

Weekly Corn and Ethanol Intel Report

Week of August 20, 2026

Market data through: August 19, 2026

Narrative created: August 20, 2026

Weekly review of corn, ethanol, energy, co-product, policy, and related public-company performance for commodities risk managers at U.S. ethanol plants.

Strategy Narrative

- [1. USDA tightened corn despite a second-largest crop](#)
- [2. Ethanol production rose while blending inputs weakened](#)
- [3. Green Plains demonstrated why “crush margin” now requires a 45Z bridge](#)
- [4. E15 demand protection continued, but the policy cliff merely moved](#)
- [5. Record soybean supply raises the competitive bar for DDGS](#)

Executive View

- **Corn procurement risk increased.** USDA's first survey-based yield forecast cut national yield to 180.7 bushels per acre, while stronger export assumptions reduced projected 2026/27 ending stocks to 1.653 billion bushels. The crop remains historically large, but the buffer against additional weather or demand surprises is smaller.
- **Ethanol supply again outran domestic blending.** Production rose to 1.117 million barrels per day and inventories increased to 24.8 million barrels, 9.5% above a year earlier, while refiner and blender ethanol inputs declined.
- **The petroleum complex provided mixed support.** Gasoline stocks fell and remained 6% below the five-year average, but gasoline demand was slightly below last year and crude and wholesale gasoline prices declined sharply during the week.
- **45Z moved from prospective value to reported earnings and cash-flow exposure.** Green Plains recognized \$58.7 million of quarterly 45Z value; Aemetis reported both credit recognition and completed monetization. Plants now need to separate physical crush performance from tax-credit economics when benchmarking margins.

- **EPA preserved the E15 outlet through August 28, but only through another temporary waiver.** The extension protects incremental blending demand without resolving the recurring regulatory cliff.
- **Soybean supply became a clearer co-product risk.** USDA raised soybean production and crush, implying more soybean meal competition for DDGS and high-protein feed products this autumn.
- **Overall margin and risk conditions deteriorated modestly:** corn tightened, ethanol inventories rose and petroleum prices weakened, partially offset by inexpensive natural gas and substantial 45Z support for qualifying low-carbon production.

Exposure	Current signal	Change	Horizon	Confidence
Corn procurement	Tighter than July balance sheet	Deteriorated	Harvest–Q1 2027	High
Ethanol selling	Heavy production and inventories	Deteriorated	1–4 weeks	High
Natural gas	Historically manageable spot cost	Improved	1–3 months	Medium
DDGS/protein	More soybean-meal competition	Deteriorated	Harvest–winter	Medium
Regulatory value	Strong 45Z, mixed RIN signals	Bifurcated	2026–27	Medium
Overall plant margin	Input/output squeeze outside 45Z	Deteriorated modestly	Near term	Medium

The initial baseline is therefore a **large-crop but no-longer-loose corn market, high ethanol operating rates, and increasingly bifurcated plant economics between conventional and low-carbon facilities**. Long-running background issues—carbon-pipeline permitting, final 45Z compliance mechanics and structural year-round E15 legislation—are not repeated except where this week produced a measurable change.

1. USDA tightened corn despite a second-largest crop

Status: NEW

What happened

USDA's August 12 survey-based forecast put corn production at 16.013 billion bushels. Harvested area increased 1.2 million acres from July, but yield fell 2.3 bushels to 180.7. USDA also reduced beginning stocks by 75 million bushels and raised 2026/27 exports by 75 million to 3.275 billion, lowering ending stocks by 137 million to 1.653 billion. Corn use for ethanol remained 5.6 billion bushels. ([USDA, "WASDE-674," August 12, 2026](#); [USDA NASS, "Crop Production," August 12, 2026](#)) (esmis.nal.usda.gov)

The August 9 condition rating held at 61% good-to-excellent, but that was 11 percentage points below the prior year. Midwest moderate-or-worse drought coverage expanded to 24.7% by August 11, especially across Minnesota, Wisconsin and pockets of Iowa and Illinois. ([USDA NASS, "Crop Progress," August 10, 2026](#); [U.S. Drought Monitor, map released August 13, 2026](#)) (esmis.nal.usda.gov)

Why it matters

The important change is not crop size but the reduced residual cushion. Export demand—not ethanol demand—drove most of the monthly tightening, leaving domestic processors more exposed to additional yield losses or stronger-than-expected shipments.

Risk-manager implication

New-crop corn is less safely viewed as a harvest-pressure procurement opportunity. Plants with thin post-harvest coverage face greater basis and futures upside risk, particularly where local drought has reduced deliverable supply despite strong state-level yields. Directionally: **corn higher risk, ethanol neutral, plant margins lower**, with the main exposure from harvest through early 2027.

Watch next

Whether late-August rainfall stabilizes kernel weight and whether export inspections validate USDA's record-scale assumptions.

2. Ethanol production rose while blending inputs weakened

Status: UPDATE

What happened

For the week ended August 7, ethanol production increased 10,000 barrels per day to 1.117 million, including 1.060 million in the Midwest. Inventories rose 274,000 barrels to 24.798 million—9.5% above the comparable 2025 week. Meanwhile, refiner and blender ethanol inputs fell 21,000 barrels per day to 915,000. ([EIA, “Weekly Petroleum Status Report,” released August 12, 2026](#)) ([eia.gov](#))

Gasoline supplied slipped to 8.964 million barrels per day, with the four-week average down 0.5% year over year. Gasoline stocks nevertheless fell 1.0 million barrels and remained 6% below the five-year seasonal average. WTI ended August 7 at \$79.77 per barrel, down \$6.39 week over week, while New York Harbor conventional gasoline fell 25.6 cents to \$2.970 per gallon. ([EIA, “Weekly Petroleum Status Report Highlights,” August 12, 2026](#)) ([eia.gov](#))

Why it matters

The weekly balance was unfavorable for prompt ethanol values: production expanded, domestic disappearance weakened and inventory accumulated. Low gasoline inventories limit the downside, but declining petroleum prices reduced gasoline's value umbrella.

