Weekly Corn and Ethanol Intel Report

> **Week of September 10, 2026**
> Market data through: September 9, 2026
> Narrative created: September 11, 2026
> Nearby corn: $5.077/bu (-$0.075 (-1.5%) week)

Weekly review of corn, ethanol, energy, co-product, policy, and related public-company performance for commodities risk managers at U.S. ethanol plants.

Strategy Narrative

Nearby futures from Yahoo Finance. Nearby corn is the market's current perception of yield and demand risk.

Contract	Last	Week change	As of
Nearby corn	$5.077/bu	-$0.075 (-1.5%)	September 9, 2026
RBOB gasoline	$3.211/gal	+0.076 (+2.4%)	September 9, 2026
Henry Hub	$2.822/MMBtu	-0.091 (-3.1%)	September 9, 2026

- 1. Corn sold off, but USDA—not price action—must resolve the yield gap
- 2. 45Z turned regenerative corn into a measurable procurement attribute
- 3. Ethanol stocks rebuilt as domestic inputs fell
- 4. Low water is widening the harvest basis and freight risk

Executive View

- **Corn-yield uncertainty remains the controlling physical-margin regime, but the market trimmed—not expanded—the risk premium this week.** USDA's August balance sheet still assumes a **180.7-bushel yield and 1.653-billion-bushel 2026/27 carryout**, versus Pro Farmer's 173.2-bushel field estimate. Nearby corn closed September 9 at **$5.077 per bushel, down**

$0.075, or 1.5%, from September 3. The decline indicates that traders did not add to yield risk ahead of Friday's report, even as USDA lowered corn condition one point to 56% good-to-excellent. (USDA NASS, *Crop Progress*, September 8, 2026; Pro Farmer, *What to Expect from USDA's September Crop Report on Friday*, September 9, 2026) (esmis.nal.usda.gov)

- **45Z guidance produced the week's largest structural change in plant economics.** IRS Notice 2026-53 and DOE's September GREET update now permit qualifying regenerative-ag practices to affect corn-feedstock carbon intensity, including for eligible 2025 production. Transition relief removes the pre-application nutrient-budget requirement for 2025 and 2026 crops, although chain-of-custody, verification and input-substantiation obligations remain. (IRS, *Notice 2026-53*, September 8, 2026; DOE, *45ZCF-GREET Change Log—September 2026*) (irs.gov)
- **The prompt ethanol balance deteriorated after last week's draw.** Production eased 5,000 barrels per day to **1.102 million**, but inventories increased **152,000 barrels to 25.187 million** and EIA refiner and blender ethanol inputs fell **32,000 barrels per day to 908,000**. Stocks were approximately 10% above the comparable 2025 week. (EIA, *Weekly Ethanol Plant Production* and *Weekly Petroleum Status Report*, released September 10, 2026) (eia.gov)
- **Low Mississippi River water became an immediate harvest-logistics exposure.** American Commercial Barge Line implemented its Low Water Protocol effective September 5, added applicable surcharges and reduced Lower Mississippi tow sizes by 13%. This can weaken upriver corn basis while raising Gulf delivery costs and export risk. (ACBL, *American Currents—Daily River Conditions*, September 9, 2026) (bargeacbl.com)
- **Energy inputs and output linkage both improved on the supplied tape.** RBOB rose **2.4% to $3.211 per gallon**, while Henry Hub fell **3.1% to $2.822 per MMBtu**. Gas storage increased 40 Bcf to **3,254 Bcf**, including an 18-Bcf Midwest build to 908 Bcf, preserving a comfortable plant-energy buffer. (EIA, *Weekly Working Gas in Underground Storage*, September 10, 2026) (eia.gov)
- **Overall margin conditions improved modestly:** lower corn and natural gas plus stronger gasoline outweighed the ethanol stock build for conventional physical crush, while the new 45Z guidance further improved potential economics for plants able to verify low-carbon feedstocks. Event risk remains high through Friday's USDA reports.

Exposure	Current signal	Change from last week	Horizon	Confidence	Main driver
Corn procurement	Yield cut partly priced; report risk high	Improved modestly	Days–Q1 2027	High	Nearby corn −1.5%; September survey

Exposure	Current signal	Change from last week	Horizon	Confidence	Main driver
45Z/feedstock CI	Regenerative-ag value operationalized	Improved materially	2025–29 credits	High	IRS notice and GREET update
Ethanol selling	Heavy stocks resumed building	Deteriorated	1–4 weeks	High	Inputs down; inventories up
Natural gas	Comfortable storage and lower futures	Improved	1–4 months	High	Henry Hub −3.1%
Gulf logistics	Low-water restrictions active	Deteriorated	Harvest–autumn	High	Tow reductions and surcharges
Overall plant margin	Favorable input/output tape; bifurcated by 45Z	Improved modestly	Near term	Medium-high	Corn/gas lower, RBOB higher

The week's thesis is **a modest improvement in physical crush inputs immediately before a potentially decisive corn report, combined with a meaningful expansion in the addressable value of verified low-carbon corn**. EPA's pending reallocation of 2025 refinery exemptions and strong year-to-date ethanol exports remain important but are not re-narrated because no operative federal reallocation or new monthly trade print emerged.

1. Corn sold off, but USDA—not price action—must resolve the yield gap

What happened

Corn condition declined to **56% good-to-excellent** for the week ended September 6, from 57% previously and 68% one year earlier. The crop was 76% dented, 25% mature and 5% harvested; maturity and harvest were slightly ahead of their five-year averages. (USDA NASS, *Crop Progress*, September 8, 2026) (esmis.nal.usda.gov)

Analysts surveyed before the September 11 reports expected USDA to reduce yield to approximately **178.1 bushels per acre** and ending stocks to **1.511 billion bushels**. Those expectations are materially

below USDA's August balance sheet but remain well above Pro Farmer's 173.2-bushel estimate. (Pro Farmer, *What to Expect from USDA's September Crop Report on Friday*, September 9, 2026) (profarmer.com)

Why it matters

The 7.5-cent weekly decline shows that the market did not interpret the dry finish and one-point condition loss as new evidence requiring a higher premium. It does not validate USDA's current yield. Rather, it suggests that a moderate reduction is already expected after corn's sharp late-August rally.

Risk-manager implication

Plants face asymmetric report risk. A yield near the 178-bushel consensus would largely confirm the market's current view; a move toward Pro Farmer would materially increase winter coverage risk, while a yield close to 180.7 could extend the futures correction. Directionally this week: **corn less expensive, ethanol neutral and plant margins modestly better**, but confidence beyond September 11 is low.

Watch next

USDA's objective ear counts, implied ear weight and any demand changes that determine whether a production cut flows fully into carryout.

---

2. 45Z turned regenerative corn into a measurable procurement attribute

What happened

Effective September 8, IRS Notice 2026-53 allows the 45Z-specific Feedstock Carbon Intensity Calculator to capture qualifying low-carbon agricultural practices. DOE's updated model includes **cover crops, tillage practices, nitrification inhibitors and manure application** as potential feedstock-CI inputs. The IRS also permits qualifying 2025 feedstocks to use the 2026 calculator and deems the advance nutrient-budget requirement satisfied for 2025 and 2026 production, provided taxpayers substantiate actual nutrient inputs and comply with USDA chain-of-custody, audit and verification rules. (IRS, *Notice 2026-53*, September 8, 2026; DOE, *45ZCF-GREET User Manual—September 2026*) (irs.gov)

Why it matters

The prior uncertainty was whether farm-level practices could be incorporated soon enough to support current credit claims. The guidance answers that question affirmatively and provides limited retroactive

usability. It does not remove execution risk: undocumented or inadequately segregated corn cannot automatically receive the same CI benefit.

Risk-manager implication

Corn procurement now has two economically distinct components: **commodity value and verified carbon attribute value**. Plants should separately measure farmer premiums, aggregation costs, audit exposure and incremental credit proceeds. Qualifying facilities may improve 2025 and 2026 credit value; plants without traceable supply chains receive little immediate benefit. Confidence is high on eligibility mechanics but only medium on realized net value until calculators, auditors and credit buyers establish repeatable pricing.

Watch next

Final Treasury regulations, third-party verification practices and the spread between gross 45Z value and delivered low-CI feedstock cost.

---

3. Ethanol stocks rebuilt as domestic inputs fell

What happened

EIA ethanol balance	Week ended Aug. 28	Week ended Sept. 4	Change
Production, million bpd	1.107	1.102	−0.005
Inventories, million bbl	25.035	25.187	+0.152
Refiner/blender inputs, million bpd	0.940	0.908	−0.032

(EIA, *Weekly Petroleum Status Report*, September 10, 2026) (eia.gov)

Gasoline inventories also rose 1.3 million barrels to 206.9 million, while the four-week average of gasoline supplied was **8.8 million barrels per day, down 1.4% year over year**. (EIA, *Summary of Weekly Petroleum Data*, September 10, 2026) (ir.eia.gov)

Why it matters

The first inventory draw in a month did not extend. Lower production was constructive, but weaker domestic inputs more than offset the reduction. RBOB’s 2.4% rally improves ethanol’s value umbrella,

yet the physical balance still requires exports or deeper maintenance cuts.

Risk-manager implication

Prompt ethanol selling and storage exposure deteriorated modestly. Plants should avoid treating stronger gasoline futures as proof that ethanol tanks are tightening. Directionally: **ethanol softer physically, corn demand still supported by a 1.1-million-barrel run rate and plant margins mixed** over the next several weeks.

---

4. Low water is widening the harvest basis and freight risk

What happened

ACBL activated low-water surcharges after the Memphis gauge reached zero feet and reduced Lower Mississippi tow size by five barges, or 13%, depending on horsepower classification. Draft restrictions had not yet reduced loading between the Gulf and Cairo as of September 9. (ACBL, *American Currents—Daily River Conditions*, September 9, 2026) (bargeacbl.com)

Why it matters

The restrictions arrived as harvest and new-crop export movement begin. Reduced barge capacity can raise delivered Gulf costs and weaken export competitiveness even when global demand remains sound.

Risk-manager implication

The exposure is geographically bifurcated. River-linked interior corn bids may weaken as freight deductions increase, creating procurement opportunities for nearby ethanol plants. Conversely, Gulf ethanol, DDGS and grain movements face higher transport costs and congestion risk. Monitor basis rather than assuming the futures decline will translate uniformly across plant draw areas.

Strategic Synthesis

The incremental thesis is **lower immediate physical crush costs but higher differentiation across plants and locations**. Corn futures, gasoline and natural gas improved the representative margin tape; 45Z now rewards verified feedstock execution more concretely; and low river levels may benefit some interior corn buyers while damaging export logistics. Friday's USDA report remains capable of overwhelming all three effects.

What I’m Watching Next

- **September 11, 2026, 11:00 a.m. CDT:** USDA September WASDE and Crop Production reports. (USDA, *WASDE Report Schedule*) (usda.azureedge.us)
- **September 14, 2026:** USDA Crop Progress, including additional harvest advancement and final-season condition evidence. (esmis.nal.usda.gov)
- **September 16, 2026:** EIA petroleum and ethanol balance for the week ending September 11. (eia.gov)
- **September 17, 2026:** EIA natural-gas storage report. (eia.gov)

Bottom Line

The week’s most consequential new change was the **operational incorporation of regenerative-ag feedstock value into 45Z**, but corn remains the exposure requiring the closest immediate attention. Nearby corn’s 1.5% decline improved the margin setup without resolving yield risk; the **September 11 USDA yield and carryout revisions** are the catalyst most likely to reset procurement strategy and the overall plant-margin view.

Notable Changes

Comparison with the final report dated September 3, 2026 (market data through September 2, 2026).

Companies covered in this section:

- Casey's General Stores (CASY)

Casey's General Stores (CASY) -31.3%

Reported: September 9, 2026 · Google Finance earnings page

Earnings Call Summary

Casey's reported strong Q1 2027 results, with diluted EPS up 28% year-over-year to $7.37 and net income up 27% to $274 million. Total revenue increased 24.3% to $5.68 billion, driven by higher inside sales, higher fuel retail prices, and operating 2% more stores. EBITDA grew 17% to $485 million.

At a Glance

- **Casey's Beats EPS and Revenue Estimates:** Casey's reported Q1 2027 diluted EPS of $7.37, surpassing the estimated $6.742, while revenue reached $5.68 billion, ahead of the $5.55 billion estimate due to robust fuel and inside sales growth.
- **Strong Inside Sales and Fuel Margins:** Inside same-store sales rose by 3.2%, anchored by a 4.8% increase in prepared food and dispensed beverages, while fuel gross margins expanded to 47.8 cents per gallon despite a 0.3% dip in same-store gallons.
- **Fiscal 2027 Outlook Remains Unchanged:** Management reiterated its full-year guidance, continuing to project inside same-store sales growth of 2% to 5%, inside margin above 42%, and EBITDA growth of 8% to 10%.
- **Remodels Impact Near-Term Store Volumes:** Ongoing CEFCO store conversions disrupted operations and created a 25-basis-point headwind to inside comps, though completed remodels are generating an average 30% lift in prepared food and beverage sales.

- **Shares Decline Post-Earnings on High Expectations:** Despite a strong top and bottom-line beat, Casey's shares slid roughly 15% following the report as investors responded to elevated expectations and potential macroeconomic limits on consumer budgets.

Key Moments from the Call

- **16m — CEFCO Remodel Performance Boost:** Remodeled CEFCO stores achieved an impressive 30%+ year-over-year lift in Prepared Food and Dispensed Beverages. This performance validates Casey's strategy in Texas and its ability to successfully optimize higher-volume acquired assets despite short-term renovation disruptions.
- **20m — Category Shifts Impacting Inside Sales:** Inside merchandise sales experienced headwinds in national-brand snacks and beer, reflecting broader industry trends. However, investors will be pleased by double-digit offsets in nicotine alternatives (+47%), energy drinks (+12%), and private label chips (+16% in units) which carry favorable margins.
- **33m — Favorable Cheese Cost Hedges:** Casey's locked in cheese costs at 80% coverage through early next fiscal year. This strategic position guarantees a modest tailwind to gross margins over the next three quarters, alleviating investor concerns regarding potential input commodity cost inflation.
- **40m — Fuel Share Gains Amid Headwinds:** Despite a slight 0.3% drop in same-store gallons, Casey's significantly outperformed its regional market benchmark, which declined 6%. Consumers are making more frequent trips and trading into high-margin ethanol blends, strengthening fuel gross profit by 19.6%.

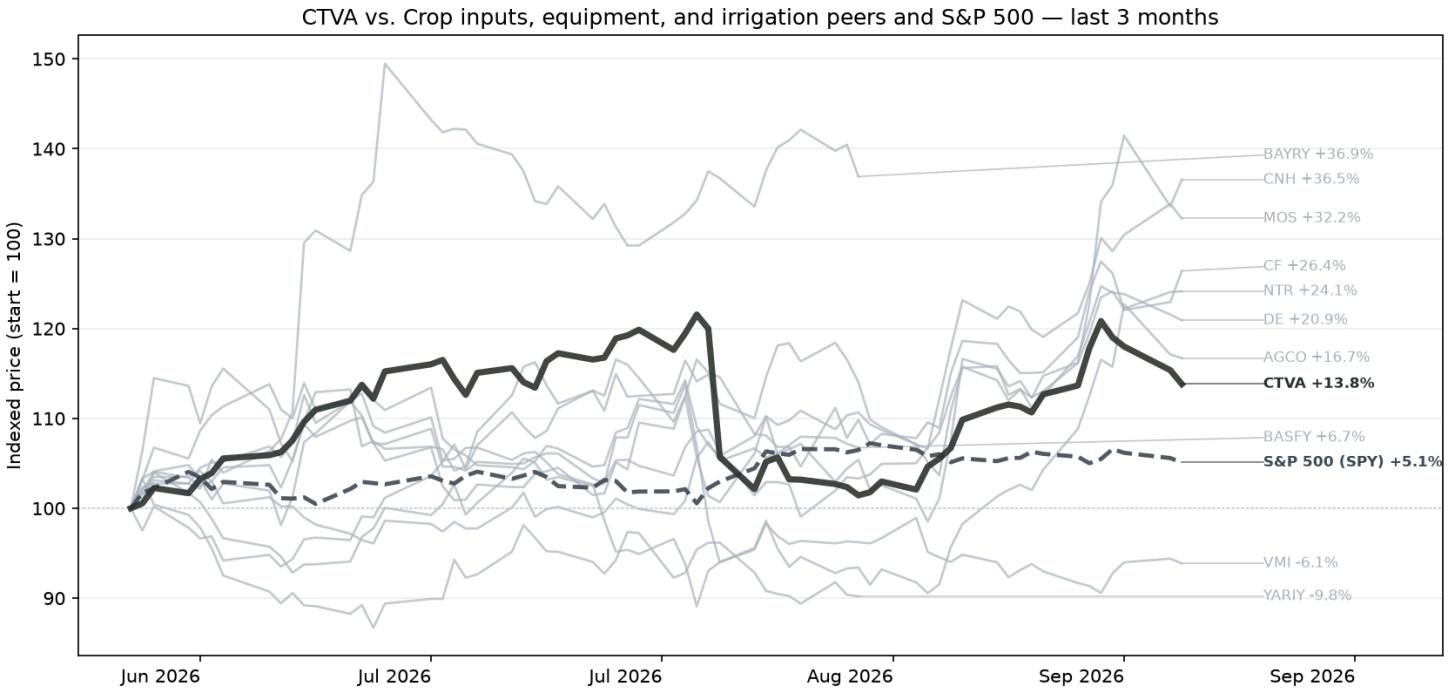

Company Overviews

Corteva (CTVA)

Crop inputs, equipment, and irrigation · $52.4B · 3m +13.8% · 12m +18.1% · 24m +53.0%

Google Finance

Largest U.S. corn-seed franchise (Pioneer) and a primary input cost for Corn Belt acres.

