Weekly Corn and Ethanol Intel Report

> **Week of September 17, 2026**
> Market data through: September 16, 2026
> Narrative created: September 18, 2026
> Nearby corn: $5.343/bu (+$0.203 (+3.9%) week)

Weekly review of corn, ethanol, energy, co-product, policy, and related public-company performance for commodities risk managers at U.S. ethanol plants.

Strategy Narrative

Nearby futures from Yahoo Finance. Nearby corn is the market's current perception of yield and demand risk.

Contract	Last	Week change	As of
Nearby corn	$5.343/bu	+$0.203 (+3.9%)	September 16, 2026
RBOB gasoline	$3.485/gal	+0.092 (+2.7%)	September 16, 2026
Henry Hub	$2.891/MMBtu	+0.057 (+2.0%)	September 16, 2026

- 1. USDA tightened corn supply, but demand rationing limited the carryout cut
- 2. Export commitments make USDA’s unchanged corn-demand forecast credible
- 3. Energy disruption improved ethanol’s price umbrella but raised delivery costs
- 4. Ethanol output discipline remains insufficient to reduce heavy stocks
- 5. Gas storage cushioned the higher futures and oil-risk environment

Executive View

- **USDA confirmed a smaller corn crop, and futures increased the procurement-risk premium.** The September balance sheet lowered yield **2.2 bushels to 178.5 bushels per acre**, production **213 million bushels to 15.800 billion**, and 2026/27 carryout **86 million bushels to**

1.567 billion. Nearby corn closed September 16 at **$5.343 per bushel, up $0.203, or 3.9%, from September 10**. Although USDA's carryout exceeded pre-report expectations, the tape indicates that the market does not view the resulting 9.7% stocks-to-use ratio as comfortable.

- **Strong export commitments reinforce the tighter corn regime.** New-crop commitments reached **17.40 million metric tons, or 685 million bushels, by September 10**—roughly 21% of USDA's 3.3-billion-bushel annual forecast. The latest weekly sale of **1.027 million tons** was slower, but it did not materially weaken the cumulative demand signal.
- **The Middle East energy shock strengthened ethanol's petroleum price umbrella but increased freight and operating costs.** RBOB rose **2.7% to $3.485 per gallon**, while EIA's New York Harbor gasoline spot assessment increased and U.S. retail diesel reached a record **$6.285 per gallon**. Higher gasoline supports ethanol value; higher diesel and war-risk freight work against delivered margins.
- **Ethanol remains physically heavy.** Production held at **1.099 million barrels per day**, inventories increased **33,000 barrels to 25.220 million**, and EIA refiner and blender inputs edged up **3,000 barrels per day to 911,000**. Gulf Coast stocks rose to **5.289 million barrels, 50.9% above last year**, leaving prompt product clearance dependent on exports.
- **Natural gas remains buffered despite a higher futures price.** Henry Hub increased **2.0% to $2.891 per MMBtu**, but Lower-48 storage rose 44 Bcf to **3,298 Bcf** and Midwest stocks increased 26 Bcf to **934 Bcf, 3.9% above the five-year average**.
- **Overall margin and risk conditions deteriorated modestly:** the 3.9% corn rally, persistently heavy ethanol stocks and higher gas and freight costs outweighed the supportive RBOB move. Plants with verified low-carbon feedstocks retain a 45Z offset, but there was no new policy change this week.

Exposure	Current signal	Change from last week	Horizon	Confidence	Main driver
Corn procurement	Tighter official balance sheet	Deteriorated	Harvest–Q1 2027	High	178.5-bushel yield; corn +3.9%
Ethanol selling	Stocks at a 19-week high	Deteriorated modestly	1–4 weeks	High	High runs and Gulf accumulation
Gasoline linkage	Stronger petroleum support	Improved	Weeks–months	High	RBOB +2.7%; oil disruption

Exposure	Current signal	Change from last week	Horizon	Confidence	Main driver
Freight/basis	River and diesel pressure	Deteriorated	Harvest–autumn	High	Low-water protocol; record diesel
45Z/feedstock CI	Major plant differentiator	Unchanged	2025–29 credits	High	Documentation and monetization execution
Overall plant margin	Higher feedstock and logistics costs	Deteriorated modestly	Near term	Medium-high	Corn increase exceeds output support

The week's thesis is that **USDA moved materially toward the crop-tour warning without fully validating it, while the market retained an additional scarcity premium above the report's headline figures**. Continuing 45Z implementation, EPA's still-pending treatment of the incremental 2025 refinery exemptions and strong year-to-date ethanol exports remain important but are not re-narrated because no new operative federal action or monthly trade print emerged.

1. USDA tightened corn supply, but demand rationing limited the carryout cut

What happened

USDA lowered corn yield from 180.7 to **178.5 bushels per acre** and production from 16.013 billion to **15.800 billion bushels**. Beginning stocks also fell 23 million bushels, reducing total supply by 236 million. USDA offset most of that change by cutting feed and residual use 150 million bushels; exports and corn-for-ethanol demand were left unchanged. Carryout fell to **1.567 billion bushels**, versus 1.653 billion in August, while the season-average farm price rose $0.30 to $4.80. (USDA NASS, *Crop Production*, September 11, 2026; Iowa Farm Bureau, *September 2026 WASDE Report Recap*, September 14, 2026.) (esmis.nal.usda.gov)

The estimate remains **5.3 bushels above Pro Farmer's 173.2-bushel tour figure**. Subsequent USDA field data supplied no immediate refutation: corn condition improved one point to 57% good-to-excellent, while 42% was mature and 8% harvested, versus a 6% five-year harvest average. (USDA NASS, *Crop Progress*, September 14, 2026.) (esmis.nal.usda.gov)

Why it matters

The report confirmed that August's 180.7-bushel framework was too optimistic, but USDA's feed-use reduction prevented the production loss from flowing fully into stocks. A 9.7% stocks-to-use ratio is tighter than August yet not an outright shortage. The 20.3-cent weekly futures rally therefore matters as a consistency check: traders increased the premium for further yield losses, strong demand or both.

On September 17, December corn settled at **$5.305**, down 3.75 cents on the day—trimming, but not reversing, the weekly repricing. (Successful Farming, *Corn Closes Down 3¾¢*, September 17, 2026.) (agriculture.com)

Risk-manager implication

Harvest and winter futures exposure deteriorated. Plants should not treat the faster harvest pace as proof that corn procurement risk is resolved; early yield evidence now determines whether USDA's 178.5 is a stopping point or an intermediate estimate. Directionally: **corn bullish, ethanol feedstock cost higher and representative plant margins lower**, with high confidence through the next objective-yield report.

Watch next

State-level harvest yields, test weights and whether USDA's October revisions move toward—or away from—the crop-tour estimate.

---

2. Export commitments make USDA's unchanged corn-demand forecast credible

What happened

USDA reported **1.027 million metric tons** of 2026/27 corn net sales for the week ended September 10, down 16.6% from the comparable week last year but within the 0.7–2.0-million-ton expectation range. Total commitments nevertheless reached **17.40 million tons, or 685 million bushels**, including 6.65 million tons committed to Mexico. (USDA AMS, *Grain Transportation Report*, September 17, 2026; FS Grain, *Market Commentary*, September 17, 2026.) (indexbox.io)

Why it matters

Commitments equal approximately 21% of USDA's 3.3-billion-bushel annual export forecast only ten days into the marketing year, although much of the volume was carried into September as outstanding sales. Physical inspections were also firm at **1.525 million tons** during the latest week. The slower weekly booking therefore does not justify weakening the demand side of the corn thesis. (indexbox.io)

Risk-manager implication

Export demand reduces the cushion available if final yield falls below 178.5. River freight may temporarily weaken bids in some interior locations, but plants should distinguish a logistics-driven basis discount from evidence that national demand is failing.

