Weekly Corn and Ethanol Intel Report

> **Week of October 15, 2026**
> Market data through: October 14, 2026
> Narrative created: October 16, 2026
> Nearby corn: $4.808/bu (-$0.195 (-3.9%) week)

Weekly review of corn, ethanol, energy, co-product, policy, and related public-company performance for commodities risk managers at U.S. ethanol plants.

Strategy Narrative

Nearby futures from Yahoo Finance. Nearby corn is the market's current perception of yield and demand risk.

Contract	Last	Week change	As of
Nearby corn	$4.808/bu	-$0.195 (-3.9%)	October 14, 2026
RBOB gasoline	$3.260/gal	-0.057 (-1.7%)	October 14, 2026
Henry Hub	$3.198/MMBtu	+0.030 (+0.9%)	October 14, 2026

- 1. USDA replaced yield anxiety with an 11.3% stocks-to-use cushion
- 2. EPA proposed full reallocation, but the compliance-year split still matters
- 3. Returning production ended the three-week ethanol-stock draw
- 4. Brazil’s larger acreage outlook extends the bearish corn-supply horizon
- 5. DOE opened the 45Z route for pathways outside the published table

Executive View

- **USDA decisively enlarged the corn balance sheet, and futures confirmed lower procurement risk.** USDA raised 2026 yield **2.7 bushels to 181.2 bushels per acre**, production **234 million bushels to 16.034 billion**, and 2026/27 carryout **282 million bushels to 1.849**

billion, or roughly 11.3% of use. Nearby corn closed October 14 at **$4.808 per bushel, down $0.195, or 3.9%, from October 8**. The selloff is consistent with a genuine supply reset, not merely harvest pressure. (USDA WAOB, *World Agricultural Supply and Demand Estimates—October 2026*, October 9, 2026; USDA NASS, *Crop Production*, October 9, 2026.) (esmis.nal.usda.gov)

- **Demand increases absorbed less than one-third of USDA's additional supply.** USDA raised corn-for-ethanol use **50 million bushels to 5.650 billion**, feed and residual use 50 million, and exports 25 million. Those revisions validate demand but leave substantially more residual supply, lowering futures-cost risk while encouraging higher industry grind. (esmis.nal.usda.gov)
- **EPA's full SRE-reallocation proposal reduced policy downside but did not yet change operative obligations.** EPA proposed reallocating an additional **770 million RINs** associated with 2025 exemptions, either equally across 2026 and 2027 or entirely into 2027. The proposal is constructive for RINs and statutory biofuel demand, but timing remains uncertain until a final rule. (EPA, *Proposed Reallocation of Additional 2025 Small Refinery Exemptions*, October 13, 2026.) (epa.gov)
- **The maintenance-led ethanol tightening stalled.** Production increased **12,000 barrels per day to 1.065 million**, inventories rebuilt **199,000 barrels to 23.942 million**, and EIA refiner and blender ethanol inputs rose only **2,000 barrels per day to 899,000**. Stocks remained 5.8% above last year, with Gulf Coast inventories 30.4% higher. (EIA, weekly data released October 15, 2026; DTN, *EIA: U.S. Ethanol Stocks Expand, Up 5.8% on Year*, October 15, 2026.) (eia.gov)
- **Energy provided no offsetting margin lift.** RBOB fell **$0.057 to $3.260 per gallon, down 1.7%**, while Henry Hub increased **$0.030 to $3.198 per MMBtu, up 0.9%**. Gasoline inventories also increased 3.518 million barrels to **208.262 million**, reinforcing the softer output-side signal. (eia.gov)
- **Overall margin and risk conditions improved modestly:** the 3.9% corn decline outweighed weaker gasoline, slightly higher gas and the ethanol-stock build. The benefit is principally lower feedstock cost—not stronger ethanol selling conditions.

Exposure	Current signal	Change from last week	Horizon	Confidence	Main driver
Corn procurement	Larger crop and 1.849-billion-bushel carryout	Improved materially	Harvest–Q2 2027	High	Yield raised to 181.2; corn −3.9%
Ethanol selling	Production recovering; stocks rebuilt	Deteriorated modestly	1–4 weeks	High	199,000-barrel stock build

Exposure	Current signal	Change from last week	Horizon	Confidence	Main driver
RFS/RINs	Full additional reallocation proposed	Improved strategically	2026–27 compliance	Medium-high	770 million RIN proposal
Natural gas	Slightly higher futures	Deteriorated marginally	1–3 months	High	Henry Hub +0.9%
45Z/novel pathways	PER application route now operational	Improved selectively	Months–years	Medium	DOE emissions-value process
Overall plant margin	Lower corn dominates weaker outputs	Improved modestly	Near term	Medium-high	Feedstock relief versus softer RBOB

The week's thesis is a **clear transition from a tight-corn regime to a more balanced procurement environment**, with USDA's survey-based supply increase validated by the tape. That relief does not automatically become wider crush margins: USDA simultaneously raised assumed ethanol grind, while EIA showed returning production already interrupting the inventory draw. Existing 45Z treatment of standard corn ethanol, regenerative-ag documentation and strong monthly ethanol exports remain material but are not re-narrated; the new developments are the DOE pathway process and EPA's SRE proposal.

1. USDA replaced yield anxiety with an 11.3% stocks-to-use cushion

What happened

USDA incorporated the 2.095-billion-bushel September 1 stock count and unexpectedly raised yield from 178.5 to **181.2 bushels per acre**. Production increased to **16.034 billion bushels**, the second-highest U.S. crop on record. Total supply rose 407 million bushels from September, while total use increased 125 million, leaving **1.849 billion bushels** of ending stocks. USDA also lowered its season-average farm-price forecast by $0.10 to $4.70. (esmis.nal.usda.gov)

Harvest evidence available after the report did not challenge that framework. Corn harvest reached **33% by October 11**, versus a 39% five-year average, while condition improved two points to 56% good-to-excellent. Iowa remained only 14% harvested versus 34% normally, but its official yield was

among those forecast at a record. (USDA NASS, *Crop Progress*, October 13, 2026.) (esmis.nal.usda.gov)

Why it matters

The report refutes the prior assumption that late-season condition deterioration would force yield lower. Even after higher ethanol, feed and export use, USDA added 282 million bushels to carryout. The 19.5-cent futures decline shows the market accepted most of that change rather than treating it as an implausible survey outlier.

Risk-manager implication

Corn futures exposure improved materially through winter and spring. Harvest basis and storage constraints can still create local divergence, particularly where harvest remains delayed, but the national balance no longer requires the same scarcity premium. The offset is competitive: cheaper corn supports higher plant utilization, potentially transferring part of the feedstock benefit into lower ethanol values.

Watch next

Whether expanding harvest data sustain 181.2 bushels and whether USDA continues raising use enough to prevent carryout from moving toward 2 billion bushels.

---

2. EPA proposed full reallocation, but the compliance-year split still matters

What happened

EPA proposed reallocating 100% of the additional 2025 SRE volume above what was assumed in the final 2026–27 RFS rule. One option would add approximately half of the **770 million RINs** to each compliance year; the other would place all of it in 2027. EPA may also extend the March 31, 2027 compliance deadline if it revises the 2026 standards. Written comments close December 4. (epa.gov)

Why it matters

The proposal substantially reduces the probability that the August exemptions permanently destroy statutory demand. However, allocating everything to 2027 would defer the nearer-term RIN and blending impact. This is therefore stronger than an advocacy commitment but weaker than an operative final volume.

Risk-manager implication

The directional signal is supportive for D6 RIN value and ethanol demand expectations, with medium confidence. Plants should not book a 2026 physical-demand increase until EPA chooses the allocation and finalizes revised percentage standards.

Watch next

The November 4 hearing, stakeholder arguments over the compliance-year split and the final rule's treatment of the 2026 deadline.

---

3. Returning production ended the three-week ethanol-stock draw

EIA ethanol balance	Week ended Oct. 2	Week ended Oct. 9	Change
Production, million bpd	1.053	1.065	+0.012
Inventories, million bbl	23.743	23.942	+0.199
Refiner/blender inputs, million bpd	0.897	0.899	+0.002

(EIA, weekly data released October 15, 2026.) (eia.gov)

Why it matters

September's maintenance cuts removed 1.477 million barrels from inventories, but the first modest production increase was enough to produce a national build. East Coast stocks increased 327,000 barrels and Gulf stocks rose 91,000 to **5.016 million**, partly offset by a Midwest draw. The physical market has improved from early September, but it has not become tight. (dtnpf.com)

Risk-manager implication

Cheaper corn improves the incentive to run precisely as domestic ethanol inputs remain near 0.90 million barrels per day and RBOB weakens. Prompt ethanol selling risk therefore deteriorated modestly. Plants should test export and terminal clearance before translating USDA's lower feedstock cost into sustained high utilization.

---

4. Brazil's larger acreage outlook extends the bearish corn-supply horizon

Conab's first 2026/27 survey projected Brazilian corn production at **148 million metric tons, up 2.4%**, on 23.7 million hectares, up 4.9%. First-crop area is expected to rise 10.7%. Conab also expects corn use for ethanol to increase domestic consumption by 6.6%. (Conab, *First 2026/27 Grain Crop Survey*, October 15, 2026.) (gov.br)

Risk-manager implication

The acreage expansion adds medium-term pressure to global corn and U.S. export values, particularly from mid-2027. Brazil's growing corn-ethanol sector absorbs part of that supply and creates additional ethanol and co-product competition. The net signal is modestly bearish corn beyond the U.S. harvest, with weather confidence still low.

---

5. DOE opened the 45Z route for pathways outside the published table

DOE began accepting emissions-value requests from producers whose fuel type, feedstock or pathway is absent from the applicable 45Z table. Applicants generally need engineering analysis consistent with a Class 3 FEED study before using DOE's value to petition Treasury for a provisional emissions rate. DOE established no fixed review deadline. (DOE, *45Z Emissions Value Request*, accessed October 15, 2026.) (energy.gov)

Risk-manager implication

This resolves an administrative gap for novel feedstocks and process configurations, but it does **not** change the representative value of standard U.S. corn-starch ethanol, which already has a published methodology. The commercial benefit is project-specific optionality; the FEED requirement and open-ended review period limit near-term credit recognition.

Strategic Synthesis

USDA's larger crop and carryout are now the controlling plant-cost regime. Policy also moved constructively, but neither the SRE proposal nor DOE's pathway process supplies immediate representative cash margin. The principal near-term tension is that lower corn encourages production while ethanol inventories, gasoline linkage and domestic inputs argue for discipline. Plants should capture procurement relief without assuming that the entire corn decline will remain in the crush.

What I'm Watching Next

- **October 21, 2026:** EIA ethanol and petroleum balance—whether inventories continue rebuilding.

- **November 4, 2026:** EPA virtual hearing on additional 2025 SRE reallocation.
- **November 10, 2026:** USDA WASDE and Crop Production—the next test of the 181.2-bushel yield and 1.849-billion-bushel carryout.
- **December 4, 2026:** EPA comment deadline for the reallocation proposal. (epa.gov)

Bottom Line

The decisive weekly change was USDA's increase to a **181.2-bushel yield and 1.849-billion-bushel carryout**, validated by nearby corn's **3.9% decline to $4.808**. Corn procurement risk improved materially, but ethanol selling now requires the closest attention because returning output has already ended the maintenance-driven inventory draw. The next EIA balance will show whether cheaper corn is beginning to overwhelm product clearance.

Company Overviews

Corteva (CTVA)

Crop inputs, equipment, and irrigation · $52.4B · 3m -84.1% · 12m -78.4% · 24m -76.6%

Google Finance

Largest U.S. corn-seed franchise (Pioneer) and a primary input cost for Corn Belt acres.

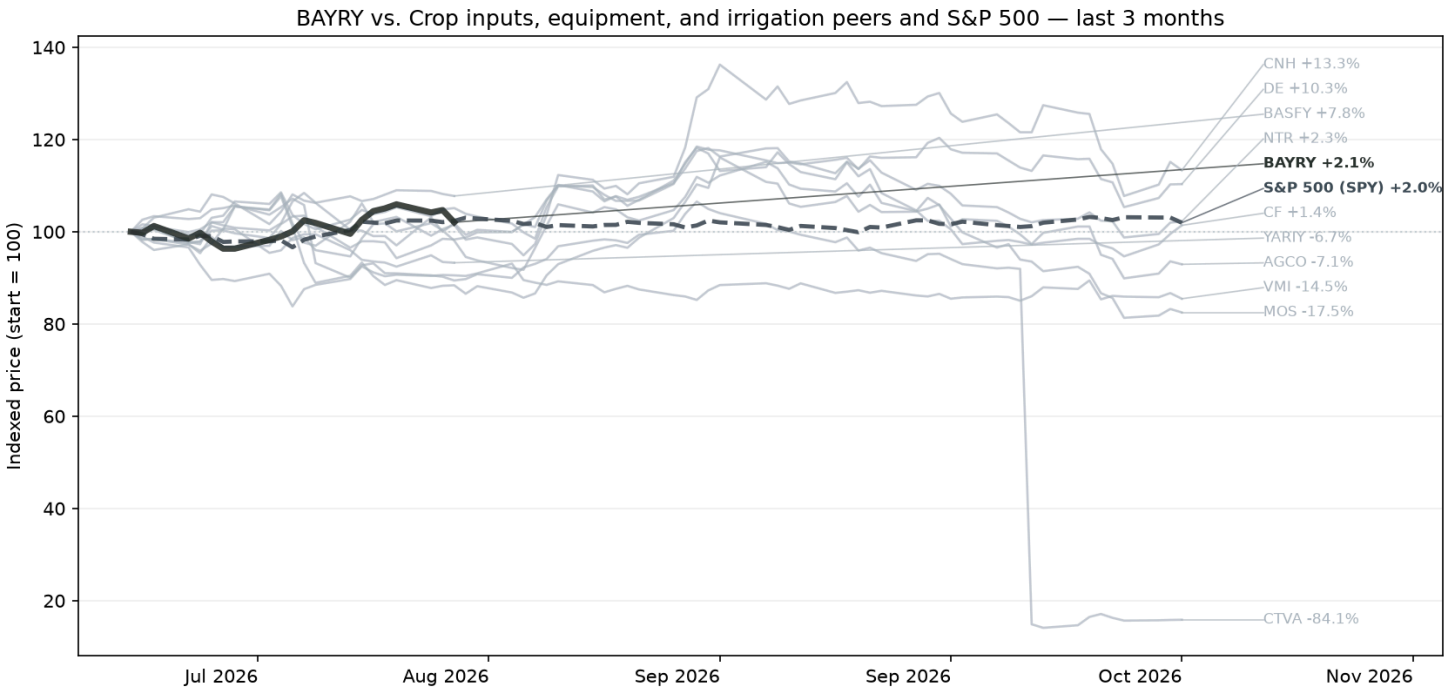

Corteva is an agricultural inputs pure play that was formed in 2019 when it was spun off from DowDuPont. The company is a leader in the development of new seed and crop protection products. Seeds generate the majority of profits with the remainder coming from crop protection products. Corteva plans to spin off its seeds business in late 2026. The seeds business will be named Vylor, while the crop protection business will retain the Corteva name and be a pure-play crop protection company following the divestiture. Corteva operates globally, but around half of revenue comes from North America.

Bayer (BAYRY)

Crop inputs, equipment, and irrigation · n/a · 3m +2.1% · 12m +76.3% · 24m +92.4%

Google Finance

Dekalb and former Monsanto corn-seed brands; together with Corteva dominates U.S. corn seed.

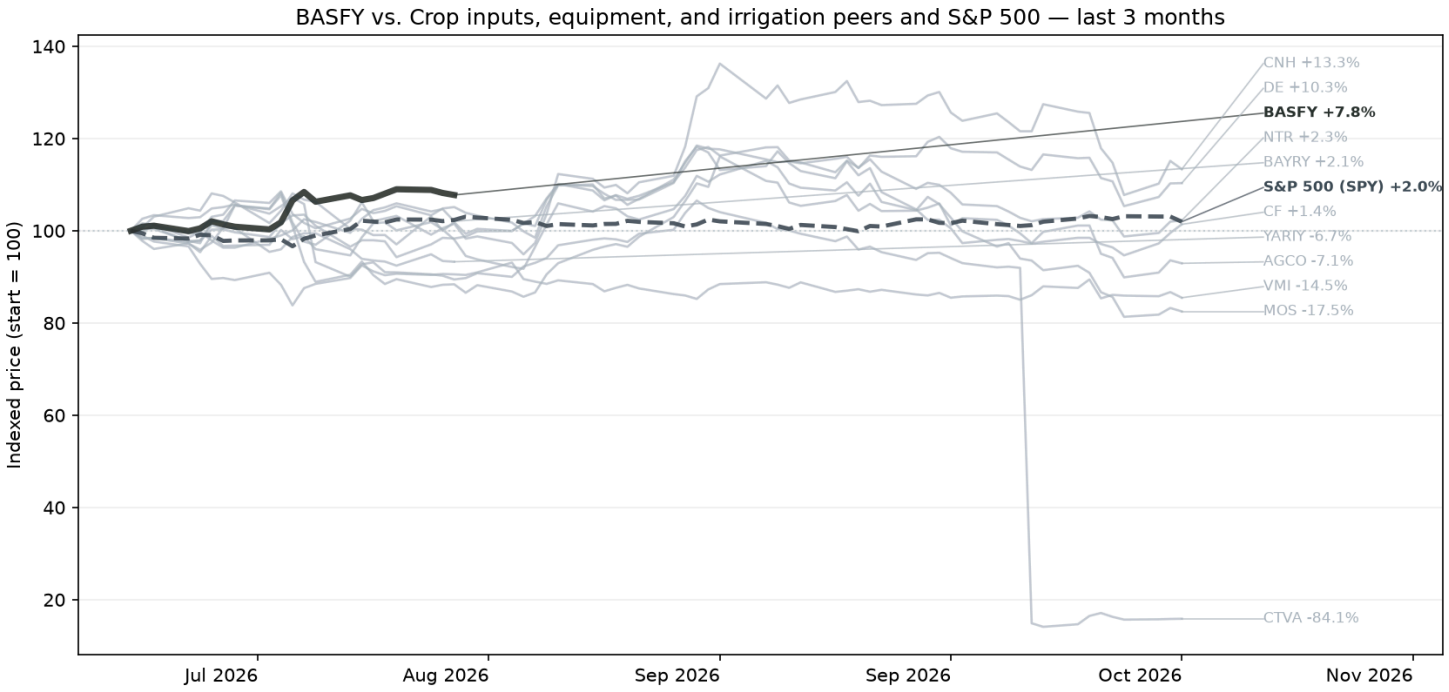

BAYER AG S/ADR

BASF (BASFY)

Crop inputs, equipment, and irrigation · n/a · 3m +7.8% · 12m +19.9% · 24m +18.4%

Google Finance

Crop-protection chemistry used on U.S. corn acres.

