Summary of Comments on Weekly Corn and Ethanol Intel Report

Page: 1

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:11:11 PM
In my opinion, perceptions of yield risk have gone up significantly since 8/12, when the last USDA WASDE report was released. That report lowered the expected yield by 2.3 bushels/acre. Much of the concern is due to too much rain in the central and eastern Corn Belt. The week of this report, the Pregressive Farmer Crop Tour was also a significant news presence with consistent reports of disappointing yields starting as early as Monday afternoon. This helped fuel the corn rally throughout the week.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:17:47 PM
Important and useful numbers here. Not really sure what the highlighted term means though. This information may be worthy of a table for week/week comparison. Total gas demand is often analyzed with these numbers because people assume ~10.5% blend and use the gas demand number as a proxy for consumpiton.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:18:46 PM
Highly variable data in this measure. Not very useful beyond long-term trends.

authorized an early September transition to higher-volatility gasoline intended to increase petroleum supply.

- **Corn exports did not provide new bullish confirmation.** Weekly sales totaled 1.05 million metric tons across both marketing years—adequate, but at the low end of expectations after USDA raised its annual export forecast last week.
- **Natural-gas storage remains a margin buffer.** National stocks were 6.2% above the five-year average, with Midwest inventories 6.7% above normal despite strong summer demand.
- **Overall margin and risk conditions were broadly unchanged:** improved corn-weather risk and adequate natural-gas supply were offset by another ethanol inventory build and the possibility that additional gasoline supply limits ethanol's petroleum-derived value support.

Exposure	Current signal	Change from last week	Horizon	Confidence	Main driver
Corn procurement	Large crop; lower broad yield tail risk	Improved	Harvest–Q1 2027	Medium	Central Corn Belt rain
Ethanol selling	Inventories still accumulating	Deteriorated	1–4 weeks	High	Supply exceeds disappearance
Natural gas	Storage remains comfortable	Unchanged/improved	1–4 months	High	Midwest stocks above normal
Domestic blending	Weekly inputs recovered	Improved modestly	1–3 weeks	High	Blender inputs +11,000 bpd
Regulatory demand	E15 cliff remains unresolved	Unchanged	Through September	Medium	Existing waiver expires August 28
Overall plant margin	Offsetting input/output signals	Broadly unchanged	Near term	Medium	Corn relief versus ethanol stocks

The week's incremental thesis is that **weather has reduced the probability of a broad national corn-yield downgrade, but ethanol producers have not yet reduced output enough to stabilize inventories**. Continuing 45Z monetization, soybean-meal competition, carbon-pipeline permitting

Page: 2

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:22:09 PM
Another highly volatile statistic, meaning most analysts use it for monthly trend analysis rather than using the weekly number as a market indicator. Exports are actually one of the best things going for the corn market right now, with sales well into record territory as we close out the marketing year.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:26:08 PM
I agree and think is a significant consideration.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:28:16 PM
Disagree. See first comment above.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:28:57 PM
Insignificant.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:36:14 PM
This was a technicality. I don't think anyone in the industry was actually concerned that E15 sales would be disallowed from 9/1 to 9/15. The loophole was closed by the EPA on 8/20, the day after data was pulled for this report.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:42:32 PM
Both of these are insignificant considerations in my opinion. 45Z, on-farm regenerative ag, and ethanol exports are all bigger factors.

and longer-term year-round E15 legislation are not repeated because no material new evidence emerged during the reporting window.

1. Central Corn Belt rain reduced the next corn-yield downgrade risk

Status: REFUTE

What happened

National corn condition slipped one point to 60% good-to-excellent for the week ended August 16, with 76% of the crop in dough, 29% dented and 4% mature. More importantly, a broad storm corridor delivered heavy rain from Nebraska through Iowa, Illinois, Indiana and Ohio. The U.S. Drought Monitor removed all abnormally dry areas from Indiana, Ohio and Kentucky and most from Illinois; Iowa and northern Missouri also improved. Parts of central Illinois and Indiana received more than five inches, although excessive totals created localized flooding and wind damage. (USDA NASS, "Crop Progress," August 17, 2026; U.S. Drought Monitor, "National Drought Summary for August 18, 2026," August 20, 2026) (finance.yahoo.com)

The benefit was not universal. Wisconsin and Michigan deteriorated after limited rainfall, northern Wisconsin retained extreme drought and Minnesota experienced mixed changes. (droughtmonitor.unl.edu)

Why it matters

Last week's concern was that expanding drought would compound USDA's August yield reduction and further erode the 1.653-billion-bushel carryout. This week's precipitation weakens that near-term hypothesis across the core eastern Corn Belt. Because much of the crop is already entering dent, however, the rain is more likely to protect kernel weight than recreate lost yield potential.

Risk-manager implication

The national futures-side procurement risk improved modestly, particularly for plants that had delayed harvest coverage after the August WASDE. Basis exposure remains geographically bifurcated: Iowa, Illinois and eastern Corn Belt plants gained supply confidence, while Wisconsin, Minnesota and Michigan facilities should not extrapolate the national improvement to local origination zones.

Directionally: **corn less bullish, ethanol neutral and plant margins modestly improved**, principally for harvest and first-quarter coverage.

Page: 3

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:43:51 PM
Very slowly changing metric, but is definitely used in the trade.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:46:52 PM
Corn is up $.285/bu in the four trading sessions since the report's data pull. One of the more bullish moves we've seen in quite a while.

Watch next

Whether August 18–24 rainfall reaches the northern Corn Belt and whether national condition ratings stabilize after seven weeks of deterioration.

---

2. Lower production did not prevent another ethanol inventory build

Status: UPDATE

What happened

For the week ended August 14, U.S. ethanol production declined 23,000 barrels per day to 1.089 million; Midwest production fell 29,000 to 1.031 million. Refiner and blender inputs improved 11,000 barrels per day to 926,000. Nevertheless, inventories increased 323,000 barrels to 25.121 million, including builds of 124,000 barrels on the East Coast and 195,000 on the Gulf Coast. (EIA, "Weekly Petroleum Status Report," August 19, 2026; DTN, "EIA Weekly Ethanol Report," August 19, 2026) (dtnpf.com)

Why it matters

The run-rate adjustment was directionally constructive but too small to clear product. The Gulf and East Coast builds are particularly relevant because those regions are central to export and gasoline-blending logistics. A reliable public weekly ethanol-export value is unavailable, so the inventory result is the clearest evidence that total disappearance remained insufficient.

Risk-manager implication

The previous thesis—production above sustainable prompt demand—was strengthened, not resolved. Plants entering maintenance should not assume a one-week production decline has tightened the market. Prompt ethanol selling remains the exposure requiring the most discipline, especially where storage capacity is limited or basis is vulnerable to regional tank congestion.

Directionally: **ethanol weaker, corn demand marginally softer and physical plant margins lower** over the next one to four weeks. The increase in blending inputs limits the magnitude of the deterioration.

Watch next

Whether national output moves below roughly 1.05 million barrels per day during maintenance season or inventories continue rising despite stronger blending.

Page: 4

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:49:24 PM
Interesting comment. I wonder why Google puts so little faith in the weekly export data while still citing blender inputs.

3. Early winter-grade gasoline adds supply, not necessarily ethanol demand

Status: NEW

What happened

On August 20, the administration authorized an early transition to higher-volatility winter-grade gasoline beginning September 1, rather than the normal mid-September transition. Public reporting indicated that the action permits earlier sale of higher-volatility E10 and is intended to add hundreds of thousands of barrels per day of gasoline supply. Formal waiver text was not yet reflected on EPA's public fuel-waiver page at the report cutoff. (Bloomberg News, "US Allows Early Sales of Winter Gasoline to Help Curb Prices," August 20, 2026) (news.bloomberglaw.com)

The existing national waiver allowing a common gasoline pool containing 9%–15% ethanol remains effective only through August 28, with a sell-through provision for previously certified or pipeline-injected fuel. (EPA, "Fuel Waivers," updated July 30, 2026) (epa.gov)

Why it matters

The new action addresses petroleum gasoline availability rather than increasing the ethanol blend rate. It could ease wholesale gasoline values and narrow the petroleum price umbrella supporting ethanol, while lower pump prices could modestly support total gasoline consumption. It does not, based on information available at cutoff, resolve E15 treatment between August 29 and the normal end of the volatility-control season.