---

3. Energy disruption improved ethanol's price umbrella but raised delivery costs

What happened

Attacks on vessels and energy infrastructure sharply reduced traffic through the Strait of Hormuz during the reporting window. Reuters reported only five commodity-vessel transits on September 12 and none on September 13, versus 31 over the previous weekend. (Reuters via *Gulf Times*, *Shipping Slows Through Strait of Hormuz After Tanker Attacks*, September 17, 2026.) (gulf-times.com)

EIA assessed New York Harbor conventional gasoline at **$3.376 per gallon on September 11**, versus $3.245 one week earlier. Gasoline inventories increased 0.8 million barrels to **207.7 million**, still 4.6% below last year, while four-week gasoline supplied averaged 8.828 million barrels per day, 1.0% lower year over year. (EIA, *Weekly Petroleum Status Report*, September 16, 2026.) (eia.gov)

Risk-manager implication

The immediate benefit is stronger gasoline-linked ethanol value, reflected in the 2.7% RBOB increase. The offset is material: diesel, rail fuel surcharges, truck costs and ocean freight all become more expensive. Plants should separate **ethanol selling support** from **net delivered-margin improvement**; this week produced the former, not clearly the latter.

---

4. Ethanol output discipline remains insufficient to reduce heavy stocks

EIA ethanol balance	Week ended Sept. 4	Week ended Sept. 11	Change
Production, million bpd	1.099	1.099	Unchanged
Inventories, million bbl	25.187	25.220	+0.033
Refiner/blender inputs, million bpd	0.908	0.911	+0.003

EIA noted that the September 11 data incorporated benchmarking to its August Petroleum Supply Monthly, accounting for revisions from figures reported last week. (EIA, *Weekly Petroleum Status*

Report, September 16, 2026.) (eia.gov)

National stocks were **11.6% above last year** and reached their highest level since May 1. The Midwest drew 79,000 barrels, but Gulf inventories increased 117,000 barrels to 5.289 million. EIA's modeled weekly export estimate rose to 161,000 barrels per day, helping prevent a larger build. (DTN, *EIA: Gulf Coast Ethanol Stocks Expand, Up 51% YoY*, September 16, 2026.) (dtnpf.com)

Risk-manager implication

The inventory pattern remains **heavy rather than rapidly worsening**, but maintenance-season production cuts have not generated a sustained draw. Gulf accumulation makes export execution and coastal tank capacity the key prompt exposures. Ethanol selling discipline remains necessary even with stronger gasoline.

---

5. Gas storage cushioned the higher futures and oil-risk environment

Lower-48 gas storage increased **44 Bcf to 3,298 Bcf** for the week ended September 11. Midwest stocks rose 26 Bcf to **934 Bcf**, 18 Bcf above last year and 35 Bcf, or 3.9%, above the five-year average. (EIA, *Weekly Natural Gas Storage Report*, September 17, 2026.) (ir.eia.gov)

Risk-manager implication

The 2.0% Henry Hub increase is a modest cost deterioration, not evidence of Midwest scarcity. Storage remains a meaningful buffer against energy-market volatility, supporting measured procurement rather than a national scarcity premium. Location-specific pipeline and basis exposure can still diverge.

Strategic Synthesis

USDA removed part of the crop-tour uncertainty but left a balance sheet with little room for another meaningful yield cut. Strong export commitments and a 3.9% nearby-corn rally reinforce that procurement risk remains the dominant plant-margin exposure. Gasoline and exports are supporting ethanol value, but product inventories, low-water logistics and record diesel costs prevent that support from translating cleanly into wider margins.

What I'm Watching Next

- **September 21, 2026:** USDA Crop Progress and additional harvest evidence. (esmis.nal.usda.gov)

- **September 23, 2026:** EIA petroleum and ethanol balance for the week ending September 18. (eia.gov)
- **September 24, 2026:** USDA export sales and EIA natural-gas storage reports. (fas.usda.gov)
- **September 30, 2026:** USDA Grain Stocks—the next survey capable of materially revising corn carry-in and residual use. (nass.usda.gov)

Bottom Line

The most consequential weekly change was USDA's confirmation of a **178.5-bushel corn yield and 1.567-billion-bushel carryout**, followed by a futures rally that kept additional supply risk priced. **Harvest and winter corn coverage requires the closest attention**, while early yield evidence and the September 30 Grain Stocks report are the next catalysts most capable of changing the view.

Company Overviews

Corteva (CTVA)

Crop inputs, equipment, and irrigation · $52.4B · 3m +4.7% · 12m +14.7% · 24m +42.0%

Google Finance

Largest U.S. corn-seed franchise (Pioneer) and a primary input cost for Corn Belt acres.

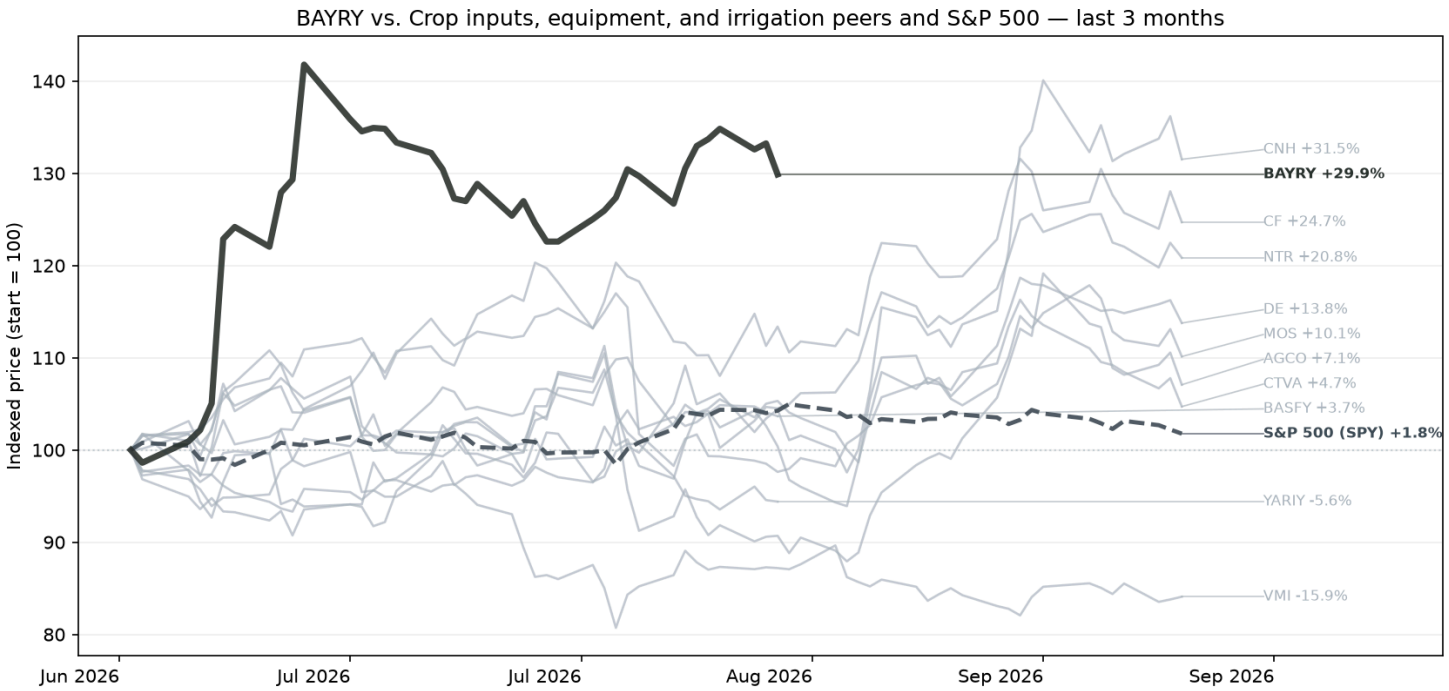

Corteva is an agricultural inputs pure play that was formed in 2019 when it was spun off from DowDuPont. The company is a leader in the development of new seed and crop protection products. Seeds generate the majority of profits with the remainder coming from crop protection products. Corteva plans to spin off its seeds business in late 2026. The seeds business will be named Vylor, while the crop protection business will retain the Corteva name and be a pure-play crop protection company following the divestiture. Corteva operates globally, but around half of revenue comes from North America.