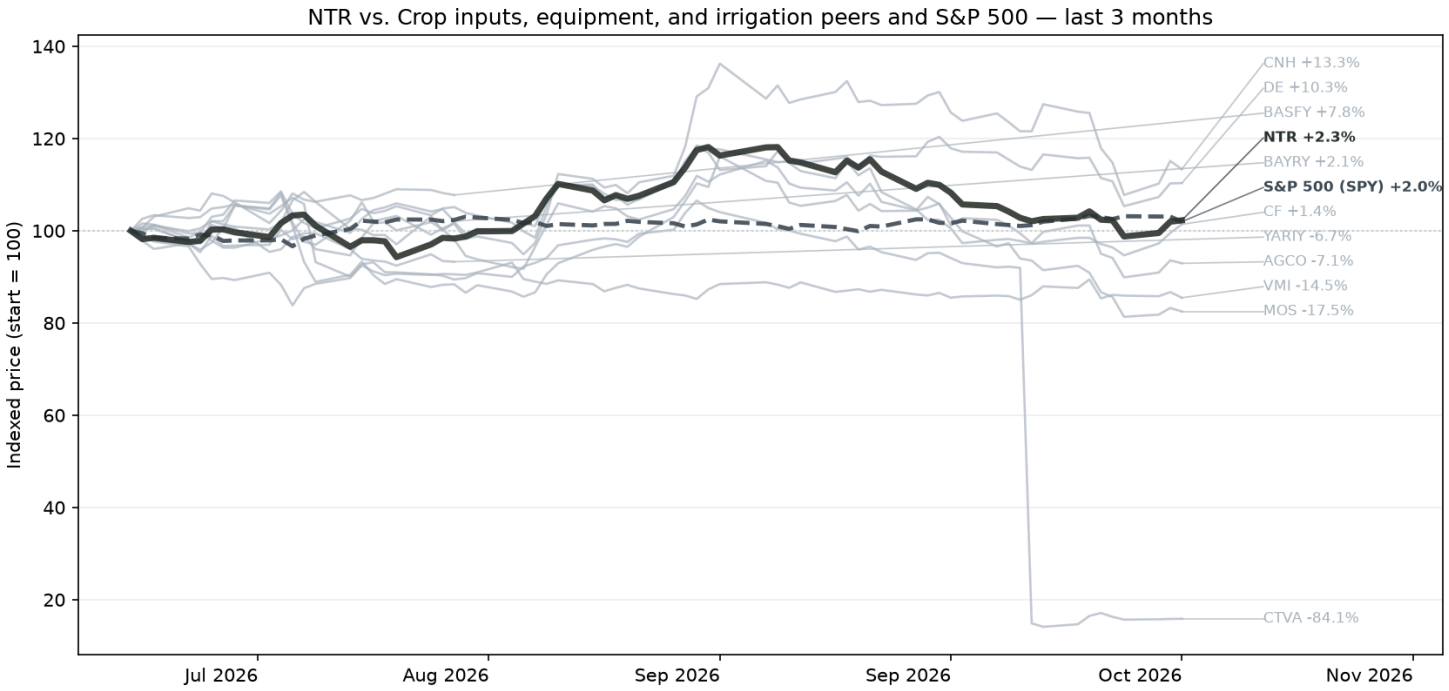

BASF SE S/ADR

Nutrien (NTR)

Crop inputs, equipment, and irrigation · $33.6B · 3m +2.3% · 12m +20.2% · 24m +45.9%

Google Finance

Largest North American agricultural retailer and a major potash and nitrogen producer.

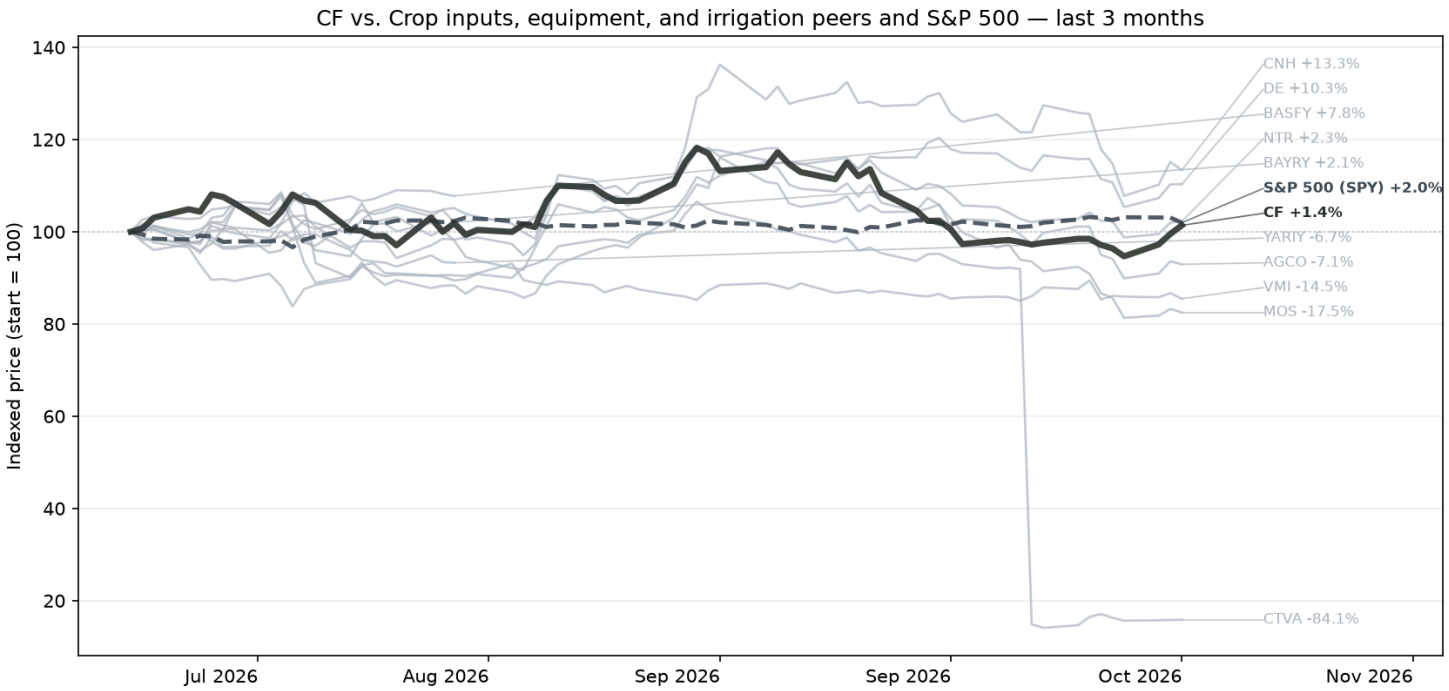

Created in 2018 as a result of the merger between PotashCorp and Agrium, Nutrien is the world's largest fertilizer producer by capacity. Nutrien produces the three main crop nutrients—nitrogen, potash, and phosphate—although its main focus is potash, where it is the global leader in installed capacity with a roughly 20% market share. The company is also the largest agricultural retailer in North America and Australia, selling fertilizers, crop chemicals, seeds, and services directly to farm customers through its brick-and-mortar stores and online platforms.

CF Industries (CF)

Crop inputs, equipment, and irrigation · $18.0B · 3m +1.4% · 12m +39.8% · 24m +40.4%

Google Finance

Nitrogen fertilizer producer; corn is the crop that most moves UAN and urea demand.

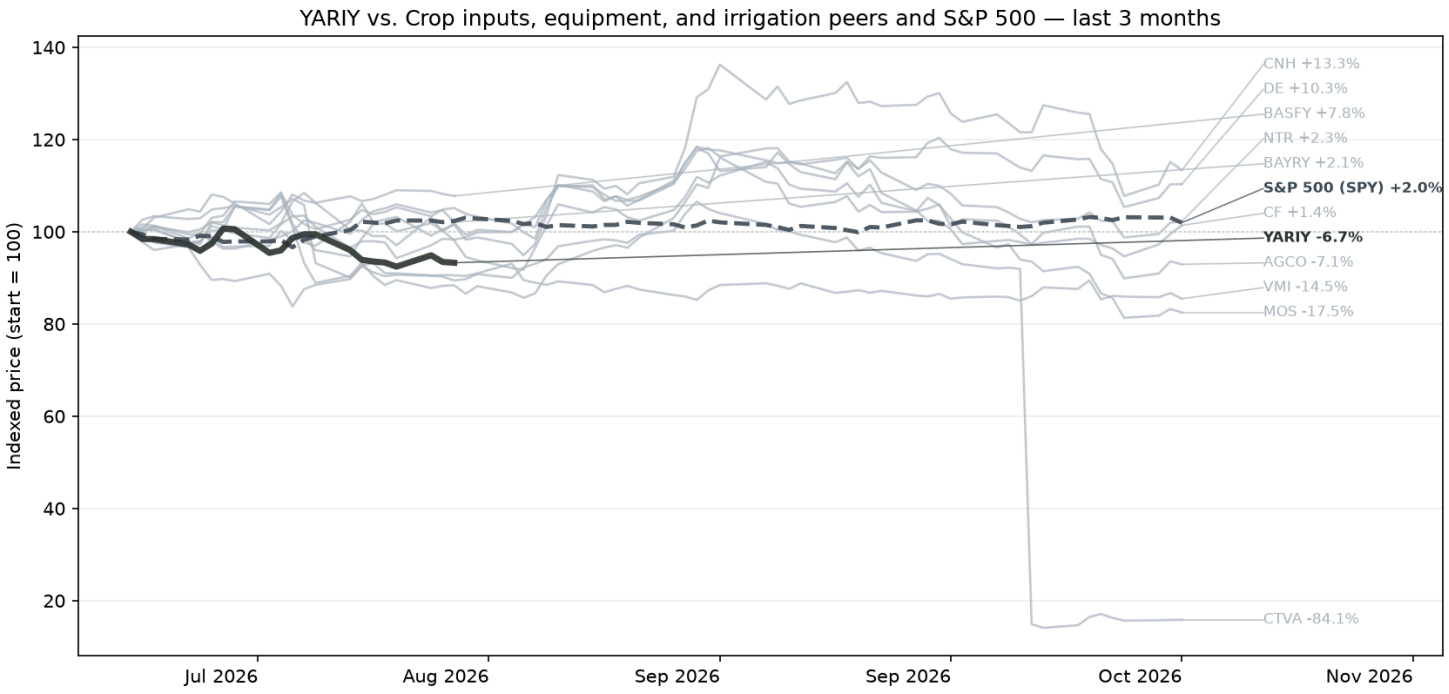

CF Industries is a leading producer and distributor of nitrogen, which is primarily used in fertilizers. The company operates nitrogen manufacturing plants primarily in North America. CF also produces nitrogen in the United Kingdom and holds a joint venture interest in a nitrogen production facility in Trinidad and Tobago. CF makes nitrogen primarily using low-cost US natural gas as its feedstock, making the company one of the lowest-cost nitrogen producers globally. It is also investing in carbon-free blue and green ammonia, which can be used as an alternative fuel to hydrogen or as a means to transport hydrogen.

Yara International (YARIY)

Crop inputs, equipment, and irrigation · n/a · 3m -6.7% · 12m +17.6% · 24m +40.4%

Google Finance

Global nitrogen producer that sets the international urea and ammonia reference.

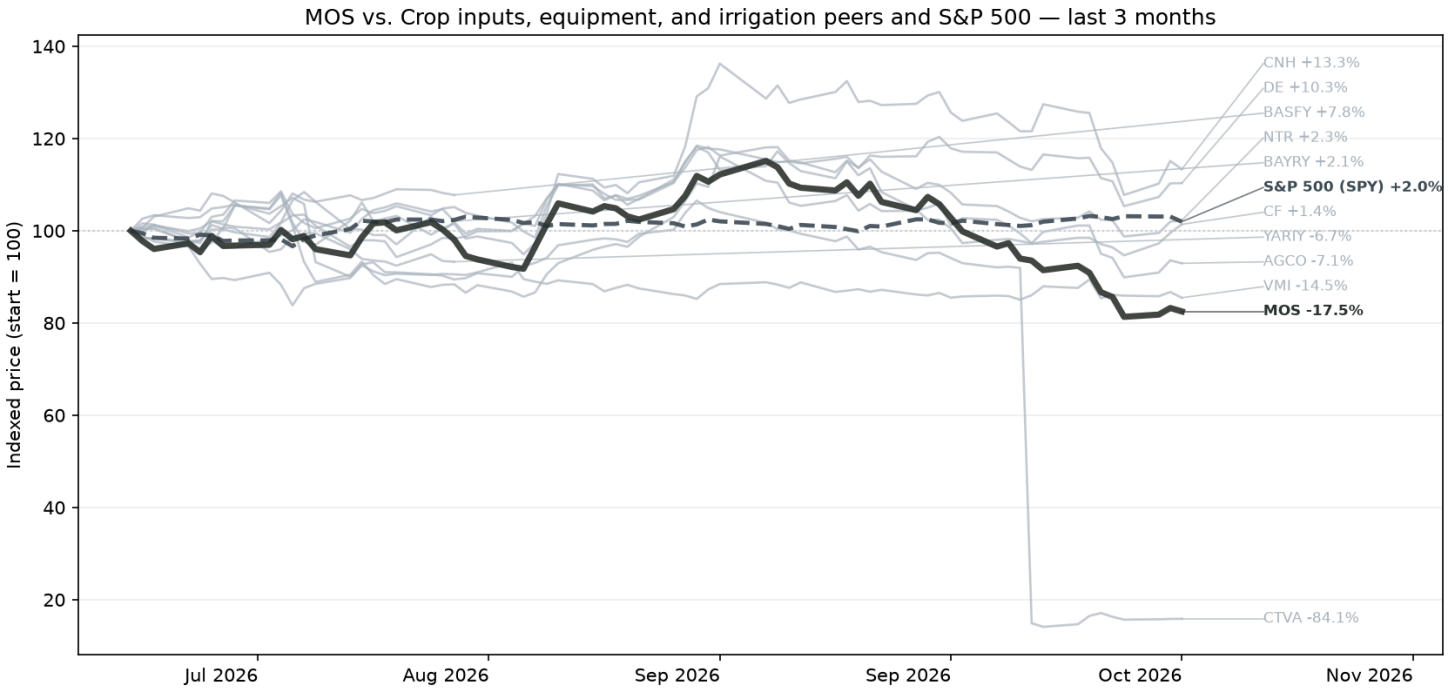

YARA INTL ASA S/ADR

Mosaic (MOS)

Crop inputs, equipment, and irrigation · $7.1B · 3m -17.5% · 12m -36.2% · 24m -25.5%

Google Finance

Phosphate and potash producer that completes corn production budgets.

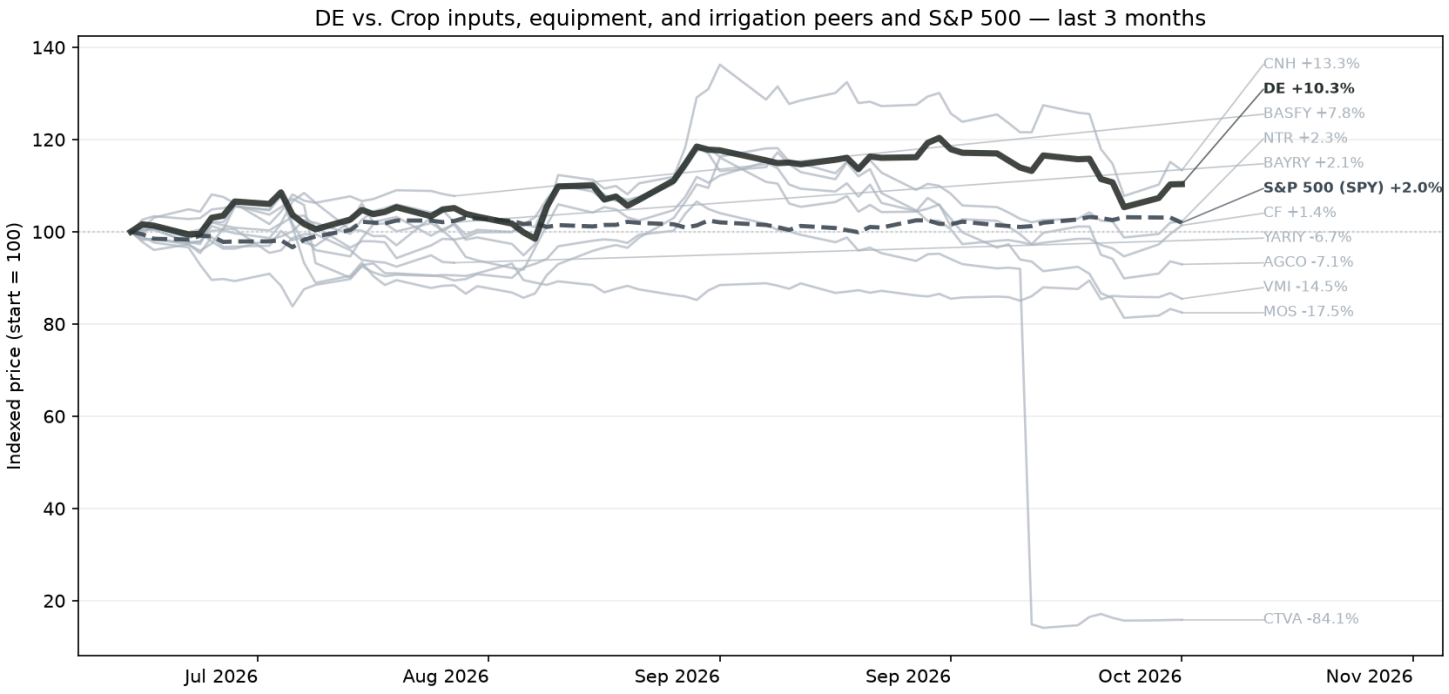

Mosaic is one of the largest phosphate and potash producers in the world. The company's assets include phosphate rock mines in the US and potash mines in Canada. Mosaic also runs a large fertilizer distribution operation in Brazil through its Mosaic Fertilizantes business.

Deere (DE)

Crop inputs, equipment, and irrigation · $156.7B · 3m +10.3% · 12m +45.0% · 24m +61.8%

Google Finance

Dominant North American farm-equipment maker for corn planting, harvest, and grain handling.

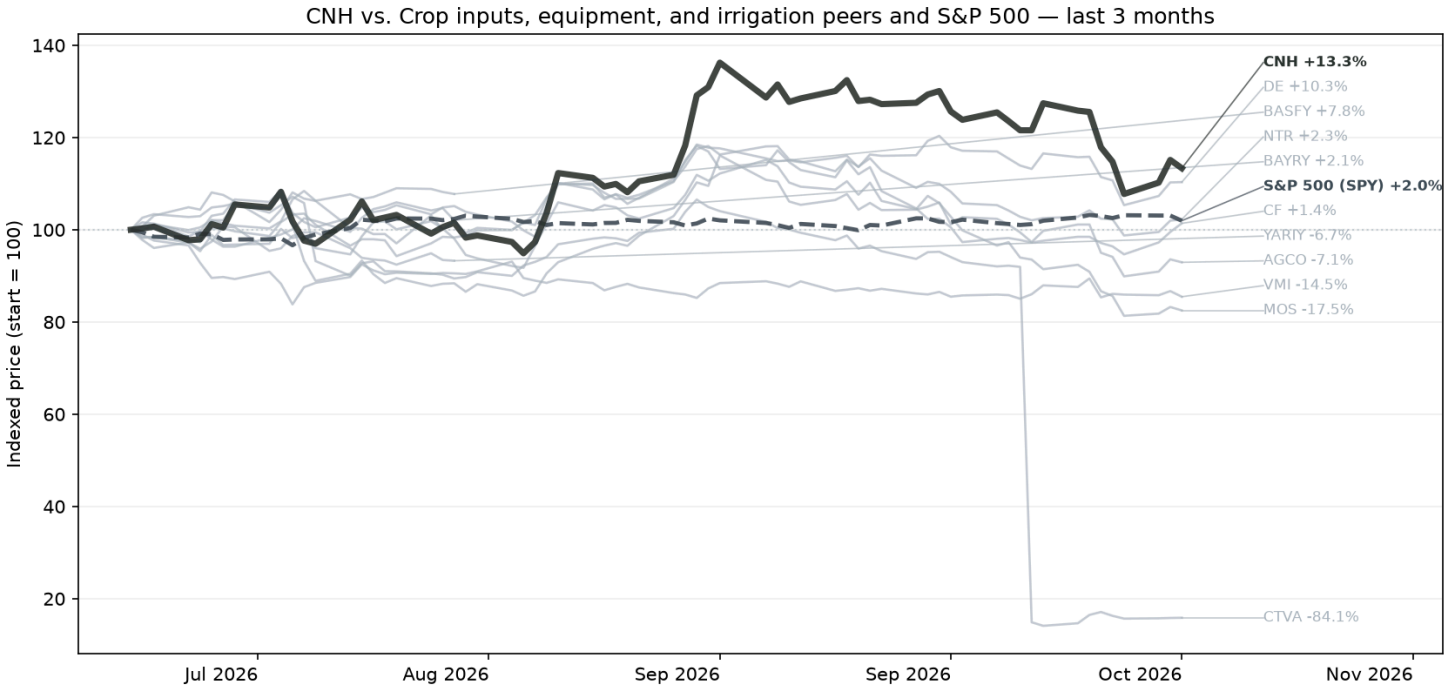

Deere is the world's leading manufacturer of agricultural equipment and a major producer of construction machinery. The company is divided into four reporting segments: production & precision agriculture, or PPA, small agriculture & turf, or SAT, construction & forestry, or CF, and financial services, or FS, its captive finance subsidiary. The core PPA business is the largest contributor to sales and profits by far. Geographically, Deere sales are 60% US/Canada, 17% Europe, 14% Latin America, and 9% rest of the world. Deere goes to market through a robust dealer network that includes over 2,000 dealer locations in North America with reach into over 100 countries. John Deere Financial provides retail financing for machinery to its customers and wholesale financing for dealers.