Risk-manager implication

Treat this as **mixed to slightly bearish for ethanol value**, not as a new ethanol-demand mandate. The first market affected should be gasoline blending components and RBOB; ethanol feels the transmission through relative blend economics and gasoline demand.

4. Weekly corn sales did not validate a more aggressive export assumption

Status: UPDATE

What happened

Page: 5

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 3:54:34 PM
This is interesting because I mentioned it in the "E15 cliff" comment above. The news came out on 8/20 but the data for the report was supposedly through 8/19. At any rate, this development directly solves the "key concern" noted in the executive table above.

Author: Brent Hoops Subject: Comment on Text Date: 8/25/2026 4:42:39 PM
Inaccurate. Winter-blend gasoline carries a higher allowable Reid Vapor Pressure (RVP), thus negating the need for the summer waiver.

USDA reported 1.05 million metric tons of corn sales across the 2025/26 and 2026/27 marketing years for the week ended August 13, at the low end of the 1.0–1.8 million-ton analyst range. Mexico was the leading buyer at 391,300 tons. (USDA FAS, "Weekly Export Sales," August 20, 2026; Dow Jones, "U.S. Corn Export Sales on Low Side for Week," August 20, 2026) (fas.usda.gov)

Why it matters

USDA's August balance sheet relied on stronger exports to tighten carryout. This week's sales were not weak enough to refute that outlook, but they did not provide the acceleration needed to strengthen it.

Risk-manager implication

Export demand remains a corn-price risk, but this print argues against chasing coverage solely because USDA raised exports. Sustained weekly commitments and Gulf loading performance matter more than one low-end report.

---

5. Midwest natural-gas storage preserved the input-cost buffer

Status: CONFIRM

What happened

Working gas totaled 3,169 Bcf on August 14, following a 16-Bcf weekly injection. National stocks were 185 Bcf, or 6.2%, above the five-year average. Midwest inventories rose 19 Bcf to 848 Bcf, 6.7% above the regional five-year average, while heat-related demand produced a 13-Bcf withdrawal in the South Central region. (EIA, "Weekly Natural Gas Storage Report," August 20, 2026) (ir.eia.gov)

Risk-manager implication

Storage evidence continues to support manageable Midwest plant-energy risk into the shoulder season. The buffer is not a guarantee of low basis at constrained locations, but it reduces the need to price a national scarcity premium into near-term gas procurement.

Strategic Synthesis

The week shifted risk away from corn yield and toward product clearance. Central Corn Belt weather now supports USDA's large-crop framework more convincingly, while export sales supplied no immediate counterweight. Ethanol producers, however, still face a market in which even lower output

This page contains no comments

and better blending failed to prevent inventory accumulation. The actionable thesis is therefore **less urgency on broad futures-based corn coverage, but continued urgency around ethanol sales, storage capacity and maintenance timing**.

What I'm Watching Next

- **August 24, 2026:** USDA Crop Progress and Condition.
- **August 26, 2026:** EIA petroleum and ethanol data for the week ending August 21.
- **August 27, 2026:** EIA Weekly Natural Gas Storage Report.
- **August 28, 2026:** Current nationwide 9%–15% ethanol gasoline-pool waiver expires.
- **September 1, 2026:** Early winter-grade gasoline waiver takes effect.
- **September 2, 2026:** REX American Resources fiscal second-quarter results.
- **September 11, 2026:** USDA September WASDE and Crop Production reports.

Bottom Line

The most consequential change was the reduction in broad Corn Belt yield risk after substantial central and eastern rainfall. **Prompt ethanol inventory and selling exposure now deserves the closest attention**, while the August 26 EIA report will show whether maintenance-season output discipline is finally sufficient to stop product accumulation.

Notable Changes

Comparison with the final report dated August 13, 2026 (market data through August 12, 2026).

I feel like this much emphasis on short-term, high frequency reports could cause the report to place too heavy a focus on short-term indicators.

Earnings Call Summary

This page contains no comments

John Deere delivered strong Q3 2026 results, with net sales and revenues up 5% year-over-year to $12.608B, and equipment operations net sales up 6% to $10.999B. Net income reached $1.379B, or $5.10 per diluted share, comfortably beating the estimated EPS of $4.679. Equipment operations achieved a 14.4% operating margin.

At a Glance

- **Deere Tops Q3 Financial Estimates:** Deere & Company reported an adjusted EPS of $5.10, comfortably beating Wall Street expectations of $4.679, while reported revenue reached $10.999 billion to surpass the estimated $10.734 billion.
- **Segment Divergence Drives KPI Resilience:** Operating performance was driven by a robust 18% net sales increase in Construction & Forestry and a 12% gain in Small Ag & Turf, which successfully offset a 6% revenue decline in the Production & Precision Ag segment.
- **Full Year Income Outlook Raised:** Management narrowed and raised its fiscal 2026 net income guidance to a range of $4.75 billion to $5.00 billion, confidently establishing 2026 as the structural bottom of the current agricultural equipment cycle.
- **Market Responds with Upward Momentum:** Following the stronger-than-expected third-quarter results and updated full-year forecast, Deere's shares jumped over 7% during trading on Thursday.
- **Tariff Costs Face Future Headwinds:** The company recorded a beneficial $110 million in tariff recoveries during the quarter, but projects a higher net run rate of direct tariff expenses near $1 billion heading into fiscal 2027.

Key Moments from the Call

- **10m — Fiscal 2026 Guidance Raised on Execution:** Deere raised its full-year 2026 net income outlook to $4.75B-$5.00B and equipment cash flows to $5.0B-$5.5B. Strong factory output, disciplined execution, and robust Q4 order books across all segments gave management the confidence to narrow and lift guidance despite dynamic, challenging agricultural end markets.
- **21m — EOP Signals 2026 as Cycle Bottom:** Model year 2027 Early Order Programs (EOP) for planters and sprayers in North America are up mid-single digits year-over-year. Management believes this encourages the view that 2026 represents the bottom of the agricultural equipment cycle, backed by normalized new/used inventory spreads and healthy dealer channel inventory.
- **25m — Precision Ag Technology Adoption Doubles:** Despite a compressed farm economy, technology adoption continues to accelerate. Factory installation trends suggest See & Spray adoption will nearly double, making its way onto 1/3 of North American sprayer orders.

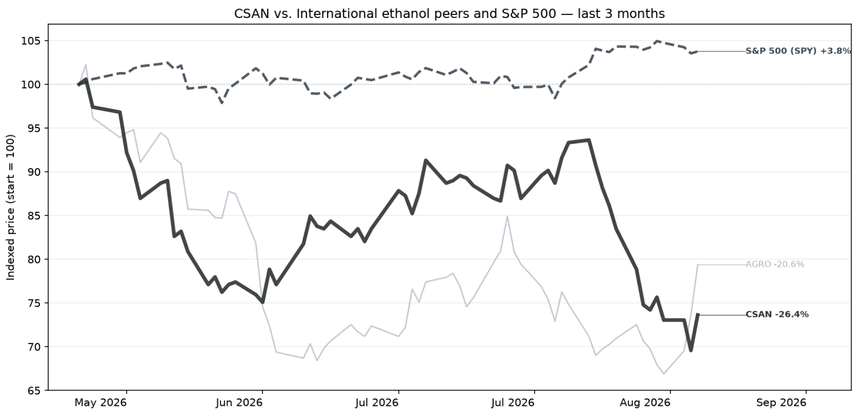
This page contains no comments

Advanced planter technologies like ExactRate and FurrowVision are appearing on over 40% of model year 2027 orders.