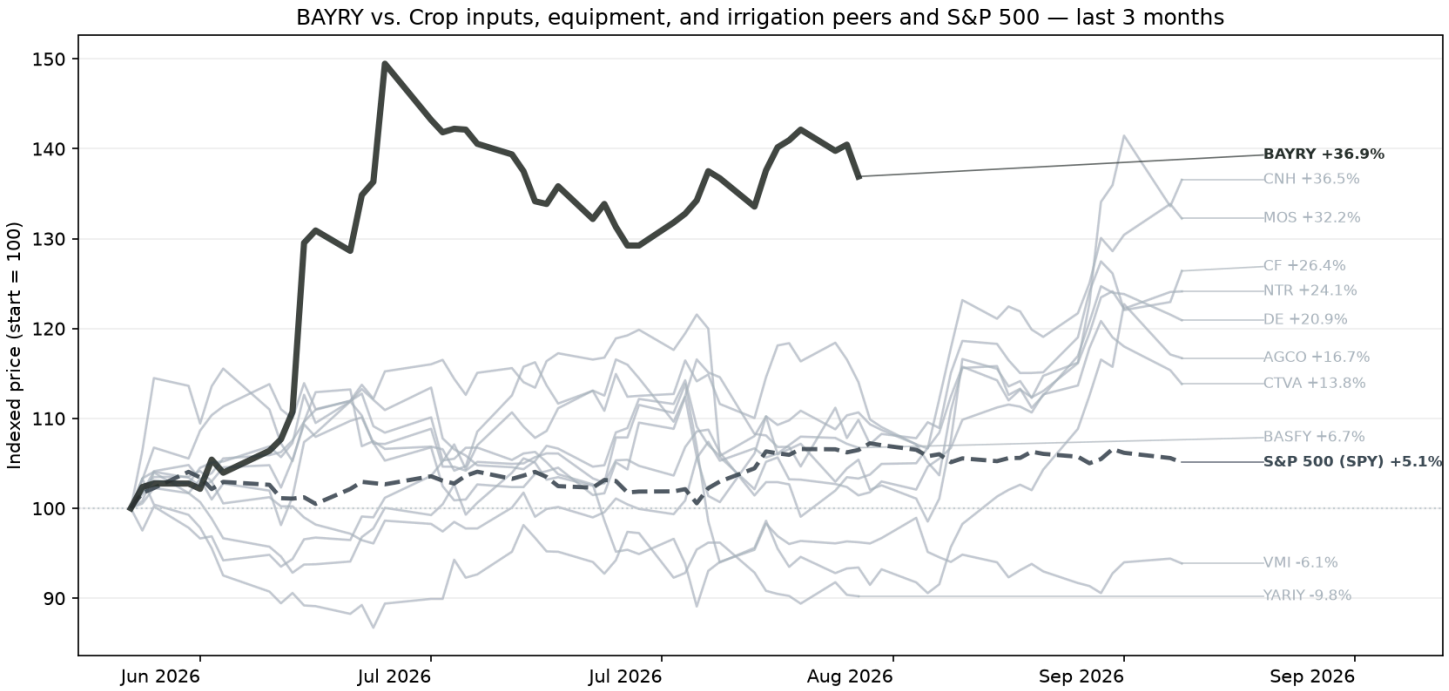

Corteva is an agricultural inputs pure play that was formed in 2019 when it was spun off from DowDuPont. The company is a leader in the development of new seed and crop protection products. Seeds generate the majority of profits with the remainder coming from crop protection products. Corteva plans to spin off its seeds business in late 2026. The seeds business will be named Vylor, while the crop protection business will retain the Corteva name and be a pure-play crop protection company following the divestiture. Corteva operates globally, but around half of revenue comes from North America.

Bayer (BAYRY)

Crop inputs, equipment, and irrigation · n/a · 3m +36.9% · 12m +70.0% · 24m +82.5%

Google Finance

Dekalb and former Monsanto corn-seed brands; together with Corteva dominates U.S. corn seed.

BASF (BASFY)

Crop inputs, equipment, and irrigation · n/a · 3m +6.7% · 12m +15.4% · 24m +25.6%

Google Finance

Crop-protection chemistry used on U.S. corn acres.

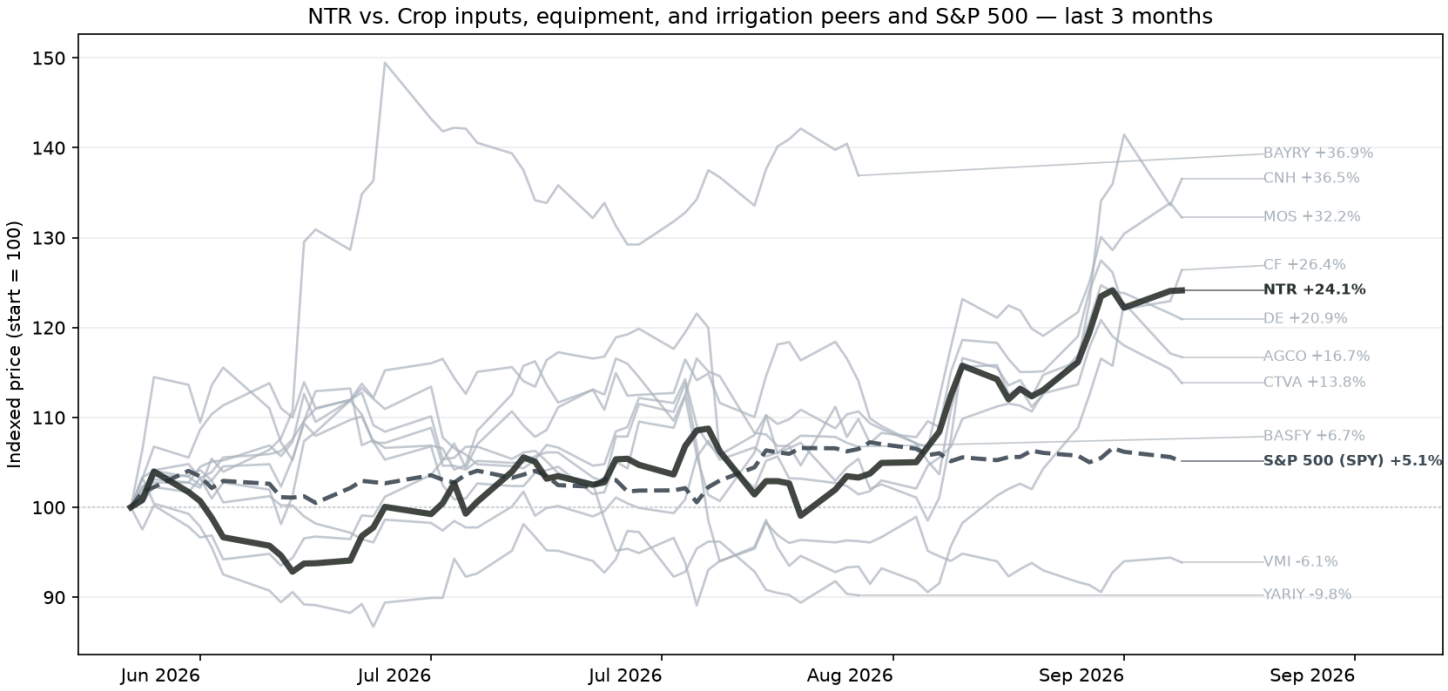

BASF SE S/ADR

Nutrien (NTR)

Crop inputs, equipment, and irrigation · $33.6B · 3m +24.1% · 12m +40.6% · 24m +78.4%

Google Finance

Largest North American agricultural retailer and a major potash and nitrogen producer.

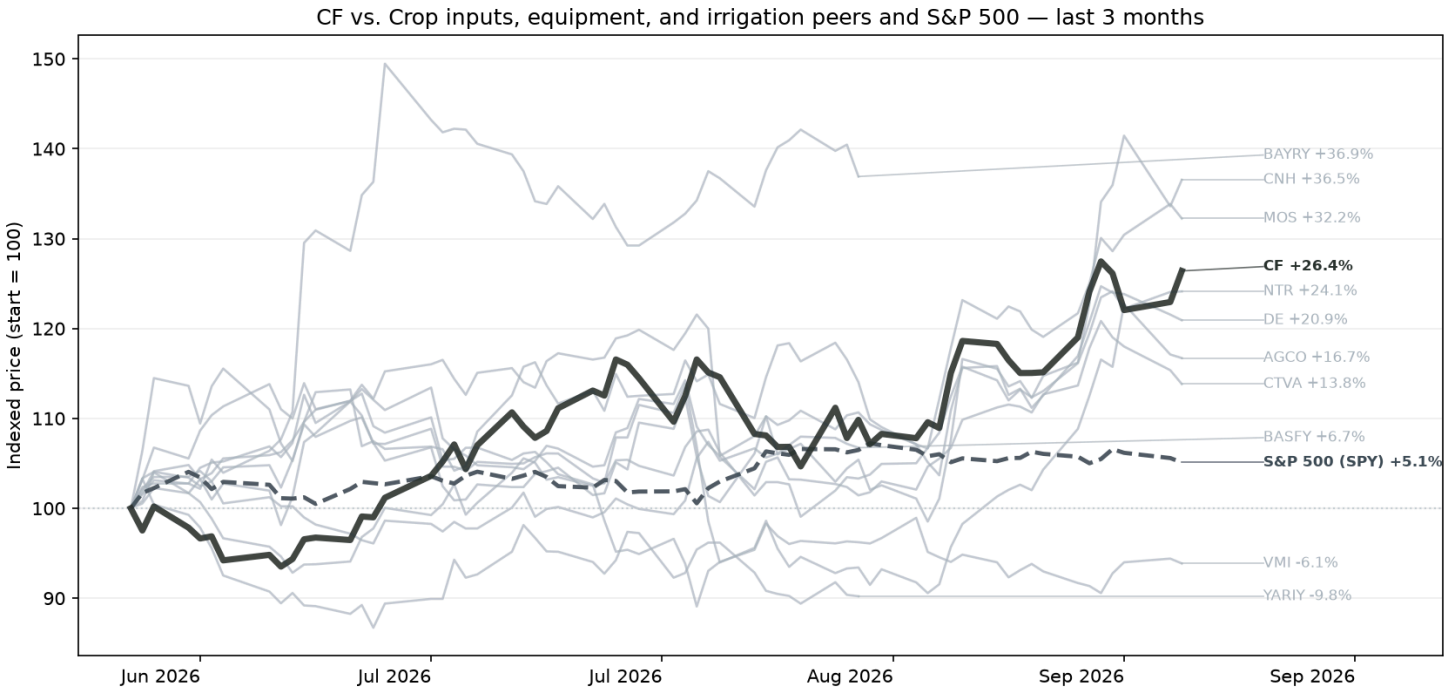

Created in 2018 as a result of the merger between PotashCorp and Agrium, Nutrien is the world's largest fertilizer producer by capacity. Nutrien produces the three main crop nutrients—nitrogen, potash, and phosphate—although its main focus is potash, where it is the global leader in installed capacity with a roughly 20% market share. The company is also the largest agricultural retailer in North America and Australia, selling fertilizers, crop chemicals, seeds, and services directly to farm customers through its brick-and-mortar stores and online platforms.

CF Industries (CF)

Crop inputs, equipment, and irrigation · $18.0B · 3m +26.4% · 12m +58.9% · 24m +79.9%

Google Finance

Nitrogen fertilizer producer; corn is the crop that most moves UAN and urea demand.

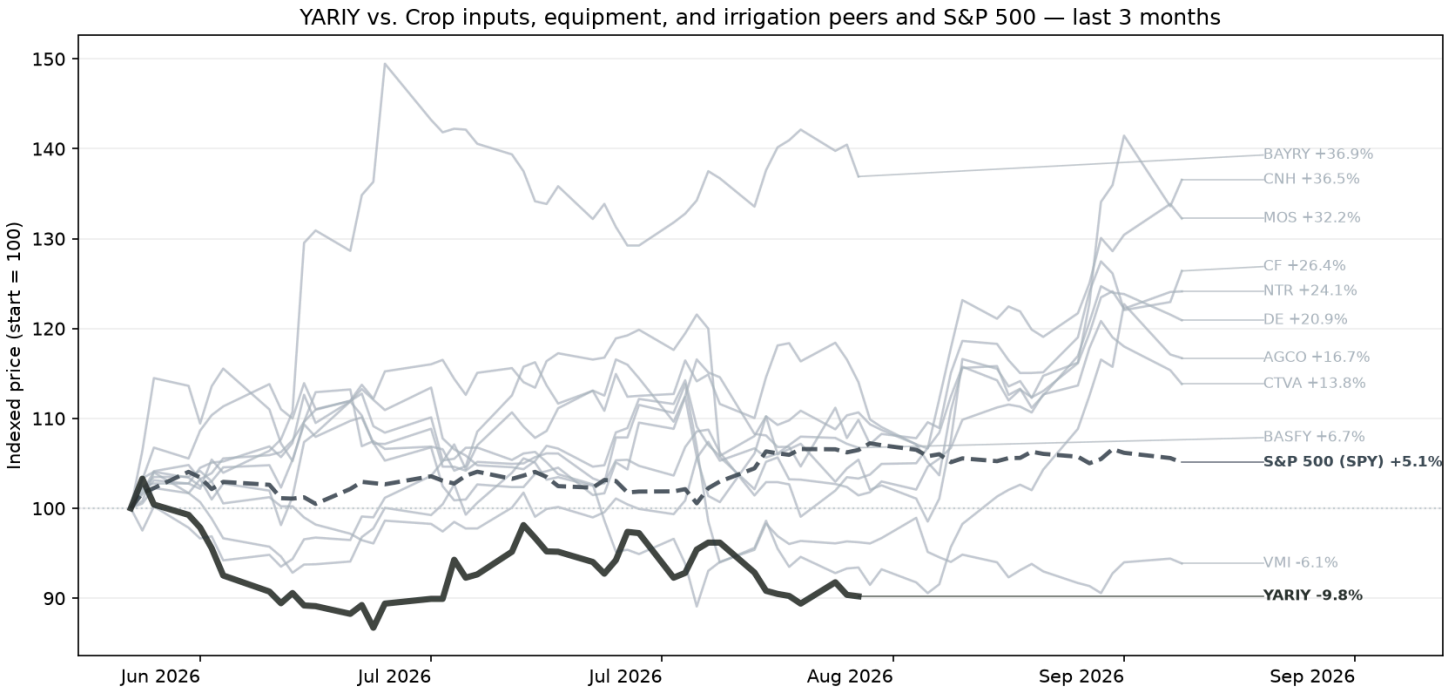

CF Industries is a leading producer and distributor of nitrogen, which is primarily used in fertilizers. The company operates nitrogen manufacturing plants primarily in North America. CF also produces nitrogen in the United Kingdom and holds a joint venture interest in a nitrogen production facility in Trinidad and Tobago. CF makes nitrogen primarily using low-cost US natural gas as its feedstock, making the company one of the lowest-cost nitrogen producers globally. It is also investing in carbon-free blue and green ammonia, which can be used as an alternative fuel to hydrogen or as a means to transport hydrogen.

Yara International (YARIY)

Crop inputs, equipment, and irrigation · n/a · 3m -9.8% · 12m +20.9% · 24m +63.7%

Google Finance

Global nitrogen producer that sets the international urea and ammonia reference.

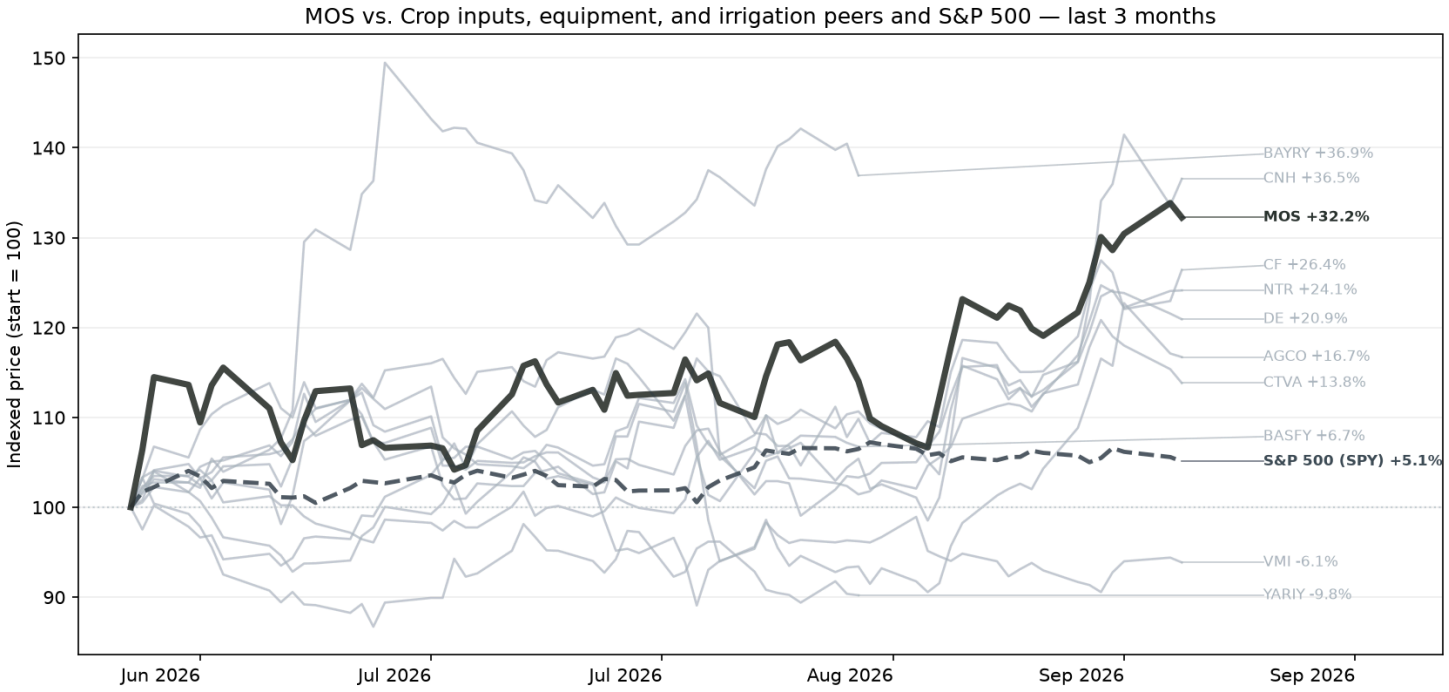

YARA INTL ASA S/ADR

Mosaic (MOS)

Crop inputs, equipment, and irrigation · $7.1B · 3m +32.2% · 12m -21.6% · 24m +6.8%

Google Finance

Phosphate and potash producer that completes corn production budgets.