CNH Industrial (CNH)

Crop inputs, equipment, and irrigation · $16.5B · 3m +13.3% · 12m +17.0% · 24m +9.3%

Google Finance

Case IH and New Holland farm equipment serving corn growers.

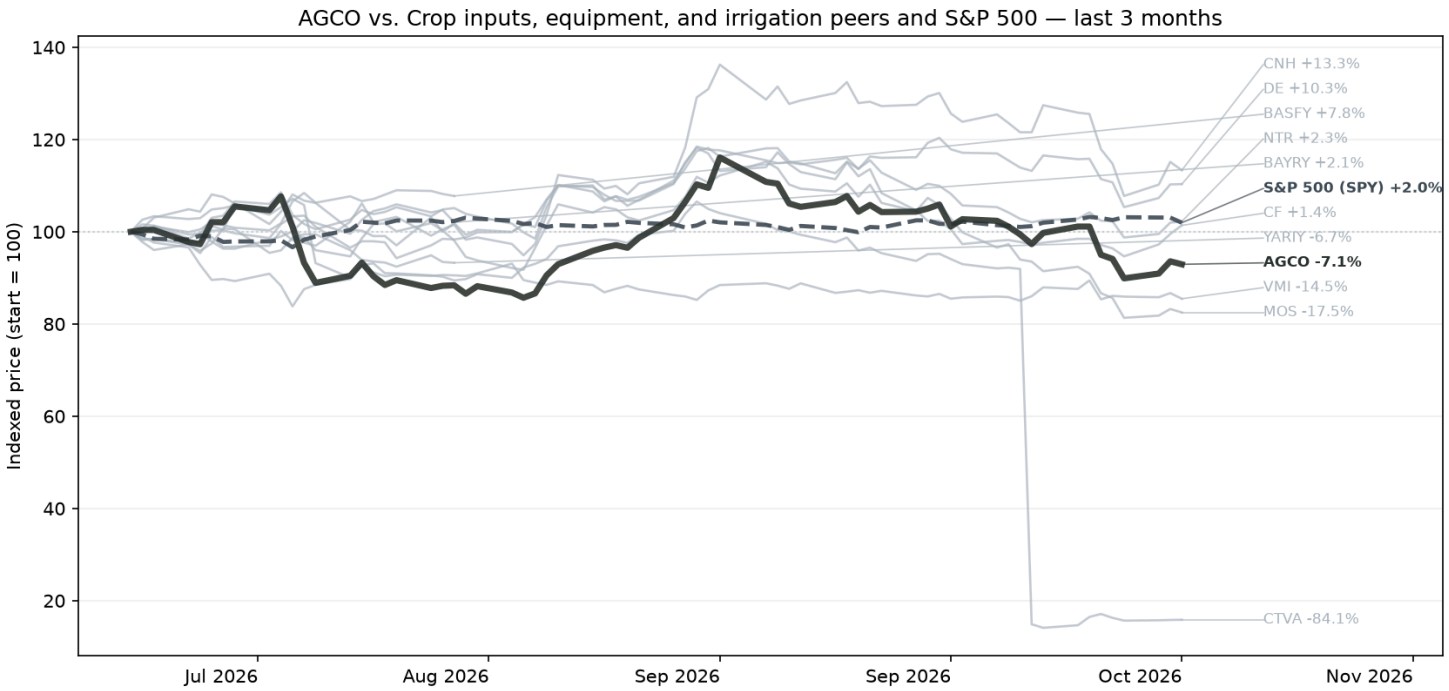

CNH Industrial is the world's second largest manufacturer of agricultural machinery (82% of industrial net sales) as well as a major player in construction equipment (18% of industrial net sales). Its Case and New Holland brands have served farmers for generations. Geographically, agricultural sales are 40% in North America, 32% in Europe, the Middle East, and Africa, 18% in South America, and 10% in Asia-Pacific. CNH's products are available through a robust independent dealer network, which includes over 2,600 dealer and distribution locations and reach into 164 countries. The construction business leverages over 400 dealers. The company's captive finance arm provides retail financing to its customers and wholesale financing to dealers to maintain inventory, thereby supporting sales.

AGCO (AGCO)

Crop inputs, equipment, and irrigation · $7.0B · 3m -7.1% · 12m -0.2% · 24m +8.1%

Google Finance

Fendt, Massey Ferguson, and Challenger farm equipment with Corn Belt exposure.

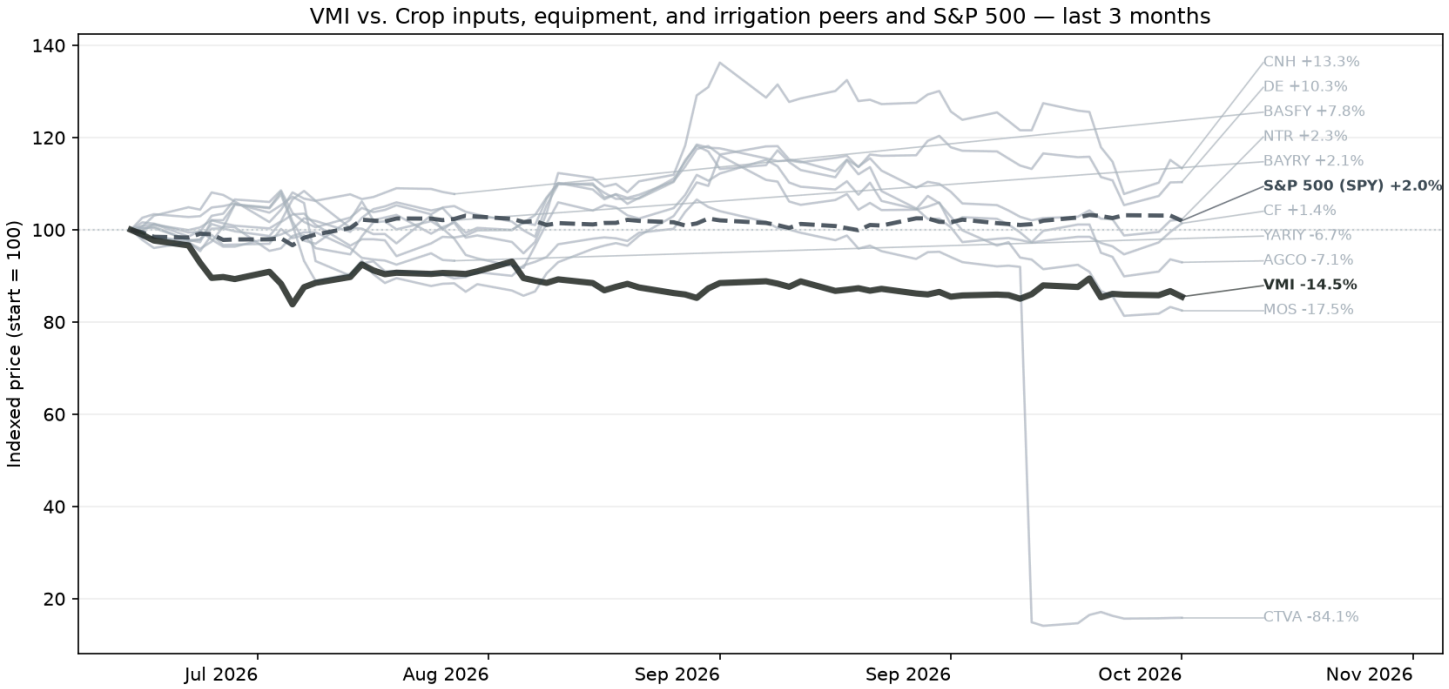

Agco is a global manufacturer of agricultural equipment. Its main machine brands are Fendt, Massey Ferguson, and Valtra; its initiatives in precision agriculture have been organized under the PTx umbrella following a series of acquisitions. While a global business, Agco's sales skew heavily toward Europe/Middle East, representing 50%-60% of sales and even more of operating profits. The company is trying to increase its exposure to the larger North and South American markets. Its products are available through a global dealer network, which includes over 3,000 dealers and distribution locations and reaches into over 140 countries. Additionally, Agco offers retail and wholesale financing to customers through its partnership with Rabobank of the Netherlands, having exited their JV in 2026.

Valmont Industries (VMI)

Crop inputs, equipment, and irrigation · $9.3B · 3m -14.5% · 12m +13.5% · 24m +53.2%

Google Finance

Center-pivot irrigation (Valley) used on irrigated High Plains corn.

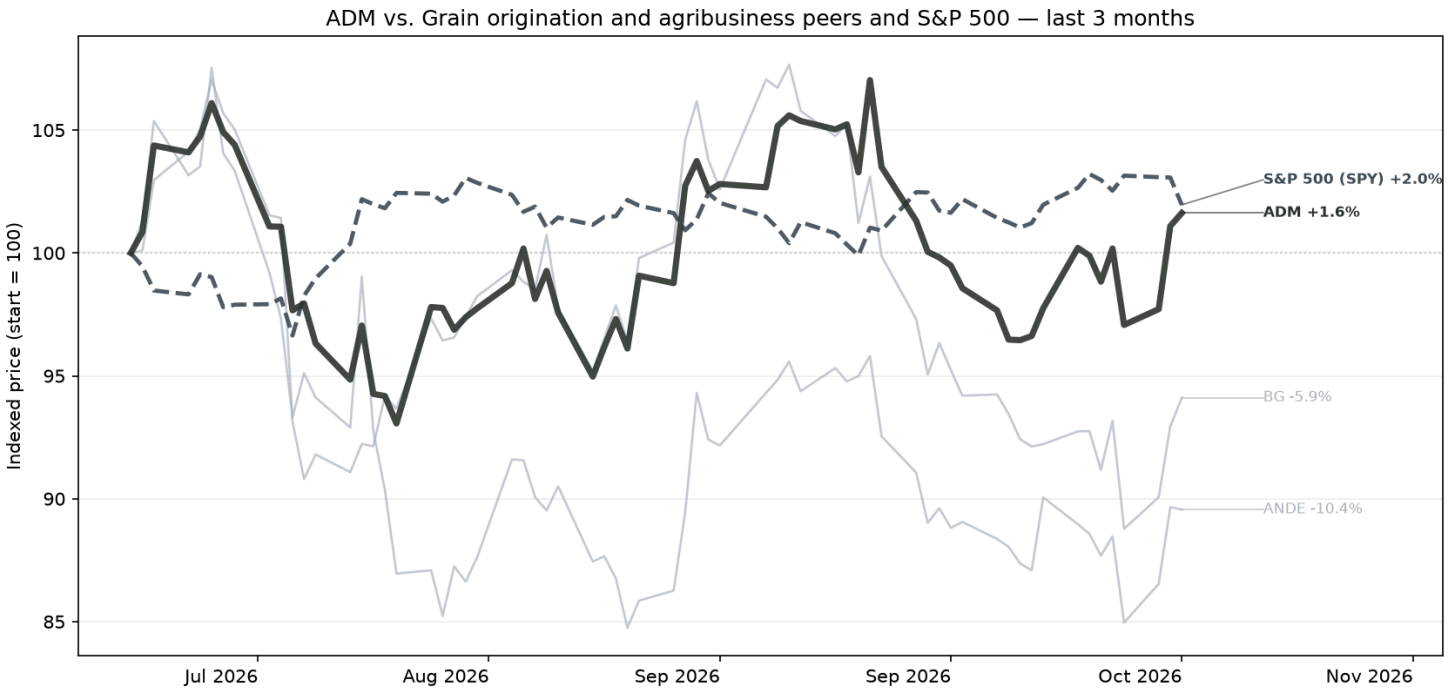

Valmont Industries Inc, along with its subsidiaries, operates as a manufacturer of products and services for infrastructure and agriculture markets. Its reportable segments are Infrastructure and Agriculture. The company generates maximum revenue from the Infrastructure segment, which includes the manufacturing and distribution of products and solutions to serve the infrastructure markets of utility, solar, lighting, transportation, and telecommunications, along with coatings services to protect metal products. The Agriculture segment provides irrigation equipment components, including aftermarket parts and tubular products, and technology solutions for precision agriculture. Geographically, it derives key revenue from the United States, followed by Australia, Brazil, and other regions.

Archer Daniels Midland (ADM)

Grain origination and agribusiness, U.S. ethanol and process technology, Wet milling, ingredients, and co-products · $38.9B · 3m +1.6% · 12m +32.0% · 24m +45.0%

Google Finance

Global grain trader, top U.S. ethanol producer, and major corn wet miller.

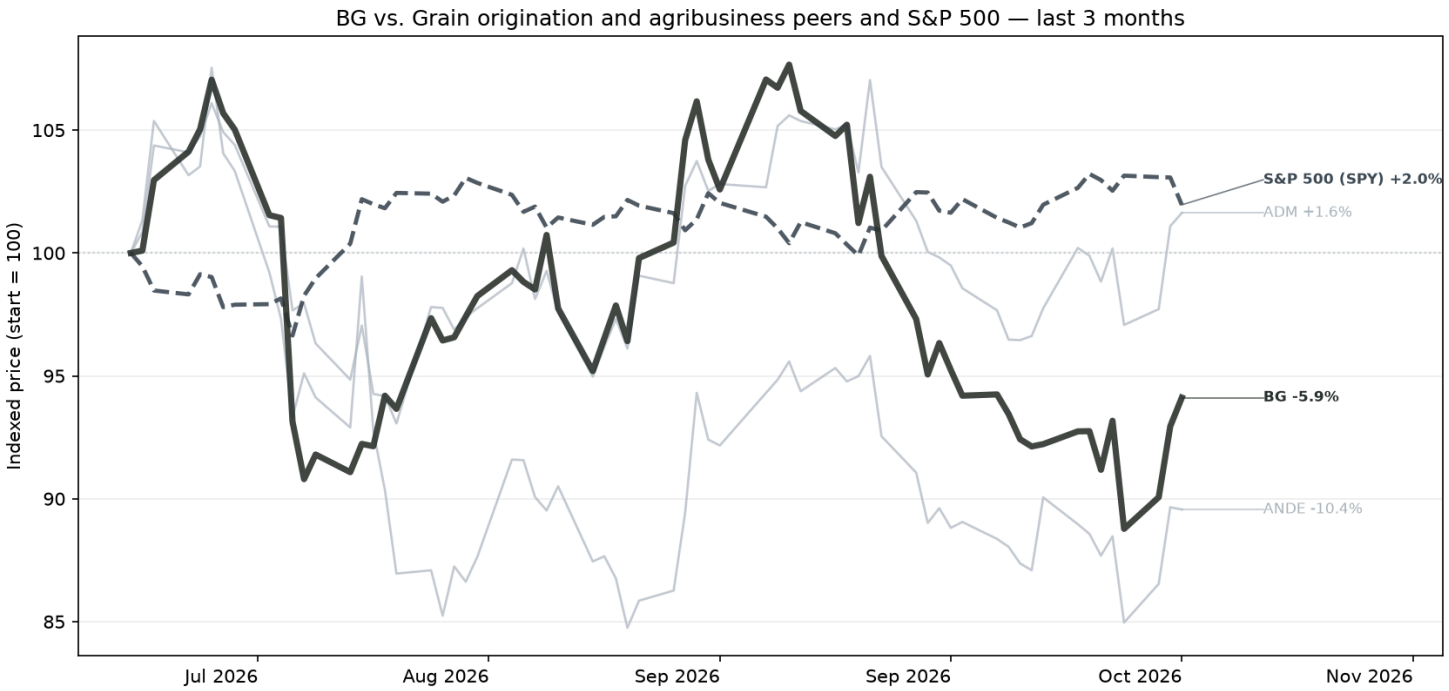

Archer-Daniels-Midland is a major processor of oilseeds, corn, wheat, and other agricultural commodities. The company is also one of the largest grain merchandisers through its extensive network of logistical assets to store and transport crops around the globe. ADM also runs a nutrition business that focuses on both human and animal ingredients and is a large producer of corn-based sweeteners, starches, and ethanol.

Bunge (BG)

Grain origination and agribusiness · $21.9B · 3m -5.9% · 12m +17.0% · 24m +15.0%

Google Finance

Global grain and oilseed merchant after the Viterra combination; competitor for corn origination.

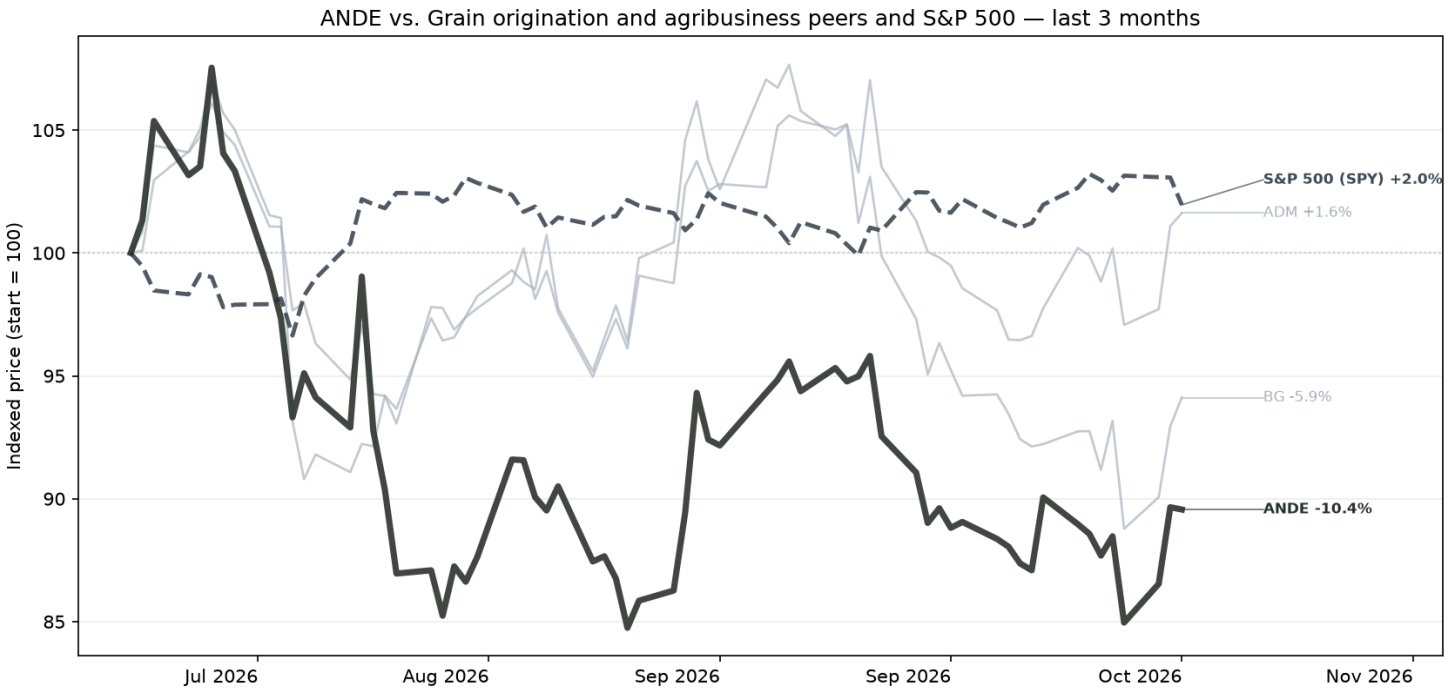

Bunge Global SA is an agribusiness solutions company, connecting farmers to consumers and delivering essential food, feed and fuel to the globe. The company segments include Soybean Processing and Refining; Softseed Processing and Refining; Other Oilseeds Processing and Refining; Grain Merchandising and Milling; and Corporate and Other. It generates maximum revenue from the Soybean Processing and Refining segment, which includes integrated business principally involved in the purchase, storage, transportation, processing, distribution, refining, marketing, and sale of soybeans and soybean related products, as well as biodiesel and fertilizer production and distribution. Geographically, the company operates in United States, Switzerland, Netherlands, and Rest of the World.