- **33m — Tariff Costs Set to Shift in 2027:** Deere lowered its 2026 direct tariff expense expectation to $1.1B (down from $1.2B) due to Section 232 adjustments. However, after factoring in $382M of 2026 refunds that will not recur, net tariff exposure will rise from ~$750M in 2026 to ~$1.0B in 2027, creating a minor headwind.

Cosan (CSAN) -26.4%

Reported: August 17, 2026 · Google Finance earnings page



Earnings Call Summary

Cosan announced key portfolio and capital initiatives in 1H 2026, including Compass' IPO secondary offering generating BRL 2.3 billion in net proceeds. The company also signed the sale of a portion of Radar's land portfolio for BRL 1.85 billion and entered an exclusive letter of intent to divest its stake in Porto São Luís for BRL 300 million.

At a Glance

- **Cosan Misses Revenue and EPS Estimates:** Cosan reported a reported adjusted EPS of -0.08 against an expected 0, alongside a reported revenue of 10,775,931,000 which missed the expected estimate of 41,679,623,000.

This page contains no comments

- **Corporate Debt Significantly Reduced Quarter-Over-Quarter:** The company's expanded net debt decreased by 20% quarter-over-quarter to BRL 9.2 billion, supported by nearly BRL 9 billion in total debt prepayments made during the first half of 2026.
- **Coverage Ratio Projected to Rebound Sharply:** Although the Debt Service Coverage Ratio temporarily dropped to 0.2 times due to dividend seasonality, management issued significant guidance targeting an improvement to between 0.8 and 1.2 times by December 2026.
- **Subsidiary Core EBITDA Performance Remains Resilient:** Operational results across key holdings were steady, as Rumo's EBITDA held stable at BRL 2.3 billion and Compass recorded a 5% year-over-year EBITDA increase driven by strong residential and commercial margins.
- **Asset Monetization Strides Deliver Liquidity Boost:** Deleveraging efforts were heavily supported by corporate actions, including a secondary IPO of Compass shares generating BRL 2.3 billion in net proceeds and a partial land portfolio sale by Radar for BRL 1.85 billion.
- **Conglomerate Seeks Voluntary NYSE Delisting:** Following the earnings release, Cosan announced plans to voluntarily delist its American Depositary Shares from the New York Stock Exchange to centralize trading on the B3 exchange and reduce overhead expenses.

Key Moments from the Call

- **3m — NYSE Delisting and Management Restructuring:** Investors will appreciate Cosan's aggressive push to simplify its holding structure and cut costs by delisting its ADSs from the NYSE and streamlining management. While the departures of long-time executives Maria Rita and Rafael Bergman are notable, bringing back Cezário accelerates the company's corporate rationalization and commitment to further G&A reductions.
- **5m — New 2026 Debt Coverage Ratio Guidance:** The introduction of a December 2026 debt service coverage ratio guidance of 0.8x to 1.2x provides clear reassurance to investors. Although the current 0.2x ratio looks weak due to dividend seasonality, the forecast proves an inflection point has been reached following BRL 9 billion in debt prepayments and pending asset monetization inflows.
- **21m — Rumo Stake Sale and Moove IPO Strategy:** CEO Marcelo Martins pleased investors by confirming that the planned sale of a minority stake in Rumo is moving forward productively with potential buyers. Conversely, he ruled out an imminent IPO or stake sale for Moove, defending this asset preservation because of Moove's exceptionally robust, resilient performance following past industrial operational headwinds.
- **35m — Moove Profitability and Working Capital Discipline:** Investors will be pleased by Moove's ability to double its EBITDA sequentially by capitalizing on supply restrictions from the Strait of Hormuz crisis. Despite rising raw material costs threatening future margins and expanding working capital needs, Moove maintained strict risk management, bringing leverage down to 1.4x, its lowest level since acquiring PetroChoice.

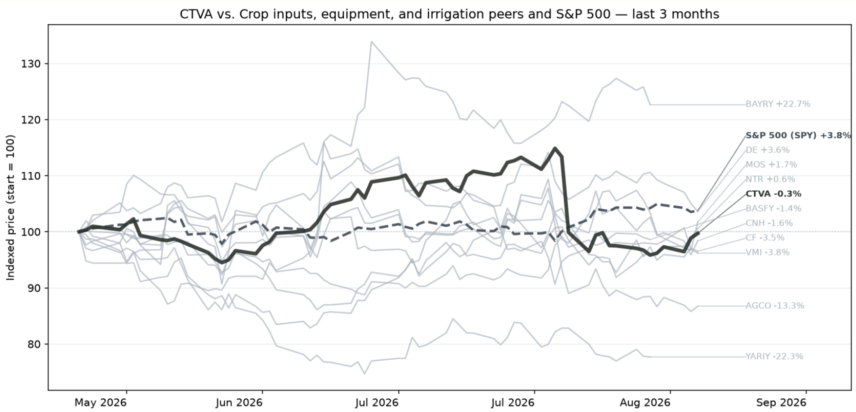
Company Overviews

Corteva (CTVA)

Crop inputs, equipment, and irrigation · $52.4B · 3m -0.3% · 12m +7.7% · 24m +46.6%

Google Finance

Largest U.S. corn-seed franchise (Pioneer) and a primary input cost for Corn Belt acres.



Corteva is an agricultural inputs pure play that was formed in 2019 when it was spun off from DowDuPont. The company is a leader in the development of new seed and crop protection products. Seeds generate the majority of profits with the remainder coming from crop protection products. Corteva plans to spin off its seeds business in late 2026. The seeds business will be named Vylor, while the crop protection business will retain the Corteva name and be a pure-play crop protection company following the divestiture. Corteva operates globally, but around half of revenue comes from North America.

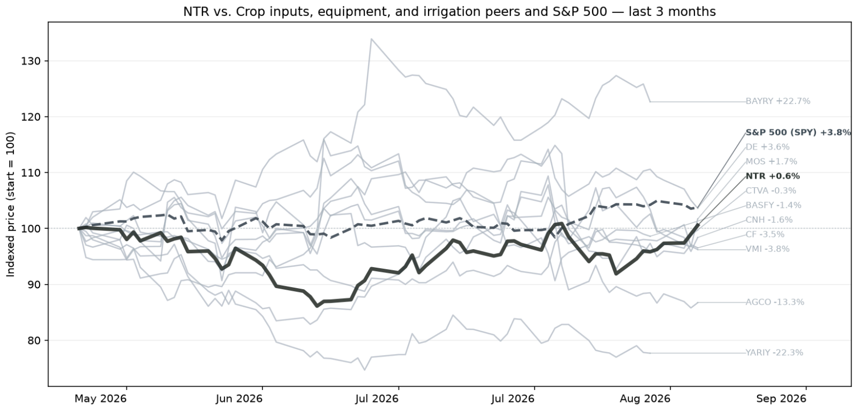
Nutrien (NTR)

Crop inputs, equipment, and irrigation · $33.6B · 3m +0.6% · 12m +23.6% · 24m +50.6%

Google Finance

Largest North American agricultural retailer and a major potash and nitrogen producer.