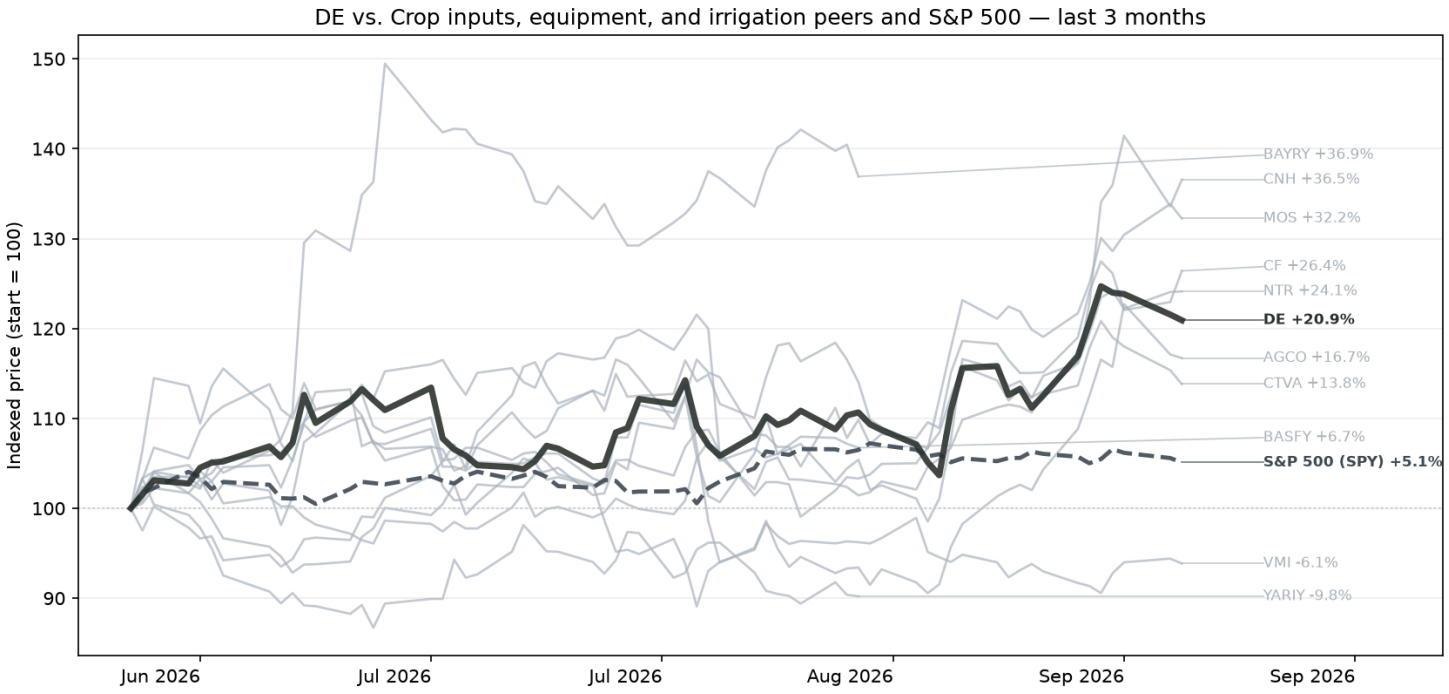

Mosaic is one of the largest phosphate and potash producers in the world. The company's assets include phosphate rock mines in the US and potash mines in Canada. Mosaic also runs a large fertilizer distribution operation in Brazil through its Mosaic Fertilizantes business.

Deere (DE)

Crop inputs, equipment, and irrigation · $156.7B · 3m +20.9% · 12m +43.7% · 24m +74.9%

Google Finance

Dominant North American farm-equipment maker for corn planting, harvest, and grain handling.

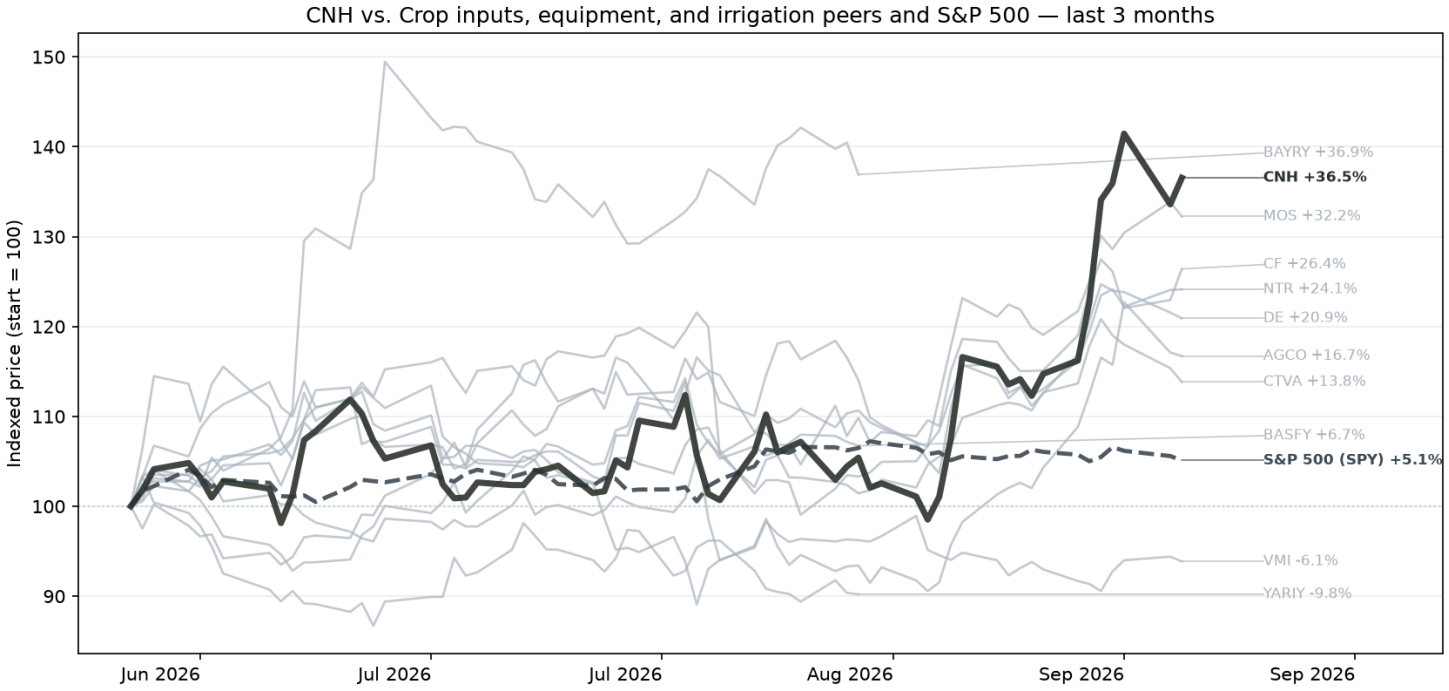

Deere is the world's leading manufacturer of agricultural equipment and a major producer of construction machinery. The company is divided into four reporting segments: production & precision agriculture, or PPA, small agriculture & turf, or SAT, construction & forestry, or CF, and financial services, or FS, its captive finance subsidiary. The core PPA business is the largest contributor to sales and profits by far. Geographically, Deere sales are 60% US/Canada, 17% Europe, 14% Latin America, and 9% rest of the world. Deere goes to market through a robust dealer network that includes over 2,000 dealer locations in North America with reach into over 100 countries. John Deere Financial provides retail financing for machinery to its customers and wholesale financing for dealers.

CNH Industrial (CNH)

Crop inputs, equipment, and irrigation · $16.5B · 3m +36.5% · 12m +23.7% · 24m +35.9%

Google Finance

Case IH and New Holland farm equipment serving corn growers.

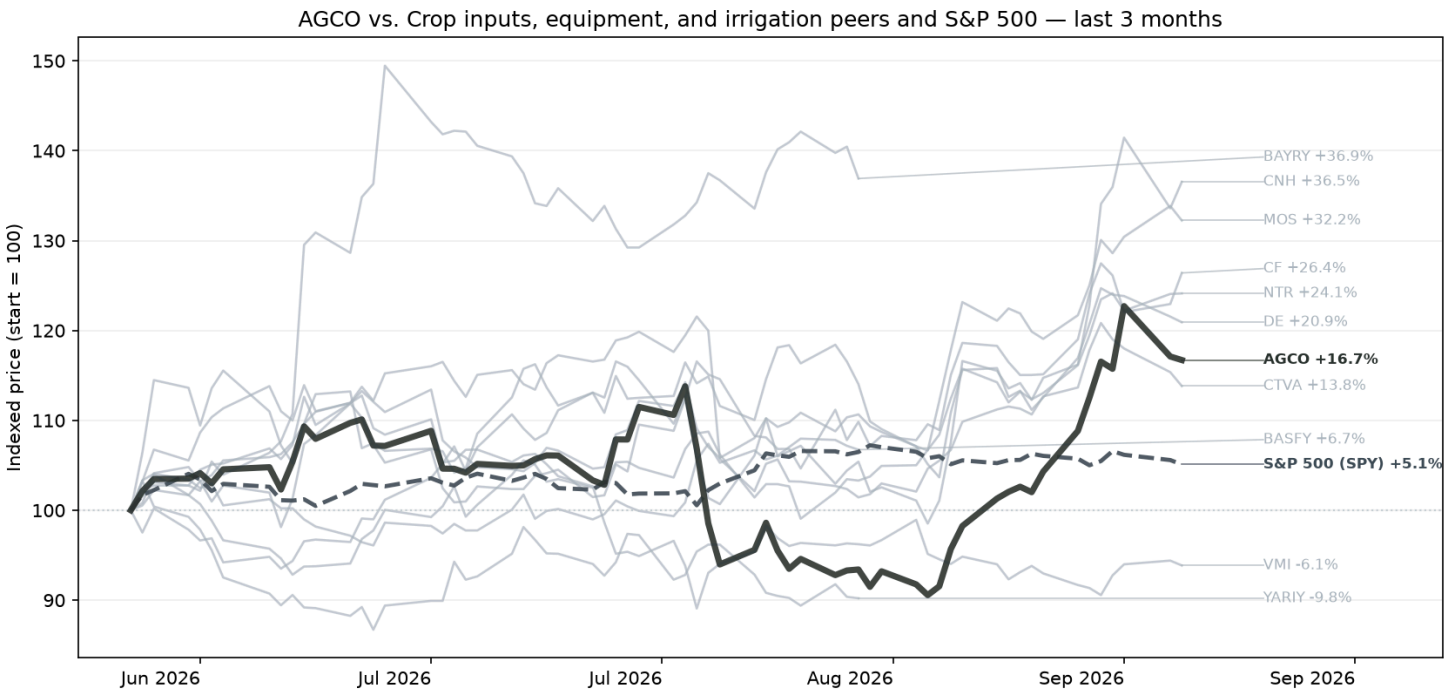

CNH Industrial is the world's second largest manufacturer of agricultural machinery (82% of industrial net sales) as well as a major player in construction equipment (18% of industrial net sales). Its Case and New Holland brands have served farmers for generations. Geographically, agricultural sales are 40% in North America, 32% in Europe, the Middle East, and Africa, 18% in South America, and 10% in Asia-Pacific. CNH's products are available through a robust independent dealer network, which includes over 2,600 dealer and distribution locations and reach into 164 countries. The construction business leverages over 400 dealers. The company's captive finance arm provides retail financing to its customers and wholesale financing to dealers to maintain inventory, thereby supporting sales.

AGCO (AGCO)

Crop inputs, equipment, and irrigation · $7.0B · 3m +16.7% · 12m +18.1% · 24m +42.9%

Google Finance

Fendt, Massey Ferguson, and Challenger farm equipment with Corn Belt exposure.

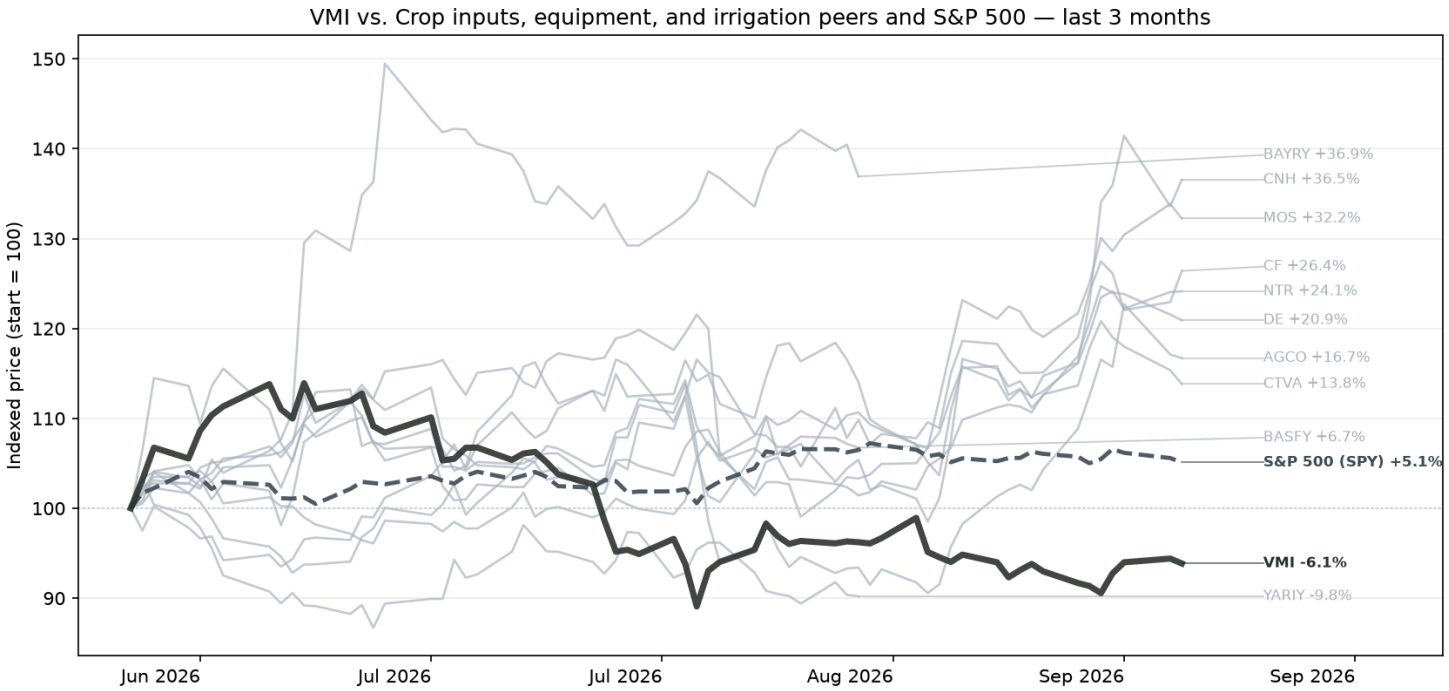

Agco is a global manufacturer of agricultural equipment. Its main machine brands are Fendt, Massey Ferguson, and Valtra; its initiatives in precision agriculture have been organized under the PTx umbrella following a series of acquisitions. While a global business, Agco's sales skew heavily toward Europe/Middle East, representing 50%-60% of sales and even more of operating profits. The company is trying to increase its exposure to the larger North and South American markets. Its products are available through a global dealer network, which includes over 3,000 dealers and distribution locations and reaches into over 140 countries. Additionally, Agco offers retail and wholesale financing to customers through its partnership with Rabobank of the Netherlands, having exited their JV in 2026.

Valmont Industries (VMI)

Crop inputs, equipment, and irrigation · $9.3B · 3m -6.1% · 12m +27.3% · 24m +79.9%

Google Finance

Center-pivot irrigation (Valley) used on irrigated High Plains corn.

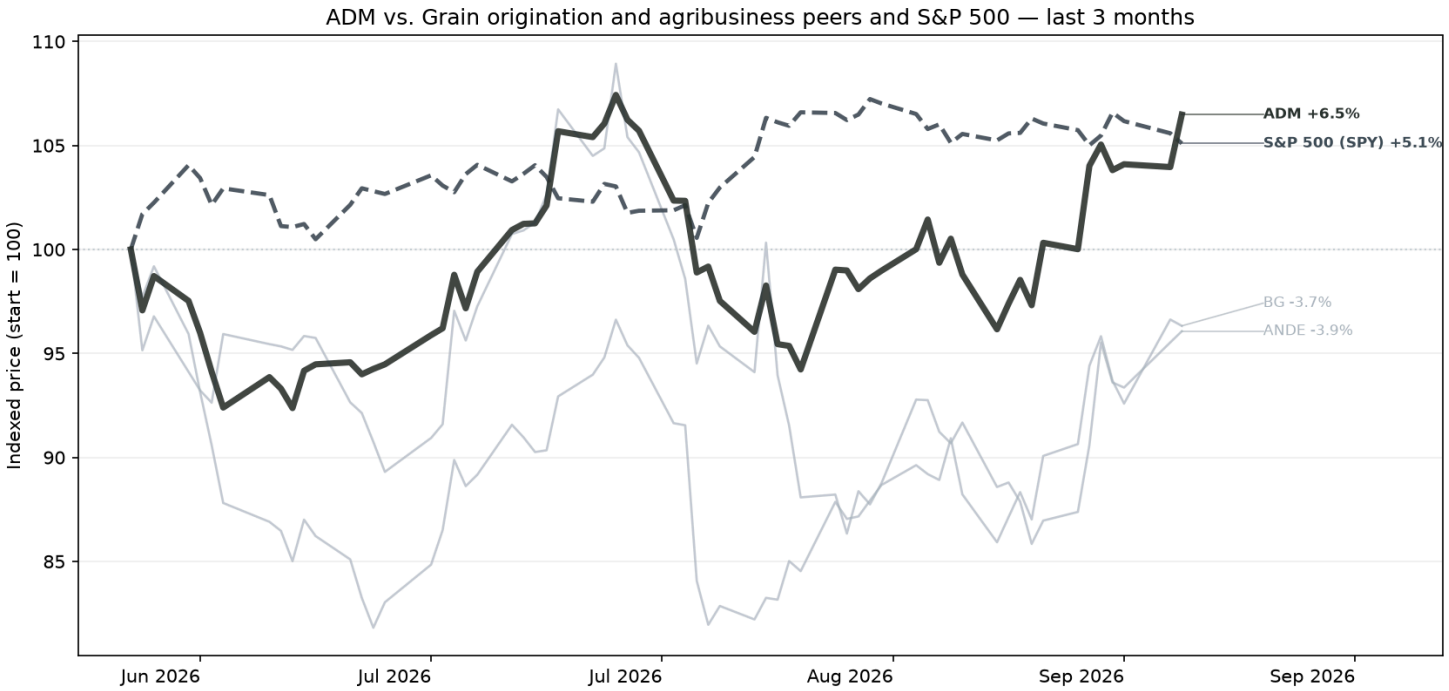

Valmont Industries Inc, along with its subsidiaries, operates as a manufacturer of products and services for infrastructure and agriculture markets. Its reportable segments are Infrastructure and Agriculture. The company generates maximum revenue from the Infrastructure segment, which includes the manufacturing and distribution of products and solutions to serve the infrastructure markets of utility, solar, lighting, transportation, and telecommunications, along with coatings services to protect metal products. The Agriculture segment provides irrigation equipment components, including aftermarket parts and tubular products, and technology solutions for precision agriculture. Geographically, it derives key revenue from the United States, followed by Australia, Brazil, and other regions.

Archer Daniels Midland (ADM)

Grain origination and agribusiness, Wet milling, ingredients, and co-products, U.S. ethanol and process technology · $38.9B · 3m +6.5% · 12m +40.9% · 24m +46.6%

Google Finance

Global grain trader, top U.S. ethanol producer, and major corn wet miller.