Risk-manager implication

Plants should treat the immediate ethanol-selling environment as softer unless exports absorb the surplus; a reliable public weekly ethanol-export value is unavailable. Directionally: **ethanol weaker, corn slightly supported by run rates, plant margins lower**, primarily over the next several weeks.

Watch next

Whether production retreats from the 1.1-million-barrel-per-day area before maintenance season and whether Gulf and East Coast stocks continue building.

3. Green Plains demonstrated why “crush margin” now requires a 45Z bridge

Status: CONFIRM

What happened

On its August 6 earnings call, Green Plains reported second-quarter adjusted EBITDA of \$93.3 million, a \$95.1 million consolidated ethanol crush margin and \$58.7 million of recognized 45Z production-credit value. Utilization was 88% because of planned maintenance and work at Madison, while management characterized physical ethanol and co-product conditions as strong. ([The Motley Fool, “Green Plains Q2 2026 Earnings Call Transcript,” published August 13, 2026; call held August 6](#)) ([fool.com](#))

Aemetis separately reported \$8.6 million of second-quarter 45Z value and disclosed \$17.6 million of July 9 net cash proceeds from a transfer of previously recognized credits. ([The Motley Fool, “Aemetis Q2 2026 Earnings Call Transcript,” published August 13, 2026; call held August 6](#)) ([fool.com](#))

Why it matters

These disclosures confirm that 45Z is already materially affecting reported plant profitability and working capital. Reported crush metrics may no longer represent purely physical ethanol, corn, energy and co-product economics.

Risk-manager implication

Benchmarking should separate **physical crush, accrued credit value, monetization haircut and timing risk**. Qualifying plants have a substantial margin buffer; conventional or higher-carbon facilities do not. Credit eligibility and verification errors now constitute operating-margin risks, not merely tax risks.

Watch next

Transfer pricing, audit reserves, final emissions-rate substantiation and the cash-conversion lag between production, recognition and credit sale.

4. E15 demand protection continued, but the policy cliff merely moved

Status: UPDATE

What happened

EPA's latest nationwide waiver became effective August 9 and permits a common gasoline pool containing 9%–15% ethanol at a 10-psi Reid Vapor Pressure standard through August 28. EPA also provided a sell-through provision for compliant fuel introduced into pipelines or certified before expiration. ([EPA, "Fuel Waivers," July 30, 2026 action; effective August 9–28](#)) ([epa.gov](#))

Separately, EPA's August 3 small-refinery action granted one full and two partial exemptions for 2024, found three petitions ineligible and denied none. The action covered six petitions from four refineries. ([EPA, "August 3, 2026 Decision on Petitions for RFS Small Refinery Exemptions," August 3, 2026](#)) ([epa.gov](#))

Why it matters

The waiver prevents an abrupt seasonal loss of E15 demand during a period of already-heavy ethanol inventories. Conversely, additional refinery relief reinforces the risk that RIN support can be diluted through case-specific exemptions, even under the new reallocation framework.

Risk-manager implication

The net signal is **supportive for physical ethanol demand but mixed for D6 RIN exposure**. Do not treat the waiver as structural demand growth: unless extended, the current authority expires August 28.

5. Record soybean supply raises the competitive bar for DDGS

Status: NEW

What happened

USDA raised 2026/27 soybean production by 44 million bushels to a record 4.519 billion, largely because harvested area increased 1.4 million acres. Projected crush rose 30 million bushels to 2.78 billion, while ending stocks increased to 320 million. ([USDA, "WASDE-674," August 12, 2026](#)) ([ers.usda.gov](#))

Why it matters

Higher crush implies additional soybean-meal availability. That does not mechanically determine DDGS prices, but it increases the probability that meal competes aggressively in feed rations during harvest and winter.

Risk-manager implication

The incremental risk is **softer DDGS and high-protein product realizations**, especially for plants relying on co-product strength to offset weaker ethanol. Distillers corn oil faces a more mixed setup because additional soybean oil supply is countered by strong biofuel-policy demand.

Strategic Synthesis

The week replaced the simple “large crop equals cheap corn” thesis with a tighter one: **the United States can harvest its second-largest corn crop and still leave ethanol plants exposed because export demand is consuming the surplus**. At the same time, high industry run rates are accumulating ethanol stocks faster than domestic blending, making low-carbon credits and disciplined product sales increasingly important to plant-level margin differentiation.

What I’m Watching Next

- **August 19, 2026:** EIA petroleum and ethanol data for the week ending August 14.
- **August 28, 2026:** Current EPA national gasoline-pool and E15 waiver expires.
- **September 11, 2026:** USDA September WASDE and Crop Production reports.

Bottom Line

The most consequential change was USDA’s reduction of the corn carryout cushion despite a 16-billion-bushel crop. **Post-harvest corn coverage now deserves the closest attention**, while the August 19 EIA report will determine whether this week’s ethanol inventory build was temporary or the start of a more persistent product-margin squeeze.

Notable Changes

Comparison with the final report dated August 13, 2026 (market data through August 12, 2026).

Companies covered in this section:

- [Deere \(DE\)](#)
- [Cosan \(CSAN\)](#)

Deere (DE) +3.6%

Reported: August 20, 2026 · [Google Finance earnings page](#)

Earnings Call Summary

John Deere delivered strong Q3 2026 results, with net sales and revenues up 5% year-over-year to \$12.608B, and equipment operations net sales up 6% to \$10.999B. Net income reached \$1.379B, or \$5.10 per diluted share, comfortably beating the estimated EPS of \$4.679. Equipment operations achieved a 14.4% operating margin.