This page contains no comments

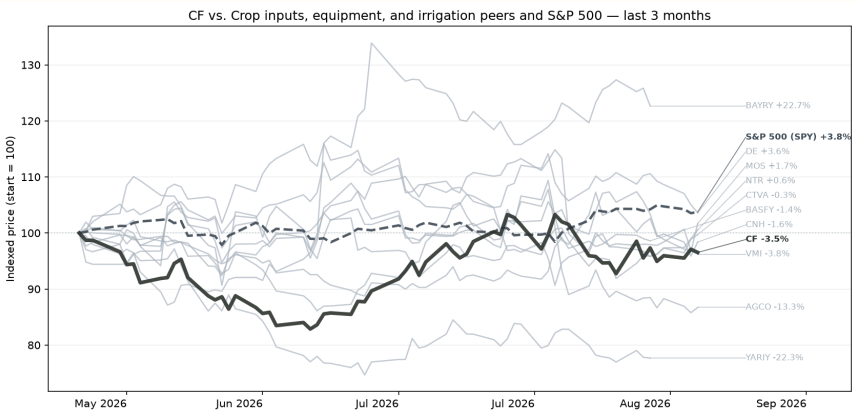
Created in 2018 as a result of the merger between PotashCorp and Agrium, Nutrien is the world's largest fertilizer producer by capacity. Nutrien produces the three main crop nutrients—nitrogen, potash, and phosphate—although its main focus is potash, where it is the global leader in installed capacity with a roughly 20% market share. The company is also the largest agricultural retailer in North America and Australia, selling fertilizers, crop chemicals, seeds, and services directly to farm customers through its brick-and-mortar stores and online platforms.

CF Industries (CF)

Crop inputs, equipment, and irrigation · $18.0B · 3m -3.5% · 12m +39.3% · 24m +48.7%

Google Finance

Nitrogen fertilizer producer; corn is the crop that most moves UAN and urea demand.



CF Industries is a leading producer and distributor of nitrogen, which is primarily used in fertilizers. The company operates nitrogen manufacturing plants primarily in North America. CF also produces nitrogen in the United Kingdom and holds a joint venture interest in a nitrogen production facility in Trinidad and Tobago. CF makes nitrogen primarily using low-cost US natural gas as its feedstock, making the company one of the lowest-cost nitrogen producers globally. It is also investing in carbon-free blue and green ammonia, which can be used as an alternative fuel to hydrogen or as a means to transport hydrogen.

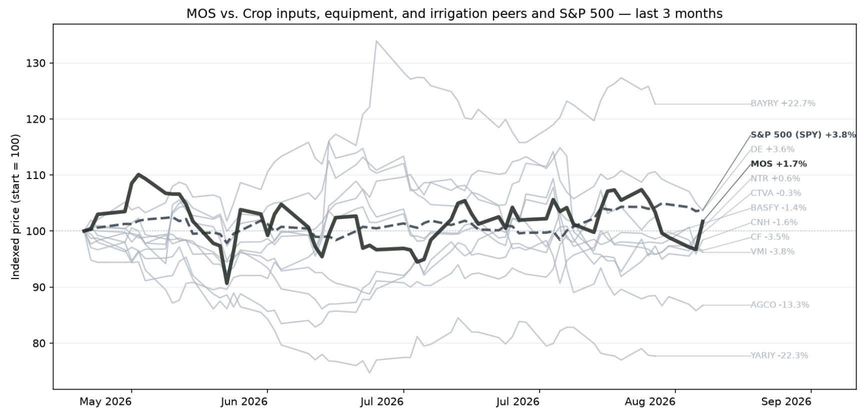
Mosaic (MOS)

Crop inputs, equipment, and irrigation · $7.1B · 3m +1.7% · 12m -31.5% · 24m -18.5%

Google Finance

Phosphate and potash producer that completes corn production budgets.

This page contains no comments



Mosaic is one of the largest phosphate and potash producers in the world. The company's assets include phosphate rock mines in the US and potash mines in Canada. Mosaic also runs a large fertilizer distribution operation in Brazil through its Mosaic Fertilizantes business.

Deere (DE)

Crop inputs, equipment, and irrigation · $156.7B · 3m +3.6% · 12m +17.8% · 24m +55.8%

Google Finance

Dominant North American farm-equipment maker for corn planting, harvest, and grain handling.

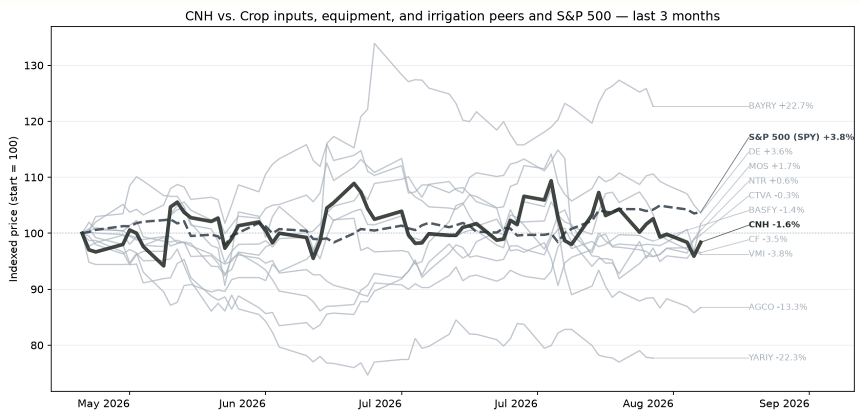
Deere is the world's leading manufacturer of agricultural equipment and a major producer of construction machinery. The company is divided into four reporting segments: production & precision agriculture, or PPA, small agriculture & turf, or SAT, construction & forestry, or CF, and financial services, or FS, its captive finance subsidiary. The core PPA business is the largest contributor to sales and profits by far. Geographically, Deere sales are 60% US/Canada, 17% Europe, 14% Latin America, and 9% rest of the world. Deere goes to market through a robust dealer network that includes over 2,000 dealer locations in North America with reach into over 100 countries. John Deere Financial provides retail financing for machinery to its customers and wholesale financing for dealers.

CNH Industrial (CNH)

Crop inputs, equipment, and irrigation · $16.5B · 3m -1.6% · 12m -15.5% · 24m +5.1%

[Google Finance]

Case IH and New Holland farm equipment serving corn growers.



CNH Industrial is the world's second largest manufacturer of agricultural machinery (82% of industrial net sales) as well as a major player in construction equipment (18% of industrial net sales). Its Case and New Holland brands have served farmers for generations. Geographically, agricultural sales are 40% in North America, 32% in Europe, the Middle East, and Africa, 18% in South America, and 10% in Asia-Pacific. CNH's products are available through a robust independent dealer network, which includes over 2,600 dealer and distribution locations and reach into 164 countries. The construction business leverages over 400 dealers. The company's captive finance arm provides retail financing to its customers and wholesale financing to dealers to maintain inventory, thereby supporting sales.

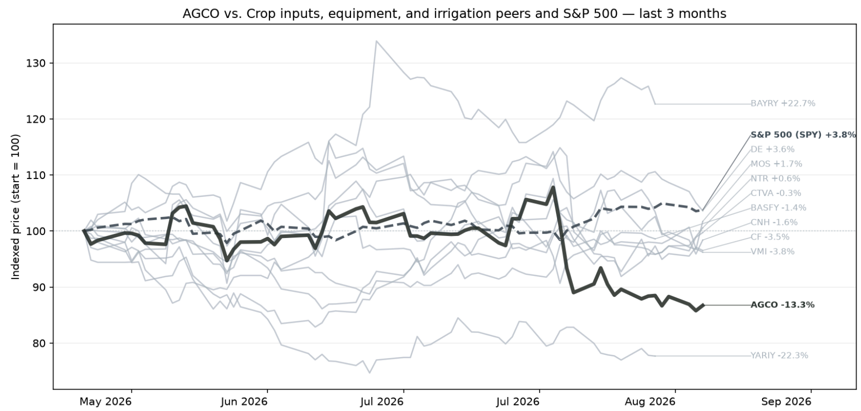
AGCO (AGCO)

Crop inputs, equipment, and irrigation · $7.0B · 3m -13.3% · 12m -11.9% · 24m +12.1%

[Google Finance]

Fendt, Massey Ferguson, and Challenger farm equipment with Corn Belt exposure.