Bayer (BAYRY)

Crop inputs, equipment, and irrigation · n/a · 3m +29.9% · 12m +72.4% · 24m +82.5%

Google Finance

Dekalb and former Monsanto corn-seed brands; together with Corteva dominates U.S. corn seed.

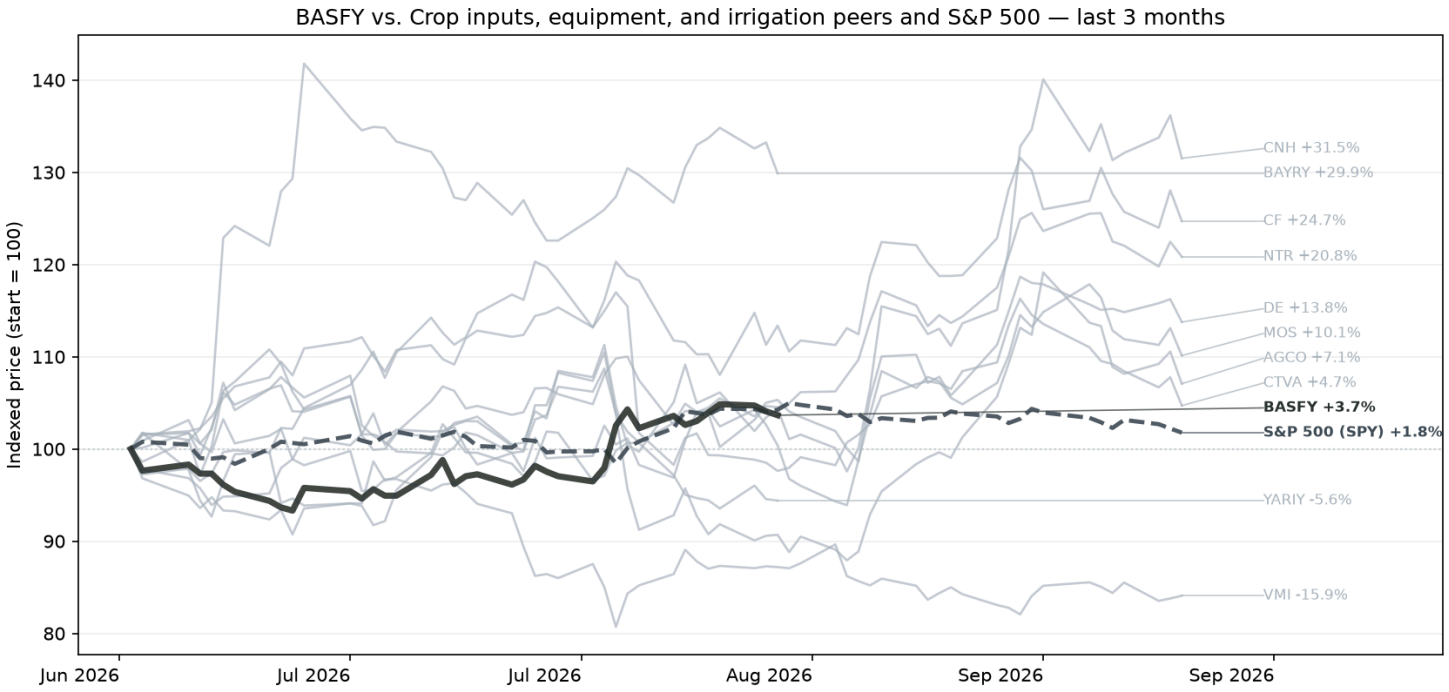

BAYER AG S/ADR

BASF (BASFY)

Crop inputs, equipment, and irrigation · n/a · 3m +3.7% · 12m +14.5% · 24m +19.2%

Google Finance

Crop-protection chemistry used on U.S. corn acres.

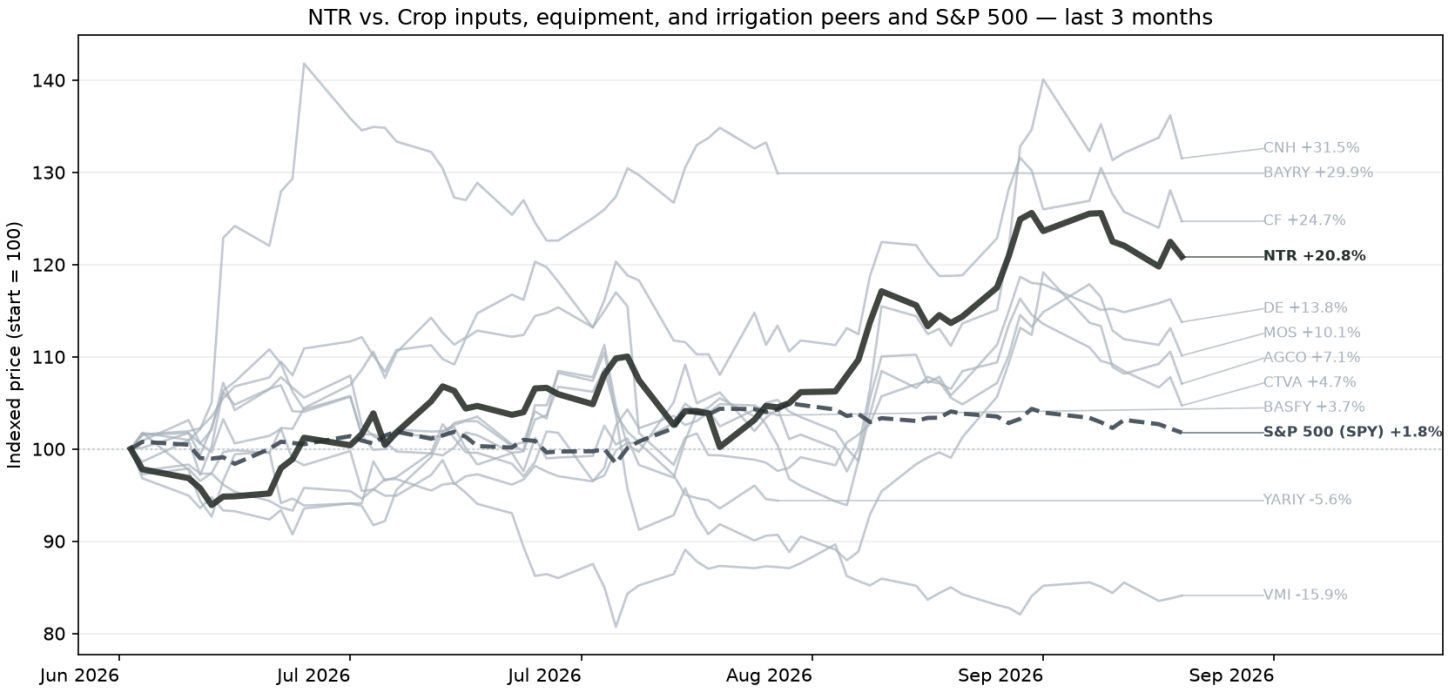

BASF SE S/ADR

Nutrien (NTR)

Crop inputs, equipment, and irrigation · $33.6B · 3m +20.8% · 12m +37.5% · 24m +65.6%

Google Finance

Largest North American agricultural retailer and a major potash and nitrogen producer.