At a Glance

- **Deere Tops Q3 Financial Estimates:** Deere & Company reported an adjusted EPS of \$5.10, comfortably beating Wall Street expectations of \$4.679, while reported revenue reached \$10.999 billion to surpass the estimated \$10.734 billion.
- **Segment Divergence Drives KPI Resilience:** Operating performance was driven by a robust 18% net sales increase in Construction & Forestry and a 12% gain in Small Ag & Turf, which successfully offset

a 6% revenue decline in the Production & Precision Ag segment.

- **Full Year Income Outlook Raised:** Management narrowed and raised its fiscal 2026 net income guidance to a range of \$4.75 billion to \$5.00 billion, confidently establishing 2026 as the structural bottom of the current agricultural equipment cycle.
- **Market Responds with Upward Momentum:** Following the stronger-than-expected third-quarter results and updated full-year forecast, Deere's shares jumped over 7% during trading on Thursday.
- **Tariff Costs Face Future Headwinds:** The company recorded a beneficial \$110 million in tariff recoveries during the quarter, but projects a higher net run rate of direct tariff expenses near \$1 billion heading into fiscal 2027.

Key Moments from the Call

- **10m — Fiscal 2026 Guidance Raised on Execution:** Deere raised its full-year 2026 net income outlook to \$4.75B-\$5.00B and equipment cash flows to \$5.0B-\$5.5B. Strong factory output, disciplined execution, and robust Q4 order books across all segments gave management the confidence to narrow and lift guidance despite dynamic, challenging agricultural end markets.
- **21m — EOP Signals 2026 as Cycle Bottom:** Model year 2027 Early Order Programs (EOP) for planters and sprayers in North America are up mid-single digits year-over-year. Management believes this encourages the view that 2026 represents the bottom of the agricultural equipment cycle, backed by normalized new/used inventory spreads and healthy dealer channel inventory.
- **25m — Precision Ag Technology Adoption Doubles:** Despite a compressed farm economy, technology adoption continues to accelerate. Factory installation trends suggest See & Spray adoption will nearly double, making its way onto 1/3 of North American sprayer orders. Advanced planter technologies like ExactRate and FurrowVision are appearing on over 40% of model year 2027 orders.
- **33m — Tariff Costs Set to Shift in 2027:** Deere lowered its 2026 direct tariff expense expectation to \$1.1B (down from \$1.2B) due to Section 232 adjustments. However, after factoring in \$382M of 2026 refunds that will not recur, net tariff exposure will rise from ~\$750M in 2026 to ~\$1.0B in 2027, creating a minor headwind.

Cosan (**CSAN**) -26.4%

Reported: August 17, 2026 · [Google Finance earnings page](#)

Earnings Call Summary

Cosan announced key portfolio and capital initiatives in 1H 2026, including Compass' IPO secondary offering generating BRL 2.3 billion in net proceeds. The company also signed the sale of a portion of Radar's land portfolio for BRL 1.85 billion and entered an exclusive letter of intent to divest its stake in Porto São Luís for BRL 300 million.

At a Glance

- **Cosan Misses Revenue and EPS Estimates:** Cosan reported a reported adjusted EPS of -0.08 against an expected 0, alongside a reported revenue of 10,775,931,000 which missed the expected estimate of 41,679,623,000.
- **Corporate Debt Significantly Reduced Quarter-Over-Quarter:** The company's expanded net debt decreased by 20% quarter-over-quarter to BRL 9.2 billion, supported by nearly BRL 9 billion in total debt prepayments made during the first half of 2026.
- **Coverage Ratio Projected to Rebound Sharply:** Although the Debt Service Coverage Ratio temporarily dropped to 0.2 times due to dividend seasonality, management issued significant guidance targeting an improvement to between 0.8 and 1.2 times by December 2026.
- **Subsidiary Core EBITDA Performance Remains Resilient:** Operational results across key holdings were steady, as Rumo's EBITDA held stable at BRL 2.3 billion and Compass recorded a 5% year-over-year EBITDA increase driven by strong residential and commercial margins.
- **Asset Monetization Strides Deliver Liquidity Boost:** Deleveraging efforts were heavily supported by corporate actions, including a secondary IPO of Compass shares generating BRL 2.3 billion in net proceeds and a partial land portfolio sale by Radar for BRL 1.85 billion.

- **Conglomerate Seeks Voluntary NYSE Delisting:** Following the earnings release, Cosan announced plans to voluntarily delist its American Depositary Shares from the New York Stock Exchange to centralize trading on the B3 exchange and reduce overhead expenses.

Key Moments from the Call

- **3m — NYSE Delisting and Management Restructuring:** Investors will appreciate Cosan's aggressive push to simplify its holding structure and cut costs by delisting its ADSs from the NYSE and streamlining management. While the departures of long-time executives Maria Rita and Rafael Bergman are notable, bringing back Cezário accelerates the company's corporate rationalization and commitment to further G&A reductions.
- **5m — New 2026 Debt Coverage Ratio Guidance:** The introduction of a December 2026 debt service coverage ratio guidance of 0.8x to 1.2x provides clear reassurance to investors. Although the current 0.2x ratio looks weak due to dividend seasonality, the forecast proves an inflection point has been reached following BRL 9 billion in debt prepayments and pending asset monetization inflows.
- **21m — Rumo Stake Sale and Moove IPO Strategy:** CEO Marcelo Martins pleased investors by confirming that the planned sale of a minority stake in Rumo is moving forward productively with potential buyers. Conversely, he ruled out an imminent IPO or stake sale for Moove, defending this asset preservation because of Moove's exceptionally robust, resilient performance following past industrial operational headwinds.
- **35m — Moove Profitability and Working Capital Discipline:** Investors will be pleased by Moove's ability to double its EBITDA sequentially by capitalizing on supply restrictions from the Strait of Hormuz crisis. Despite rising raw material costs threatening future margins and expanding working capital needs, Moove maintained strict risk management, bringing leverage down to 1.4x, its lowest level since acquiring PetroChoice.