The Andersons (ANDE)

Grain origination and agribusiness, U.S. ethanol and process technology · $2.3B · 3m -10.4% · 12m +45.2% · 24m +39.4%

Google Finance

Grain elevators plus four wholly owned ethanol plants totaling about 500 million gallons a year.

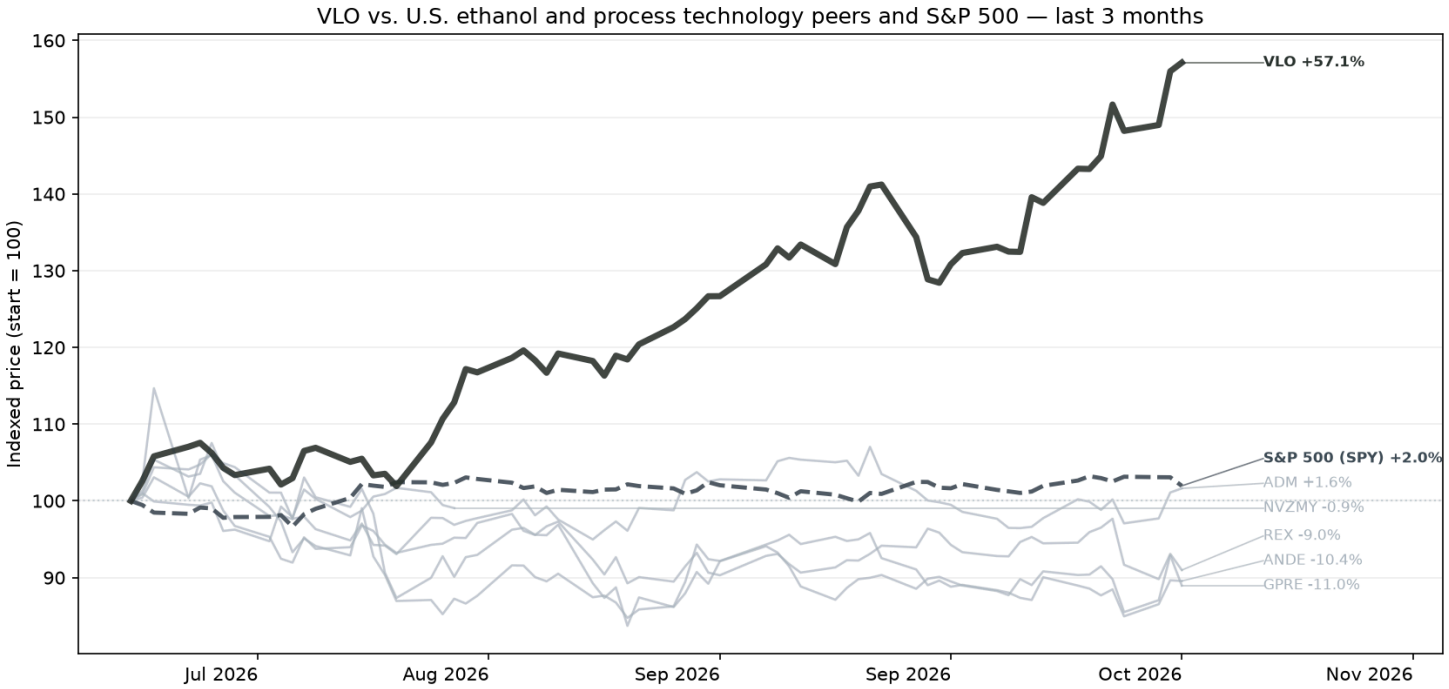

Andersons Inc is an agriculture and renewable fuels company. Its operations are classified into two reportable business segments: Agribusiness, which generates maximum revenue, and Renewables. The Agribusiness segment includes merchandising and managing logistics across various commodities, as well as being a manufacturer, distributor, and retailer of agricultural and related plant nutrients. The segment specializes in the movement of physical commodities such as whole grains, grain products, feed ingredients, and domestic fuel products, among other agricultural commodities. The Renewables segment mainly produces, purchases, and sells ethanol and co-products. Geographically, the company generates maximum revenue from the United States, followed by Canada, Mexico, and other markets.

Valero Energy (VLO)

U.S. ethanol and process technology, Fuel blending, refining, and retail · $99.7B · 3m +57.1% · 12m +185.6% · 24m +241.5%

Google Finance

World's second-largest corn-ethanol producer with a distinct Ethanol segment and a major blender.

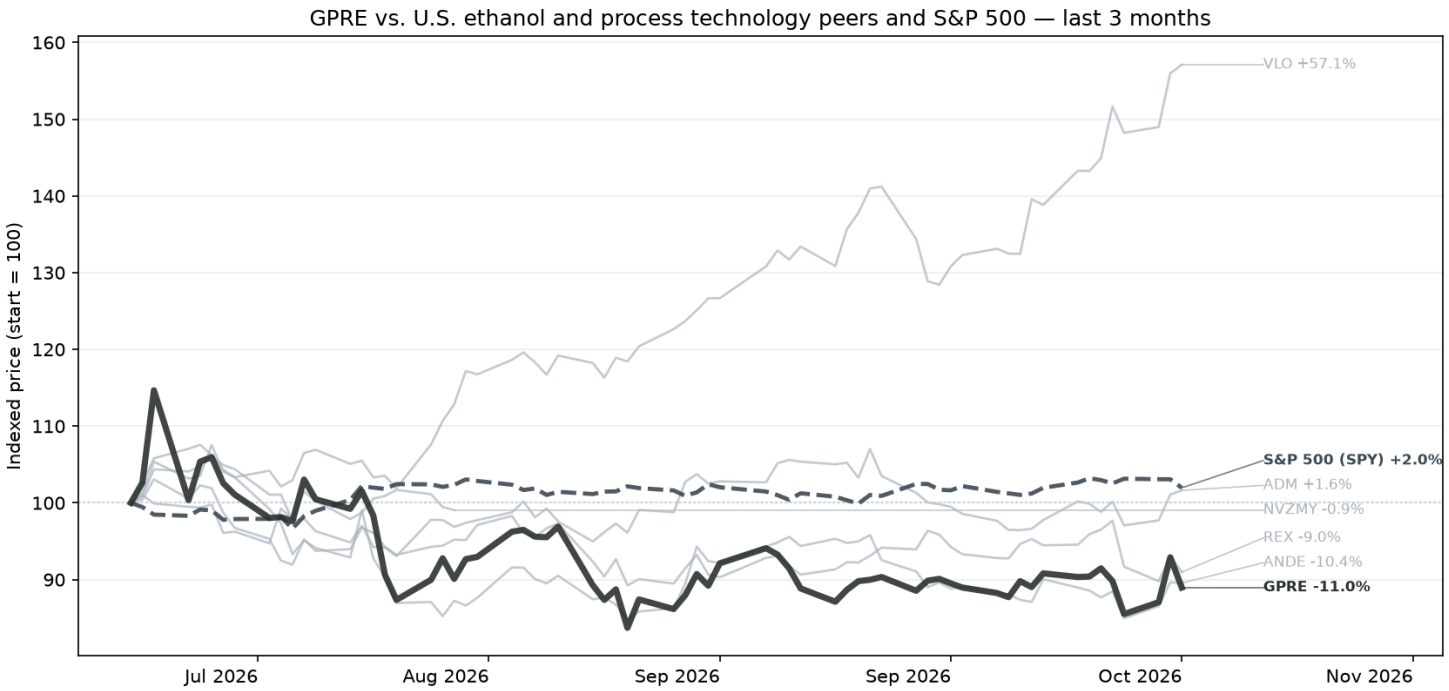

Valero Energy is one of the largest independent refiners in the United States. It operates 15 refineries, with a total throughput capacity of 3.2 million barrels a day in the US, Canada, and the United Kingdom. Valero also owns 12 ethanol plants with capacity of 1.6 billion gallons a year and holds a 50% stake in Diamond Green Diesel, which can produce 1.2 billion gallons per year of renewable diesel.

Green Plains (GPRE)

U.S. ethanol and process technology · $1.1B · 3m -11.0% · 12m +26.2% · 24m +27.5%

Google Finance

Largest U.S. ethanol pure play, with high-protein feed, corn oil, and Nebraska carbon-capture work.

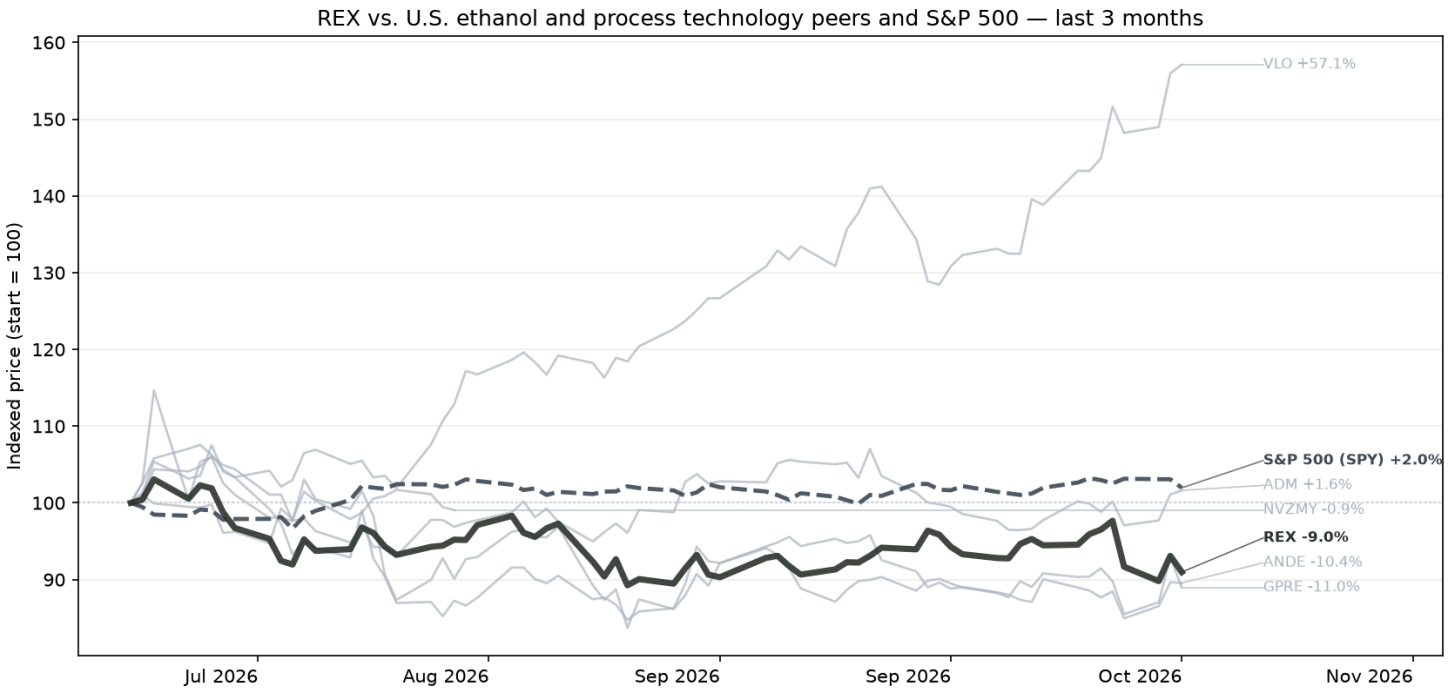

Green Plains Inc manufactures and sells ethanol and ethanol byproducts in two segments based on function. The ethanol production segment, which generates the majority of revenue, includes the production of ethanol, distillers grains, Ultra-High Protein and renewable corn oil. The agribusiness and energy services segment includes grain handling and storage, commodity marketing and merchant trading for company-produced and third-party ethanol, distillers grains, Ultra-High Protein, renewable corn oil, natural gas and other commodities.

REX American Resources (REX)

U.S. ethanol and process technology · $1.4B · 3m -9.0% · 12m +25.2% · 24m +86.8%

Google Finance

Holding company with interests in six Corn Belt ethanol plants; cleanest public crush-margin equity.

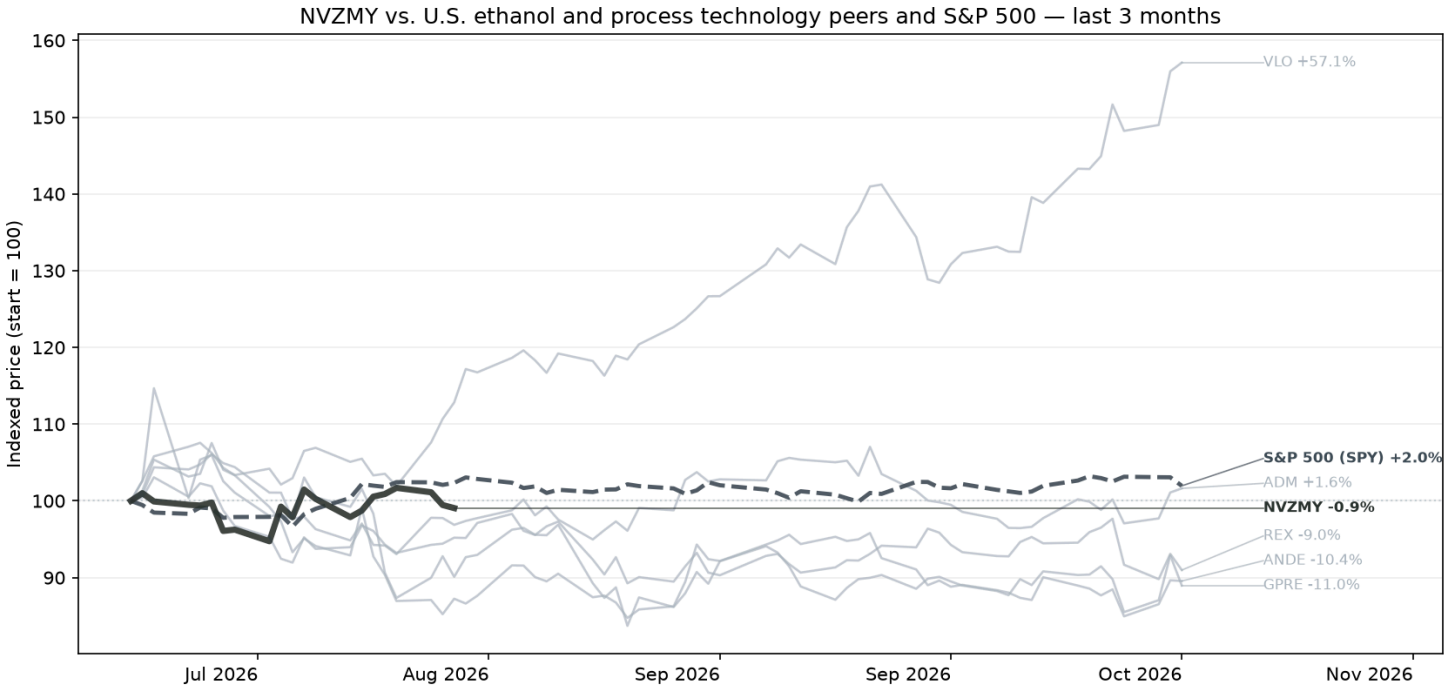

REX American Resources Corp operates as a holding company that engages in investments in alternative energy and ethanol production entities. Its operating segments include Ethanol and By-Products. Its products include Ethanol, dried distillers grains, modified distillers grains, Distillers corn oil, Modified distillers grains, and Other.

Novonesis (NVZMY)

U.S. ethanol and process technology · n/a · 3m -0.9% · 12m +4.5% · 24m -5.7%

Google Finance

Dominant supplier of enzymes used in dry-mill ethanol fermentation.

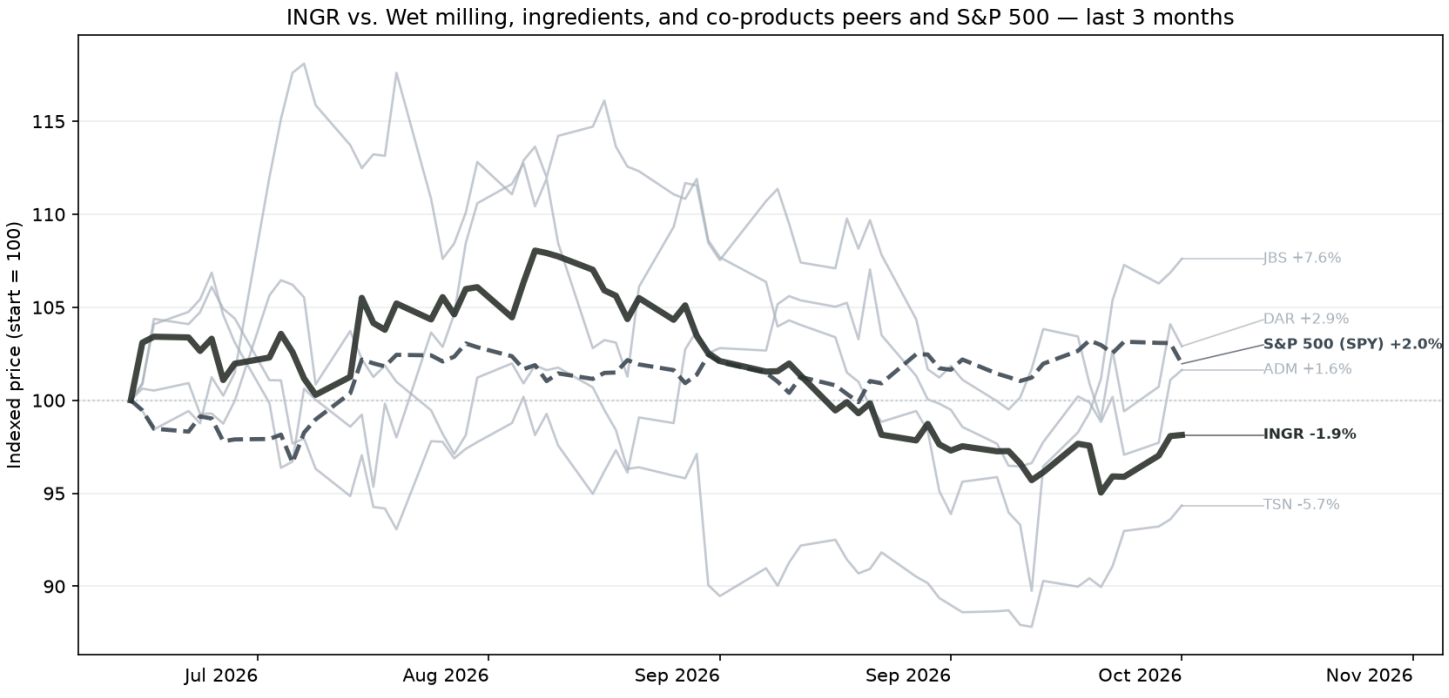

NOVONESIS B UNSP/ADR

Ingredion (INGR)

Wet milling, ingredients, and co-products · $6.8B · 3m -1.9% · 12m -19.2% · 24m -27.9%

Google Finance

Major corn wet miller producing sweeteners, starches, and specialty ingredients.