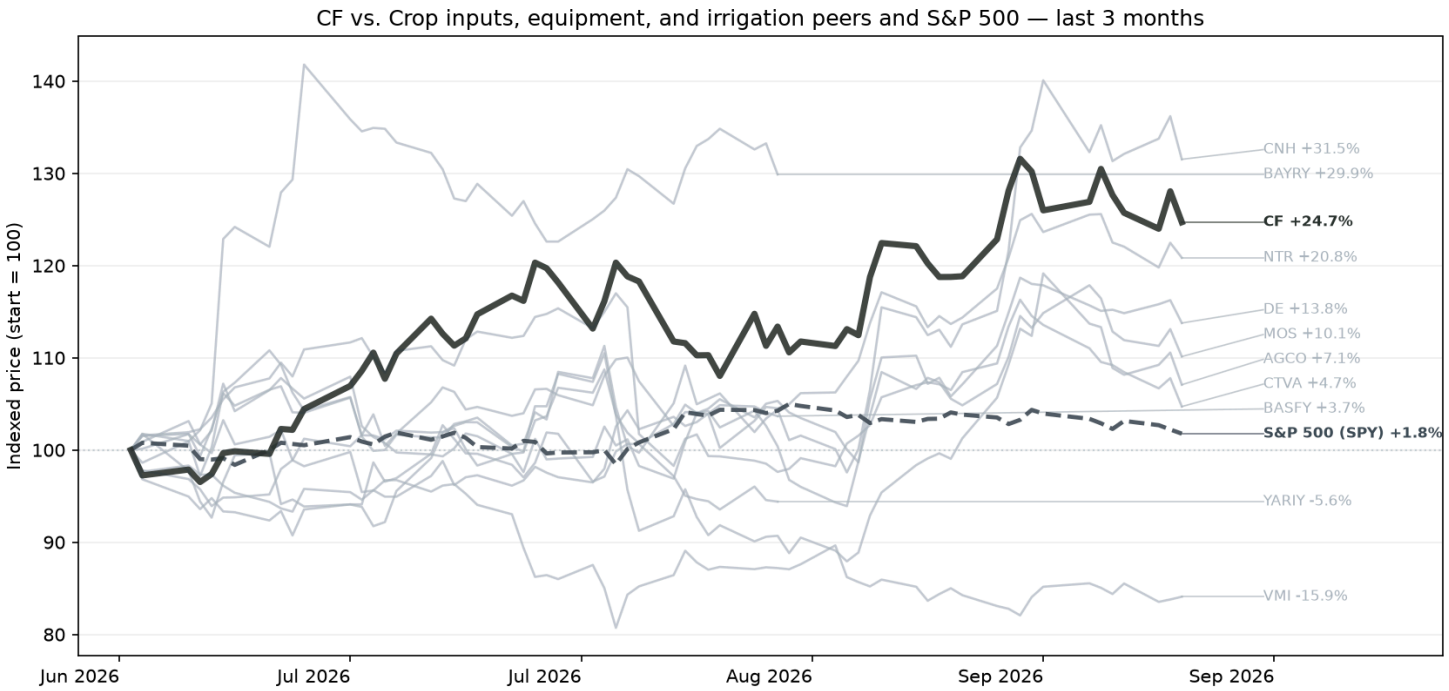

Created in 2018 as a result of the merger between PotashCorp and Agrium, Nutrien is the world's largest fertilizer producer by capacity. Nutrien produces the three main crop nutrients—nitrogen, potash, and phosphate—although its main focus is potash, where it is the global leader in installed capacity with a roughly 20% market share. The company is also the largest agricultural retailer in North America and Australia, selling fertilizers, crop chemicals, seeds, and services directly to farm customers through its brick-and-mortar stores and online platforms.

CF Industries (CF)

Crop inputs, equipment, and irrigation · $18.0B · 3m +24.7% · 12m +56.8% · 24m +62.0%

Google Finance

Nitrogen fertilizer producer; corn is the crop that most moves UAN and urea demand.

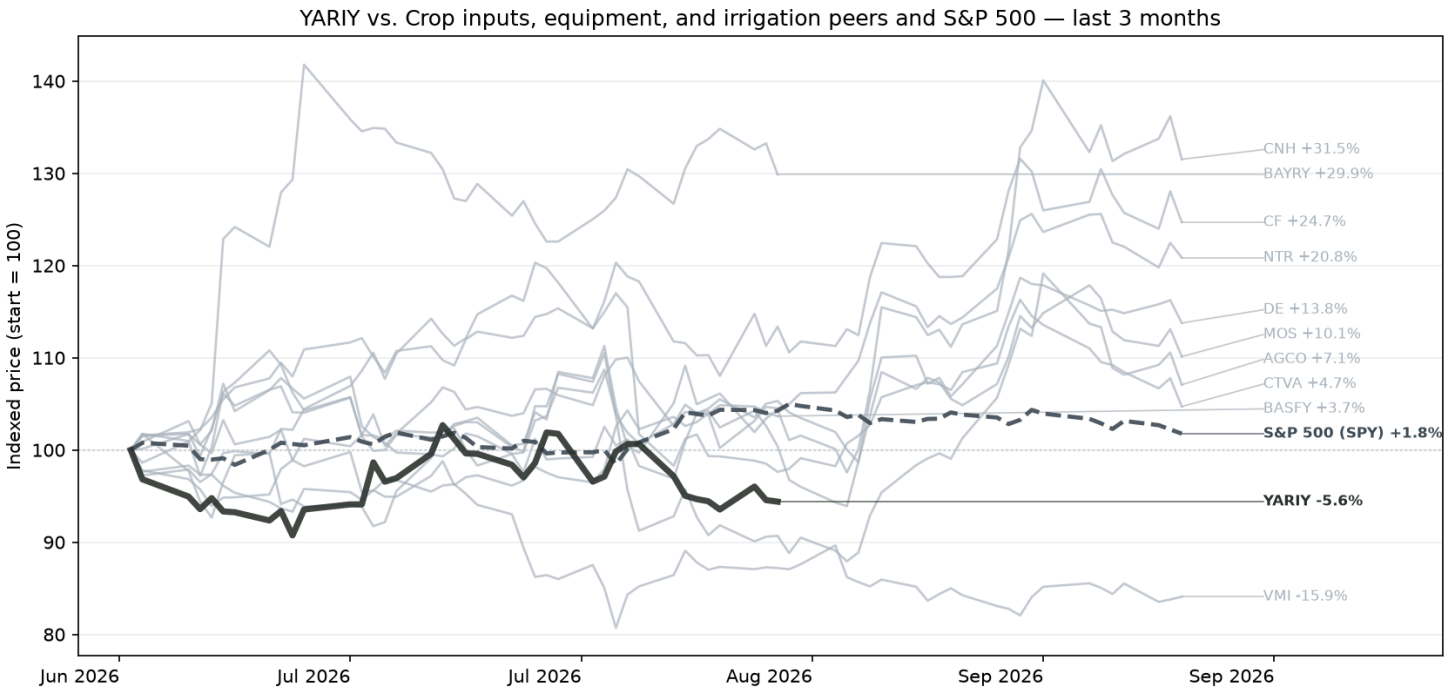

CF Industries is a leading producer and distributor of nitrogen, which is primarily used in fertilizers. The company operates nitrogen manufacturing plants primarily in North America. CF also produces nitrogen in the United Kingdom and holds a joint venture interest in a nitrogen production facility in Trinidad and Tobago. CF makes nitrogen primarily using low-cost US natural gas as its feedstock, making the company one of the lowest-cost nitrogen producers globally. It is also investing in carbon-free blue and green ammonia, which can be used as an alternative fuel to hydrogen or as a means to transport hydrogen.

Yara International (YARIY)

Crop inputs, equipment, and irrigation · n/a · 3m -5.6% · 12m +20.2% · 24m +50.4%

Google Finance

Global nitrogen producer that sets the international urea and ammonia reference.