Company Overviews

Corteva (CTVA)

Crop inputs, equipment, and irrigation · \$52.4B · 3m -0.3% · 12m +7.7% · 24m +46.6%

[Google Finance](#)

Largest U.S. corn-seed franchise (Pioneer) and a primary input cost for Corn Belt acres.

Corteva is an agricultural inputs pure play that was formed in 2019 when it was spun off from DowDuPont. The company is a leader in the development of new seed and crop protection products. Seeds generate the majority of profits with the remainder coming from crop protection products. Corteva plans to spin off its seeds business in late 2026. The seeds business will be named Vylor, while the crop protection business will retain the Corteva name and be a pure-play crop protection company following the divestiture. Corteva operates globally, but around half of revenue comes from North America.

Bayer (BAYRY)

Crop inputs, equipment, and irrigation · n/a · 3m +22.7% · 12m +71.5% · 24m +77.4%

[Google Finance](#)

Dekalb and former Monsanto corn-seed brands; together with Corteva dominates U.S. corn seed.

Crop-protection chemistry used on U.S. corn acres.

BASFY vs. Crop inputs, equipment, and irrigation peers and S&P 500 — last 3 months

BASF SE S/ADR

Nutrien (NTR)

Crop inputs, equipment, and irrigation · \$33.6B · 3m +0.6% · 12m +23.6% · 24m +50.6%

[Google Finance](#)

Largest North American agricultural retailer and a major potash and nitrogen producer.

Created in 2018 as a result of the merger between PotashCorp and Agrium, Nutrien is the world's largest fertilizer producer by capacity. Nutrien produces the three main crop nutrients—nitrogen, potash, and phosphate—although its main focus is potash, where it is the global leader in installed capacity with a roughly 20% market share. The company is also the largest agricultural retailer in North America and Australia, selling fertilizers, crop chemicals, seeds, and services directly to farm customers through its brick-and-mortar stores and online platforms.

CF Industries (CF)

Crop inputs, equipment, and irrigation · \$18.0B · 3m -3.5% · 12m +39.3% · 24m +48.7%

[Google Finance](#)

Nitrogen fertilizer producer; corn is the crop that most moves UAN and urea demand.

CF vs. Crop inputs, equipment, and irrigation peers and S&P 500 — last 3 months

CF Industries is a leading producer and distributor of nitrogen, which is primarily used in fertilizers. The company operates nitrogen manufacturing plants primarily in North America. CF also produces nitrogen in the United Kingdom and holds a joint venture interest in a nitrogen production facility in Trinidad and Tobago. CF makes nitrogen primarily using low-cost US natural gas as its feedstock, making the company one of the lowest-cost nitrogen producers globally. It is also investing in carbon-free blue and green ammonia, which can be used as an alternative fuel to hydrogen or as a means to transport hydrogen.

Yara International (YARIY)

Crop inputs, equipment, and irrigation · n/a · 3m -22.3% · 12m +20.3% · 24m +54.3%

[Google Finance](#)

Global nitrogen producer that sets the international urea and ammonia reference.

YARIY vs. Crop inputs, equipment, and irrigation peers and S&P 500 — last 3 months

YARA INTL ASA S/ADR

Mosaic (MOS)

Crop inputs, equipment, and irrigation · \$7.1B · 3m +1.7% · 12m -31.5% · 24m -18.5%

[Google Finance](#)

Phosphate and potash producer that completes corn production budgets.

MOS vs. Crop inputs, equipment, and irrigation peers and S&P 500 — last 3 months

Mosaic is one of the largest phosphate and potash producers in the world. The company's assets include phosphate rock mines in the US and potash mines in Canada. Mosaic also runs a large fertilizer distribution operation in Brazil through its Mosaic Fertilizantes business.

Deere (DE)

Crop inputs, equipment, and irrigation · \$156.7B · 3m +3.6% · 12m +17.8% · 24m +55.8%

[Google Finance](#)

Dominant North American farm-equipment maker for corn planting, harvest, and grain handling.

Deere is the world's leading manufacturer of agricultural equipment and a major producer of construction machinery. The company is divided into four reporting segments: production & precision agriculture, or PPA, small agriculture & turf, or SAT, construction & forestry, or CF, and financial services, or FS, its captive finance subsidiary. The core PPA business is the largest contributor to sales and profits by far.

Geographically, Deere sales are 60% US/Canada, 17% Europe, 14% Latin America, and 9% rest of the world. Deere goes to market through a robust dealer network that includes over 2,000 dealer locations in North America with reach into over 100 countries. John Deere Financial provides retail financing for machinery to its customers and wholesale financing for dealers.

CNH Industrial (CNH)

Crop inputs, equipment, and irrigation · \$16.5B · 3m -1.6% · 12m -15.5% · 24m +5.1%

[Google Finance](#)

Case IH and New Holland farm equipment serving corn growers.

CNH Industrial is the world's second largest manufacturer of agricultural machinery (82% of industrial net sales) as well as a major player in construction equipment (18% of industrial net sales). Its Case and New Holland brands have served farmers for generations. Geographically, agricultural sales are 40% in North America, 32% in Europe, the Middle East, and Africa, 18% in South America, and 10% in Asia-Pacific. CNH's products are available through a robust independent dealer network, which includes over 2,600 dealer and distribution locations and reach into 164 countries. The construction business leverages over 400 dealers. The company's captive finance arm provides retail financing to its customers and wholesale financing to dealers to maintain inventory, thereby supporting sales.