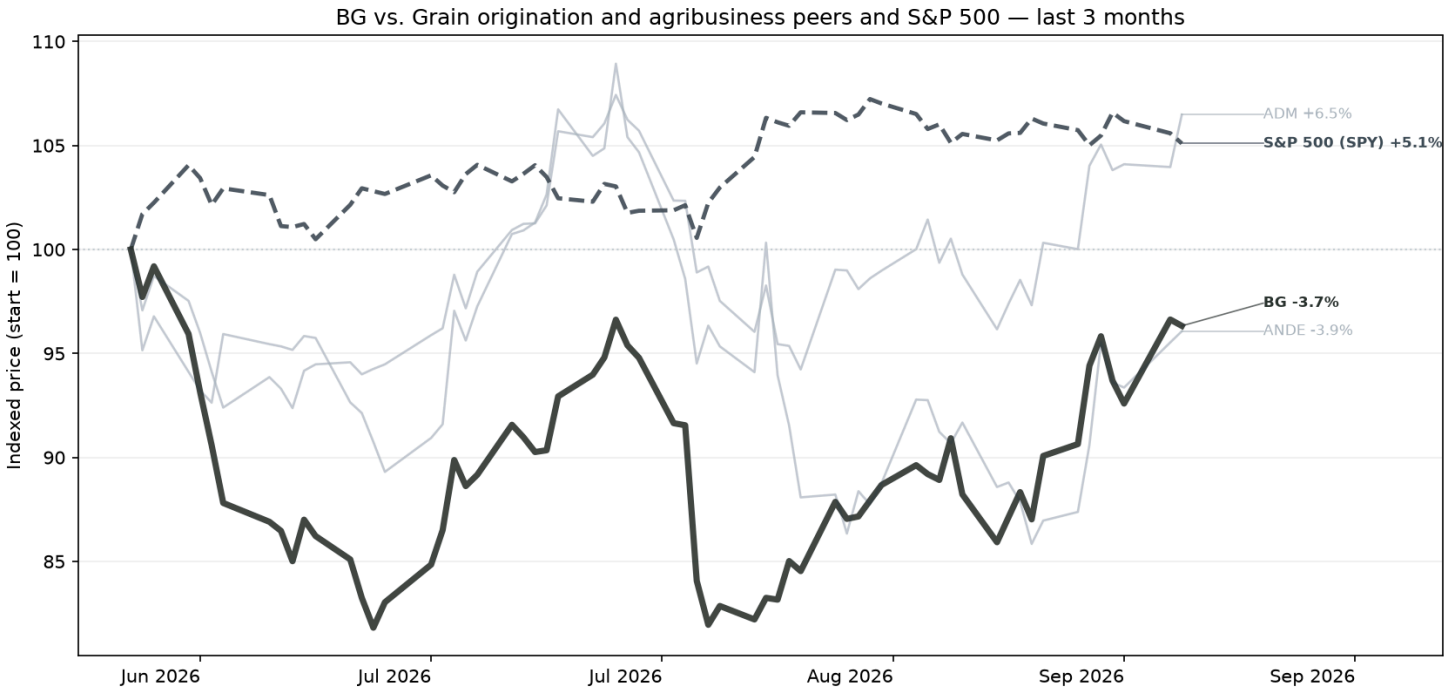

Archer-Daniels-Midland is a major processor of oilseeds, corn, wheat, and other agricultural commodities. The company is also one of the largest grain merchandisers through its extensive network of logistical assets to store and transport crops around the globe. ADM also runs a nutrition business that focuses on both human and animal ingredients and is a large producer of corn-based sweeteners, starches, and ethanol.

Bunge (BG)

Grain origination and agribusiness · $21.9B · 3m -3.7% · 12m +50.0% · 24m +28.4%

Google Finance

Global grain and oilseed merchant after the Viterra combination; competitor for corn origination.

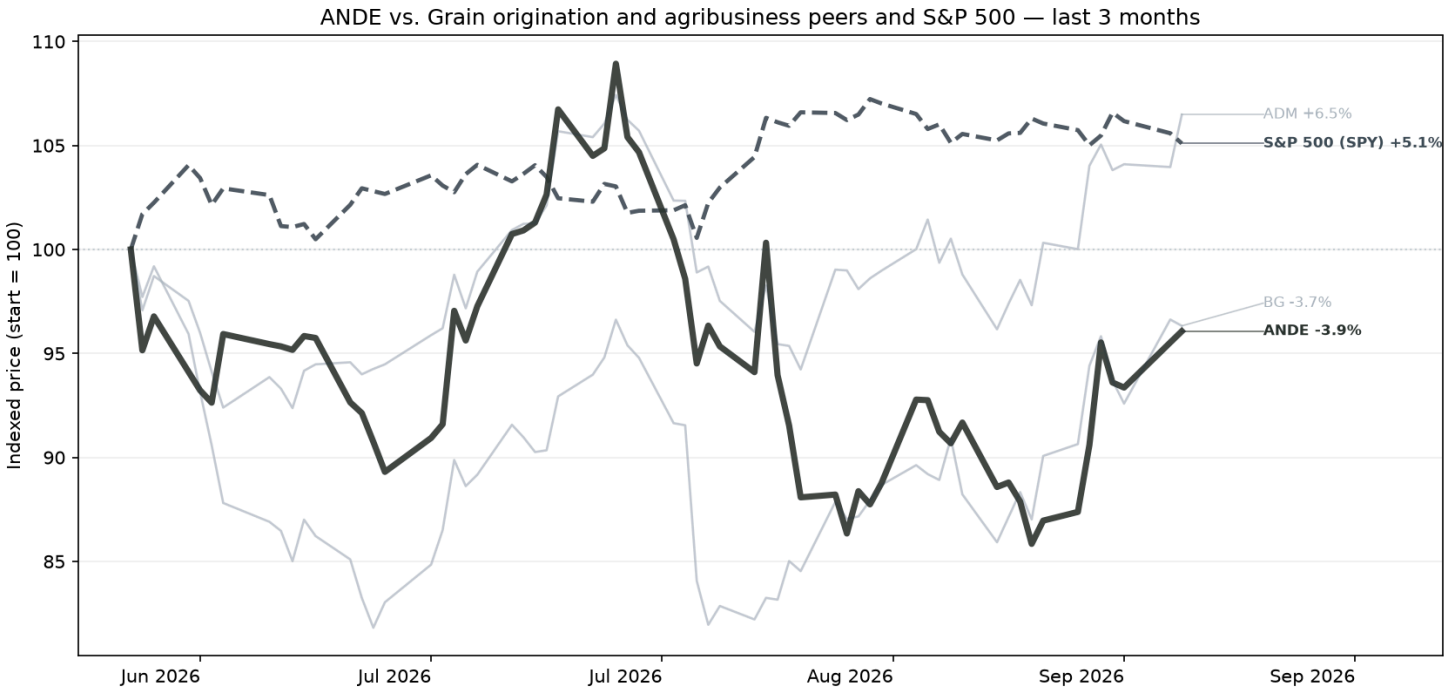

Bunge Global SA is an agribusiness solutions company, connecting farmers to consumers and delivering essential food, feed and fuel to the globe. The company segments include Soybean Processing and Refining; Softseed Processing and Refining; Other Oilseeds Processing and Refining; Grain Merchandising and Milling; and Corporate and Other. It generates maximum revenue from the Soybean Processing and Refining segment, which includes integrated business principally involved in the purchase, storage, transportation, processing, distribution, refining, marketing, and sale of soybeans and soybean related products, as well as biodiesel and fertilizer production and distribution. Geographically, the company operates in United States, Switzerland, Netherlands, and Rest of the World.

The Andersons (ANDE)

Grain origination and agribusiness, U.S. ethanol and process technology · $2.3B · 3m -3.9% · 12m +78.4% · 24m +54.5%

Google Finance

Grain elevators plus four wholly owned ethanol plants totaling about 500 million gallons a year.

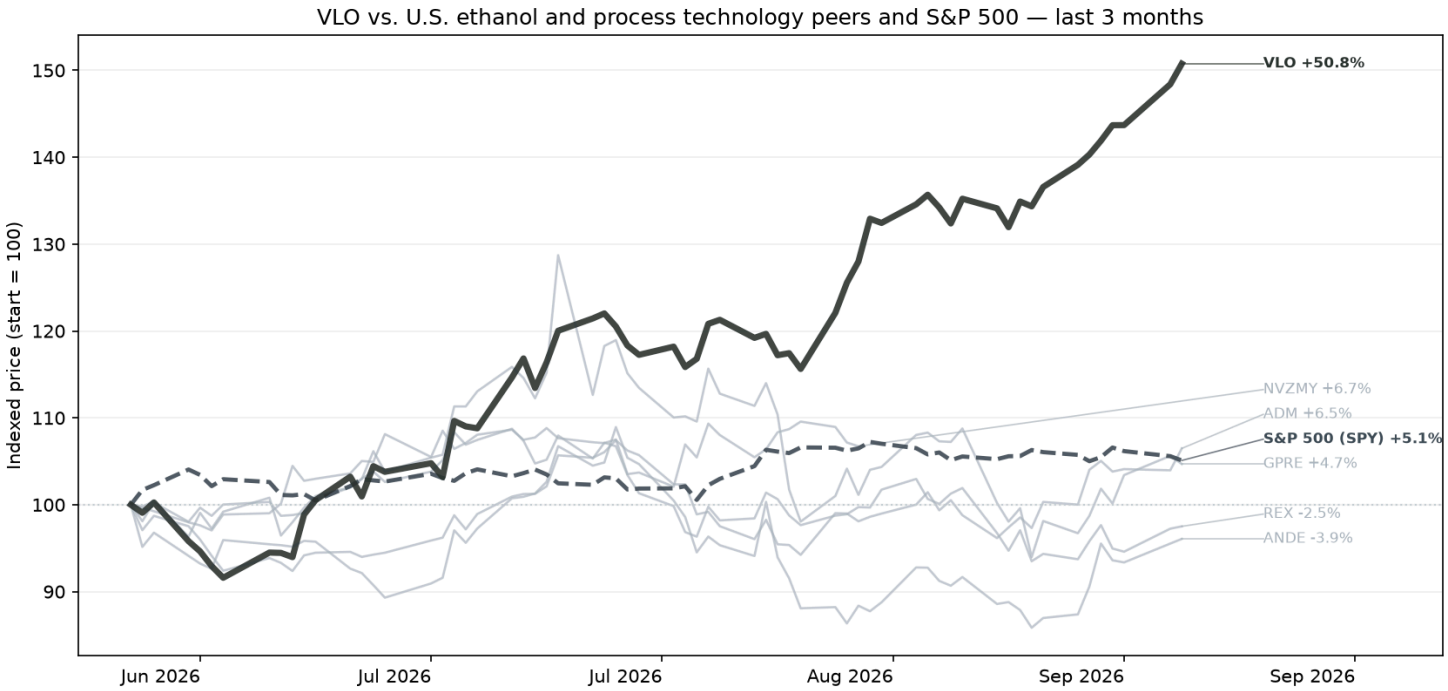

Andersons Inc is an agriculture and renewable fuels company. Its operations are classified into two reportable business segments: Agribusiness, which generates maximum revenue, and Renewables. The Agribusiness segment includes merchandising and managing logistics across various commodities, as well as being a manufacturer, distributor, and retailer of agricultural and related plant nutrients. The segment specializes in the movement of physical commodities such as whole grains, grain products, feed ingredients, and domestic fuel products, among other agricultural commodities. The Renewables segment mainly produces, purchases, and sells ethanol and co-products. Geographically, the company generates maximum revenue from the United States, followed by Canada, Mexico, and other markets.

Valero Energy (VLO)

U.S. ethanol and process technology, Fuel blending, refining, and retail · $99.7B · 3m +50.8% · 12m +145.4% · 24m +185.8%

Google Finance

World's second-largest corn-ethanol producer with a distinct Ethanol segment and a major blender.

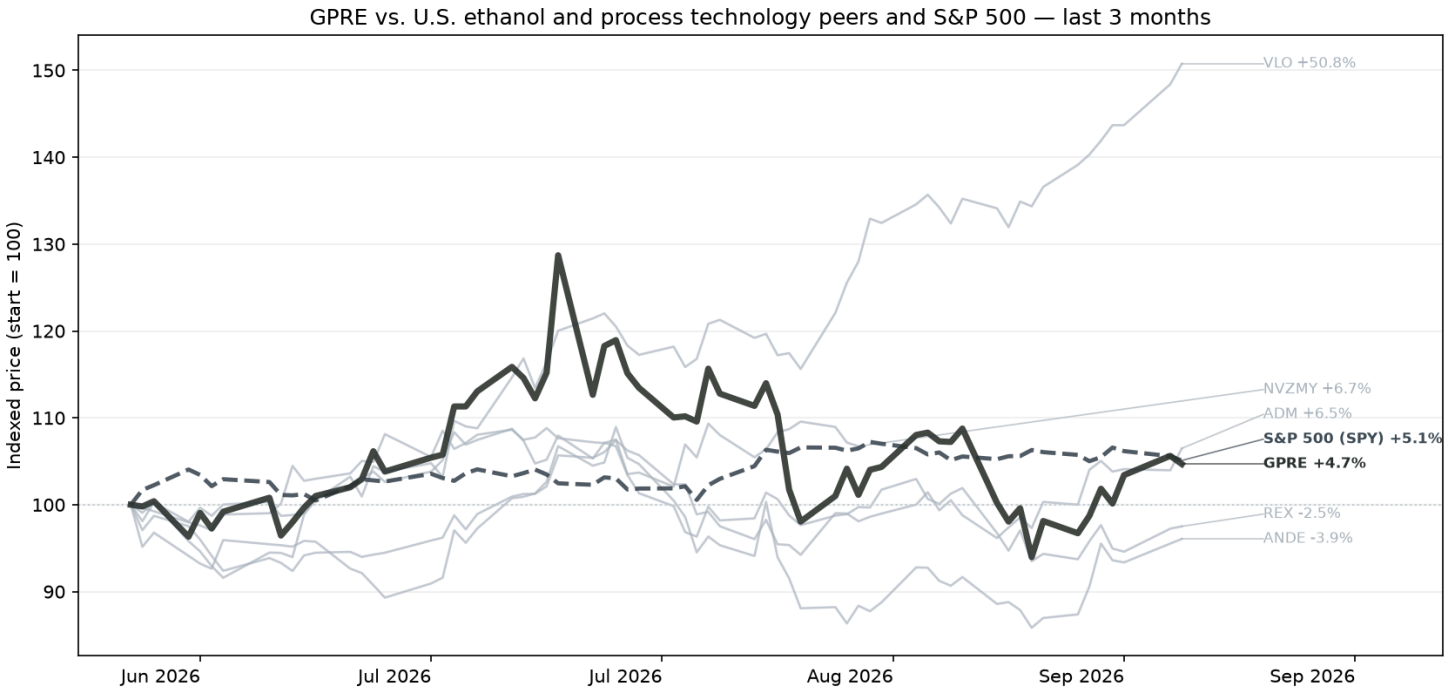

Valero Energy is one of the largest independent refiners in the United States. It operates 15 refineries, with a total throughput capacity of 3.2 million barrels a day in the US, Canada, and the United Kingdom. Valero also owns 12 ethanol plants with capacity of 1.6 billion gallons a year and holds a 50% stake in Diamond Green Diesel, which can produce 1.2 billion gallons per year of renewable diesel.

Green Plains (GPRE)

U.S. ethanol and process technology · $1.1B · 3m +4.7% · 12m +61.6% · 24m +31.0%

Google Finance

Largest U.S. ethanol pure play, with high-protein feed, corn oil, and Nebraska carbon-capture work.

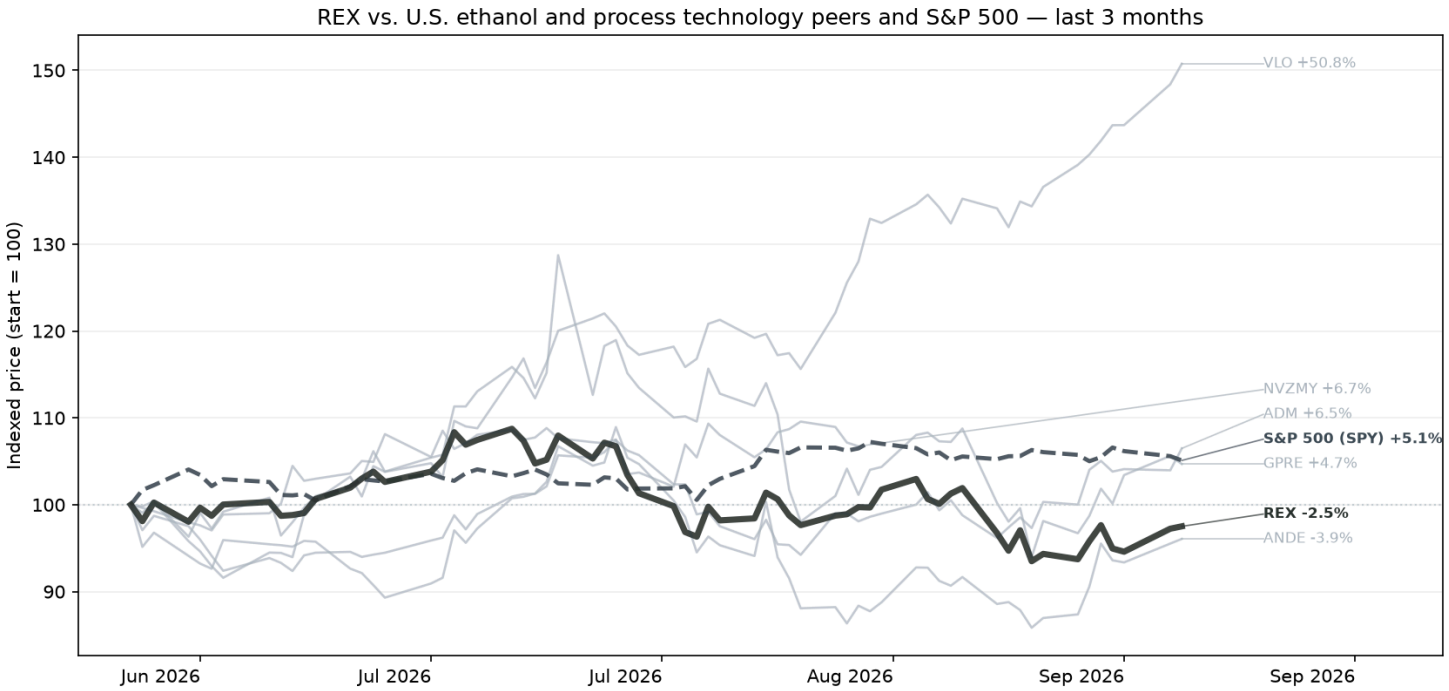

Green Plains Inc manufactures and sells ethanol and ethanol byproducts in two segments based on function. The ethanol production segment, which generates the majority of revenue, includes the production of ethanol, distillers grains, Ultra-High Protein and renewable corn oil. The agribusiness and energy services segment includes grain handling and storage, commodity marketing and merchant trading for company-produced and third-party ethanol, distillers grains, Ultra-High Protein, renewable corn oil, natural gas and other commodities.