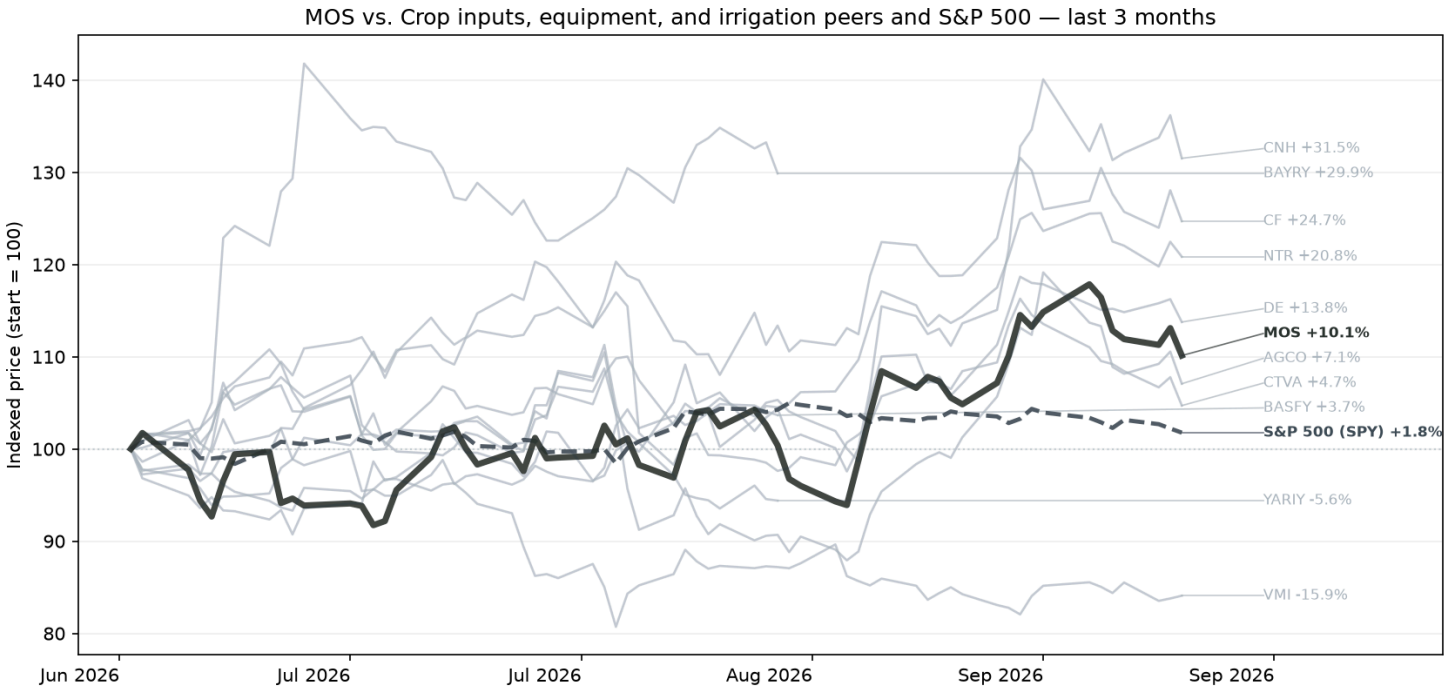

YARA INTL ASA S/ADR

Mosaic (MOS)

Crop inputs, equipment, and irrigation · $7.1B · 3m +10.1% · 12m -27.4% · 24m -3.4%

Google Finance

Phosphate and potash producer that completes corn production budgets.

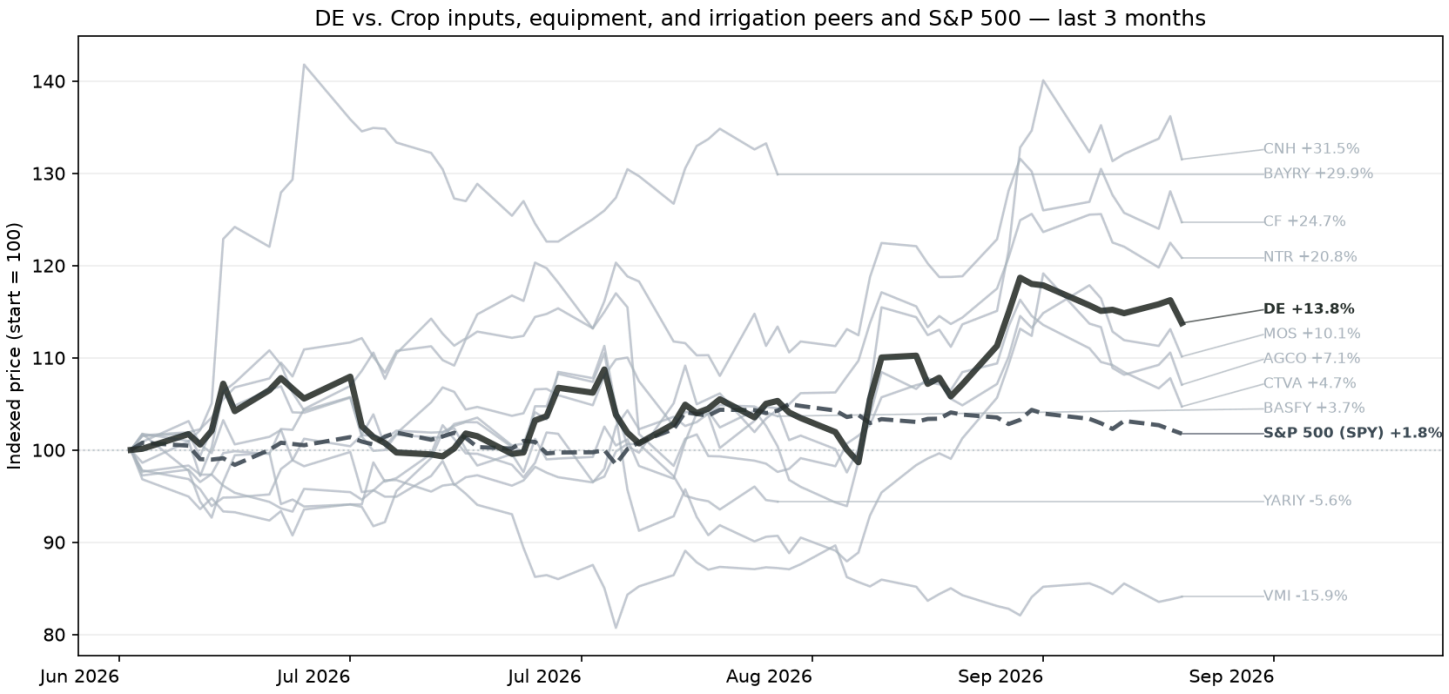

Mosaic is one of the largest phosphate and potash producers in the world. The company's assets include phosphate rock mines in the US and potash mines in Canada. Mosaic also runs a large fertilizer distribution operation in Brazil through its Mosaic Fertilizantes business.

Deere (DE)

Crop inputs, equipment, and irrigation · $156.7B · 3m +13.8% · 12m +42.7% · 24m +68.3%

Google Finance

Dominant North American farm-equipment maker for corn planting, harvest, and grain handling.