AGCO (AGCO)

Crop inputs, equipment, and irrigation · \$7.0B · 3m -13.3% · 12m -11.9% · 24m +12.1%

[Google Finance](#)

Fendt, Massey Ferguson, and Challenger farm equipment with Corn Belt exposure.

AGCO vs. Crop inputs, equipment, and irrigation peers and S&P 500 — last 3 months

Agco is a global manufacturer of agricultural equipment. Its main machine brands are Fendt, Massey Ferguson, and Valtra; its initiatives in precision agriculture have been organized under the PTx umbrella following a series of acquisitions. While a global business, Agco's sales skew heavily toward Europe/Middle East, representing 50%-60% of sales and even more of operating profits. The company is trying to increase its exposure to the larger North and South American markets. Its products are available through a global dealer network, which includes over 3,000 dealers and distribution locations and reaches into over 140 countries. Additionally, Agco offers retail and wholesale financing to customers through its partnership with Rabobank of the Netherlands, having exited their JV in 2026.

Valmont Industries (VMI)

Crop inputs, equipment, and irrigation · \$9.3B · 3m -3.8% · 12m +33.0% · 24m +72.4%

[Google Finance](#)

Center-pivot irrigation (Valley) used on irrigated High Plains corn.

VMI vs. Crop inputs, equipment, and irrigation peers and S&P 500 — last 3 months

Valmont Industries Inc, along with its subsidiaries, operates as a manufacturer of products and services for infrastructure and agriculture markets. Its reportable segments are Infrastructure and Agriculture. The company generates maximum revenue from the Infrastructure segment, which includes the manufacturing and distribution of products and solutions to serve the infrastructure markets of utility, solar, lighting, transportation, and telecommunications, along with coatings services to protect metal products. The Agriculture segment provides irrigation equipment components, including aftermarket parts and tubular products, and technology solutions for precision agriculture. Geographically, it derives key revenue from the United States, followed by Australia, Brazil, and other regions.

Archer Daniels Midland (ADM)

Grain origination and agribusiness, U.S. ethanol and process technology, Wet milling, ingredients, and co-products · \$38.9B · 3m +4.1% · 12m +33.0% · 24m +36.9%

[Google Finance](#)

Global grain trader, top U.S. ethanol producer, and major corn wet miller.

Archer-Daniels-Midland is a major processor of oilseeds, corn, wheat, and other agricultural commodities. The company is also one of the largest grain merchandisers through its extensive network of logistical assets to store and transport crops around the globe. ADM also runs a nutrition business that focuses on both human and animal ingredients and is a large producer of corn-based sweeteners, starches, and ethanol.

Bunge (BG)

Grain origination and agribusiness · \$21.9B · 3m -5.0% · 12m +38.4% · 24m +19.8%

[Google Finance](#)

Global grain and oilseed merchant after the Viterra combination; competitor for corn origination.

Bunge Global SA is an agribusiness solutions company, connecting farmers to consumers and delivering essential food, feed and fuel to the globe. The company segments include Soybean Processing and Refining; Softseed Processing and Refining; Other Oilseeds Processing and Refining; Grain Merchandising and Milling; and Corporate and Other. It generates maximum revenue from the Soybean Processing and Refining segment, which includes integrated business principally involved in the purchase, storage, transportation, processing, distribution, refining, marketing, and sale of soybeans and soybean related products, as well as biodiesel and fertilizer production and distribution. Geographically, the company operates in United States, Switzerland, Netherlands, and Rest of the World.

The Andersons (ANDE)

Grain origination and agribusiness, U.S. ethanol and process technology · \$2.3B · 3m -4.1% · 12m +76.9% · 24m +38.9%

[Google Finance](#)

Grain elevators plus four wholly owned ethanol plants totaling about 500 million gallons a year.

Andersons Inc is an agriculture and renewable fuels company. Its operations are classified into two reportable business segments: Agribusiness, which generates maximum revenue, and Renewables. The Agribusiness segment includes merchandising and managing logistics across various commodities, as well as being a manufacturer, distributor, and retailer of agricultural and related plant nutrients. The segment specializes in the movement of physical commodities such as whole grains, grain products, feed ingredients, and domestic fuel products, among other agricultural commodities. The Renewables segment mainly produces, purchases, and sells ethanol and co-products. Geographically, the company generates maximum revenue from the United States, followed by Canada, Mexico, and other markets.

Valero Energy (VLO)

U.S. ethanol and process technology, Fuel blending, refining, and retail · \$99.7B · 3m +36.4% · 12m +146.4% · 24m +145.1%

[Google Finance](#)

World's second-largest corn-ethanol producer with a distinct Ethanol segment and a major blender.

Valero Energy is one of the largest independent refiners in the United States. It operates 15 refineries, with a total throughput capacity of 3.2 million barrels a day in the US, Canada, and the United Kingdom. Valero also owns 12 ethanol plants with capacity of 1.6 billion gallons a year and holds a 50% stake in Diamond Green Diesel, which can produce 1.2 billion gallons per year of renewable diesel.

Green Plains (GPRE)

U.S. ethanol and process technology · \$1.1B · 3m +2.4% · 12m +110.4% · 24m +19.2%

[Google Finance](#)

Largest U.S. ethanol pure play, with high-protein feed, corn oil, and Nebraska carbon-capture work.