REX American Resources (REX)

Ingredion (INGR)

Wet milling, ingredients, and co-products · $6.8B · 3m -1.8% · 12m -20.0% · 24m -25.7%

Google Finance

Major corn wet miller producing sweeteners, starches, and specialty ingredients.

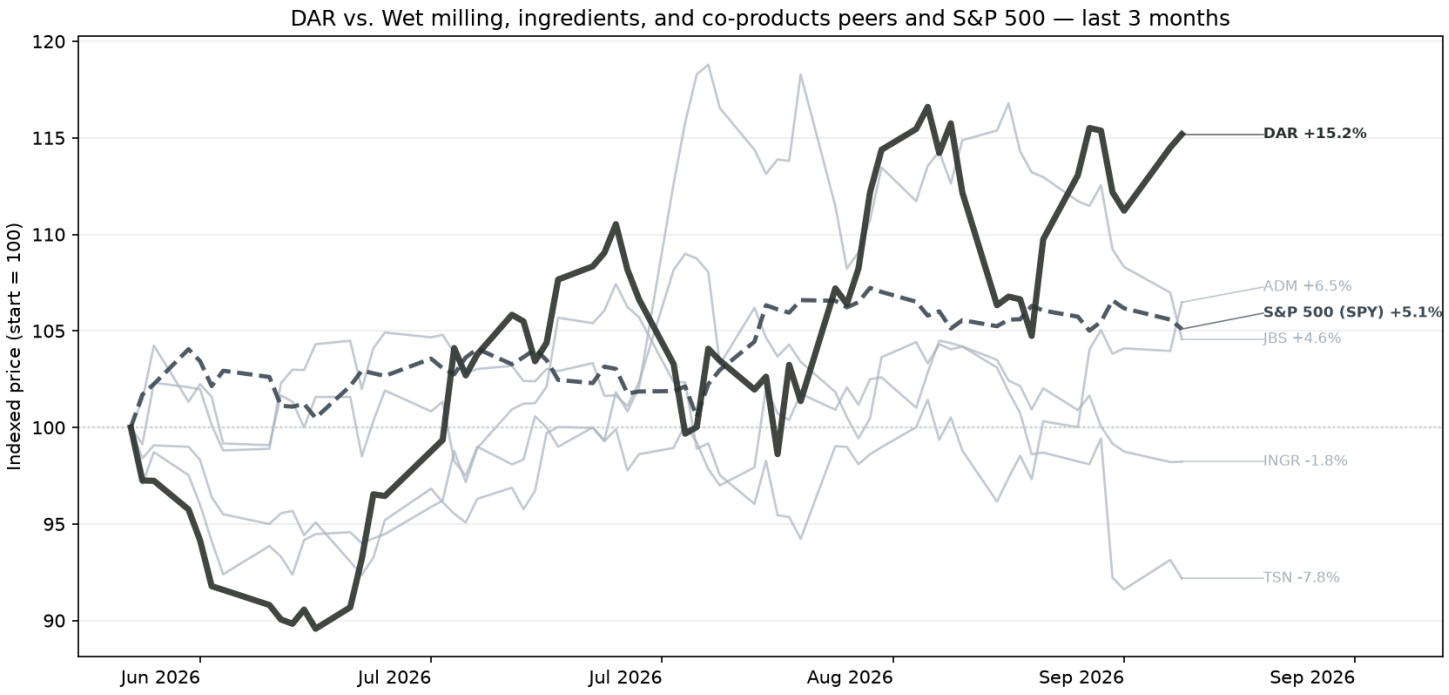

Ingredion is an ingredients provider for the food, beverage, brewing, and animal nutrition industries. The company processes corn, tapioca, potatoes, stevia, grains, fruits, gums, and vegetables into value-added ingredients. The company sells specialty ingredients that include starch-based texturizers and natural alternative sweeteners such as stevia. Ingredion also sells commodity ingredients that include sweeteners, such as high-fructose corn syrup, and starches, such as those used for sustainable packaging, as well as plant-based proteins. The company plans to acquire Tate & Lyle in an all-cash deal that should close in 2027.

Darling Ingredients (DAR)

Wet milling, ingredients, and co-products · $10.6B · 3m +15.2% · 12m +115.7% · 24m +98.6%

Google Finance

Rendering and used cooking oil; 50/50 owner of Diamond Green Diesel with Valero.

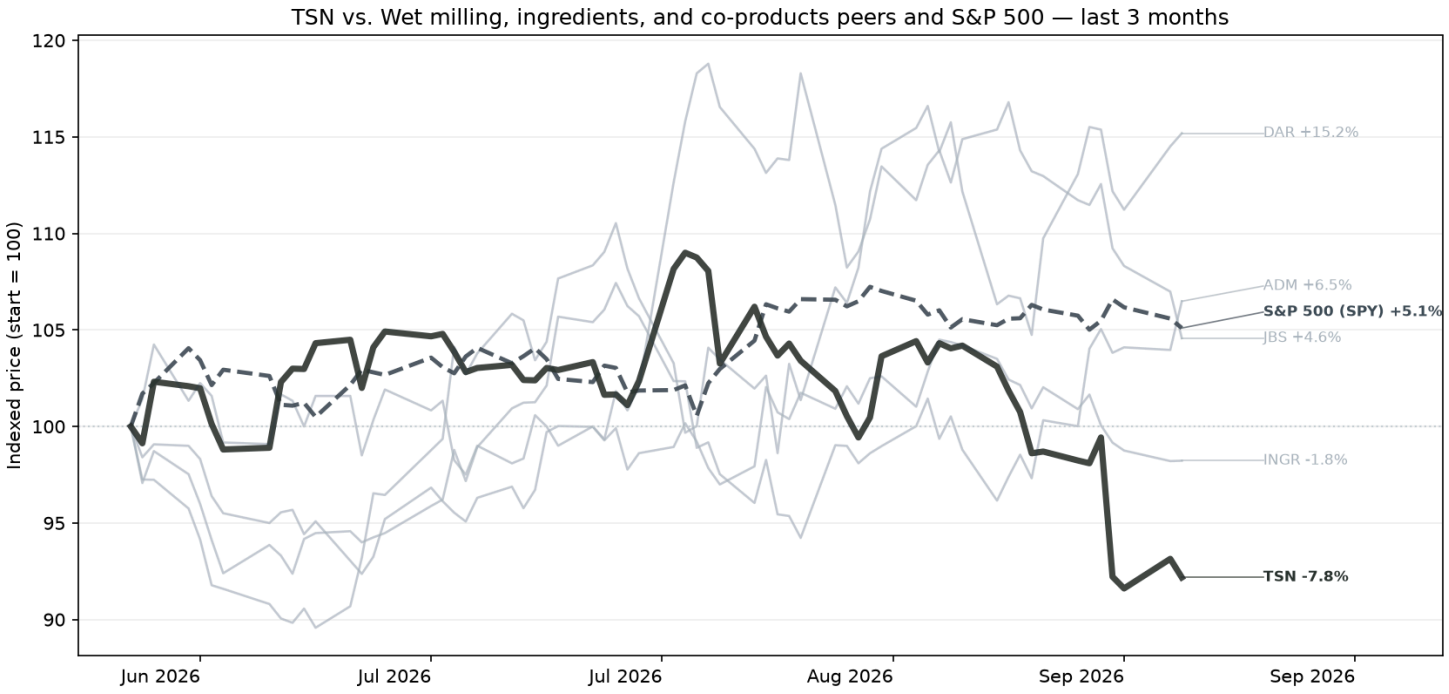

Darling Ingredients Inc is a developer and producer of sustainable natural ingredients from edible and inedible bio-nutrients, creating a wide range of ingredients and customized specialty solutions for customers in the pharmaceutical, food, pet food, animal feed, industrial, fuel, bioenergy and fertilizer industries. It processes by-products from the animal agriculture and food industries into ingredients and products for human nutrition, animal feed, crop inputs, and renewable energy applications. The company operates processing facilities across multiple countries and produces collagen, including gelatin and hydrolyzed collagen, as well as renewable energy products.

Tyson Foods (TSN)

Wet milling, ingredients, and co-products · $20.6B · 3m -7.8% · 12m -6.6% · 24m -18.1%

Google Finance

Largest U.S. protein company and a primary domestic sink for distillers grains.

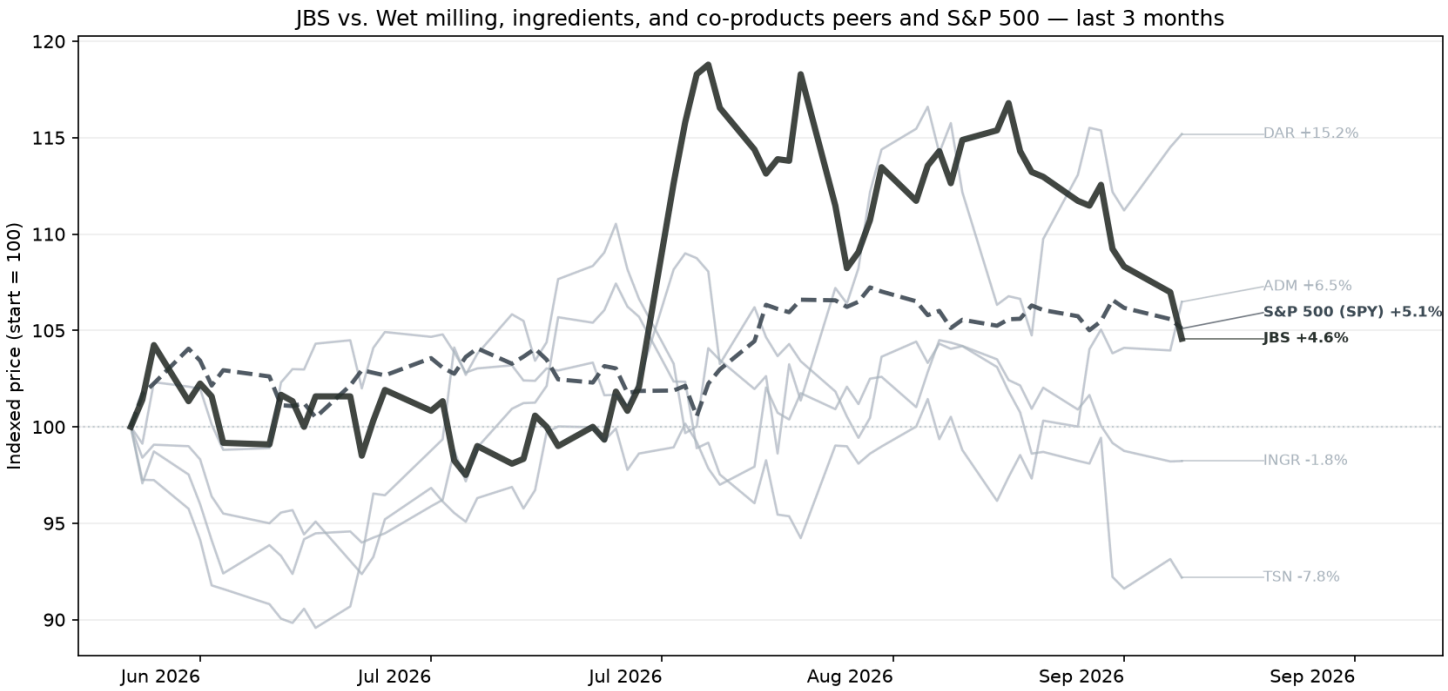

Tyson Foods is a protein-focused food producer, selling raw chicken, beef, pork, and prepared foods. Chicken and beef are its two largest segments, composing about 40% and 30% of sales, respectively. Prepared foods constituted 18% of fiscal 2025 sales and include brands like Tyson, Jimmy Dean, Hillshire Farm, Ball Park, and Sara Lee. However, most of these are in product categories rife with competition where Tyson does not have a massive market share lead. Tyson sells some products overseas, but the international segment accounts for just 4% of total revenue. The company is an active acquirer, with more recent years' purchases focused on international and food-service markets.

JBS (JBS)

Wet milling, ingredients, and co-products · $45.2B · 3m +4.6% · 12m -19.9% · 24m n/a

Google Finance

World's largest protein company and a major DDGS buyer in the U.S. and Brazil.

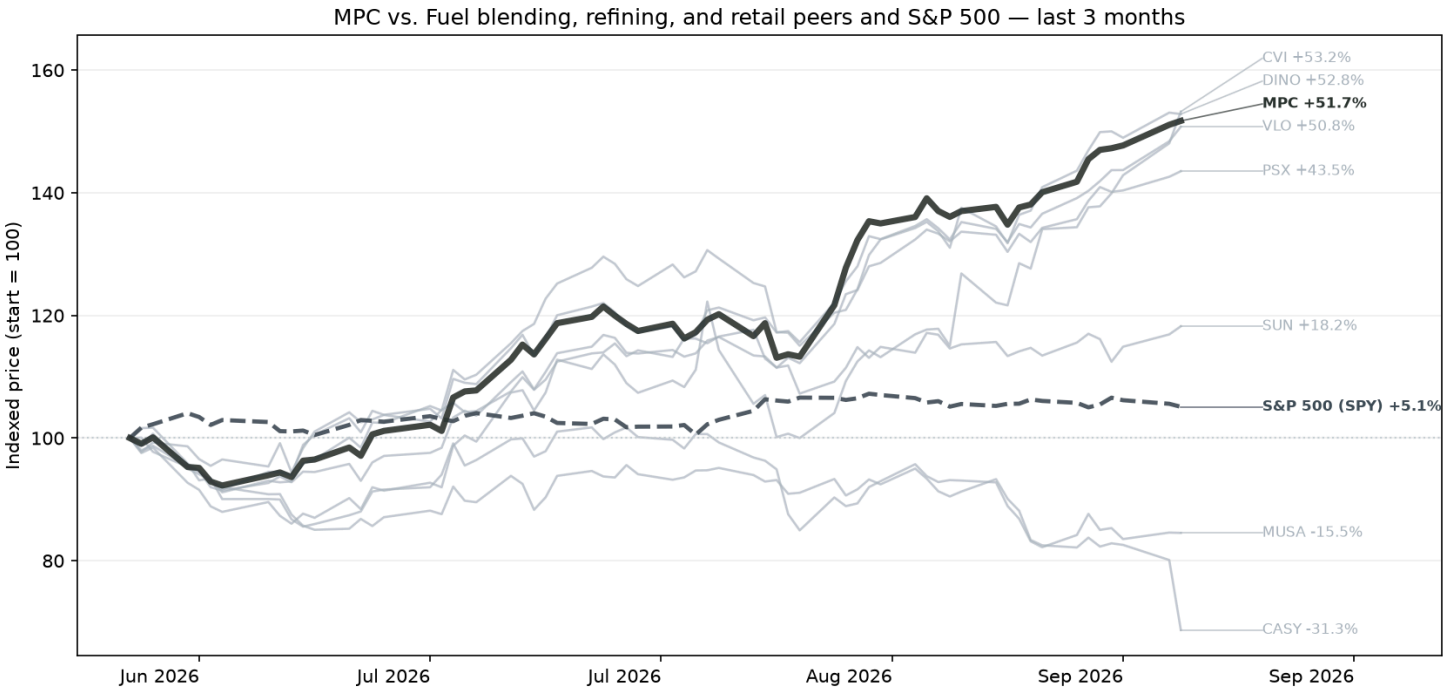

JBS NV is a protein food company, selling protein products, which include fresh and frozen cuts of beef, pork, lamb, fish, whole chickens, and chicken parts, to retailers, and foodservice companies. The food products are marketed under different brands such as Swift, Just Bare, Pilgrim's Pride, Sunnyvalley, Reserva Friboi, Great Southern, etc., globally. The company's reportable segments are Beef North America, which generates maximum revenue, Brazil, Seara, Pork USA, Pilgrim's Pride, Australia, and Others. Geographically, it derives majority of its revenue from United States of America.

Marathon Petroleum (MPC)

Fuel blending, refining, and retail · $101.3B · 3m +51.7% · 12m +119.8% · 24m +144.2%

Google Finance

Largest U.S. independent refiner and a major Midwest ethanol blender.

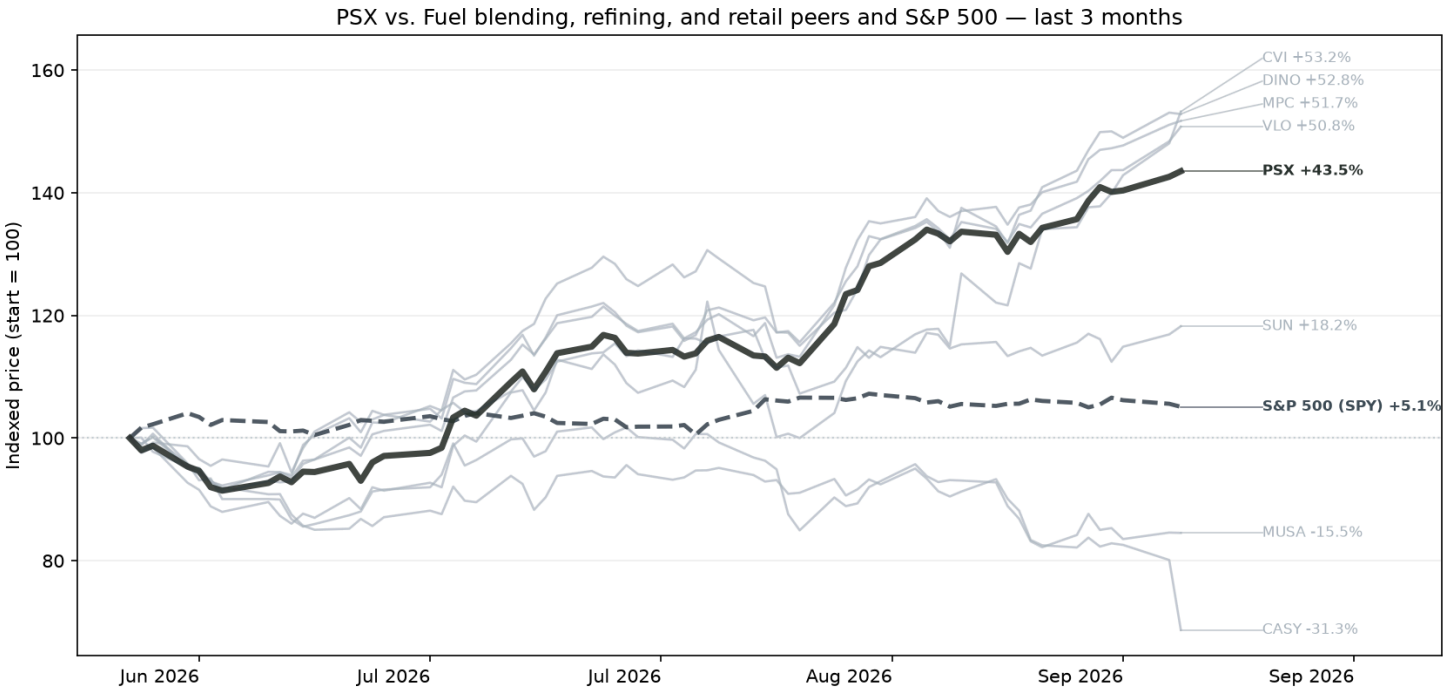

Marathon Petroleum is a leading integrated downstream and midstream energy company that operates 13 refineries in the Gulf Coast, Mid-Continent, and West Coast regions of the United States with an aggregate crude oil refining capacity of 3.0 million barrels per day. The company is one of the largest producers of renewable diesel in the US; its Dickinson, North Dakota facility has the capacity to produce 184 million gallons per year, and its Martinez, California, joint venture facility (a 50/50 partnership with Neste) reached its full capacity of 730 million gallons per year in late 2024. Marathon also owns the general partner and approximately 64% of MPLX LP, a large-cap master limited partnership that owns and operates midstream energy infrastructure and logistics assets.