This page contains no comments



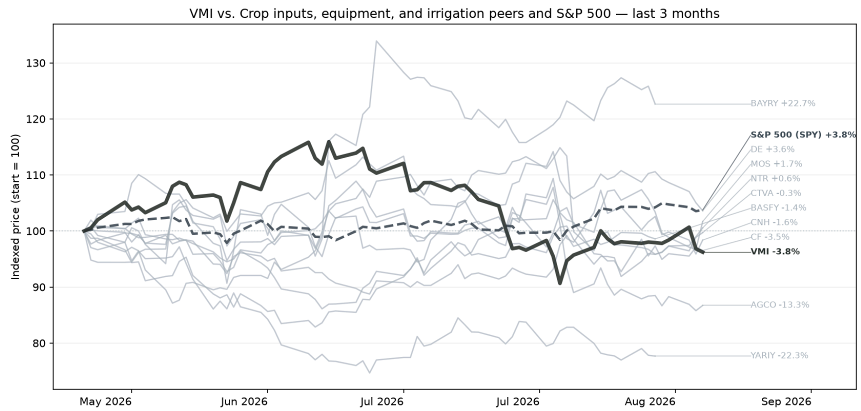
Agco is a global manufacturer of agricultural equipment. Its main machine brands are Fendt, Massey Ferguson, and Valtra; its initiatives in precision agriculture have been organized under the PTx umbrella following a series of acquisitions. While a global business, Agco's sales skew heavily toward Europe/Middle East, representing 50%-60% of sales and even more of operating profits. The company is trying to increase its exposure to the larger North and South American markets. Its products are available through a global dealer network, which includes over 3,000 dealers and distribution locations and reaches into over 140 countries. Additionally, Agco offers retail and wholesale financing to customers through its partnership with Rabobank of the Netherlands, having exited their JV in 2026.

Valmont Industries (VMI)

Crop inputs, equipment, and irrigation · $9.3B · 3m -3.8% · 12m +33.0% · 24m +72.4%

Google Finance

Center-pivot irrigation (Valley) used on irrigated High Plains corn.



Valmont Industries Inc, along with its subsidiaries, operates as a manufacturer of products and services for infrastructure and agriculture markets. Its reportable segments are Infrastructure and Agriculture. The company generates maximum revenue from the Infrastructure segment, which includes the manufacturing and distribution of products and solutions to serve the infrastructure markets of utility, solar, lighting, transportation, and telecommunications, along with coatings services to protect metal products. The Agriculture segment provides irrigation equipment components, including aftermarket parts and tubular products, and technology solutions for precision agriculture. Geographically, it derives key revenue from the United States, followed by Australia, Brazil, and other regions.

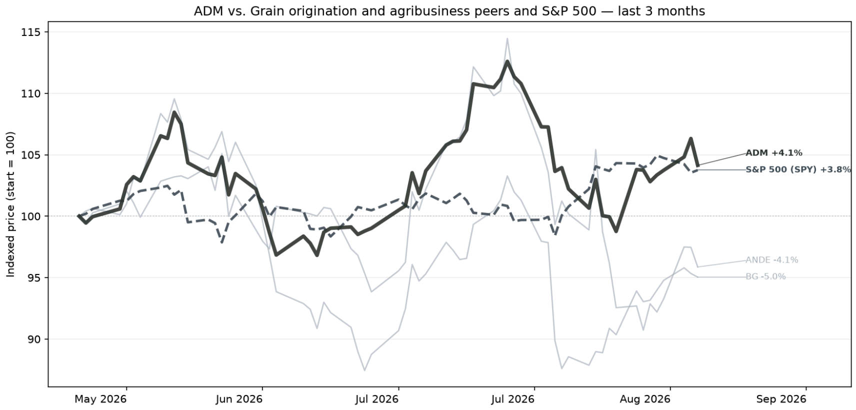
Archer Daniels Midland (ADM)

Grain origination and agribusiness, U.S. ethanol and process technology, Wet milling, ingredients, and co-products · $38.9B · 3m +4.1% · 12m +33.0% · 24m +36.9%

[Google Finance]

Global grain trader, top U.S. ethanol producer, and major corn wet miller.

This page contains no comments



This page contains no comments

Archer-Daniels-Midland is a major processor of oilseeds, corn, wheat, and other agricultural commodities. The company is also one of the largest grain merchandisers through its extensive network of logistical assets to store and transport crops around the globe. ADM also runs a nutrition business that focuses on both human and animal ingredients and is a large producer of corn-based sweeteners, starches, and ethanol.

Bunge (BG)

Grain origination and agribusiness · $21.9B · 3m -5.0% · 12m +38.4% · 24m +19.8%

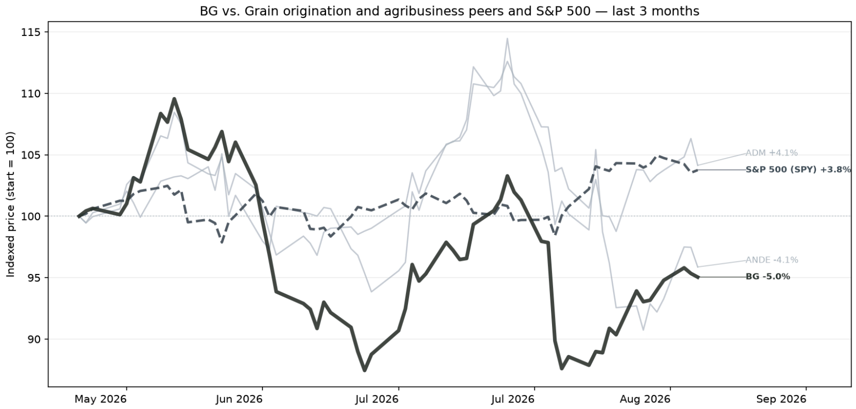
Global grain and oilseed merchant after the Viterra combination; competitor for corn origination.



This page contains no comments

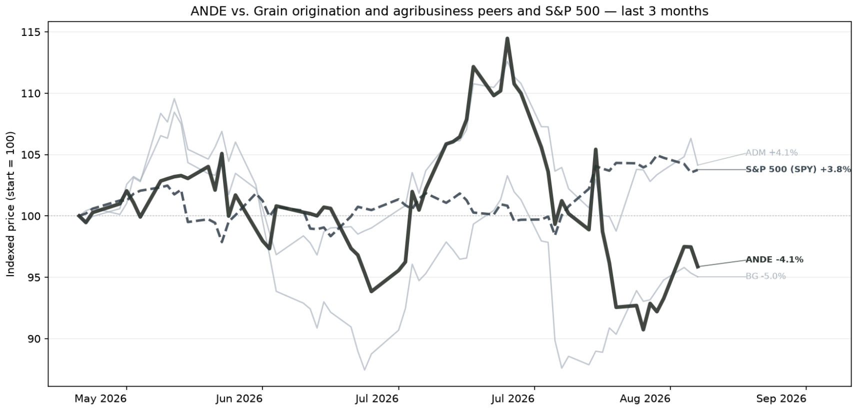
Bunge Global SA is an agribusiness solutions company, connecting farmers to consumers and delivering essential food, feed and fuel to the globe. The company segments include Soybean Processing and Refining; Softseed Processing and Refining; Other Oilseeds Processing and Refining; Grain Merchandising and Milling; and Corporate and Other. It generates maximum revenue from the Soybean Processing and Refining segment, which includes integrated business principally involved in the purchase, storage, transportation, processing, distribution, refining, marketing, and sale of soybeans and soybean related products, as well as biodiesel and fertilizer production and distribution. Geographically, the company operates in United States, Switzerland, Netherlands, and Rest of the World.