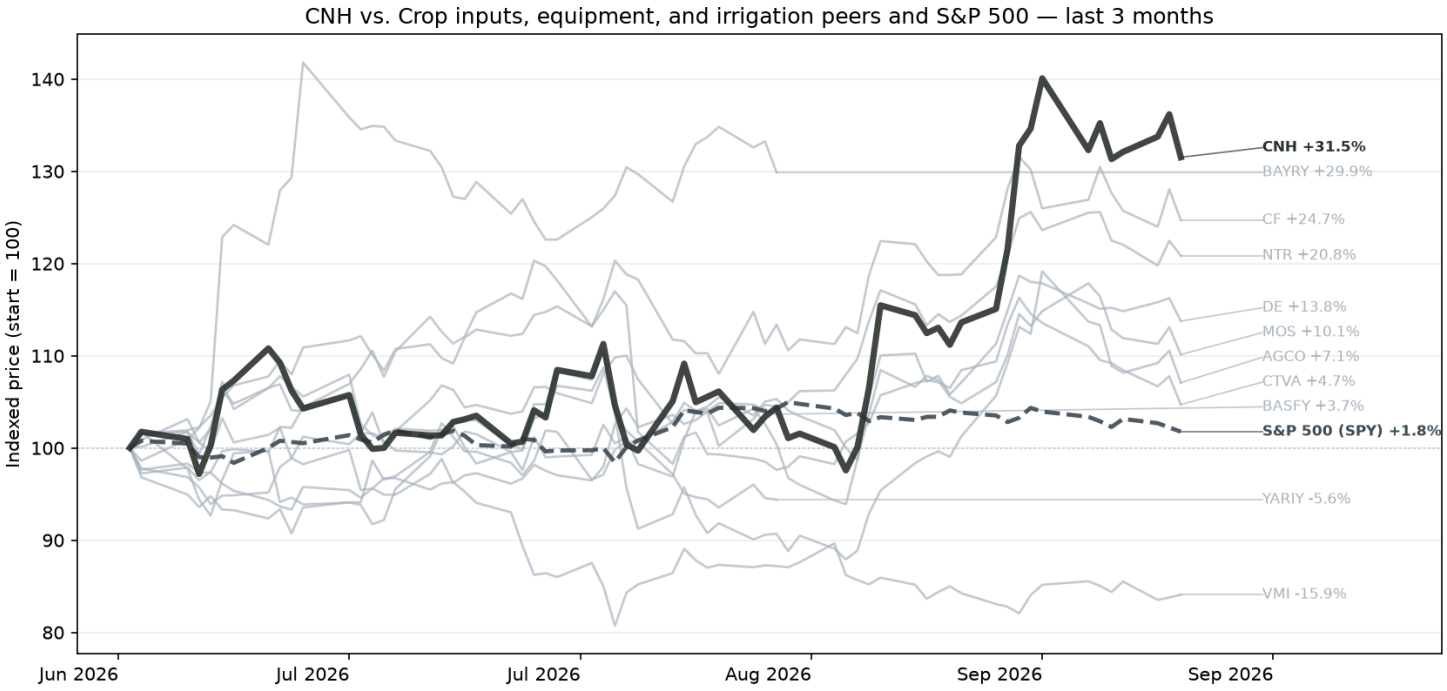

Deere is the world's leading manufacturer of agricultural equipment and a major producer of construction machinery. The company is divided into four reporting segments: production & precision agriculture, or PPA, small agriculture & turf, or SAT, construction & forestry, or CF, and financial services, or FS, its captive finance subsidiary. The core PPA business is the largest contributor to sales and profits by far. Geographically, Deere sales are 60% US/Canada, 17% Europe, 14% Latin America, and 9% rest of the world. Deere goes to market through a robust dealer network that includes over 2,000 dealer locations in North America with reach into over 100 countries. John Deere Financial provides retail financing for machinery to its customers and wholesale financing for dealers.

CNH Industrial (CNH)

Crop inputs, equipment, and irrigation · $16.5B · 3m +31.5% · 12m +24.6% · 24m +28.8%

Google Finance

Case IH and New Holland farm equipment serving corn growers.

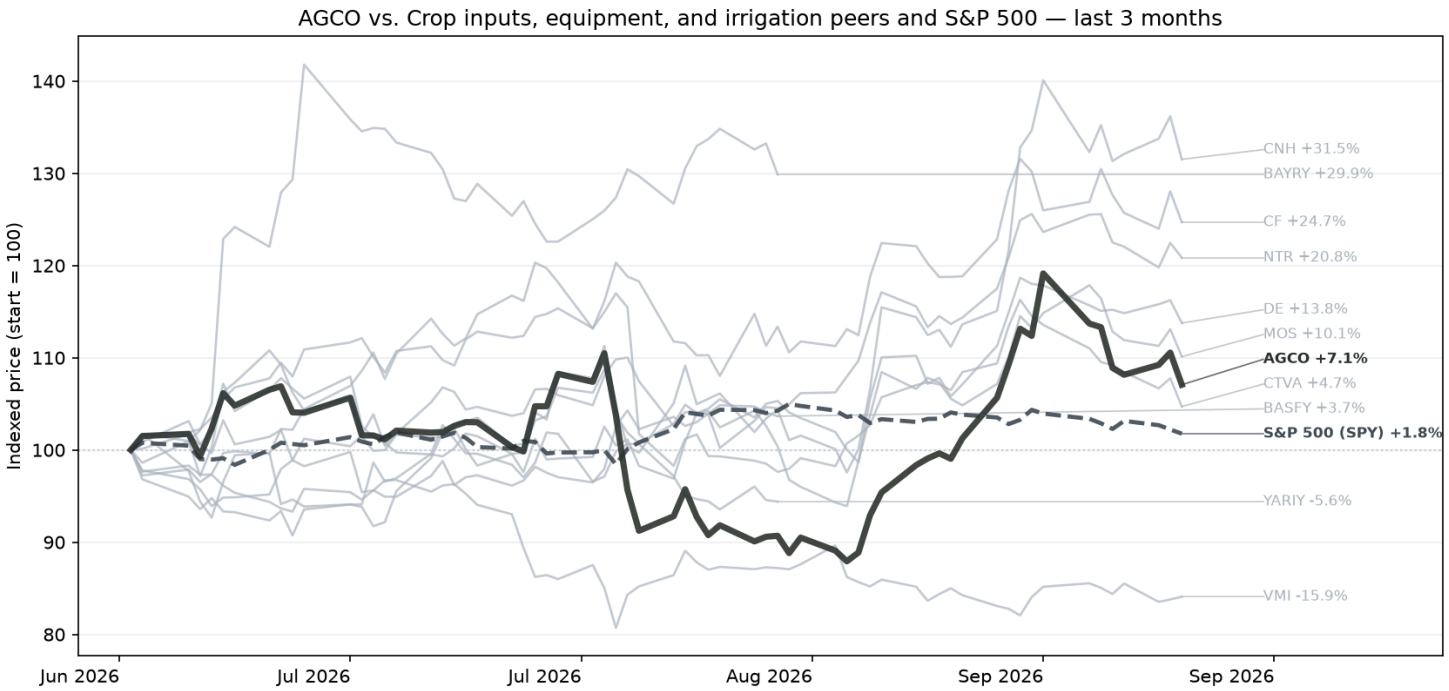

CNH Industrial is the world's second largest manufacturer of agricultural machinery (82% of industrial net sales) as well as a major player in construction equipment (18% of industrial net sales). Its Case and New Holland brands have served farmers for generations. Geographically, agricultural sales are 40% in North America, 32% in Europe, the Middle East, and Africa, 18% in South America, and 10% in Asia-Pacific. CNH's products are available through a robust independent dealer network, which includes over 2,600 dealer and distribution locations and reach into 164 countries. The construction business leverages over 400 dealers. The company's captive finance arm provides retail financing to its customers and wholesale financing to dealers to maintain inventory, thereby supporting sales.

AGCO (AGCO)

Crop inputs, equipment, and irrigation · $7.0B · 3m +7.1% · 12m +9.7% · 24m +29.3%

Google Finance

Fendt, Massey Ferguson, and Challenger farm equipment with Corn Belt exposure.