Phillips 66 (PSX)

Fuel blending, refining, and retail · $96.7B · 3m +43.5% · 12m +98.4% · 24m +105.5%

Google Finance

Large blender and marketer with West Coast renewable-diesel capacity.

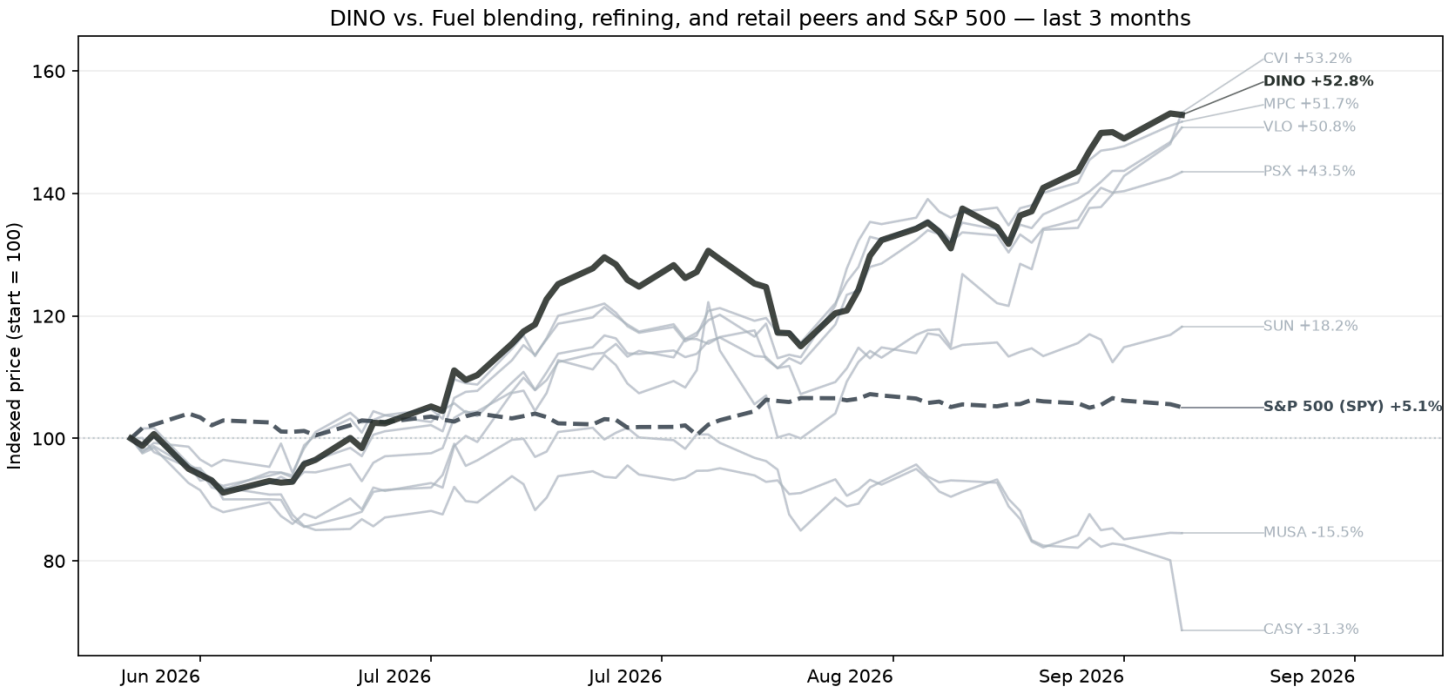

Phillips 66 is an independent refiner that owns or holds interest in 10 refineries with a total crude throughput capacity of 2.0 million barrels per day, or mmb/d, at the end of 2025. The midstream segment comprises extensive transportation and NGL processing assets. It includes 70,000 miles of crude oil, refined petroleum product, NGL and natural gas pipeline systems, and a comprehensive set of refined petroleum product, NGL and crude oil terminals, gathering and processing plants and fractionation facilities and various other storage and loading facilities. Its CPChem chemical joint venture operates facilities primarily in the United States and the Middle East and produces olefins and polyolefins.

HF Sinclair (DINO)

Fuel blending, refining, and retail · $16.8B · 3m +52.8% · 12m +111.3% · 24m +133.6%

Google Finance

Independent Mid-Continent and Rockies refiner with renewable diesel and RFS blending obligations.

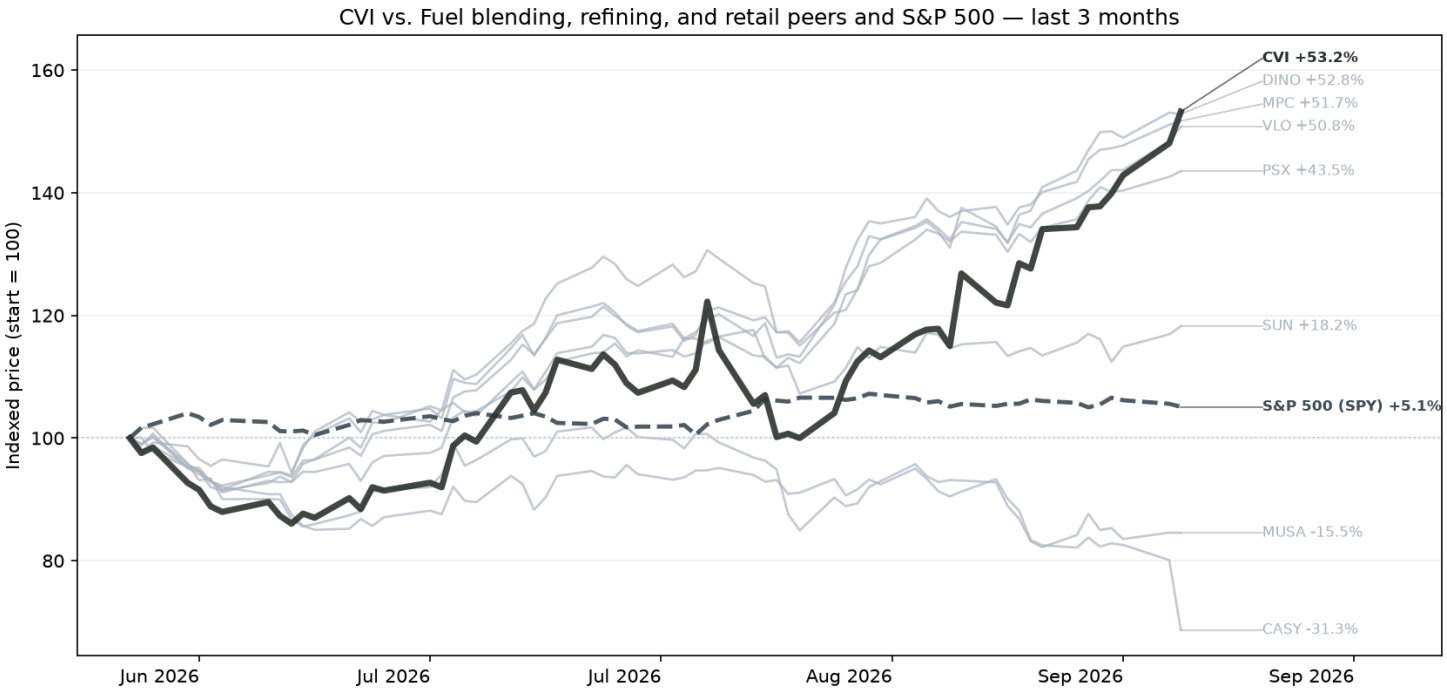

HF Sinclair is an integrated petroleum refiner that owns and operates seven refineries serving the Rockies, midcontinent, Southwest, and Pacific Northwest, with a total crude oil throughput capacity of 678,000 barrels per day. It can produce 380 million gallons of renewable diesel annually. It operates a marketing business with over 350 distributors and 1,700 branded wholesale sites across 30 states. It also owns and operates 4,500 miles of petroleum product pipelines and terminals principally in the Southwestern United States.

CVR Energy (CVI)

Fuel blending, refining, and retail · $3.7B · 3m +53.2% · 12m +49.5% · 24m +118.5%

Google Finance

Coffeyville, Kansas refiner in the corn complex with renewable diesel and a nitrogen affiliate.

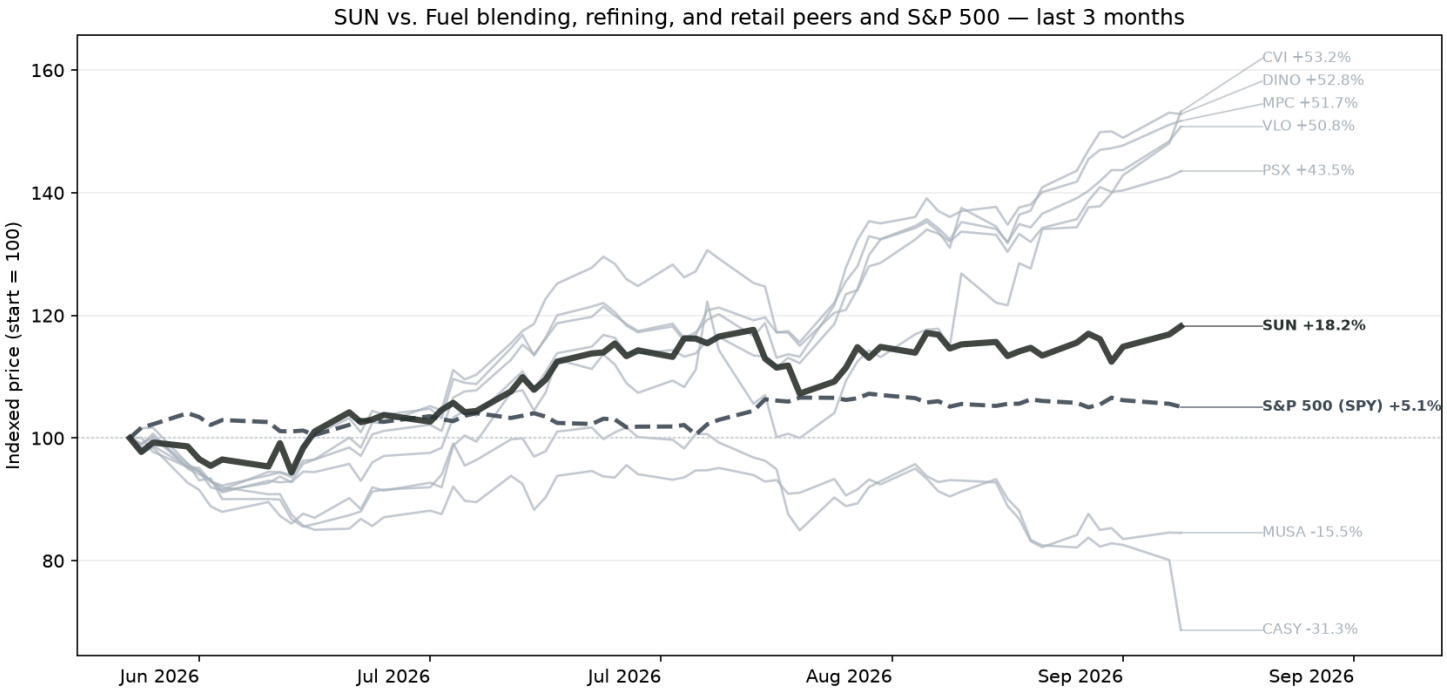

CVR Energy Inc is a holding company that engages in petroleum refining and nitrogen fertilizer manufacturing through its subsidiaries. Subsidiaries include several complex, full-coking crude oil refineries, along with a crude oil gathering system, pipelines, storage tanks, and marketing and supply. The company's refineries can process blends of a variety of crude oil ranging from heavy sour to light sweet crude oil. Crude oil for CVR's refineries is supplied through its wholly-owned gathering system and pipeline. From its refineries, CVR supplies products through tanker trucks directly to customers located in close geographic proximity and customers at throughput terminals. The company's customers include retailers, railroads, and farm cooperatives.

Sunoco LP (SUN)

Fuel blending, refining, and retail · $14.5B · 3m +18.2% · 12m +54.0% · 24m +47.6%

Google Finance

Fuel distributor and terminal operator that moves finished gasoline and ethanol.

Sunoco LP is engaged in the distribution of motor fuels to independent dealers, distributors, and other commercial customers as well as the distribution of motor fuels to end-use customers at retail sites operated by commission agents. It is a growth-oriented master limited partnership (MLP) that operates as a wholesale and retail fuel distributor in the United States. The firm operates through the Fuel Distribution; Pipeline Systems; Refinery and Terminals segments. It generates the majority of its revenue from the Fuel Distribution segment. It distributes motor fuel to convenience stores, dealers, and commercial customers in various states.

Casey's General Stores (CASY)

Fuel blending, refining, and retail · $30.9B · 3m -31.3% · 12m +16.8% · 24m +67.8%

Google Finance

Corn Belt convenience-store chain with high E10/E15/E85 exposure.

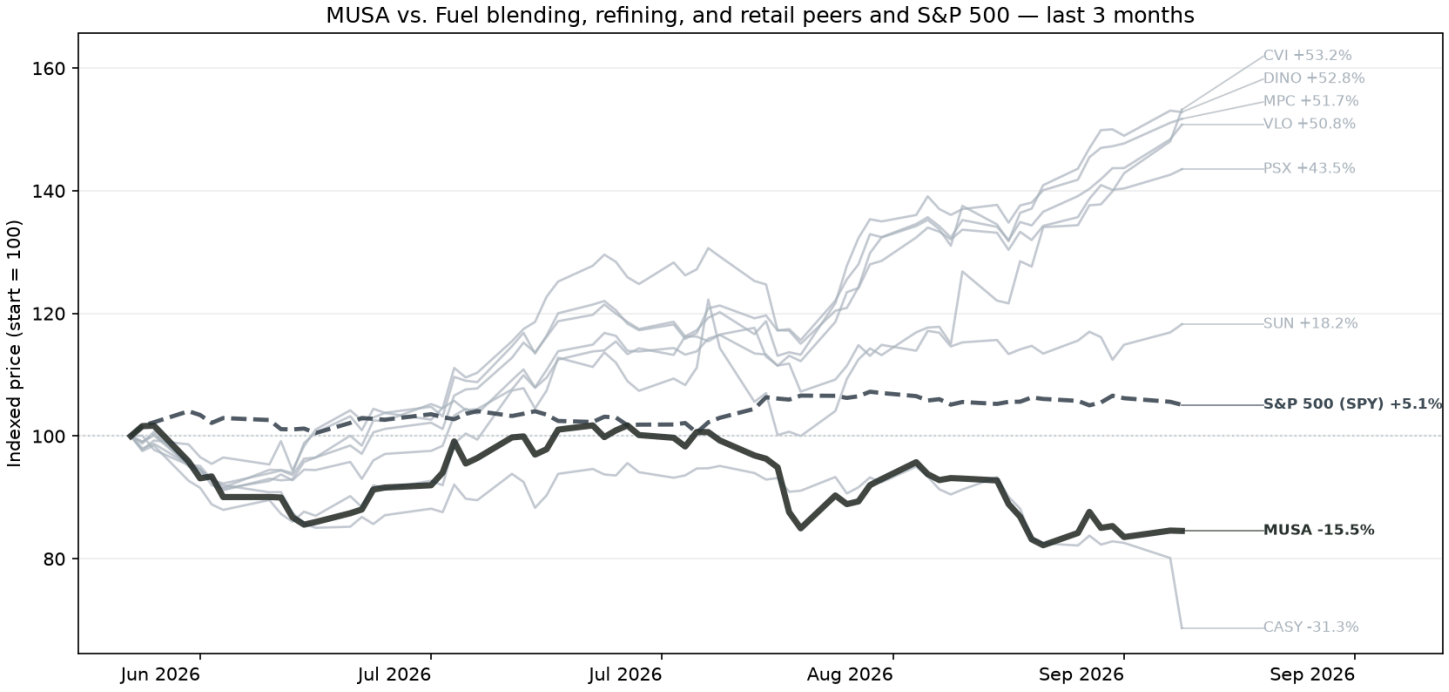

Casey's General Stores Inc, along with its subsidiaries, operates convenience stores mainly under the names Casey's, GoodStop (by Casey's), and Casey's General Store throughout various states in the USA, approximately half of which are located in Iowa, Missouri, and Illinois. These stores offer a broad selection of food items (which includes prepared foods such as regular and breakfast pizza, donuts, hot breakfast items, and hot and cold sandwiches), beverages, tobacco and nicotine products, groceries, health and beauty aids, automotive products, and other non-food items. The majority of the company's revenue is mainly derived from the retail sale of fuel and the products offered inside its stores.

Murphy USA (MUSA)

Fuel blending, refining, and retail · $10.4B · 3m -15.5% · 12m +37.6% · 24m -0.8%

Google Finance

High-volume fuel retailer and national ethanol blender.