Green Plains Inc manufactures and sells ethanol and ethanol byproducts in two segments based on function. The ethanol production segment, which generates the majority of revenue, includes the production of ethanol, distillers grains, Ultra-High Protein and renewable corn oil. The agribusiness and energy services segment includes grain handling and storage, commodity marketing and merchant trading for company-produced and third-party ethanol, distillers grains, Ultra-High Protein, renewable corn oil, natural gas and other commodities.

REX American Resources (REX)

U.S. ethanol and process technology · \$1.4B · 3m -10.1% · 12m +55.9% · 24m +91.0%

[Google Finance](#)

Holding company with interests in six Corn Belt ethanol plants; cleanest public crush-margin equity.

REX American Resources Corp operates as a holding company that engages in investments in alternative energy and ethanol production entities. Its operating segments include Ethanol and By-Products. Its products include Ethanol, dried distillers grains, modified distillers grains, Distillers corn oil, Modified distillers grains, and Other.

Novonesis (NVZMY)

U.S. ethanol and process technology · n/a · 3m +10.4% · 12m -1.4% · 24m -2.5%

[Google Finance](#)

Dominant supplier of enzymes used in dry-mill ethanol fermentation.

NOVONESIS B UNSP/ADR

Ingredion (INGR)

Wet milling, ingredients, and co-products · \$6.8B · 3m +6.4% · 12m -15.5% · 24m -18.8%

[Google Finance](#)

Major corn wet miller producing sweeteners, starches, and specialty ingredients.

Ingredion is an ingredients provider for the food, beverage, brewing, and animal nutrition industries. The company processes corn, tapioca, potatoes, stevia, grains, fruits, gums, and vegetables into value-added ingredients. The company sells specialty ingredients that include starch-based texturizers and natural alternative sweeteners such as stevia. Ingredion also sells commodity ingredients that include sweeteners, such as high-fructose corn syrup, and starches, such as those used for sustainable packaging, as well as plant-based proteins. The company plans to acquire Tate & Lyle in an all-cash deal that should close in 2027.

Darling Ingredients (DAR)

Wet milling, ingredients, and co-products · \$10.6B · 3m +13.5% · 12m +117.3% · 24m +71.4%

[Google Finance](#)

Rendering and used cooking oil; 50/50 owner of Diamond Green Diesel with Valero.

Darling Ingredients Inc is a developer and producer of sustainable natural ingredients from edible and inedible bio-nutrients, creating a wide range of ingredients and customized specialty solutions for customers in the pharmaceutical, food, pet food, animal feed, industrial, fuel, bioenergy and fertilizer industries. It processes by-products from the animal agriculture and food industries into ingredients and products for human nutrition, animal feed, crop inputs, and renewable energy applications. The company operates processing facilities across multiple countries and produces collagen, including gelatin and hydrolyzed collagen, as well as renewable energy products.

Tyson Foods (TSN)

Wet milling, ingredients, and co-products · \$20.6B · 3m -12.0% · 12m +3.5% · 24m -6.2%

[Google Finance](#)

Largest U.S. protein company and a primary domestic sink for distillers grains.

Tyson Foods is a protein-focused food producer, selling raw chicken, beef, pork, and prepared foods. Chicken and beef are its two largest segments, composing about 40% and 30% of sales, respectively. Prepared foods constituted 18% of fiscal 2025 sales and include brands like Tyson, Jimmy Dean, Hillshire Farm, Ball Park, and Sara Lee. However, most of these are in product categories rife with competition where Tyson does not have a massive market share lead. Tyson sells some products overseas, but the international segment accounts for just 4% of total revenue. The company is an active acquirer, with more recent years' purchases focused on international and food-service markets.

JBS (JBS)

Wet milling, ingredients, and co-products · \$45.2B · 3m +6.6% · 12m -8.8% · 24m n/a

[Google Finance](#)

World's largest protein company and a major DDGS buyer in the U.S. and Brazil.

JBS NV is a protein food company, selling protein products, which include fresh and frozen cuts of beef, pork, lamb, fish, whole chickens, and chicken parts, to retailers, and foodservice companies. The food products are marketed under different brands such as Swift, Just Bare, Pilgrim's Pride, Sunnyvalley, Reserva Friboi, Great Southern, etc., globally. The company's reportable segments are Beef North America, which generates maximum revenue, Brazil, Seara, Pork USA, Pilgrim's Pride, Australia, and Others. Geographically, it derives majority of its revenue from United States of America.

Marathon Petroleum (MPC)

Fuel blending, refining, and retail · \$101.3B · 3m +39.6% · 12m +117.6% · 24m +110.2%

[Google Finance](#)

Largest U.S. independent refiner and a major Midwest ethanol blender.

Marathon Petroleum is a leading integrated downstream and midstream energy company that operates 13 refineries in the Gulf Coast, Mid-Continent, and West Coast regions of the United States with an aggregate crude oil refining capacity of 3.0 million barrels per day. The company is one of the largest producers of renewable diesel in the US; its Dickinson, North Dakota facility has the capacity to produce 184 million gallons per year, and its Martinez, California, joint venture facility (a 50/50 partnership with Neste) reached its full capacity of 730 million gallons per year in late 2024. Marathon also owns the general partner and approximately 64% of MPLX LP, a large-cap master limited partnership that owns and operates midstream energy infrastructure and logistics assets.

Phillips 66 (PSX)

Fuel blending, refining, and retail · \$96.7B · 3m +35.1% · 12m +96.1% · 24m +83.0%

[Google Finance](#)

Large blender and marketer with West Coast renewable-diesel capacity.