The Andersons (ANDE)

Grain origination and agribusiness, U.S. ethanol and process technology · $2.3B · 3m -4.1% · 12m +76.9% · 24m +38.9%

Google Finance

Grain elevators plus four wholly owned ethanol plants totaling about 500 million gallons a year.



Andersons Inc is an agriculture and renewable fuels company. Its operations are classified into two reportable business segments: Agribusiness, which generates maximum revenue, and Renewables. The Agribusiness segment includes merchandising and managing logistics across various commodities, as well as being a manufacturer, distributor, and retailer of agricultural and related plant nutrients. The segment specializes in the movement of physical commodities such as whole grains, grain products, feed ingredients, and domestic fuel products, among other agricultural commodities. The Renewables segment mainly produces, purchases, and sells ethanol and co-products. Geographically, the company generates maximum revenue from the United States, followed by Canada, Mexico, and other markets.

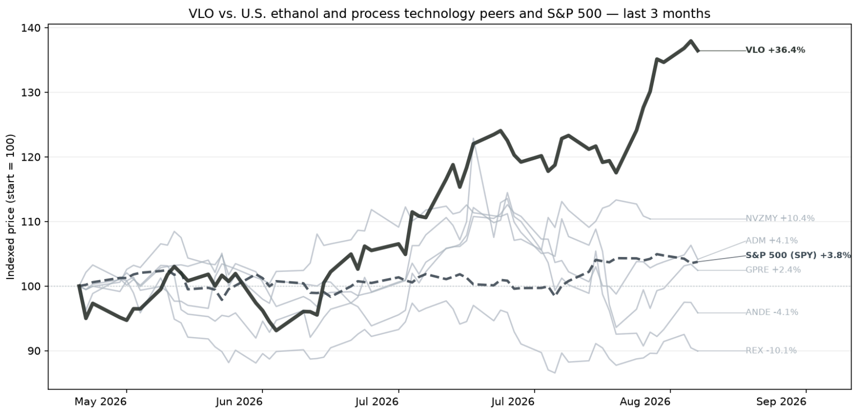
Valero Energy (VLO)

U.S. ethanol and process technology, Fuel blending, refining, and retail · $99.7B · 3m +36.4% · 12m +146.4% · 24m +145.1%

Google Finance

World's second-largest corn-ethanol producer with a distinct Ethanol segment and a major blender.

This page contains no comments



Valero Energy is one of the largest independent refiners in the United States. It operates 15 refineries, with a total throughput capacity of 3.2 million barrels a day in the US, Canada, and the United Kingdom. Valero also owns 12 ethanol plants with capacity of 1.6 billion gallons a year and holds a 50% stake in Diamond Green Diesel, which can produce 1.2 billion gallons per year of renewable diesel.

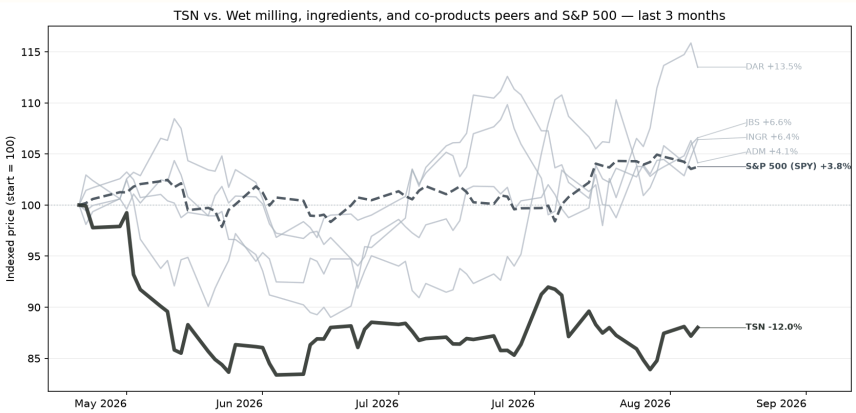
Tyson Foods (TSN)

Wet milling, ingredients, and co-products · $20.6B · 3m -12.0% · 12m +3.5% · 24m -6.2%

[Google Finance]

Largest U.S. protein company and a primary domestic sink for distillers grains.



Tyson Foods is a protein-focused food producer, selling raw chicken, beef, pork, and prepared foods. Chicken and beef are its two largest segments, composing about 40% and 30% of sales, respectively. Prepared foods constituted 18% of fiscal 2025 sales and include brands like Tyson, Jimmy Dean, Hillshire Farm, Ball Park, and Sara Lee. However, most of these are in product categories rife with competition where Tyson does not have a massive market share lead. Tyson sells some products overseas, but the international segment accounts for just 4% of total revenue. The company is an active acquirer, with more recent years' purchases focused on international and food-service markets.

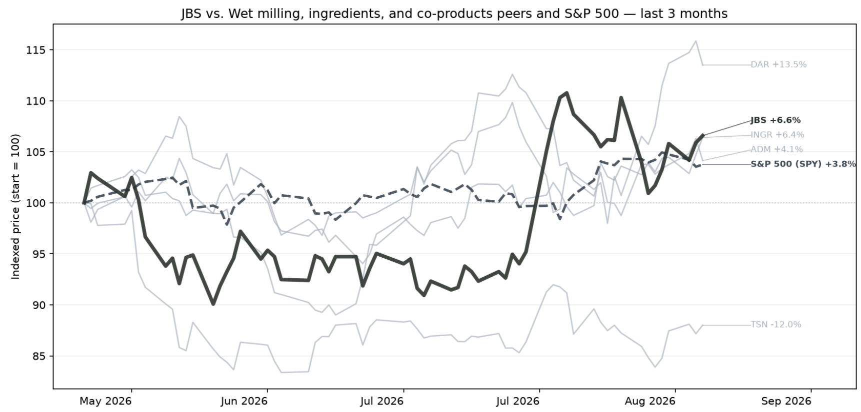
JBS (JBS)

Wet milling, ingredients, and co-products · $45.2B · 3m +6.6% · 12m -8.8% · 24m n/a

[Google Finance]

World's largest protein company and a major DDGS buyer in the U.S. and Brazil.

This page contains no comments



This page contains no comments

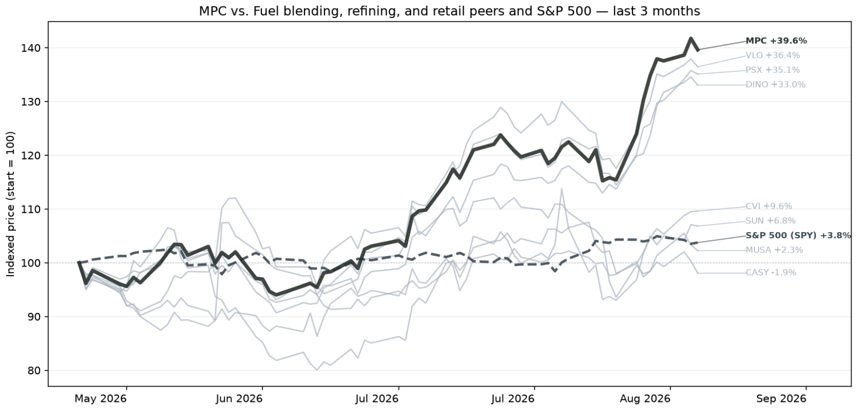
JBS NV is a protein food company, selling protein products, which include fresh and frozen cuts of beef, pork, lamb, fish, whole chickens, and chicken parts, to retailers, and foodservice companies. The food products are marketed under different brands such as Swift, Just Bare, Pilgrim's Pride, Sunnyvalley, Reserva Friboi, Great Southern, etc., globally. The company's reportable segments are Beef North America, which generates maximum revenue, Brazil, Seara, Pork USA, Pilgrim's Pride, Australia, and Others. Geographically, it derives majority of its revenue from United States of America.