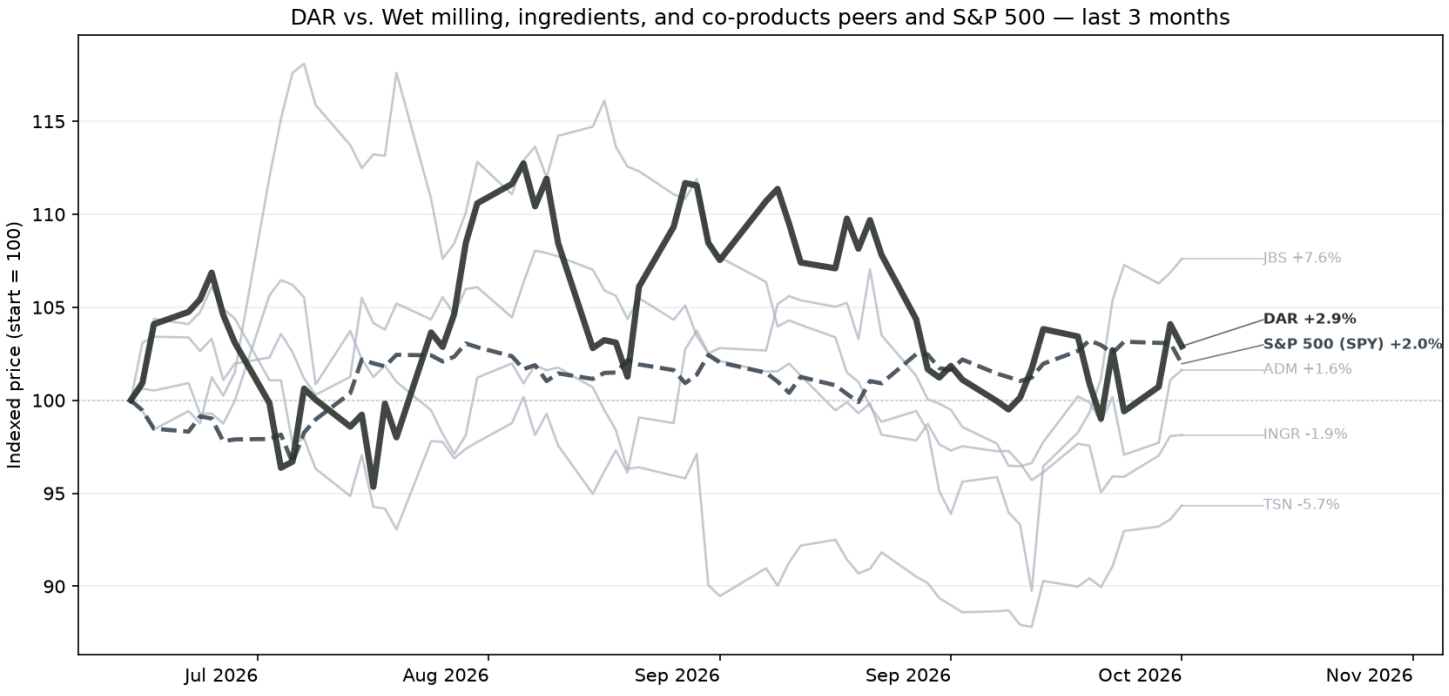

Ingredion is an ingredients provider for the food, beverage, brewing, and animal nutrition industries. The company processes corn, tapioca, potatoes, stevia, grains, fruits, gums, and vegetables into value-added ingredients. The company sells specialty ingredients that include starch-based texturizers and natural alternative sweeteners such as stevia. Ingredion also sells commodity ingredients that include sweeteners, such as high-fructose corn syrup, and starches, such as those used for sustainable packaging, as well as plant-based proteins. The company plans to acquire Tate & Lyle in an all-cash deal that should close in 2027.

Darling Ingredients (DAR)

Wet milling, ingredients, and co-products · $10.6B · 3m +2.9% · 12m +97.2% · 24m +77.6%

Google Finance

Rendering and used cooking oil; 50/50 owner of Diamond Green Diesel with Valero.

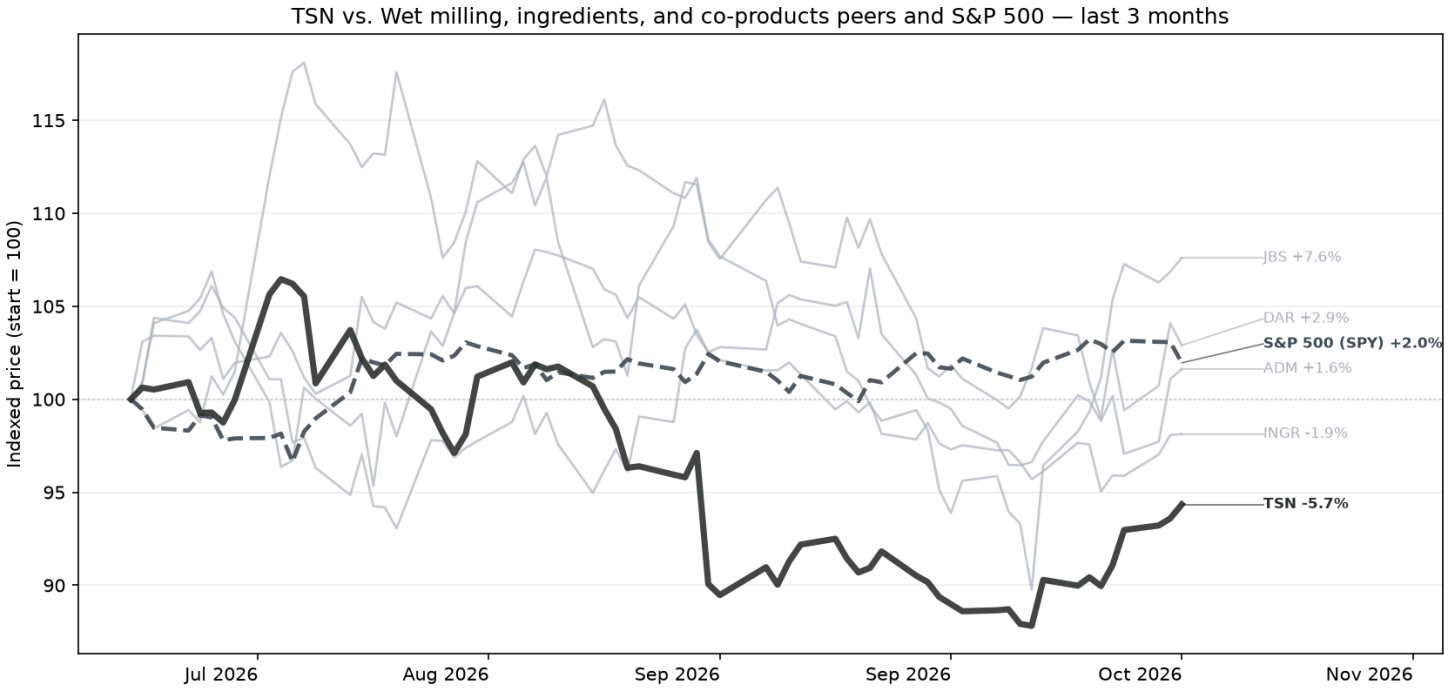

Darling Ingredients Inc is a developer and producer of sustainable natural ingredients from edible and inedible bio-nutrients, creating a wide range of ingredients and customized specialty solutions for customers in the pharmaceutical, food, pet food, animal feed, industrial, fuel, bioenergy and fertilizer industries. It processes by-products from the animal agriculture and food industries into ingredients and products for human nutrition, animal feed, crop inputs, and renewable energy applications. The company operates processing facilities across multiple countries and produces collagen, including gelatin and hydrolyzed collagen, as well as renewable energy products.

Tyson Foods (TSN)

Wet milling, ingredients, and co-products · $20.6B · 3m -5.7% · 12m +2.7% · 24m -9.4%

Google Finance

Largest U.S. protein company and a primary domestic sink for distillers grains.

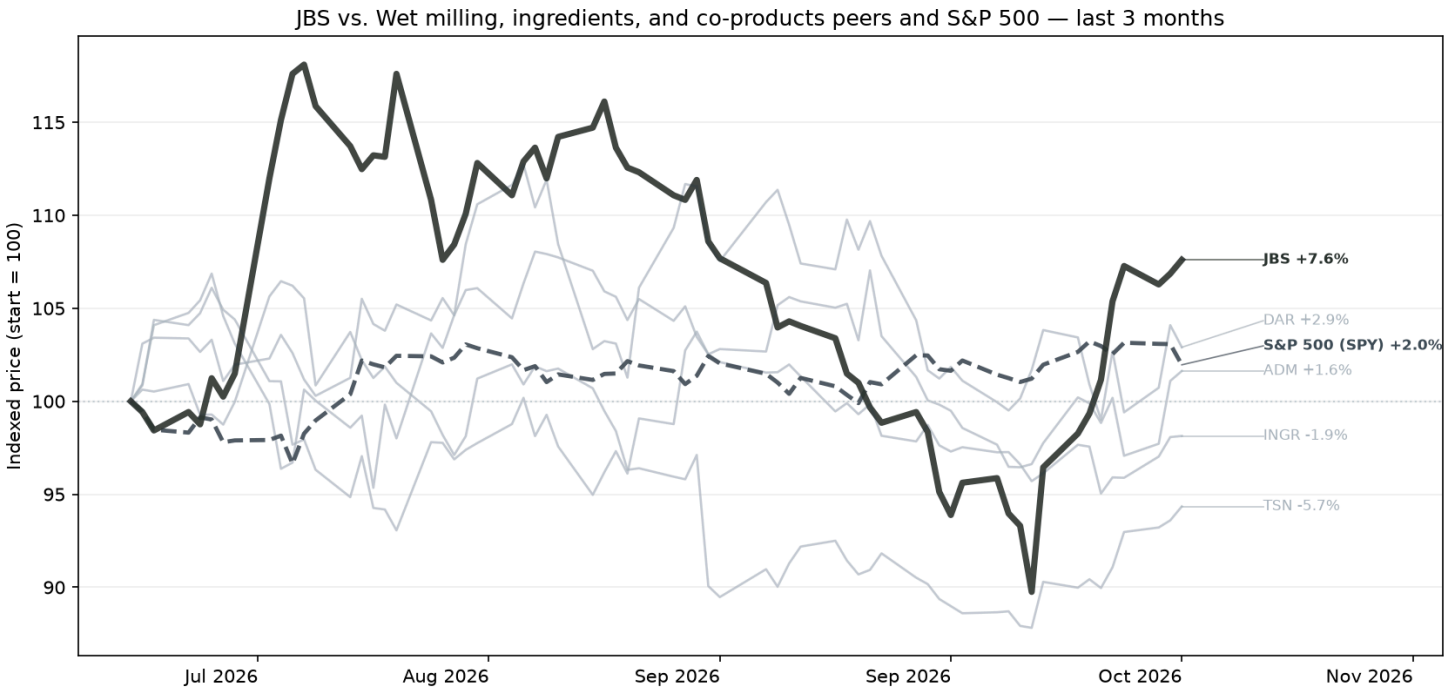

Tyson Foods is a protein-focused food producer, selling raw chicken, beef, pork, and prepared foods. Chicken and beef are its two largest segments, composing about 40% and 30% of sales, respectively. Prepared foods constituted 18% of fiscal 2025 sales and include brands like Tyson, Jimmy Dean, Hillshire Farm, Ball Park, and Sara Lee. However, most of these are in product categories rife with competition where Tyson does not have a massive market share lead. Tyson sells some products overseas, but the international segment accounts for just 4% of total revenue. The company is an active acquirer, with more recent years' purchases focused on international and food-service markets.

JBS (JBS)

Wet milling, ingredients, and co-products · $45.2B · 3m +7.6% · 12m +1.6% · 24m n/a

Google Finance

World's largest protein company and a major DDGS buyer in the U.S. and Brazil.

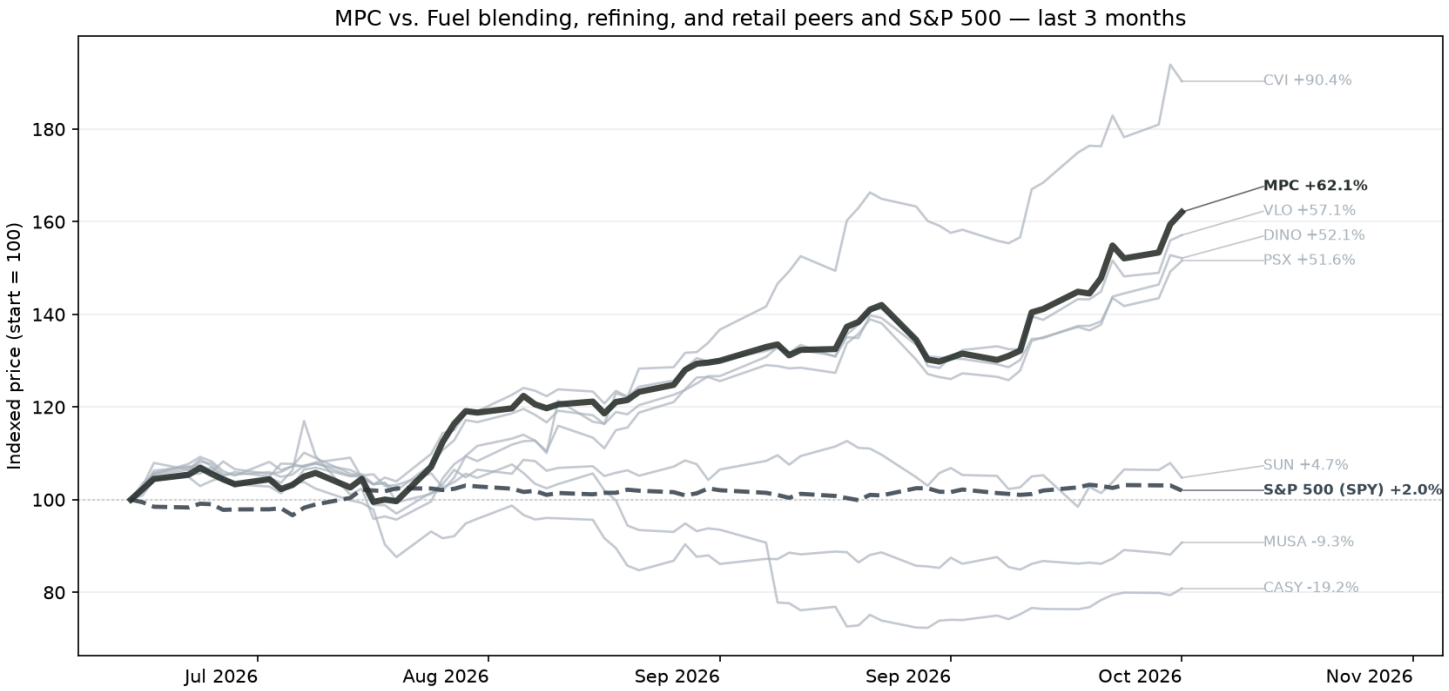

JBS NV is a protein food company, selling protein products, which include fresh and frozen cuts of beef, pork, lamb, fish, whole chickens, and chicken parts, to retailers, and foodservice companies. The food products are marketed under different brands such as Swift, Just Bare, Pilgrim's Pride, Sunnyvalley, Reserva Friboi, Great Southern, etc., globally. The company's reportable segments are Beef North America, which generates maximum revenue, Brazil, Seara, Pork USA, Pilgrim's Pride, Australia, and Others. Geographically, it derives majority of its revenue from United States of America.

Marathon Petroleum (MPC)

Fuel blending, refining, and retail · $101.3B · 3m +62.1% · 12m +163.8% · 24m +208.8%

Google Finance

Largest U.S. independent refiner and a major Midwest ethanol blender.

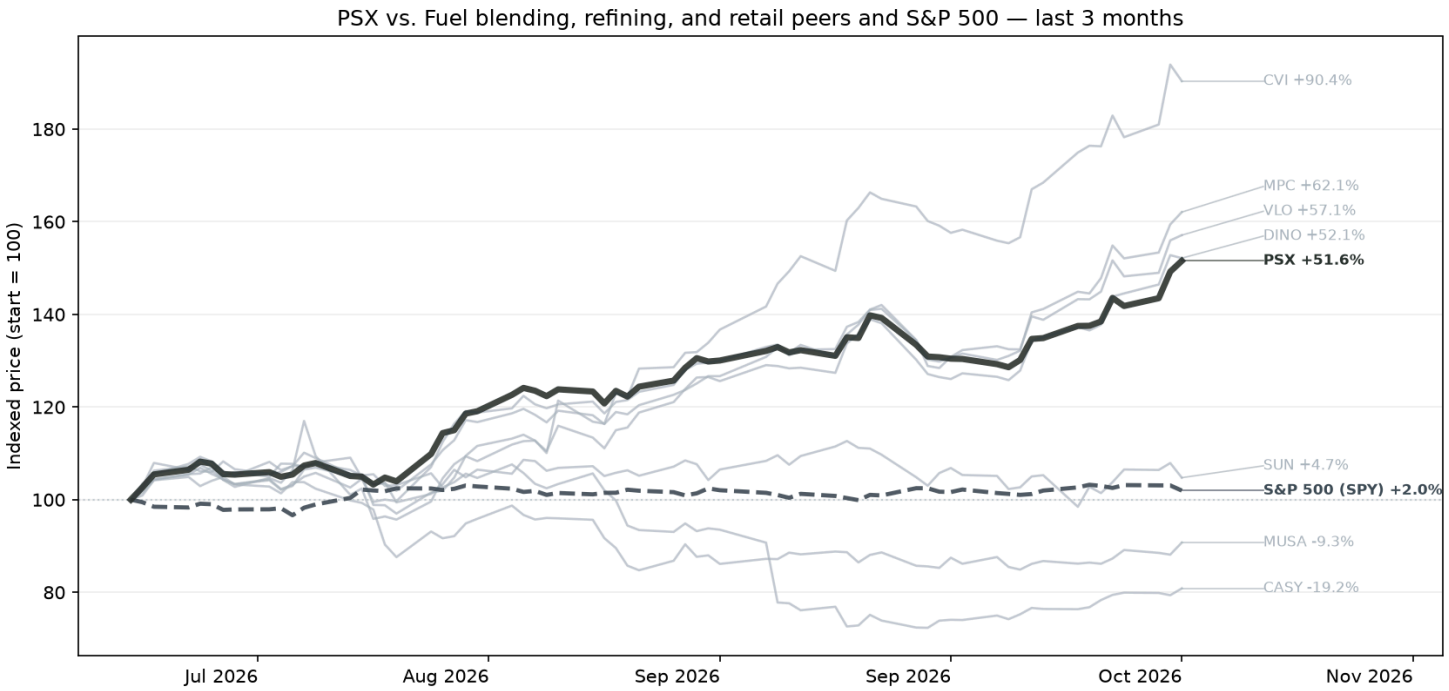

Marathon Petroleum is a leading integrated downstream and midstream energy company that operates 13 refineries in the Gulf Coast, Mid-Continent, and West Coast regions of the United States with an aggregate crude oil refining capacity of 3.0 million barrels per day. The company is one of the largest producers of renewable diesel in the US; its Dickinson, North Dakota facility has the capacity to produce 184 million gallons per year, and its Martinez, California, joint venture facility (a 50/50 partnership with Neste) reached its full capacity of 730 million gallons per year in late 2024. Marathon also owns the general partner and approximately 64% of MPLX LP, a large-cap master limited partnership that owns and operates midstream energy infrastructure and logistics assets.