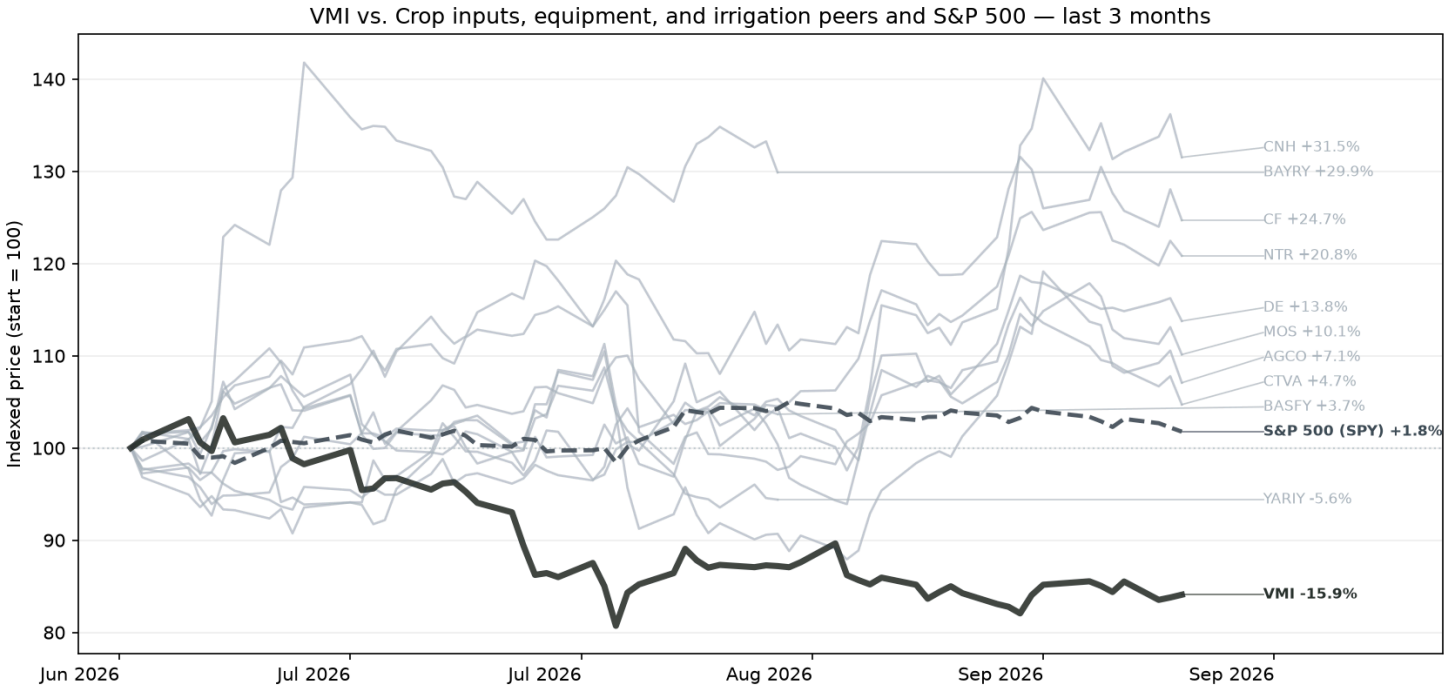

Agco is a global manufacturer of agricultural equipment. Its main machine brands are Fendt, Massey Ferguson, and Valtra; its initiatives in precision agriculture have been organized under the PTx umbrella following a series of acquisitions. While a global business, Agco's sales skew heavily toward Europe/Middle East, representing 50%-60% of sales and even more of operating profits. The company is trying to increase its exposure to the larger North and South American markets. Its products are available through a global dealer network, which includes over 3,000 dealers and distribution locations and reaches into over 140 countries. Additionally, Agco offers retail and wholesale financing to customers through its partnership with Rabobank of the Netherlands, having exited their JV in 2026.

Valmont Industries (VMI)

Crop inputs, equipment, and irrigation · $9.3B · 3m -15.9% · 12m +27.6% · 24m +70.3%

Google Finance

Center-pivot irrigation (Valley) used on irrigated High Plains corn.

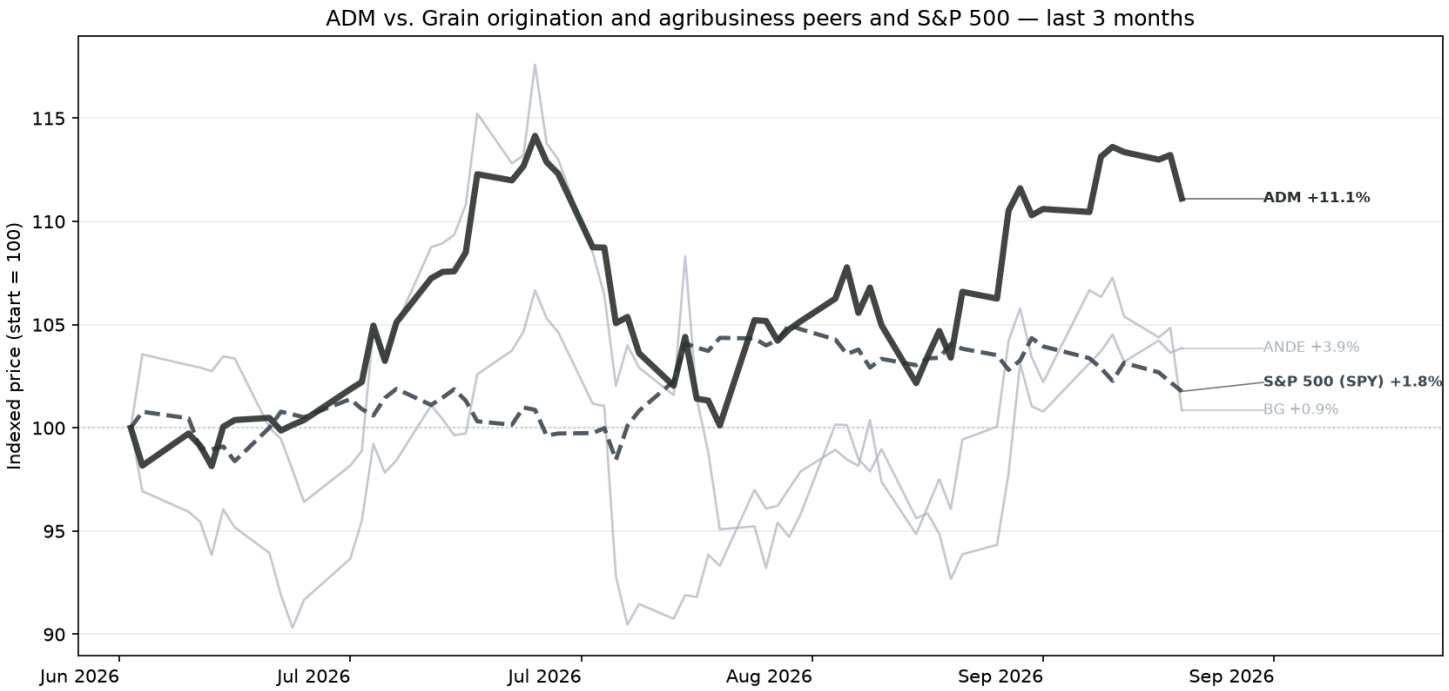

Valmont Industries Inc, along with its subsidiaries, operates as a manufacturer of products and services for infrastructure and agriculture markets. Its reportable segments are Infrastructure and Agriculture. The company generates maximum revenue from the Infrastructure segment, which includes the manufacturing and distribution of products and solutions to serve the infrastructure markets of utility, solar, lighting, transportation, and telecommunications, along with coatings services to protect metal products. The Agriculture segment provides irrigation equipment components, including aftermarket parts and tubular products, and technology solutions for precision agriculture. Geographically, it derives key revenue from the United States, followed by Australia, Brazil, and other regions.

Archer Daniels Midland (ADM)

Grain origination and agribusiness, U.S. ethanol and process technology, Wet milling, ingredients, and co-products · $38.9B · 3m +11.1% · 12m +39.1% · 24m +40.6%

Google Finance

Global grain trader, top U.S. ethanol producer, and major corn wet miller.