Marathon Petroleum (MPC)

Fuel blending, refining, and retail · $101.3B · 3m +39.6% · 12m +117.6% · 24m +110.2%

[Google Finance]

Largest U.S. independent refiner and a major Midwest ethanol blender.



This page contains no comments

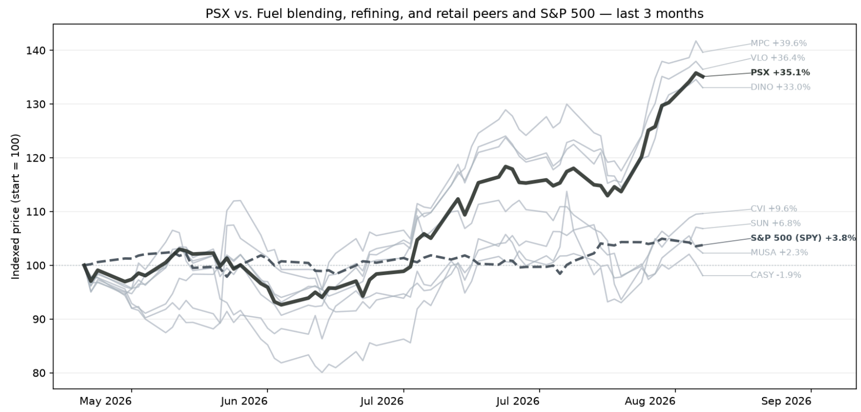
Marathon Petroleum is a leading integrated downstream and midstream energy company that operates 13 refineries in the Gulf Coast, Mid-Continent, and West Coast regions of the United States with an aggregate crude oil refining capacity of 3.0 million barrels per day. The company is one of the largest producers of renewable diesel in the US; its Dickinson, North Dakota facility has the capacity to produce 184 million gallons per year, and its Martinez, California, joint venture facility (a 50/50 partnership with Neste) reached its full capacity of 730 million gallons per year in late 2024. Marathon also owns the general partner and approximately 64% of MPLX LP, a large-cap master limited partnership that owns and operates midstream energy infrastructure and logistics assets.

Phillips 66 (PSX)

Fuel blending, refining, and retail · $96.7B · 3m +35.1% · 12m +96.1% · 24m +83.0%

Google Finance

Large blender and marketer with West Coast renewable-diesel capacity.



This page contains no comments

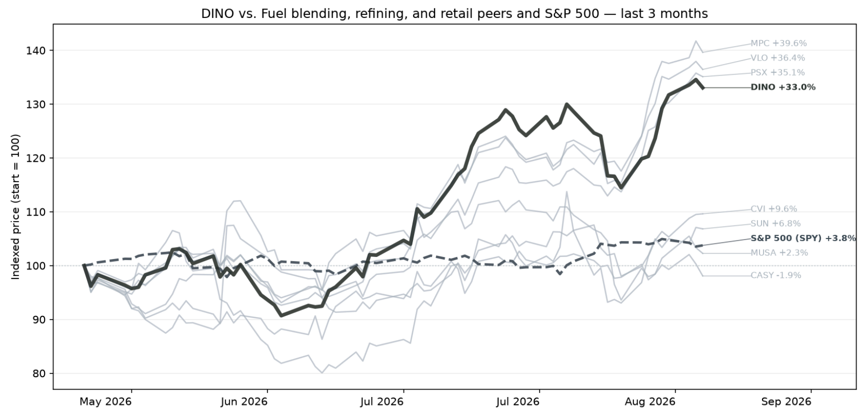
Phillips 66 is an independent refiner that owns or holds interest in 10 refineries with a total crude throughput capacity of 2.0 million barrels per day, or mmb/d, at the end of 2025. The midstream segment comprises extensive transportation and NGL processing assets. It includes 70,000 miles of crude oil, refined petroleum product, NGL and natural gas pipeline systems, and a comprehensive set of refined petroleum product, NGL and crude oil terminals, gathering and processing plants and fractionation facilities and various other storage and loading facilities. Its CPChem chemical joint venture operates facilities primarily in the United States and the Middle East and produces olefins and polyolefins.

HF Sinclair (DINO)

Fuel blending, refining, and retail · $16.8B · 3m +33.0% · 12m +103.1% · 24m +100.2%

[Google Finance]

Independent Mid-Continent and Rockies refiner with renewable diesel and RFS blending obligations.



HF Sinclair is an integrated petroleum refiner that owns and operates seven refineries serving the Rockies, midcontinent, Southwest, and Pacific Northwest, with a total crude oil throughput capacity of 678,000 barrels per day. It can produce 380 million gallons of renewable diesel annually. It operates a marketing business with over 350 distributors and 1,700 branded wholesale sites across 30 states. It also owns and operates 4,500 miles of petroleum product pipelines and terminals principally in the Southwestern United States.

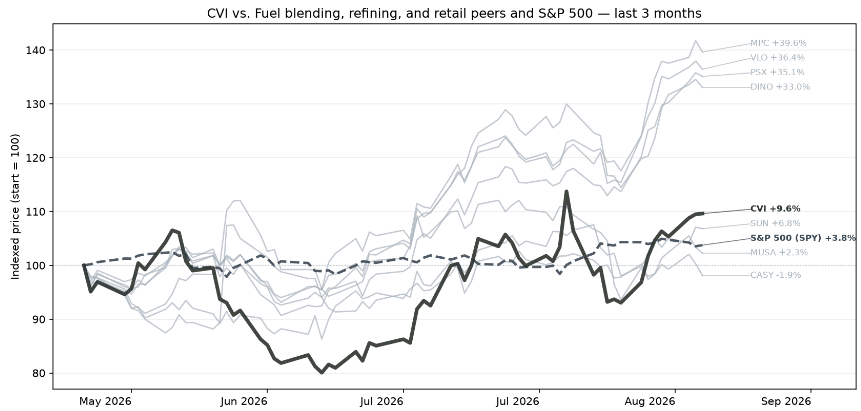
CVR Energy (CVI)

Fuel blending, refining, and retail · $3.7B · 3m +9.6% · 12m +27.0% · 24m +50.7%

Google Finance

Coffeyville, Kansas refiner in the corn complex with renewable diesel and a nitrogen affiliate.

This page contains no comments



CVR Energy Inc is a holding company that engages in petroleum refining and nitrogen fertilizer manufacturing through its subsidiaries. Subsidiaries include several complex, full-coking crude oil refineries, along with a crude oil gathering system, pipelines, storage tanks, and marketing and supply. The company's refineries can process blends of a variety of crude oil ranging from heavy sour to light sweet crude oil. Crude oil for CVR's refineries is supplied through its wholly-owned gathering system and pipeline. From its refineries, CVR supplies products through tanker trucks directly to customers located in close geographic proximity and customers at throughput terminals. The company's customers include retailers, railroads, and farm cooperatives.

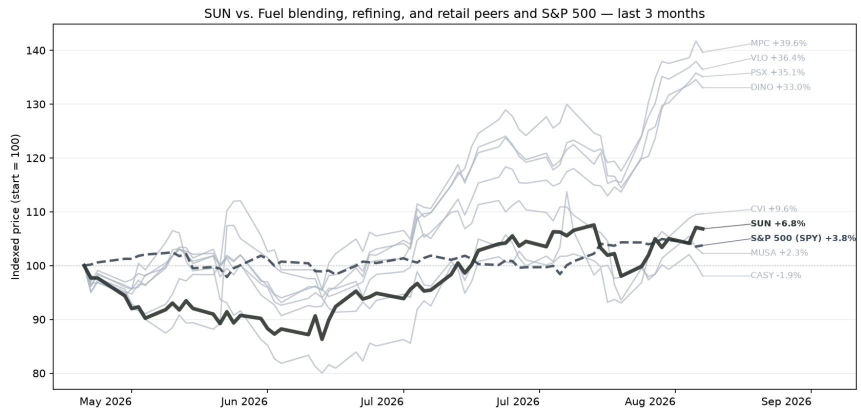
Sunoco LP (SUN)

Fuel blending, refining, and retail · $14.5B · 3m +6.8% · 12m +47.6% · 24m +46.2%

Google Finance

Fuel distributor and terminal operator that moves finished gasoline and ethanol.