Phillips 66 (PSX)

Fuel blending, refining, and retail · $96.7B · 3m +51.6% · 12m +129.4% · 24m +126.2%

Google Finance

Large blender and marketer with West Coast renewable-diesel capacity.

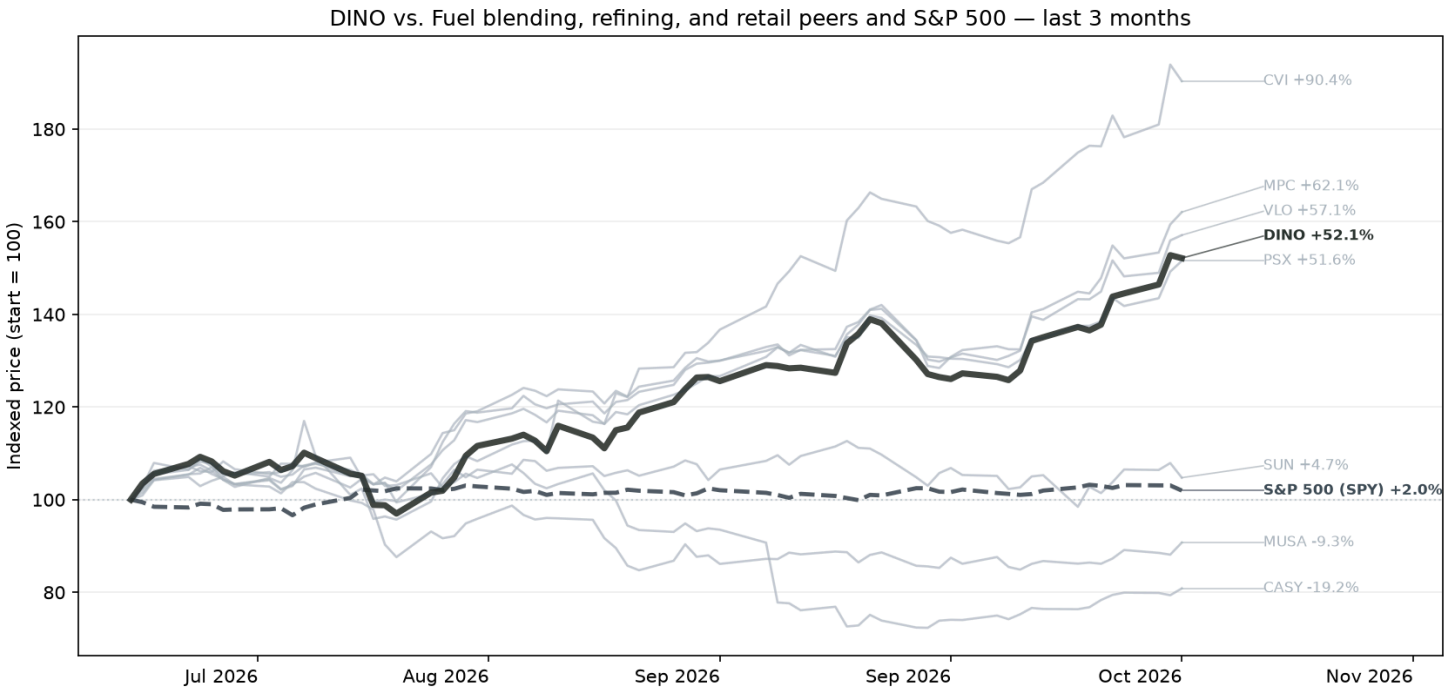

Phillips 66 is an independent refiner that owns or holds interest in 10 refineries with a total crude throughput capacity of 2.0 million barrels per day, or mmb/d, at the end of 2025. The midstream segment comprises extensive transportation and NGL processing assets. It includes 70,000 miles of crude oil, refined petroleum product, NGL and natural gas pipeline systems, and a comprehensive set of refined petroleum product, NGL and crude oil terminals, gathering and processing plants and fractionation facilities and various other storage and loading facilities. Its CPChem chemical joint venture operates facilities primarily in the United States and the Middle East and produces olefins and polyolefins.

HF Sinclair (DINO)

Fuel blending, refining, and retail · $16.8B · 3m +52.1% · 12m +145.5% · 24m +195.1%

Google Finance

Independent Mid-Continent and Rockies refiner with renewable diesel and RFS blending obligations.

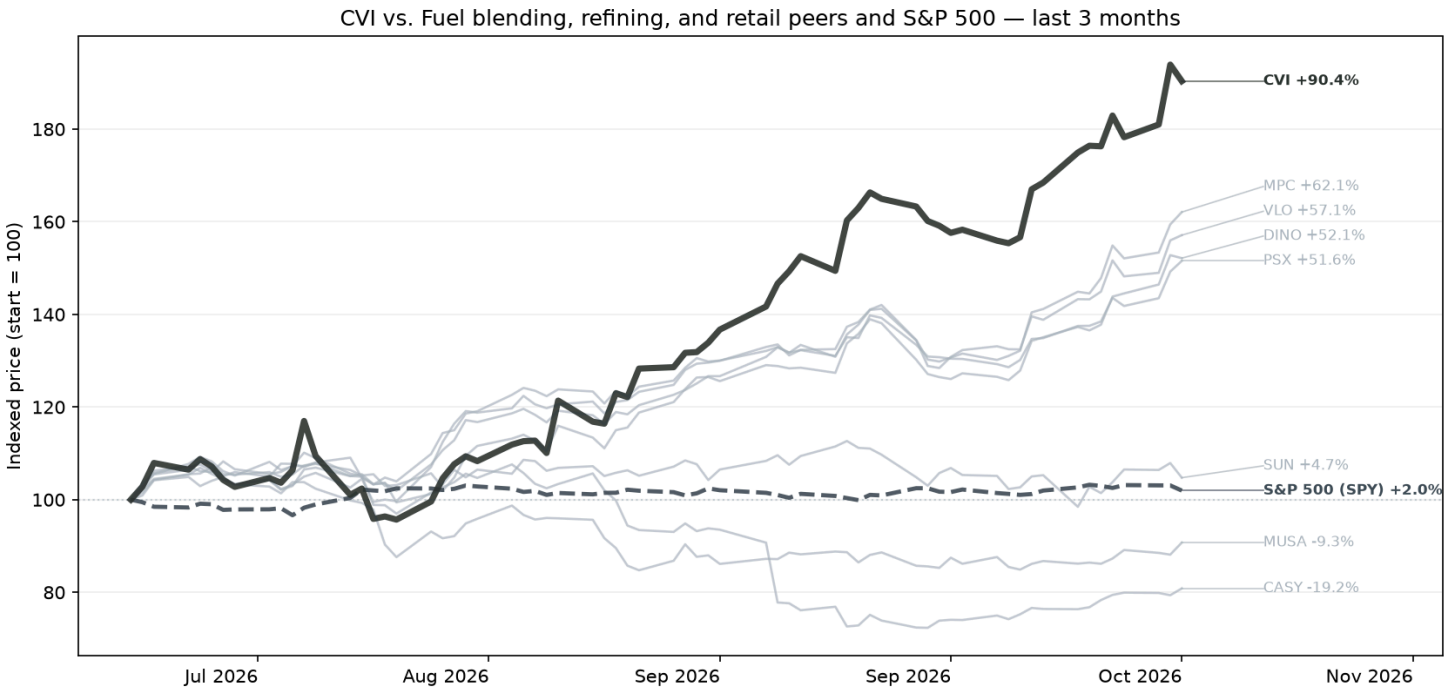

HF Sinclair is an integrated petroleum refiner that owns and operates seven refineries serving the Rockies, midcontinent, Southwest, and Pacific Northwest, with a total crude oil throughput capacity of 678,000 barrels per day. It can produce 380 million gallons of renewable diesel annually. It operates a marketing business with over 350 distributors and 1,700 branded wholesale sites across 30 states. It also owns and operates 4,500 miles of petroleum product pipelines and terminals principally in the Southwestern United States.

CVR Energy (CVI)

Fuel blending, refining, and retail · $3.7B · 3m +90.4% · 12m +80.6% · 24m +167.2%

Google Finance

Coffeyville, Kansas refiner in the corn complex with renewable diesel and a nitrogen affiliate.

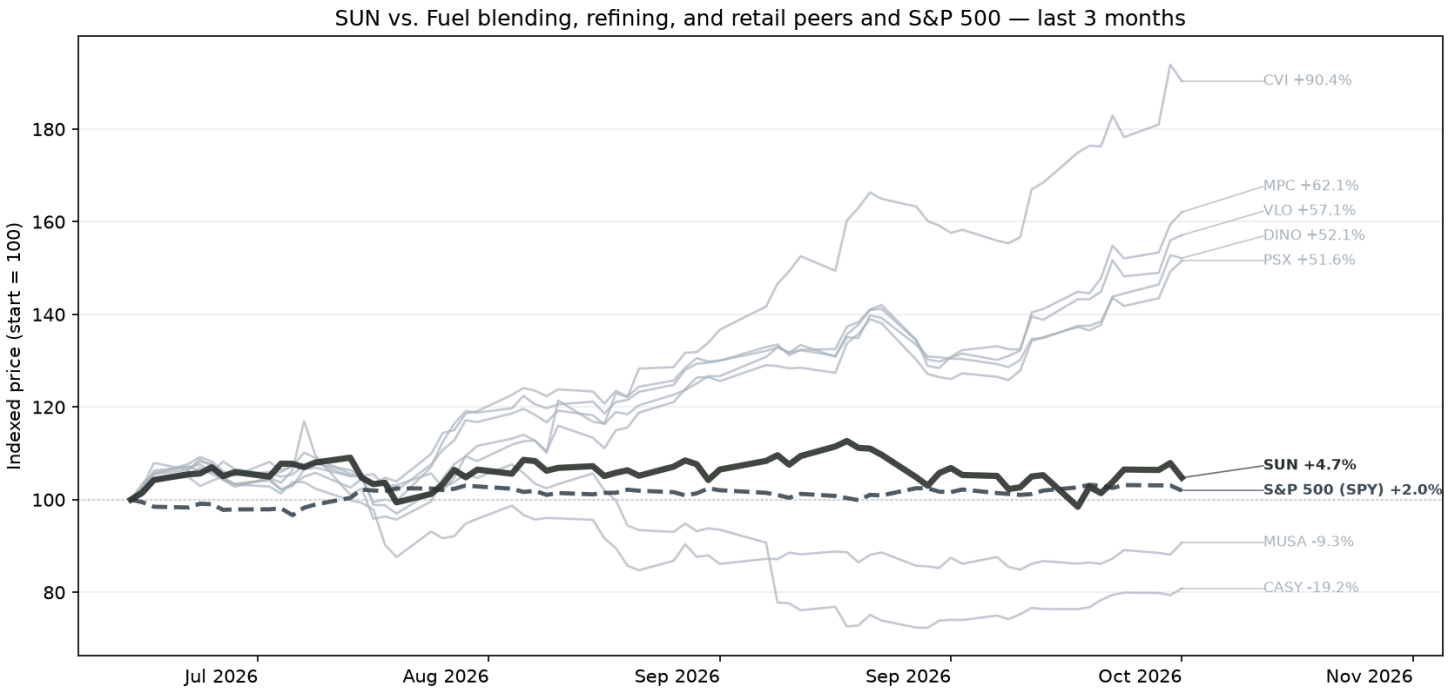

CVR Energy Inc is a holding company that engages in petroleum refining and nitrogen fertilizer manufacturing through its subsidiaries. Subsidiaries include several complex, full-coking crude oil refineries, along with a crude oil gathering system, pipelines, storage tanks, and marketing and supply. The company's refineries can process blends of a variety of crude oil ranging from heavy sour to light sweet crude oil. Crude oil for CVR's refineries is supplied through its wholly-owned gathering system and pipeline. From its refineries, CVR supplies products through tanker trucks directly to customers located in close geographic proximity and customers at throughput terminals. The company's customers include retailers, railroads, and farm cooperatives.

Sunoco LP (SUN)

Fuel blending, refining, and retail · $14.5B · 3m +4.7% · 12m +41.8% · 24m +41.8%

Google Finance

Fuel distributor and terminal operator that moves finished gasoline and ethanol.

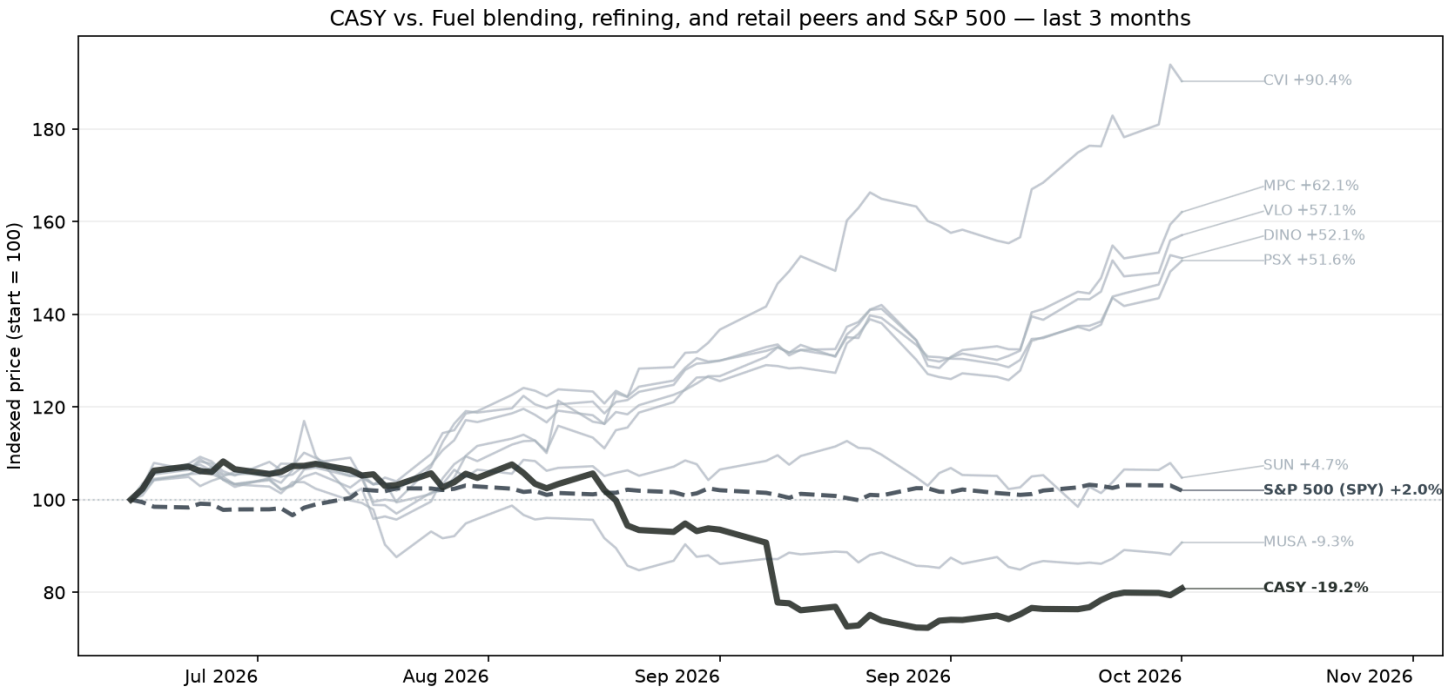

Sunoco LP is engaged in the distribution of motor fuels to independent dealers, distributors, and other commercial customers as well as the distribution of motor fuels to end-use customers at retail sites operated by commission agents. It is a growth-oriented master limited partnership (MLP) that operates as a wholesale and retail fuel distributor in the United States. The firm operates through the Fuel Distribution; Pipeline Systems; Refinery and Terminals segments. It generates the majority of its revenue from the Fuel Distribution segment. It distributes motor fuel to convenience stores, dealers, and commercial customers in various states.

Casey's General Stores (CASY)

Fuel blending, refining, and retail · $30.9B · 3m -19.2% · 12m +15.9% · 24m +67.9%

Google Finance

Corn Belt convenience-store chain with high E10/E15/E85 exposure.

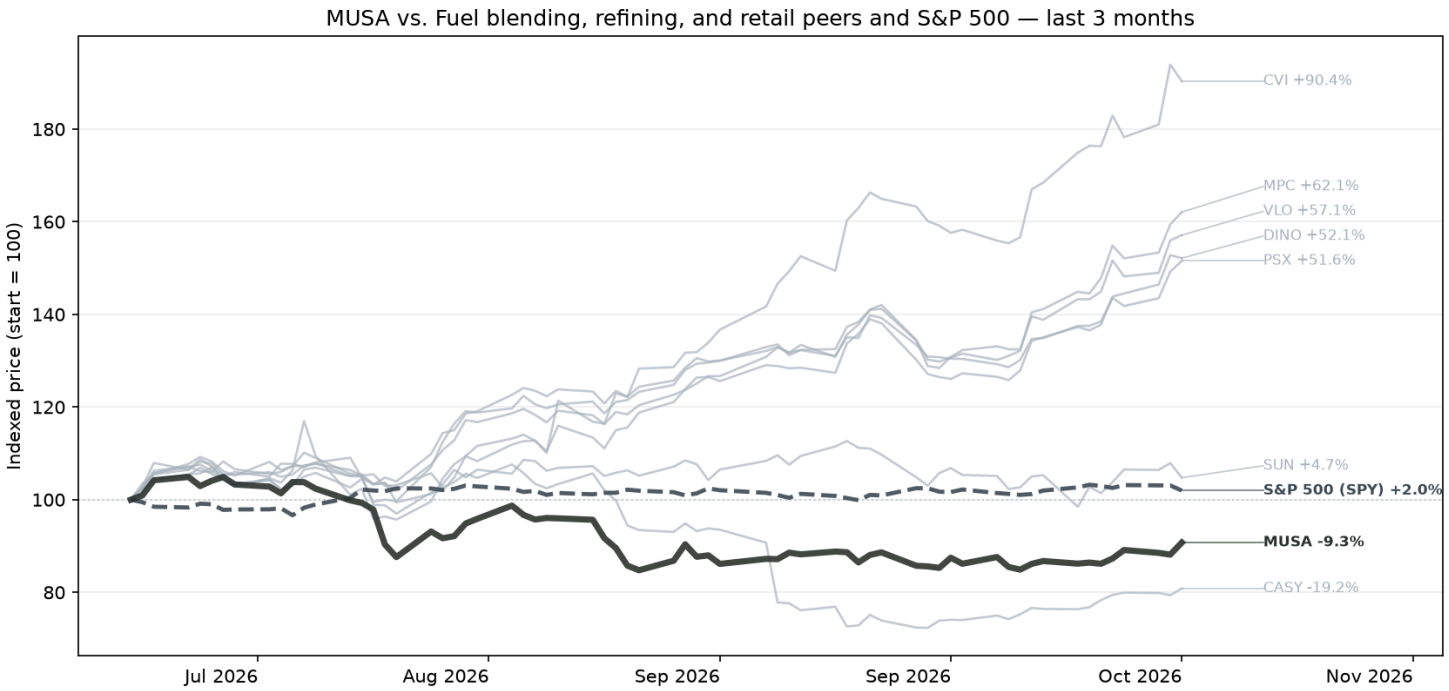

Casey's General Stores Inc, along with its subsidiaries, operates convenience stores mainly under the names Casey's, GoodStop (by Casey's), and Casey's General Store throughout various states in the USA, approximately half of which are located in Iowa, Missouri, and Illinois. These stores offer a broad selection of food items (which includes prepared foods such as regular and breakfast pizza, donuts, hot breakfast items, and hot and cold sandwiches), beverages, tobacco and nicotine products, groceries, health and beauty aids, automotive products, and other non-food items. The majority of the company's revenue is mainly derived from the retail sale of fuel and the products offered inside its stores.