Phillips 66 is an independent refiner that owns or holds interest in 10 refineries with a total crude throughput capacity of 2.0 million barrels per day, or mmb/d, at the end of 2025. The midstream segment comprises extensive transportation and NGL processing assets. It includes 70,000 miles of crude oil, refined petroleum product, NGL and natural gas pipeline systems, and a comprehensive set of refined petroleum product, NGL and crude oil terminals, gathering and processing plants and fractionation facilities and various other storage and loading facilities. Its CPChem chemical joint venture operates facilities primarily in the United States and the Middle East and produces olefins and polyolefins.

HF Sinclair (DINO)

Fuel blending, refining, and retail · \$16.8B · 3m +33.0% · 12m +103.1% · 24m +100.2%

[Google Finance](#)

Independent Mid-Continent and Rockies refiner with renewable diesel and RFS blending obligations.

HF Sinclair is an integrated petroleum refiner that owns and operates seven refineries serving the Rockies, midcontinent, Southwest, and Pacific Northwest, with a total crude oil throughput capacity of 678,000 barrels per day. It can produce 380 million gallons of renewable diesel annually. It operates a marketing business with over 350 distributors and 1,700 branded wholesale sites across 30 states. It also owns and operates 4,500 miles of petroleum product pipelines and terminals principally in the Southwestern United States.

CVR Energy (CVI)

Fuel blending, refining, and retail · \$3.7B · 3m +9.6% · 12m +27.0% · 24m +50.7%

[Google Finance](#)

Coffeyville, Kansas refiner in the corn complex with renewable diesel and a nitrogen affiliate.

CVR Energy Inc is a holding company that engages in petroleum refining and nitrogen fertilizer manufacturing through its subsidiaries. Subsidiaries include several complex, full-coking crude oil refineries, along with a crude oil gathering system, pipelines, storage tanks, and marketing and supply. The company's refineries can process blends of a variety of crude oil ranging from heavy sour to light sweet crude oil. Crude oil for CVR's refineries is supplied through its wholly-owned gathering system and pipeline. From its refineries, CVR supplies products through tanker trucks directly to customers located in close geographic proximity and customers at throughput terminals. The company's customers include retailers, railroads, and farm cooperatives.

Sunoco LP (SUN)

Fuel blending, refining, and retail · \$14.5B · 3m +6.8% · 12m +47.6% · 24m +46.2%

[Google Finance](#)

Fuel distributor and terminal operator that moves finished gasoline and ethanol.

Sunoco LP is engaged in the distribution of motor fuels to independent dealers, distributors, and other commercial customers as well as the distribution of motor fuels to end-use customers at retail sites operated by commission agents. It is a growth-oriented master limited partnership (MLP) that operates as a wholesale and retail fuel distributor in the United States. The firm operates through the Fuel Distribution; Pipeline Systems; Refinery and Terminals segments. It generates the majority of its revenue from the Fuel Distribution segment. It distributes motor fuel to convenience stores, dealers, and commercial customers in various states.

Casey's General Stores (CASY)

Fuel blending, refining, and retail · \$30.9B · 3m -1.9% · 12m +62.9% · 24m +123.1%

[Google Finance](#)

Corn Belt convenience-store chain with high E10/E15/E85 exposure.

Casey's General Stores Inc, along with its subsidiaries, operates convenience stores mainly under the names Casey's, GoodStop (by Casey's), and Casey's General Store throughout various states in the USA, approximately half of which are located in Iowa, Missouri, and Illinois. These stores offer a broad selection of food items (which includes prepared foods such as regular and breakfast pizza, donuts, hot breakfast items, and hot and cold sandwiches), beverages, tobacco and nicotine products, groceries, health and beauty aids, automotive products, and other non-food items. The majority of the company's revenue is mainly derived from the retail sale of fuel and the products offered inside its stores.

Murphy USA (MUSA)

Fuel blending, refining, and retail · \$10.4B · 3m +2.3% · 12m +44.1% · 24m +11.3%

[Google Finance](#)

High-volume fuel retailer and national ethanol blender.

MUSA vs. Fuel blending, refining, and retail peers and S&P 500 — last 3 months

Murphy USA Inc is mainly engaged in the marketing of retail motor fuel products and convenience merchandise through a network of several retail stores in the Southwest, Southeast, Midwest, and Northeast United States. The majority of Murphy USA's stores are located in proximity to Walmart Supercenters, but it also operates standalone stores that market gasoline and other products under the Murphy USA, Murphy Express, and QuickChek brands. In addition, the company also markets fuel to unbranded wholesale customers through a mixture of company-owned and third-party product distribution terminals and pipeline positions. The firm generates maximum revenue through retail sales of petroleum products, and the rest from merchandise sales and wholesale of petroleum products.

Neste (NTOIY)

Advanced biofuels and SAF · n/a · 3m +3.5% · 12m +97.5% · 24m +54.8%

[Google Finance](#)

Largest global producer of renewable diesel and SAF; sets the price umbrella for corn oil.

NESTE OYJ UNSP/ADR

Chevron (CVX)

Advanced biofuels and SAF · \$403.6B · 3m +7.5% · 12m +34.3% · 24m +42.2%

[Google Finance](#)

Owner of Renewable Energy Group biodiesel and renewable-diesel plants that take corn oil at the margin.

CVX vs. Advanced biofuels and SAF peers and S&P 500 — last 3 months

Chevron is an integrated energy company with exploration, production, and refining operations worldwide. It is the second-largest oil company in the United States with 2025 worldwide net oil-equivalent production of 3.7 million barrels per day, including 8.5 billion cubic feet per day of natural gas and 2.3 million barrels of liquids per day. Production takes place in North America, South America, Europe, Africa, Asia, and Australia. The company's refining networks are located in the United States and Asia, with a total worldwide refining capacity of 1.8 million barrels of oil a day at year-end 2025. Net proved reserves at year-end 2025 stood at 10.6 billion barrels of oil equivalent, consisting of 5.7 billion barrels of liquids and 29.2 trillion cubic feet of natural gas.