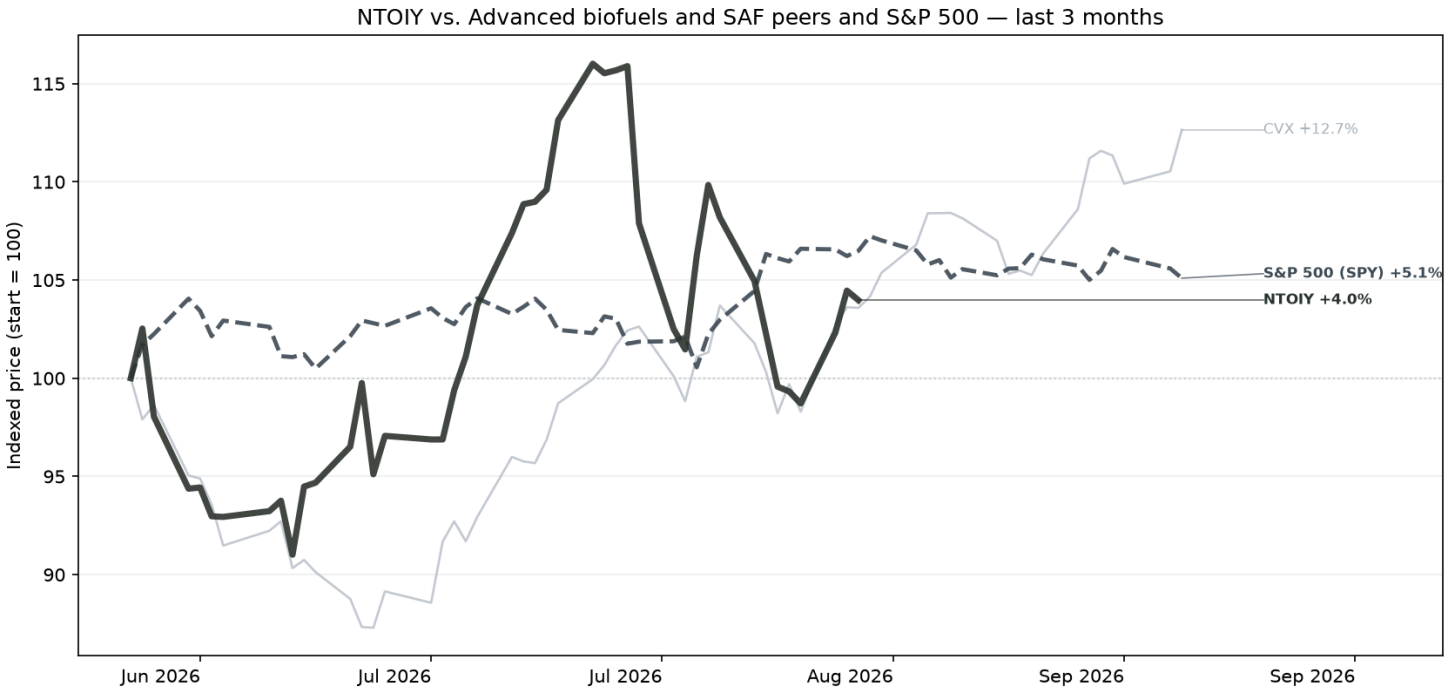

Murphy USA Inc is mainly engaged in the marketing of retail motor fuel products and convenience merchandise through a network of several retail stores in the Southwest, Southeast, Midwest, and Northeast United States. The majority of Murphy USA's stores are located in proximity to Walmart Supercenters, but it also operates standalone stores that market gasoline and other products under the Murphy USA, Murphy Express, and QuickChek brands. In addition, the company also markets fuel to unbranded wholesale customers through a mixture of company-owned and third-party product distribution terminals and pipeline positions. The firm generates maximum revenue through retail sales of petroleum products, and the rest from merchandise sales and wholesale of petroleum products.

Neste (NTOIY)

Advanced biofuels and SAF · n/a · 3m +4.0% · 12m +76.3% · 24m +72.2%

Google Finance

Largest global producer of renewable diesel and SAF; sets the price umbrella for corn oil.

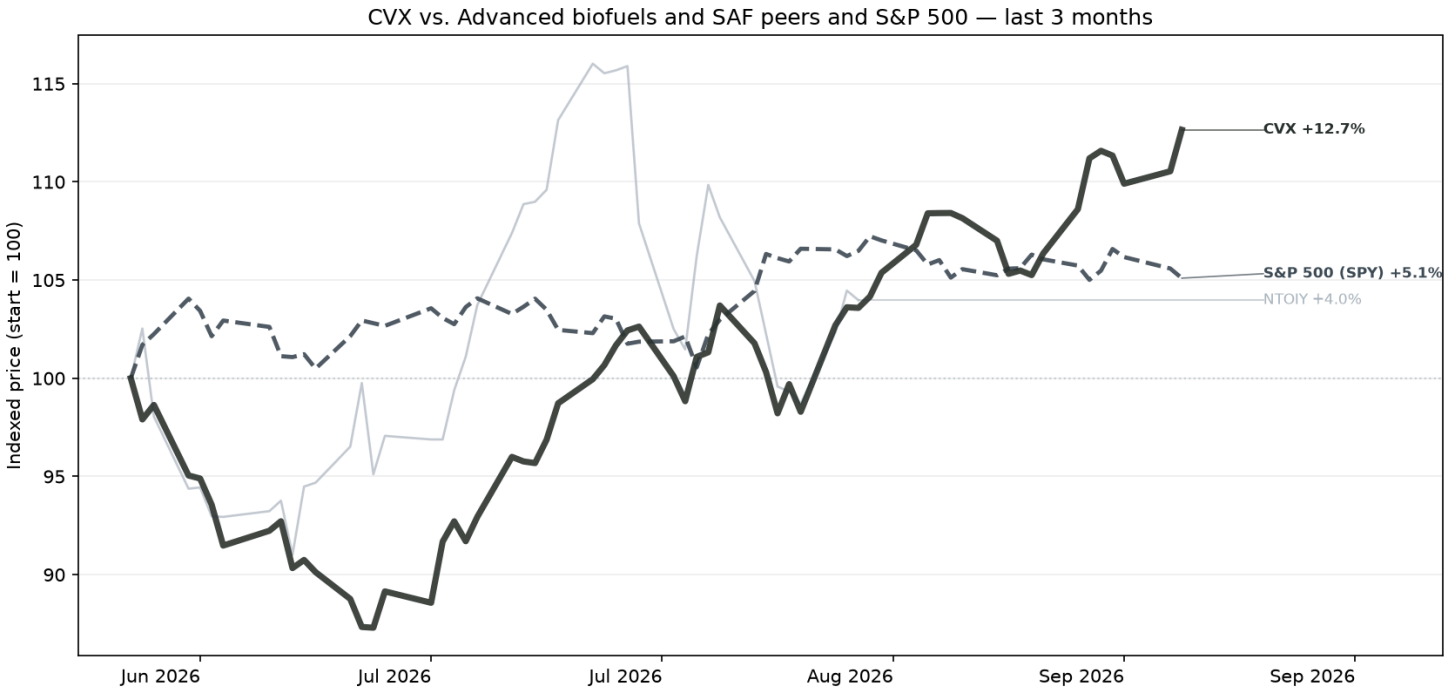

NESTE OYJ UNSP/ADR

Chevron (CVX)

Advanced biofuels and SAF · $403.6B · 3m +12.7% · 12m +35.5% · 24m +54.7%

Google Finance

Owner of Renewable Energy Group biodiesel and renewable-diesel plants that take corn oil at the margin.

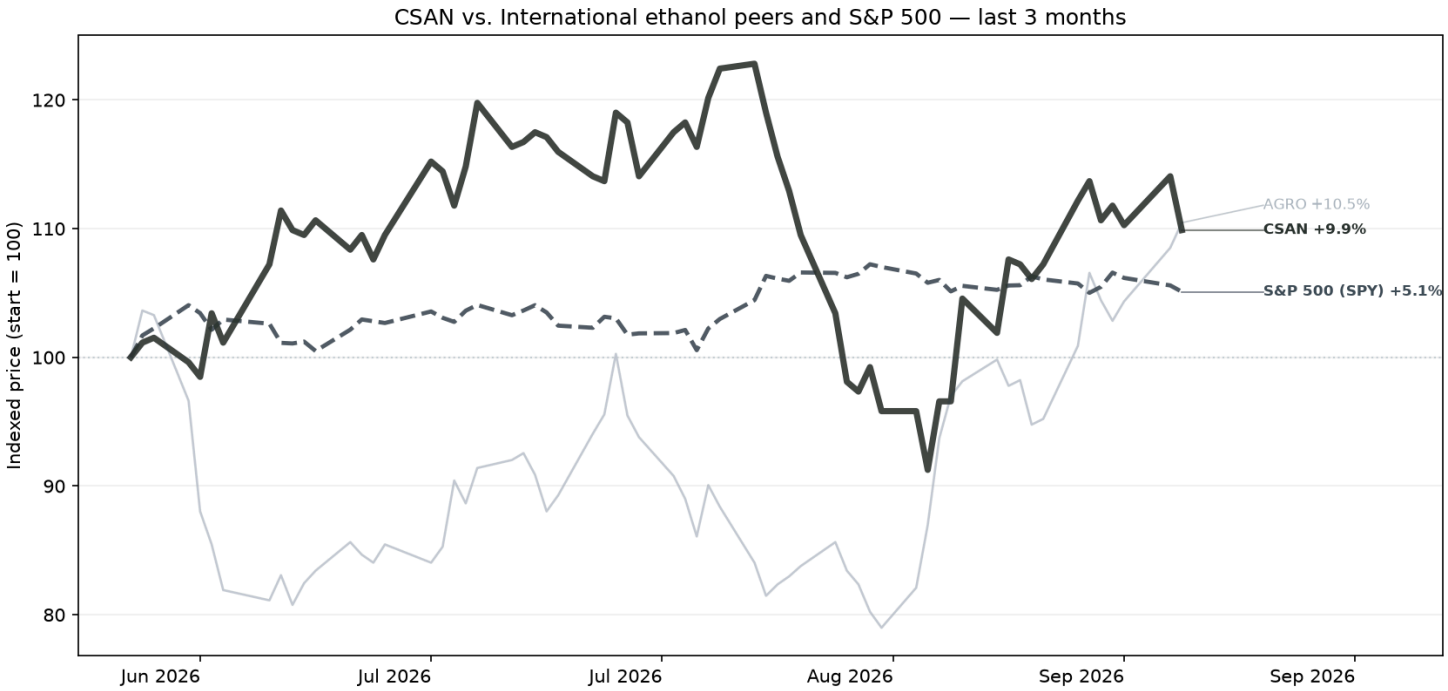

Chevron is an integrated energy company with exploration, production, and refining operations worldwide. It is the second-largest oil company in the United States with 2025 worldwide net oil-equivalent production of 3.7 million barrels per day, including 8.5 billion cubic feet per day of natural gas and 2.3 million barrels of liquids per day. Production takes place in North America, South America, Europe, Africa, Asia, and Australia. The company's refining networks arelocated in the United States and Asia, with a total worldwide refining capacity of 1.8 million barrels of oil a day at year-end 2025. Net proved reserves at year-end 2025 stood at 10.6 billion barrels of oil equivalent, consisting of 5.7 billion barrels of liquids and 29.2 trillion cubic feet of natural gas.

Cosan (CSAN)

International ethanol · $2.5B · 3m +9.9% · 12m -46.5% · 24m -67.3%

Google Finance

Brazilian holding company and the liquid U.S.-listed proxy for sugarcane ethanol via Raizen.

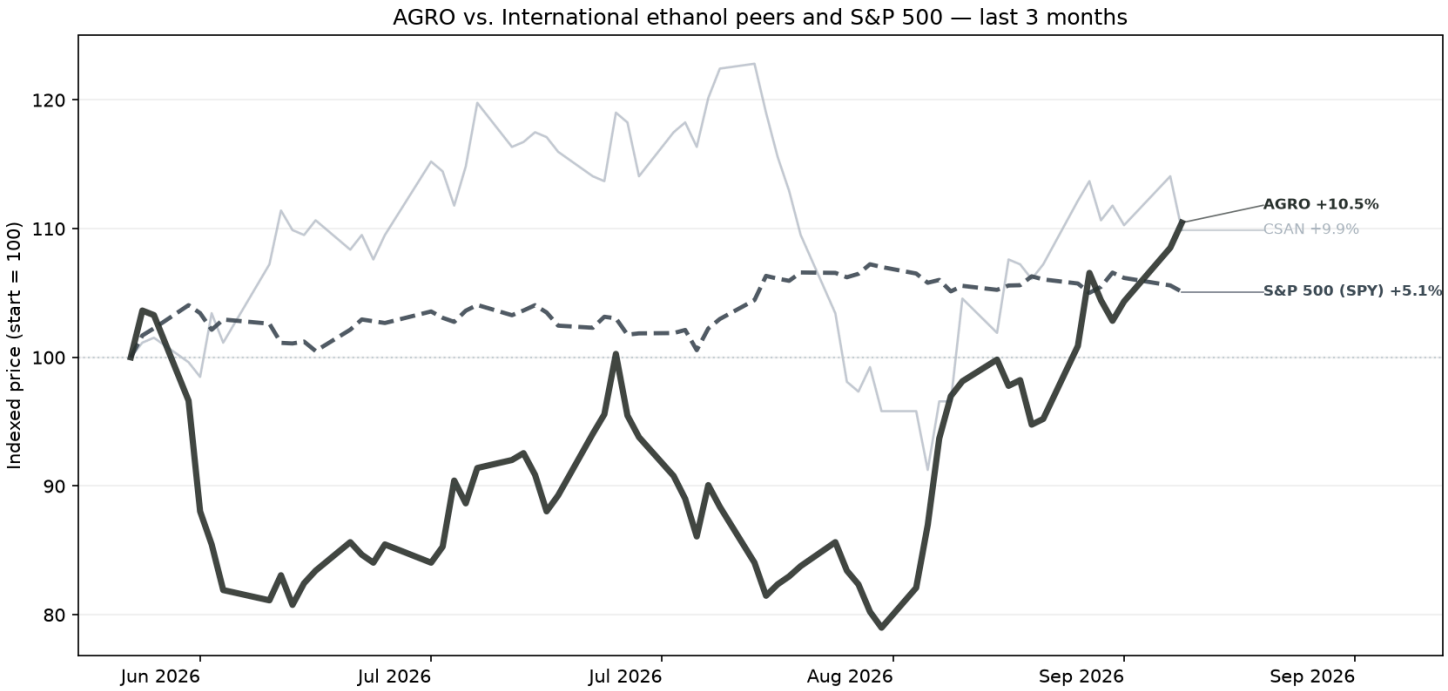

Cosan SA engages in several services throughout the energy and logistics sectors. Its reportable segments are Raizen, Compass, Moove, Rumo, and Radar. It generates the majority of its revenue from Raizen which operates in the production, commercialization, origination, and trading of ethanol, bioenergy, resale, and trading of electricity, renewable sources, marketing, origination, and trading of sugar and fuels, and lubricant.

Adecoagro (AGRO)

International ethanol · $1.5B · 3m +10.5% · 12m +52.9% · 24m +11.2%

Google Finance

South American farmland and sugar/ethanol producer with U.S.-listed equity.

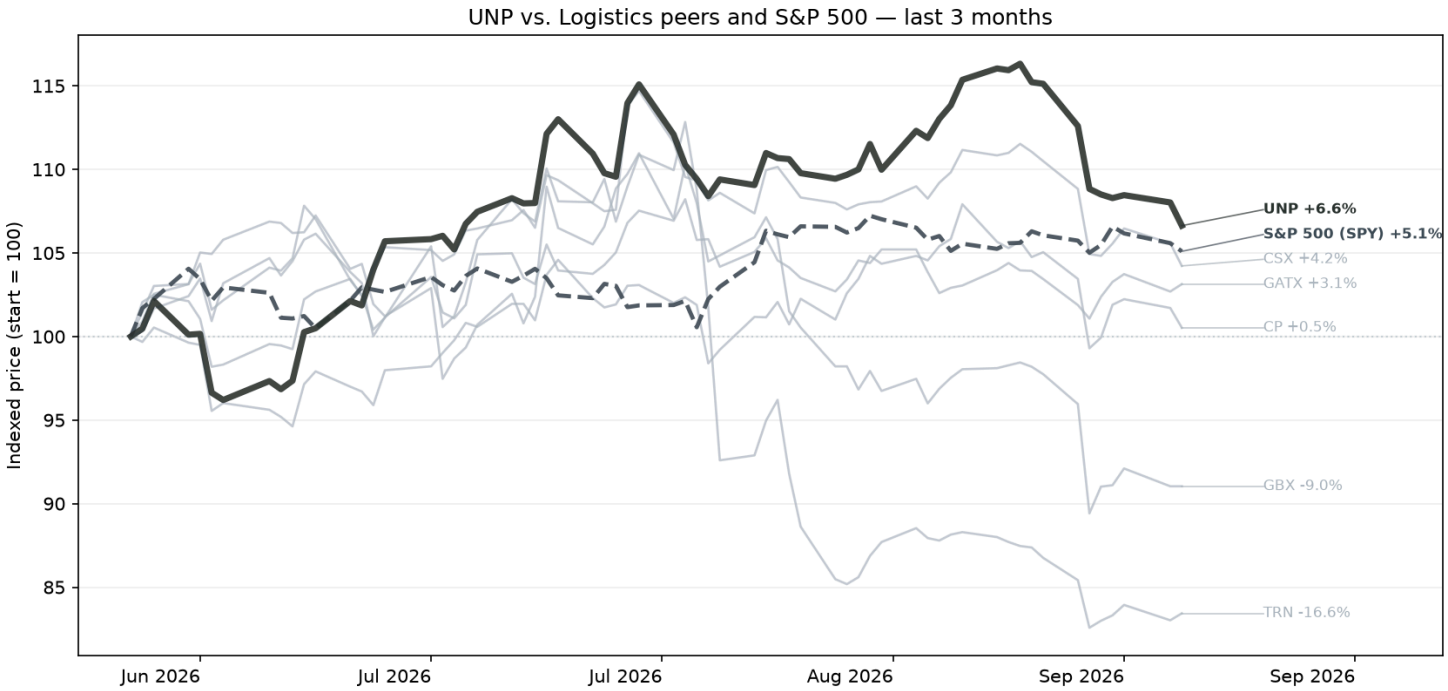

Adecoagro SA is a Luxembourg-based agricultural company. It is involved in a wide range of businesses, including farming crops and other agricultural products, dairy operations sugar, ethanol, energy production, and land transformation. The group operates in two lines of business, namely, Farming and Sugar, Ethanol and Energy. The Farming is further comprised of three reportable segments: Crops, Rice and Dairy. Sugar, Ethanol and Energy Segment, consists of cultivating sugarcane, which is processed in owned sugar mills, transformed into ethanol, sugar and electricity, in addition to biomethane and then marketed.

Union Pacific (UNP)

Logistics · $179.3B · 3m +6.6% · 12m +32.3% · 24m +12.7%

Google Finance

Primary western Class I for Corn Belt corn, ethanol unit trains, DDGS, and corn oil.