This page contains no comments



This page contains no comments

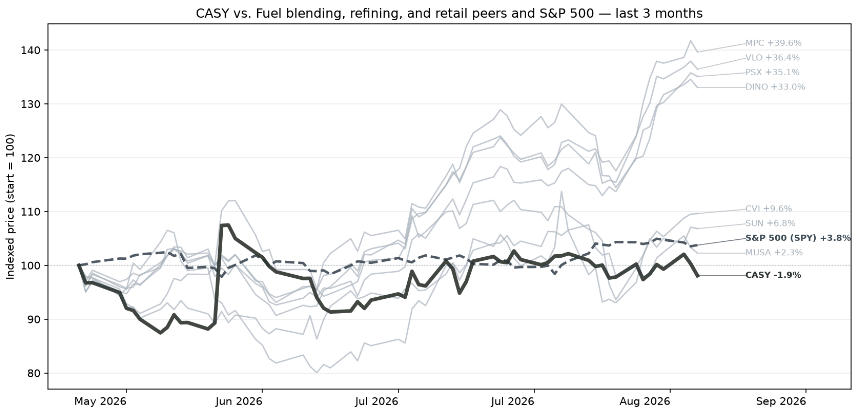
Sunoco LP is engaged in the distribution of motor fuels to independent dealers, distributors, and other commercial customers as well as the distribution of motor fuels to end-use customers at retail sites operated by commission agents. It is a growth-oriented master limited partnership (MLP) that operates as a wholesale and retail fuel distributor in the United States. The firm operates through the Fuel Distribution; Pipeline Systems; Refinery and Terminals segments. It generates the majority of its revenue from the Fuel Distribution segment. It distributes motor fuel to convenience stores, dealers, and commercial customers in various states.

Casey's General Stores (CASY)

Fuel blending, refining, and retail · $30.9B · 3m -1.9% · 12m +62.9% · 24m +123.1%

Google Finance

Corn Belt convenience-store chain with high E10/E15/E85 exposure.



Casey's General Stores Inc, along with its subsidiaries, operates convenience stores mainly under the names Casey's, GoodStop (by Casey's), and Casey's General Store throughout various states in the USA, approximately half of which are located in Iowa, Missouri, and Illinois. These stores offer a broad selection of food items (which includes prepared foods such as regular and breakfast pizza, donuts, hot breakfast items, and hot and cold sandwiches), beverages, tobacco and nicotine products, groceries, health and beauty aids, automotive products, and other non-food items. The majority of the company's revenue is mainly derived from the retail sale of fuel and the products offered inside its stores.

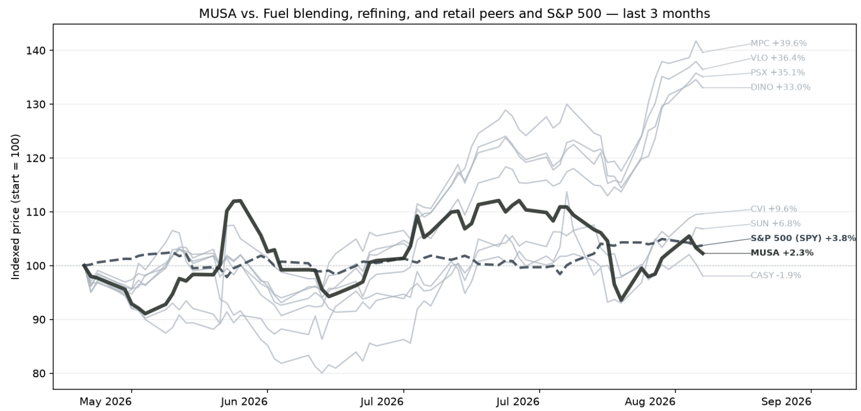
Murphy USA (MUSA)

Fuel blending, refining, and retail · $10.4B · 3m +2.3% · 12m +44.1% · 24m +11.3%

[Google Finance]

High-volume fuel retailer and national ethanol blender.

This page contains no comments



Murphy USA Inc is mainly engaged in the marketing of retail motor fuel products and convenience merchandise through a network of several retail stores in the Southwest, Southeast, Midwest, and Northeast United States. The majority of Murphy USA's stores are located in proximity to Walmart Supercenters, but it also operates standalone stores that market gasoline and other products under the Murphy USA, Murphy Express, and QuickChek brands. In addition, the company also markets fuel to unbranded wholesale customers through a mixture of company-owned and third-party product distribution terminals and pipeline positions. The firm generates maximum revenue through retail sales of petroleum products, and the rest from merchandise sales and wholesale of petroleum products.

Neste (NTOIY)

Advanced biofuels and SAF · n/a · 3m +3.5% · 12m +97.5% · 24m +54.8%

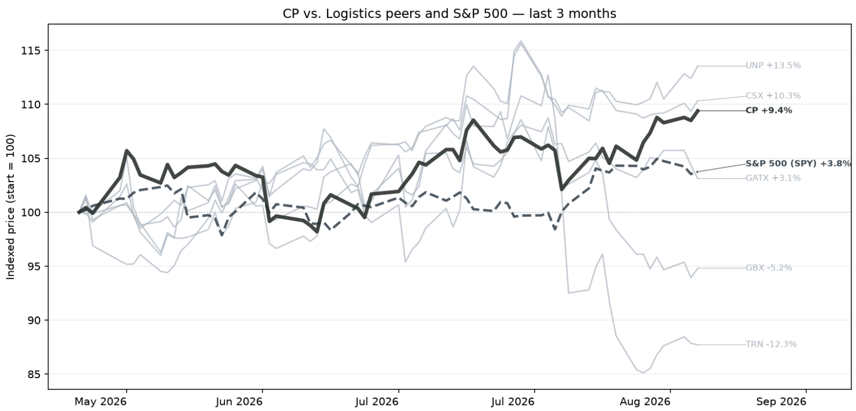
North-south railroad for Midwest corn and ethanol to the Gulf and Mexico.

This page contains no comments



Canadian Pacific Kansas City is a Class I railroad operating on tracks that span most of Canada and into parts of the Midwestern and Northeastern United States. Following the April 2023 Kansas City Southern merger, CPKC operates new single-linehaul services from Canada and the Upper Midwest down through Texas, the Gulf of Mexico, and into Mexico. It also hauls cross-border and intra-Mexico freight via operating concessions on more than 3,000 miles of rail in Mexico. CPKC hauls shipments of grain, intermodal containers, energy products (like crude and frac sand), chemicals, plastics, coal, fertilizer and potash, automotive products, and a diverse mix of other merchandise.

GATX (GATX)

Logistics · $6.2B · 3m +3.1% · 12m +10.1% · 24m +27.2%

Google Finance

Largest public railcar lessor of ethanol tank cars and grain/DDGS hoppers.

GATX Corp leases transportation assets, including railcars, aircraft spare engines, and tank containers, to customers in North America, Europe, and India. The company's reportable business segments are: Rail North America, Rail International, Engine Leasing, and Other. The majority of its revenue is generated from the Rail North America segment, which is composed of the company's operations in the United States, Canada, and Mexico. This segment mainly provides railcars pursuant to full-service leases under which it maintains the railcars, pays ad valorem taxes and insurance, and provides other ancillary services.