Murphy USA (MUSA)

Fuel blending, refining, and retail · $10.4B · 3m -9.3% · 12m +42.6% · 24m +10.8%

Google Finance

High-volume fuel retailer and national ethanol blender.

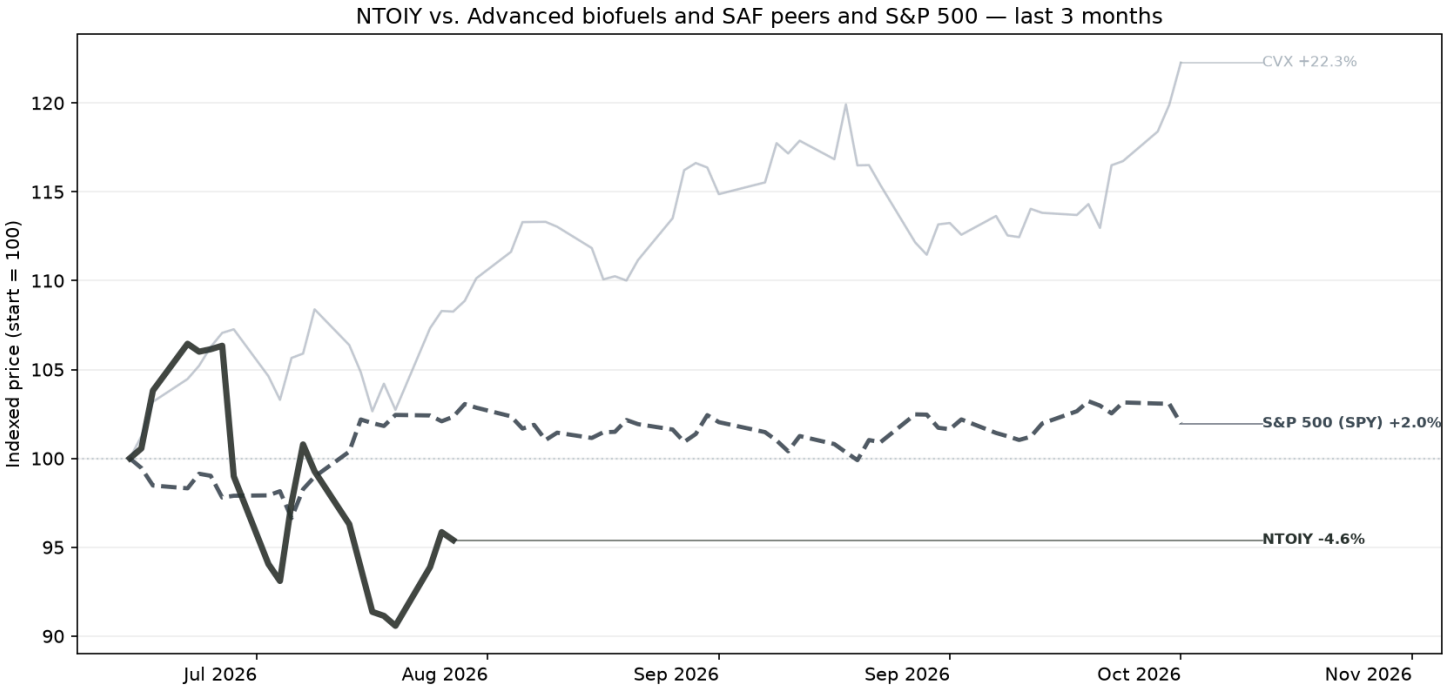

Murphy USA Inc is mainly engaged in the marketing of retail motor fuel products and convenience merchandise through a network of several retail stores in the Southwest, Southeast, Midwest, and Northeast United States. The majority of Murphy USA's stores are located in proximity to Walmart Supercenters, but it also operates standalone stores that market gasoline and other products under the Murphy USA, Murphy Express, and QuickChek brands. In addition, the company also markets fuel to unbranded wholesale customers through a mixture of company-owned and third-party product distribution terminals and pipeline positions. The firm generates maximum revenue through retail sales of petroleum products, and the rest from merchandise sales and wholesale of petroleum products.

Neste (NTOIY)

Advanced biofuels and SAF · n/a · 3m -4.6% · 12m +76.1% · 24m +95.3%

Google Finance

Largest global producer of renewable diesel and SAF; sets the price umbrella for corn oil.

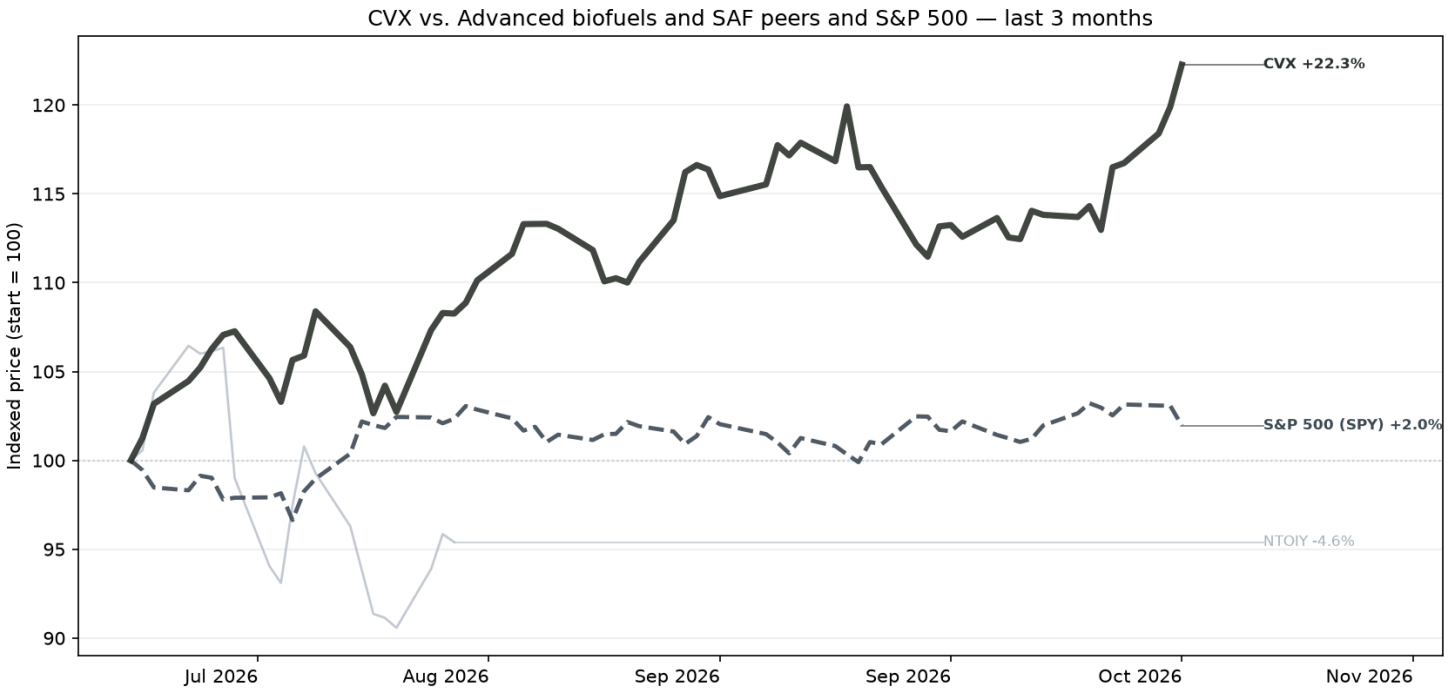

NESTE OYJ UNSP/ADR

Chevron (CVX)

Advanced biofuels and SAF · $403.6B · 3m +22.3% · 12m +46.0% · 24m +50.3%

Google Finance

Owner of Renewable Energy Group biodiesel and renewable-diesel plants that take corn oil at the margin.

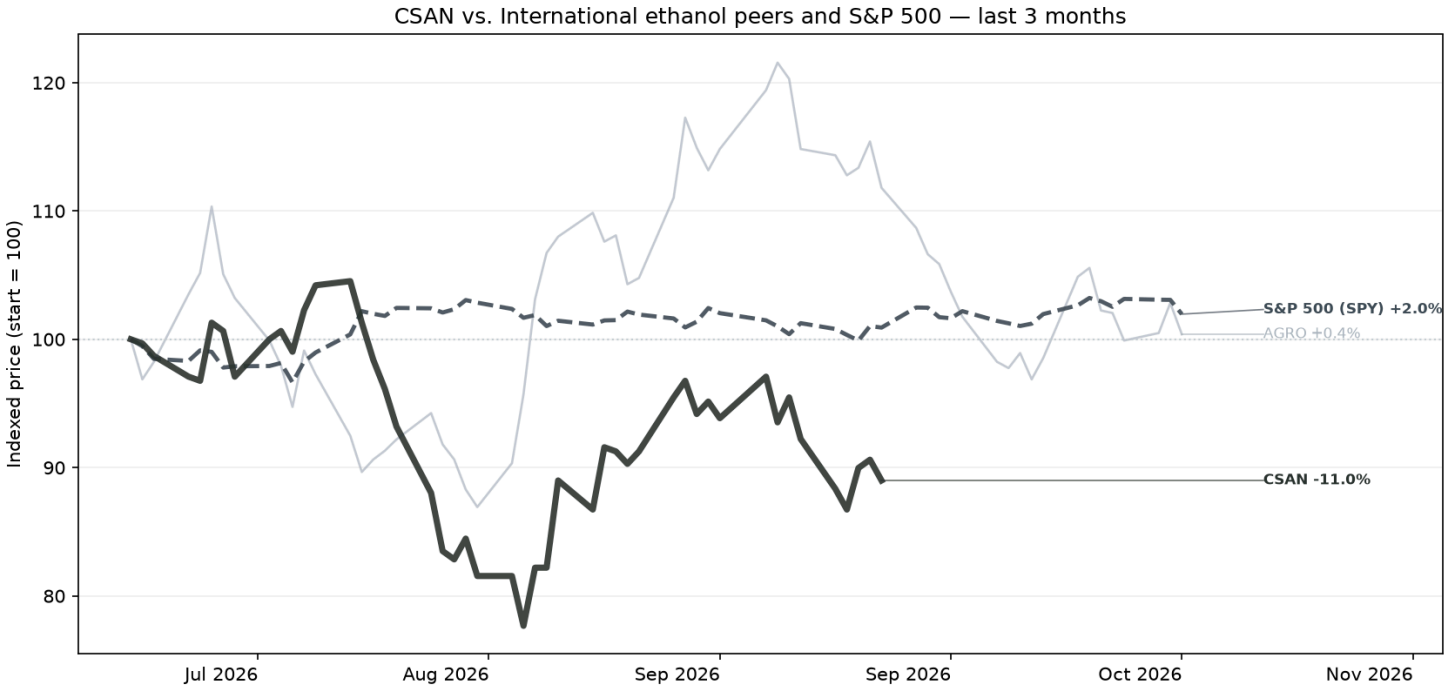

Chevron is an integrated energy company with exploration, production, and refining operations worldwide. It is the second-largest oil company in the United States with 2025 worldwide net oil-equivalent production of 3.7 million barrels per day, including 8.5 billion cubic feet per day of natural gas and 2.3 million barrels of liquids per day. Production takes place in North America, South America, Europe, Africa, Asia, and Australia. The company's refining networks arelocated in the United States and Asia, with a total worldwide refining capacity of 1.8 million barrels of oil a day at year-end 2025. Net proved reserves at year-end 2025 stood at 10.6 billion barrels of oil equivalent, consisting of 5.7 billion barrels of liquids and 29.2 trillion cubic feet of natural gas.

Cosan (CSAN)

International ethanol · $2.5B · 3m -11.0% · 12m -36.5% · 24m -67.7%

Google Finance

Brazilian holding company and the liquid U.S.-listed proxy for sugarcane ethanol via Raizen.

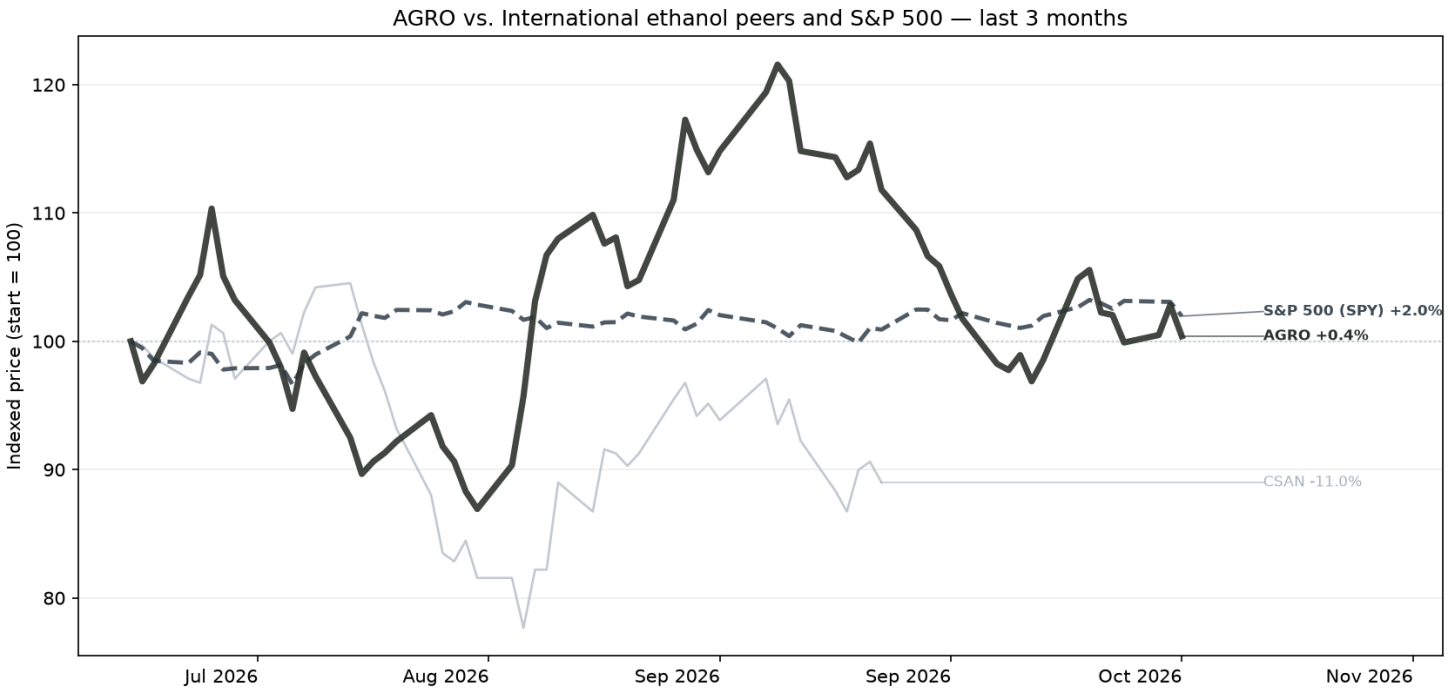

Cosan SA engages in several services throughout the energy and logistics sectors. Its reportable segments are Raizen, Compass, Moove, Rumo, and Radar. It generates the majority of its revenue from Raizen which operates in the production, commercialization, origination, and trading of ethanol, bioenergy, resale, and trading of electricity, renewable sources, marketing, origination, and trading of sugar and fuels, and lubricant.

Adecoagro (AGRO)

International ethanol · $1.5B · 3m +0.4% · 12m +34.5% · 24m -8.0%

Google Finance

South American farmland and sugar/ethanol producer with U.S.-listed equity.

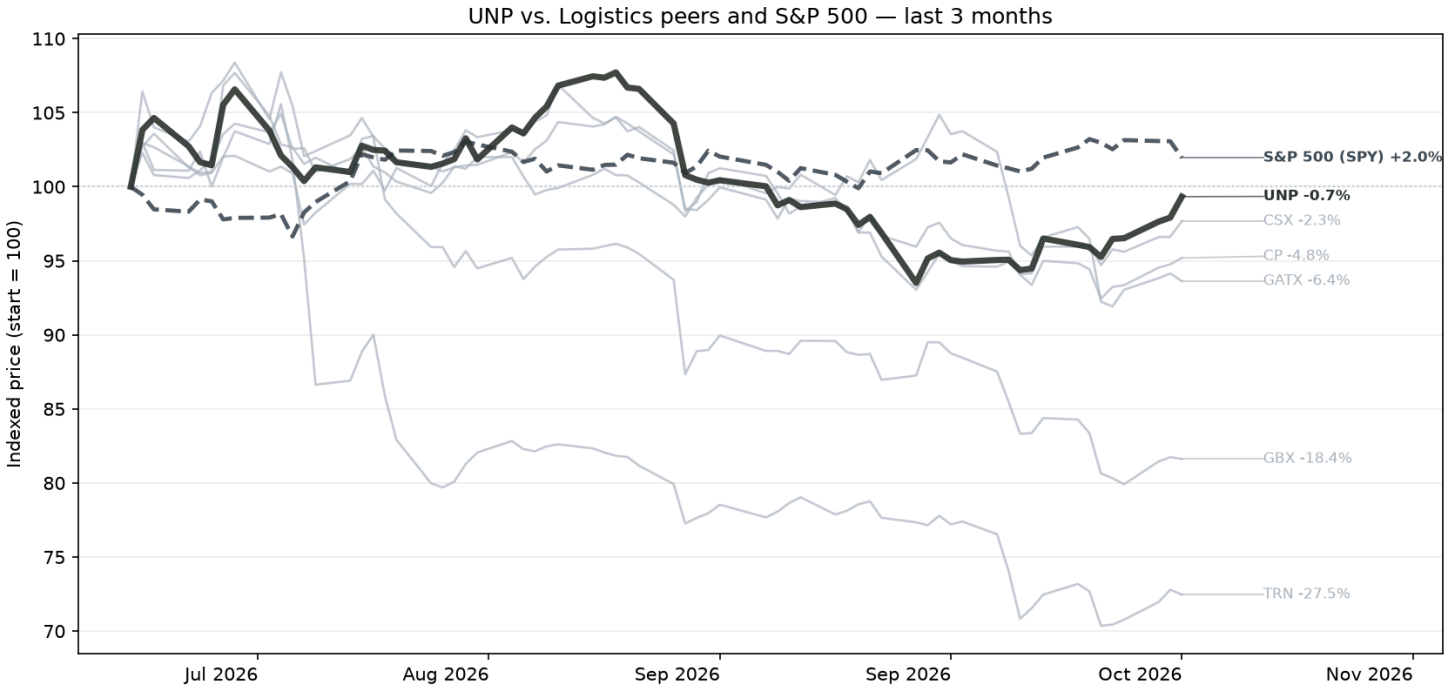

Adecoagro SA is a Luxembourg-based agricultural company. It is involved in a wide range of businesses, including farming crops and other agricultural products, dairy operations sugar, ethanol, energy production, and land transformation. The group operates in two lines of business, namely, Farming and Sugar, Ethanol and Energy. The Farming is further comprised of three reportable segments: Crops, Rice and Dairy. Sugar, Ethanol and Energy Segment, consists of cultivating sugarcane, which is processed in owned sugar mills, transformed into ethanol, sugar and electricity, in addition to biomethane and then marketed.

Union Pacific (UNP)

Logistics · $179.3B · 3m -0.7% · 12m +26.9% · 24m +16.5%

Google Finance

Primary western Class I for Corn Belt corn, ethanol unit trains, DDGS, and corn oil.