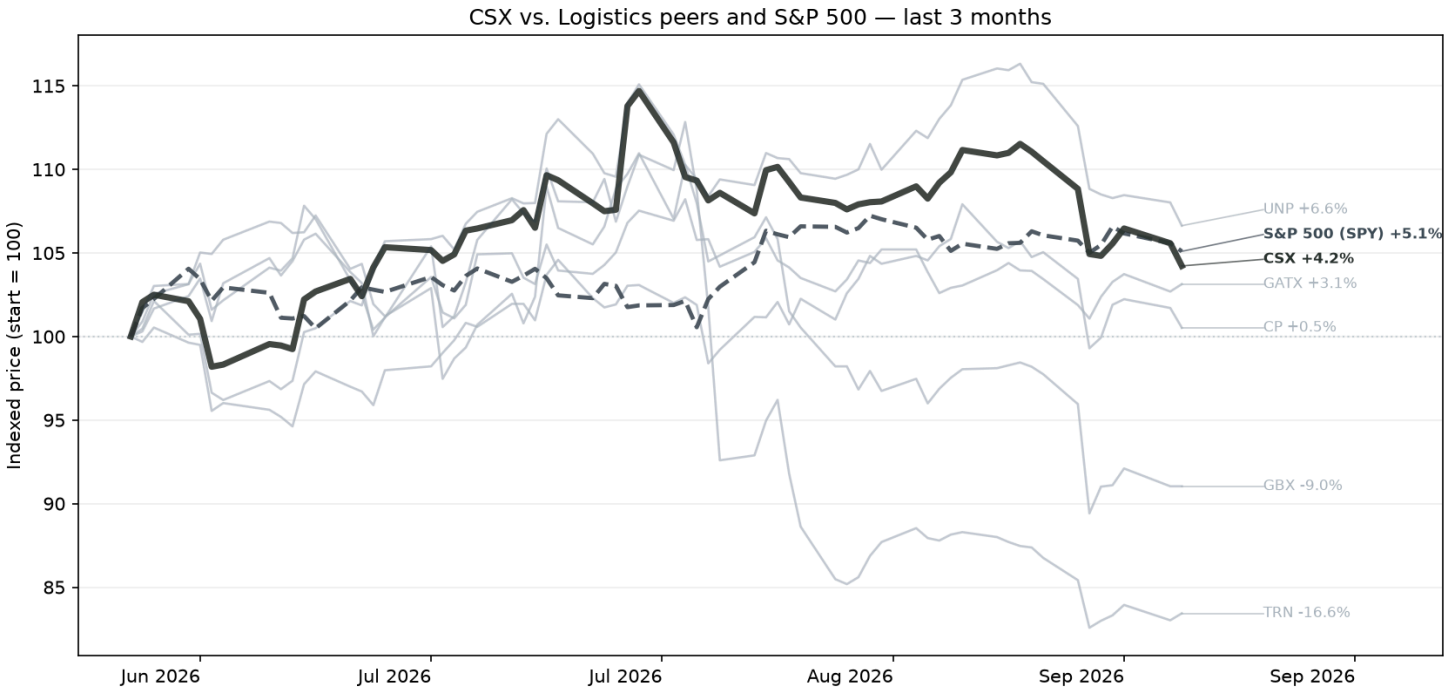

Omaha, Nebraska-based Union Pacific is the largest public railroad in North America. Operating on more than 30,000 miles of track in the western two-thirds of the US, Union Pacific generated $24.5 billion of revenue in 2025 by hauling coal, industrial products, intermodal containers, agricultural goods, chemicals, fertilizers, and automotive goods. Union Pacific owns about one-fourth of Mexican railroad Ferromex and historically derives roughly 10% of its revenue hauling freight to and from Mexico.

CSX (CSX)

Logistics · $93.9B · 3m +4.2% · 12m +50.9% · 24m +44.3%

Google Finance

Primary eastern Class I into Northeast and Southeast gasoline markets for ethanol unit trains.

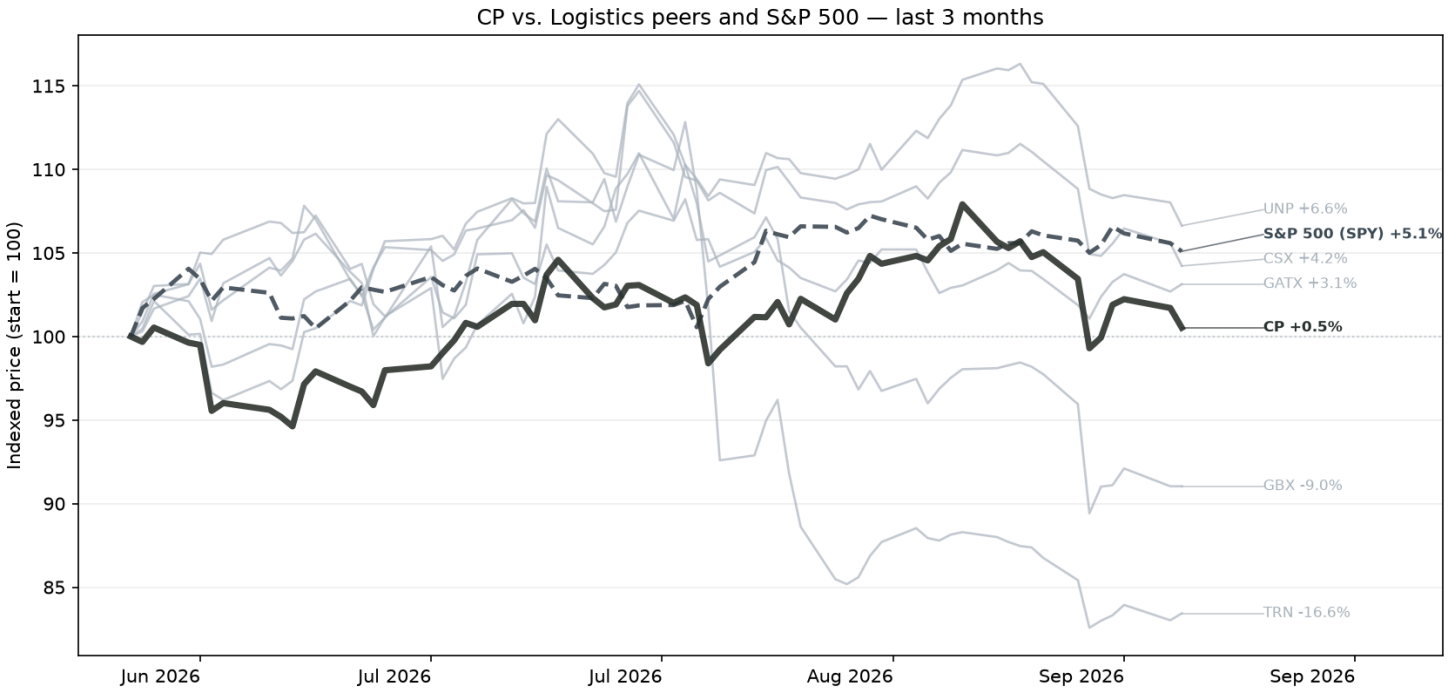

Operating in the Eastern United States, Class I railroad CSX generated revenue of nearly $14 billion in 2025. On its more than 21,000 miles of track, CSX hauls shipments of coal (16% of consolidated revenue), chemicals (17%), intermodal containers (16%), automotive cargo (7%), and a diverse mix of other bulk and industrial merchandise.

Canadian Pacific Kansas City (CP)

Logistics · $83.0B · 3m +0.5% · 12m +20.9% · 24m +7.2%

Google Finance

North-south railroad for Midwest corn and ethanol to the Gulf and Mexico.

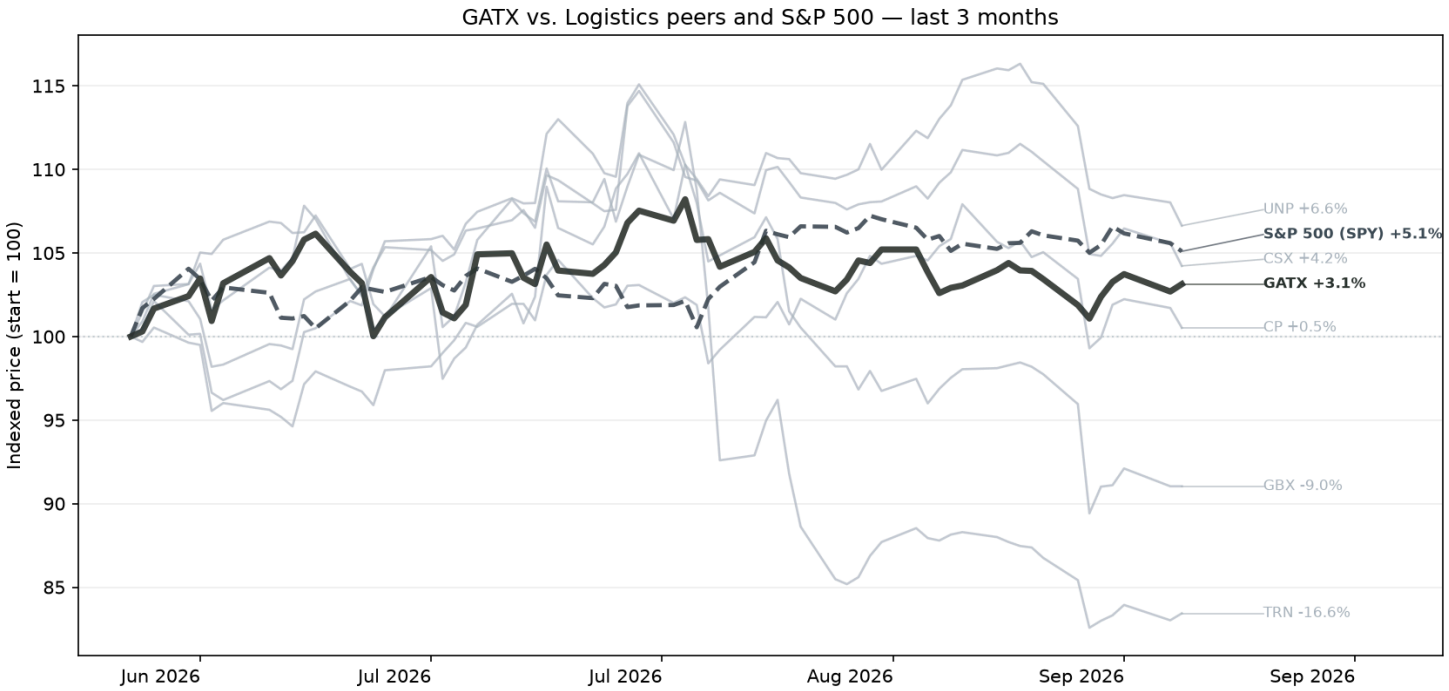

Canadian Pacific Kansas City is a Class I railroad operating on tracks that span most of Canada and into parts of the Midwestern and Northeastern United States. Following the April 2023 Kansas City Southern merger, CPKC operates new single-linehaul services from Canada and the Upper Midwest down through Texas, the Gulf of Mexico, and into Mexico. It also hauls cross-border and intra-Mexico freight via operating concessions on more than 3,000 miles of rail in Mexico. CPKC hauls shipments of grain, intermodal containers, energy products (like crude and frac sand), chemicals, plastics, coal, fertilizer and potash, automotive products, and a diverse mix of other merchandise.

GATX (GATX)

Logistics · $6.2B · 3m +3.1% · 12m +5.1% · 24m +34.0%

Google Finance

Largest public railcar lessor of ethanol tank cars and grain/DDGS hoppers.

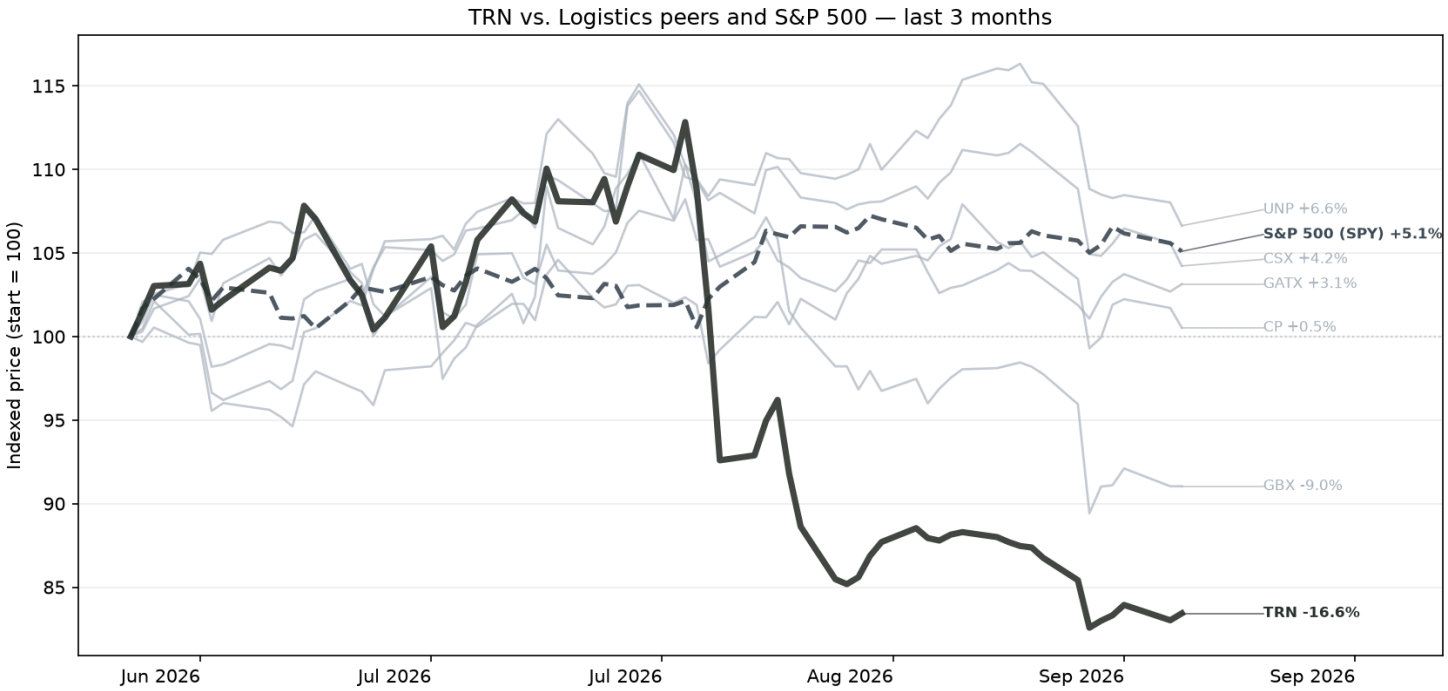

GATX Corp leases transportation assets, including railcars, aircraft spare engines, and tank containers, to customers in North America, Europe, and India. The company's reportable business segments are: Rail North America, Rail International, Engine Leasing, and Other. The majority of its revenue is generated from the Rail North America segment, which is composed of the company's operations in the United States, Canada, and Mexico. This segment mainly provides railcars pursuant to full-service leases under which it maintains the railcars, pays ad valorem taxes and insurance, and provides other ancillary services.

Trinity Industries (TRN)

Logistics · $2.4B · 3m -16.6% · 12m -0.1% · 24m -8.0%

Google Finance

Builds and leases covered hoppers and tank cars used for grain, DDGS, and ethanol.

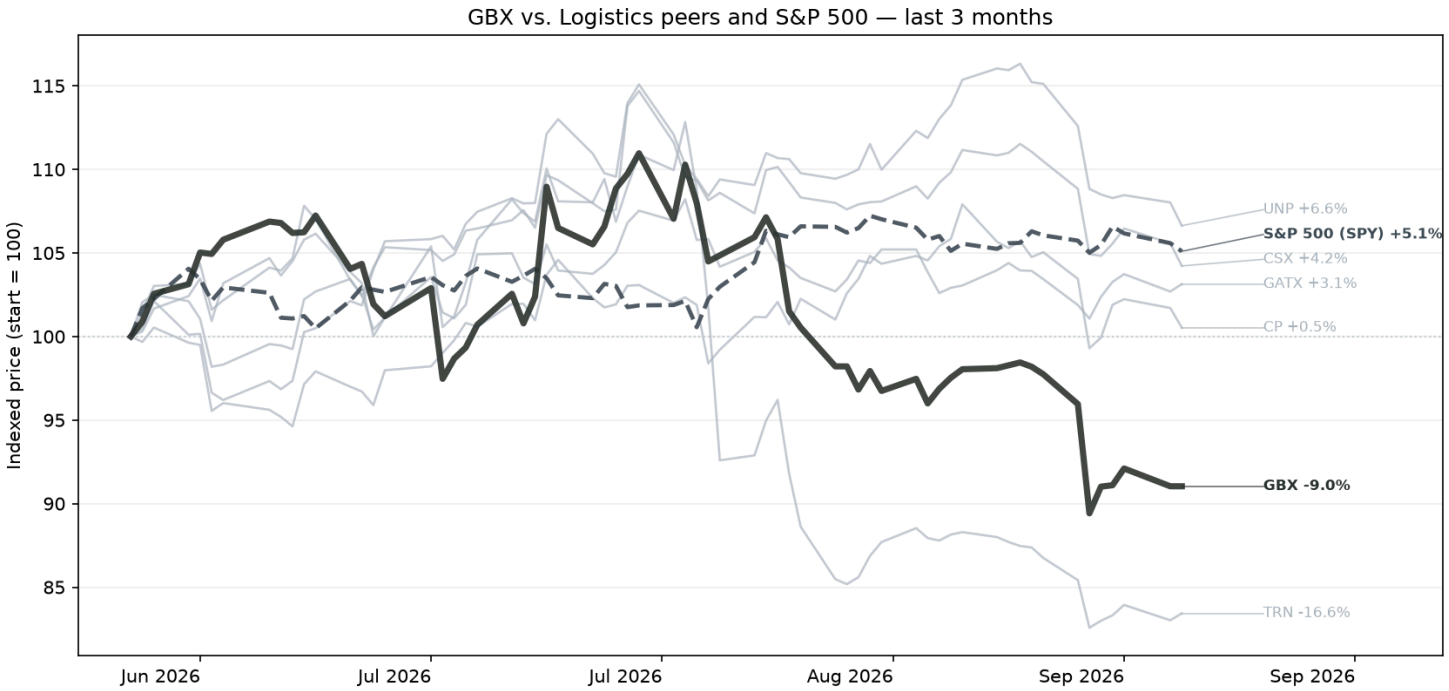

Trinity Industries Inc sells and leases railroad products and railcar maintenance services in North America. The company operates under the name TrinityRail in two main segments: railcar leasing and management services, which owns railcars and provides fleet management and administration services; rail products, which builds, sells, and modifies freight and tank railcars and their components; and all other, which sells highway products such as guardrail and other highway barriers. Customers include railroads, leasing companies, and shipping companies in agriculture, construction, consumer products, energy, and chemicals.

Greenbrier (GBX)

Logistics · $1.4B · 3m -9.0% · 12m -7.1% · 24m -5.9%

Google Finance

Builds tank cars used for ethanol, renewable fuels, and CO2.

Greenbrier Companies Inc supplies equipment and services to international freight transportation markets, designing and marketing freight railcars in North America, Europe, and Brazil through subsidiaries and joint ventures. It provides railcar wheel services, parts, maintenance, and conversion services in North America. The company owns a lease fleet sourced mainly from its manufacturing operations and offers railcar management, regulatory compliance, and leasing services to railroads and owners. It operates two segments: Manufacturing and Leasing & Fleet Management, with the majority of revenue from Manufacturing. The company operates in the U.S. and internationally, with the majority of revenue from the U.S. market.