Cosan (CSAN)

International ethanol · \$2.5B · 3m -26.4% · 12m -34.4% · 24m -74.9%

[Google Finance](#)

Brazilian holding company and the liquid U.S.-listed proxy for sugarcane ethanol via Raizen.

Cosan SA engages in several services throughout the energy and logistics sectors. Its reportable segments are Raizen, Compass, Moove, Rumo, and Radar. It generates the majority of its revenue from Raizen which operates in the production, commercialization, origination, and trading of ethanol, bioenergy, resale, and trading of electricity, renewable sources, marketing, origination, and trading of sugar and fuels, and lubricant.

Adecoagro (AGRO)

International ethanol · \$1.5B · 3m -20.6% · 12m +25.1% · 24m -4.3%

[Google Finance](#)

South American farmland and sugar/ethanol producer with U.S.-listed equity.

Adecoagro SA is a Luxembourg-based agricultural company. It is involved in a wide range of businesses, including farming crops and other agricultural products, dairy operations sugar, ethanol, energy production, and land transformation. The group operates in two lines of business, namely, Farming and Sugar, Ethanol and Energy. The Farming is further comprised of three reportable segments: Crops, Rice and Dairy. Sugar, Ethanol and Energy Segment, consists of cultivating sugarcane, which is processed in owned sugar mills, transformed into ethanol, sugar and electricity, in addition to biomethane and then marketed.

Union Pacific (UNP)

Logistics · \$179.3B · 3m +13.5% · 12m +33.7% · 24m +22.4%

[Google Finance](#)

Primary western Class I for Corn Belt corn, ethanol unit trains, DDGS, and corn oil.

Omaha, Nebraska-based Union Pacific is the largest public railroad in North America. Operating on more than 30,000 miles of track in the western two-thirds of the US, Union Pacific generated \$24.5 billion of revenue in 2025 by hauling coal, industrial products, intermodal containers, agricultural goods, chemicals, fertilizers, and automotive goods. Union Pacific owns about one-fourth of Mexican railroad Ferromex and historically derives roughly 10% of its revenue hauling freight to and from Mexico.

CSX (CSX)

Logistics · \$93.9B · 3m +10.3% · 12m +40.8% · 24m +50.9%

[Google Finance](#)

Primary eastern Class I into Northeast and Southeast gasoline markets for ethanol unit trains.

Operating in the Eastern United States, Class I railroad CSX generated revenue of nearly \$14 billion in 2025. On its more than 21,000 miles of track, CSX hauls shipments of coal (16% of consolidated revenue), chemicals (17%), intermodal containers (16%), automotive cargo (7%), and a diverse mix of other bulk and industrial merchandise.

Canadian Pacific Kansas City (CP)

Logistics · \$83.0B · 3m +9.4% · 12m +27.1% · 24m +19.1%

[Google Finance](#)

North-south railroad for Midwest corn and ethanol to the Gulf and Mexico.

Canadian Pacific Kansas City is a Class I railroad operating on tracks that span most of Canada and into parts of the Midwestern and Northeastern United States. Following the April 2023 Kansas City Southern merger, CPKC operates new single-linehaul services from Canada and the Upper Midwest down through Texas, the Gulf of Mexico, and into Mexico. It also hauls cross-border and intra-Mexico freight via operating concessions on more than 3,000 miles of rail in Mexico. CPKC hauls shipments of grain, intermodal containers, energy products (like crude and frac sand), chemicals, plastics, coal, fertilizer and potash, automotive products, and a diverse mix of other merchandise.

GATX (GATX)

Logistics · \$6.2B · 3m +3.1% · 12m +10.1% · 24m +27.2%

[Google Finance](#)

Largest public railcar lessor of ethanol tank cars and grain/DDGS hoppers.

GATX Corp leases transportation assets, including railcars, aircraft spare engines, and tank containers, to customers in North America, Europe, and India. The company's reportable business segments are: Rail North America, Rail International, Engine Leasing, and Other. The majority of its revenue is generated from the Rail North America segment, which is composed of the company's operations in the United States, Canada, and Mexico. This segment mainly provides railcars pursuant to full-service leases under which it maintains the railcars, pays ad valorem taxes and insurance, and provides other ancillary services.

Trinity Industries (TRN)

Logistics · \$2.4B · 3m -12.3% · 12m +6.3% · 24m -7.3%

[Google Finance](#)

Builds and leases covered hoppers and tank cars used for grain, DDGS, and ethanol.

Trinity Industries Inc sells and leases railroad products and railcar maintenance services in North America. The company operates under the name TrinityRail in two main segments: railcar leasing and management services, which owns railcars and provides fleet management and administration services; rail products, which builds, sells, and modifies freight and tank railcars and their components; and all other, which sells highway products such as guardrail and other highway barriers. Customers include railroads, leasing companies, and shipping companies in agriculture, construction, consumer products, energy, and chemicals.

Greenbrier (GBX)

Logistics · \$1.4B · 3m -5.2% · 12m -1.8% · 24m -2.0%

[Google Finance](#)

Builds tank cars used for ethanol, renewable fuels, and CO2.

Greenbrier Companies Inc supplies equipment and services to international freight transportation markets, designing and marketing freight railcars in North America, Europe, and Brazil through subsidiaries and joint ventures. It provides railcar wheel services, parts, maintenance, and conversion services in North America. The company owns a lease fleet sourced mainly from its manufacturing operations and offers railcar management, regulatory compliance, and leasing services to railroads and owners. It operates two segments: Manufacturing and Leasing & Fleet Management, with the majority of revenue from Manufacturing. The company operates in the U.S. and internationally, with the majority of revenue from the U.S. market.