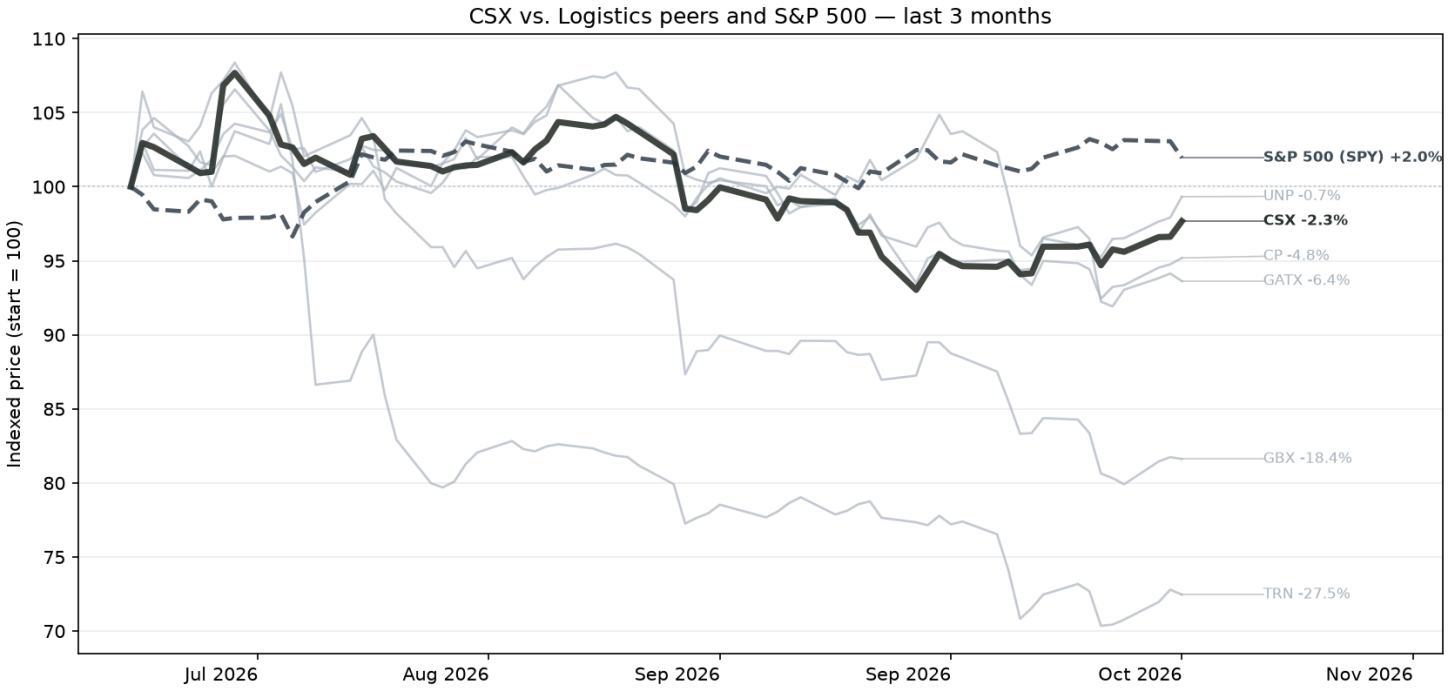

Omaha, Nebraska-based Union Pacific is the largest public railroad in North America. Operating on more than 30,000 miles of track in the western two-thirds of the US, Union Pacific generated $24.5 billion of revenue in 2025 by hauling coal, industrial products, intermodal containers, agricultural goods, chemicals, fertilizers, and automotive goods. Union Pacific owns about one-fourth of Mexican railroad Ferromex and historically derives roughly 10% of its revenue hauling freight to and from Mexico.

CSX (CSX)

Logistics · $93.9B · 3m -2.3% · 12m +33.2% · 24m +36.0%

Google Finance

Primary eastern Class I into Northeast and Southeast gasoline markets for ethanol unit trains.

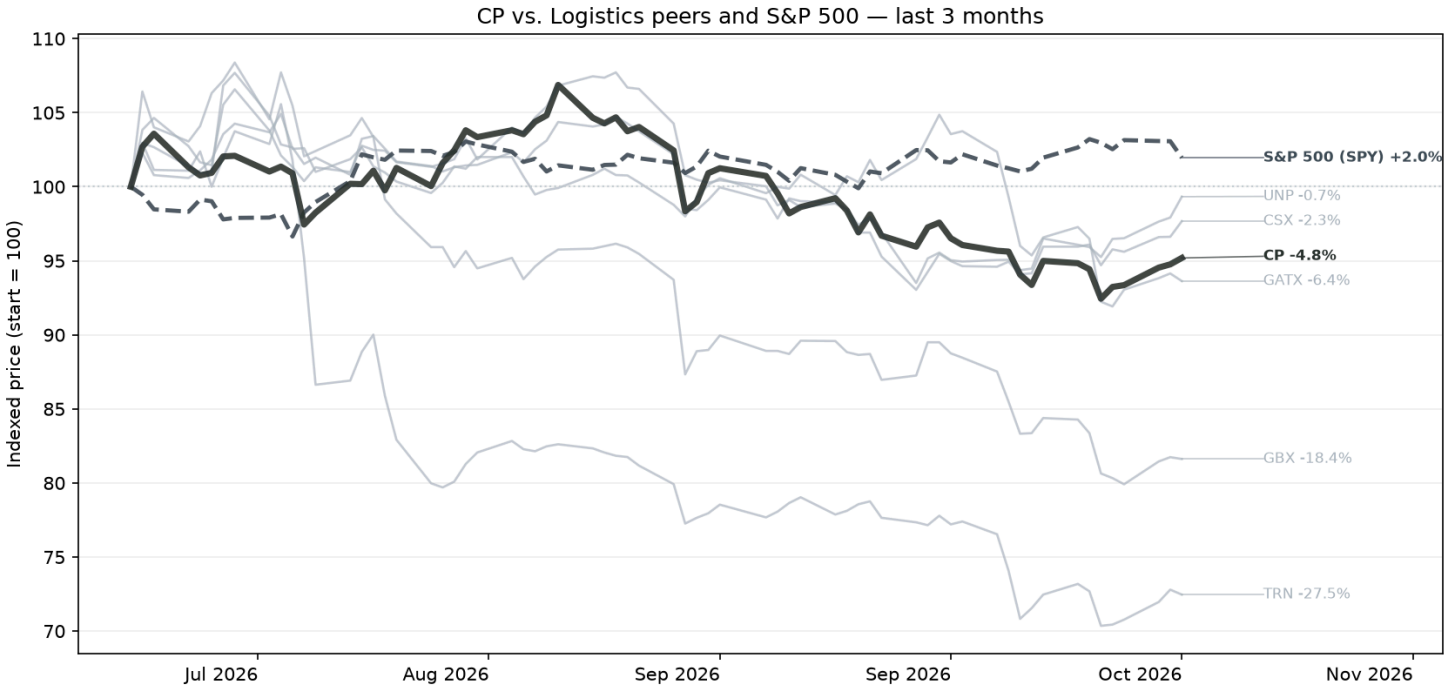

Operating in the Eastern United States, Class I railroad CSX generated revenue of nearly $14 billion in 2025. On its more than 21,000 miles of track, CSX hauls shipments of coal (16% of consolidated revenue), chemicals (17%), intermodal containers (16%), automotive cargo (7%), and a diverse mix of other bulk and industrial merchandise.

Canadian Pacific Kansas City (CP)

Logistics · $83.0B · 3m -4.8% · 12m +12.2% · 24m +5.8%

Google Finance

North-south railroad for Midwest corn and ethanol to the Gulf and Mexico.

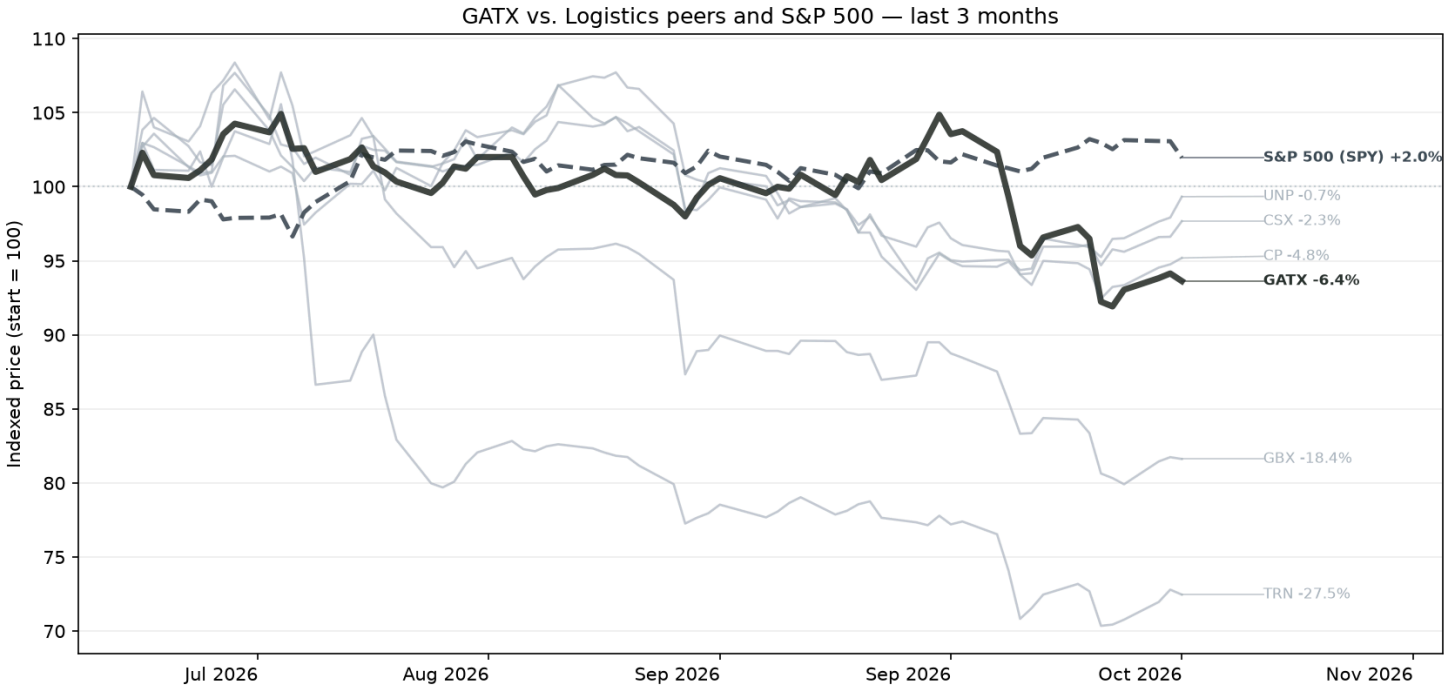

Canadian Pacific Kansas City is a Class I railroad operating on tracks that span most of Canada and into parts of the Midwestern and Northeastern United States. Following the April 2023 Kansas City Southern merger, CPKC operates new single-linehaul services from Canada and the Upper Midwest down through Texas, the Gulf of Mexico, and into Mexico. It also hauls cross-border and intra-Mexico freight via operating concessions on more than 3,000 miles of rail in Mexico. CPKC hauls shipments of grain, intermodal containers, energy products (like crude and frac sand), chemicals, plastics, coal, fertilizer and potash, automotive products, and a diverse mix of other merchandise.

GATX (GATX)

Logistics · $6.2B · 3m -6.4% · 12m -5.7% · 24m +24.1%

Google Finance

Largest public railcar lessor of ethanol tank cars and grain/DDGS hoppers.

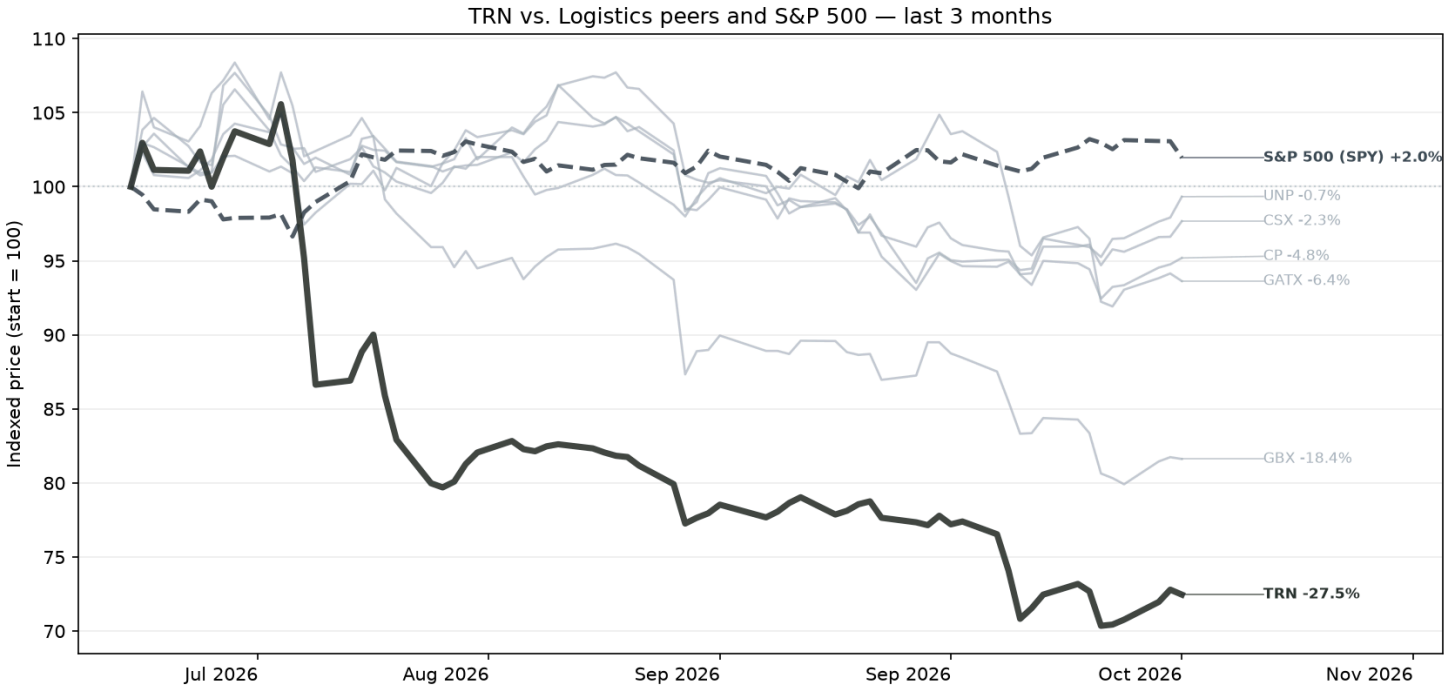

GATX Corp leases transportation assets, including railcars, aircraft spare engines, and tank containers, to customers in North America, Europe, and India. The company's reportable business segments are: Rail North America, Rail International, Engine Leasing, and Other. The majority of its revenue is generated from the Rail North America segment, which is composed of the company's operations in the United States, Canada, and Mexico. This segment mainly provides railcars pursuant to full-service leases under which it maintains the railcars, pays ad valorem taxes and insurance, and provides other ancillary services.

Trinity Industries (TRN)

Logistics · $2.4B · 3m -27.5% · 12m -7.3% · 24m -25.8%

Google Finance

Builds and leases covered hoppers and tank cars used for grain, DDGS, and ethanol.

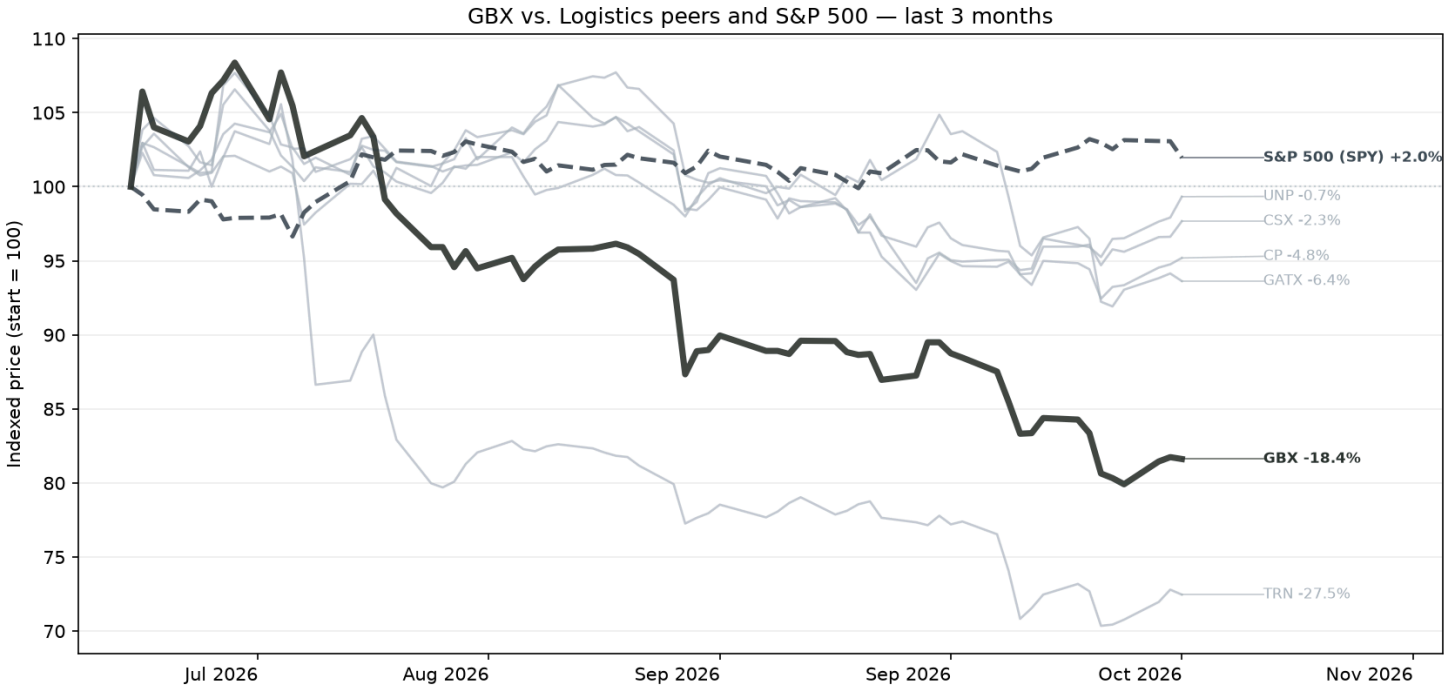

Trinity Industries Inc sells and leases railroad products and railcar maintenance services in North America. The company operates under the name TrinityRail in two main segments: railcar leasing and management services, which owns railcars and provides fleet management and administration services; rail products, which builds, sells, and modifies freight and tank railcars and their components; and all other, which sells highway products such as guardrail and other highway barriers. Customers include railroads, leasing companies, and shipping companies in agriculture, construction, consumer products, energy, and chemicals.

Greenbrier (GBX)

Logistics · $1.4B · 3m -18.4% · 12m -14.5% · 24m -24.2%

Google Finance

Builds tank cars used for ethanol, renewable fuels, and CO2.

Greenbrier Companies Inc supplies equipment and services to international freight transportation markets, designing and marketing freight railcars in North America, Europe, and Brazil through subsidiaries and joint ventures. It provides railcar wheel services, parts, maintenance, and conversion services in North America. The company owns a lease fleet sourced mainly from its manufacturing operations and offers railcar management, regulatory compliance, and leasing services to railroads and owners. It operates two segments: Manufacturing and Leasing & Fleet Management, with the majority of revenue from Manufacturing. The company operates in the U.S. and internationally, with the majority of revenue from the U.S. market.