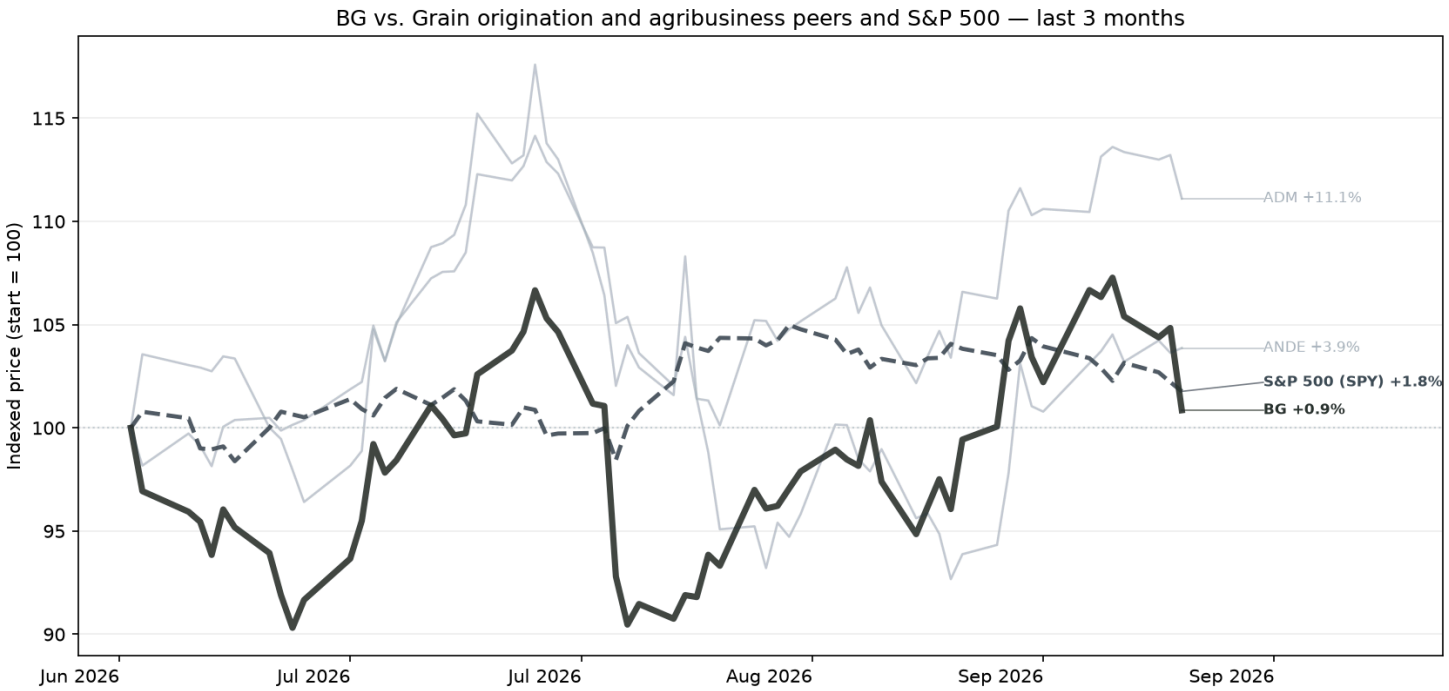

Archer-Daniels-Midland is a major processor of oilseeds, corn, wheat, and other agricultural commodities. The company is also one of the largest grain merchandisers through its extensive network of logistical assets to store and transport crops around the globe. ADM also runs a nutrition business that focuses on both human and animal ingredients and is a large producer of corn-based sweeteners, starches, and ethanol.

Bunge (BG)

Grain origination and agribusiness · $21.9B · 3m +0.9% · 12m +45.7% · 24m +19.9%

Google Finance

Global grain and oilseed merchant after the Viterra combination; competitor for corn origination.

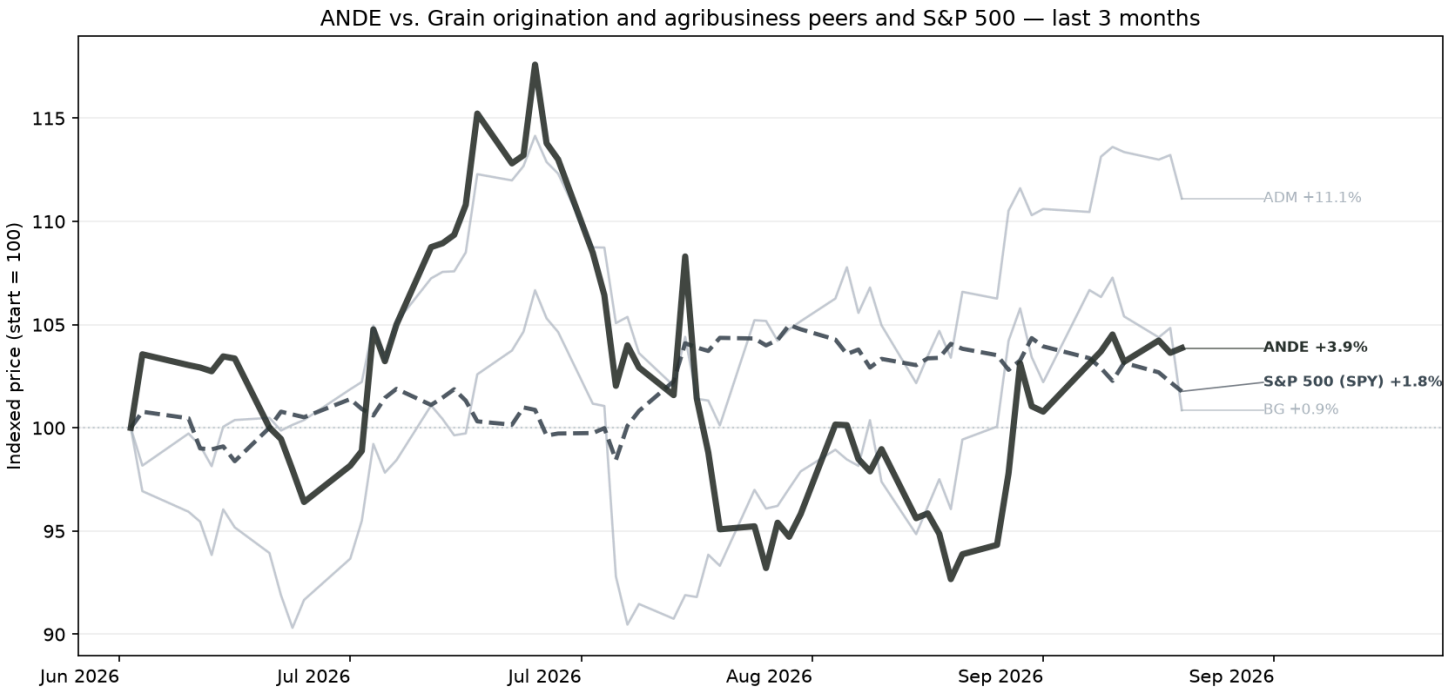

Bunge Global SA is an agribusiness solutions company, connecting farmers to consumers and delivering essential food, feed and fuel to the globe. The company segments include Soybean Processing and Refining; Softseed Processing and Refining; Other Oilseeds Processing and Refining; Grain Merchandising and Milling; and Corporate and Other. It generates maximum revenue from the Soybean Processing and Refining segment, which includes integrated business principally involved in the purchase, storage, transportation, processing, distribution, refining, marketing, and sale of soybeans and soybean related products, as well as biodiesel and fertilizer production and distribution. Geographically, the company operates in United States, Switzerland, Netherlands, and Rest of the World.

The Andersons (ANDE)

Grain origination and agribusiness, U.S. ethanol and process technology · $2.3B · 3m +3.9% · 12m +81.0% · 24m +45.4%

Google Finance

Grain elevators plus four wholly owned ethanol plants totaling about 500 million gallons a year.

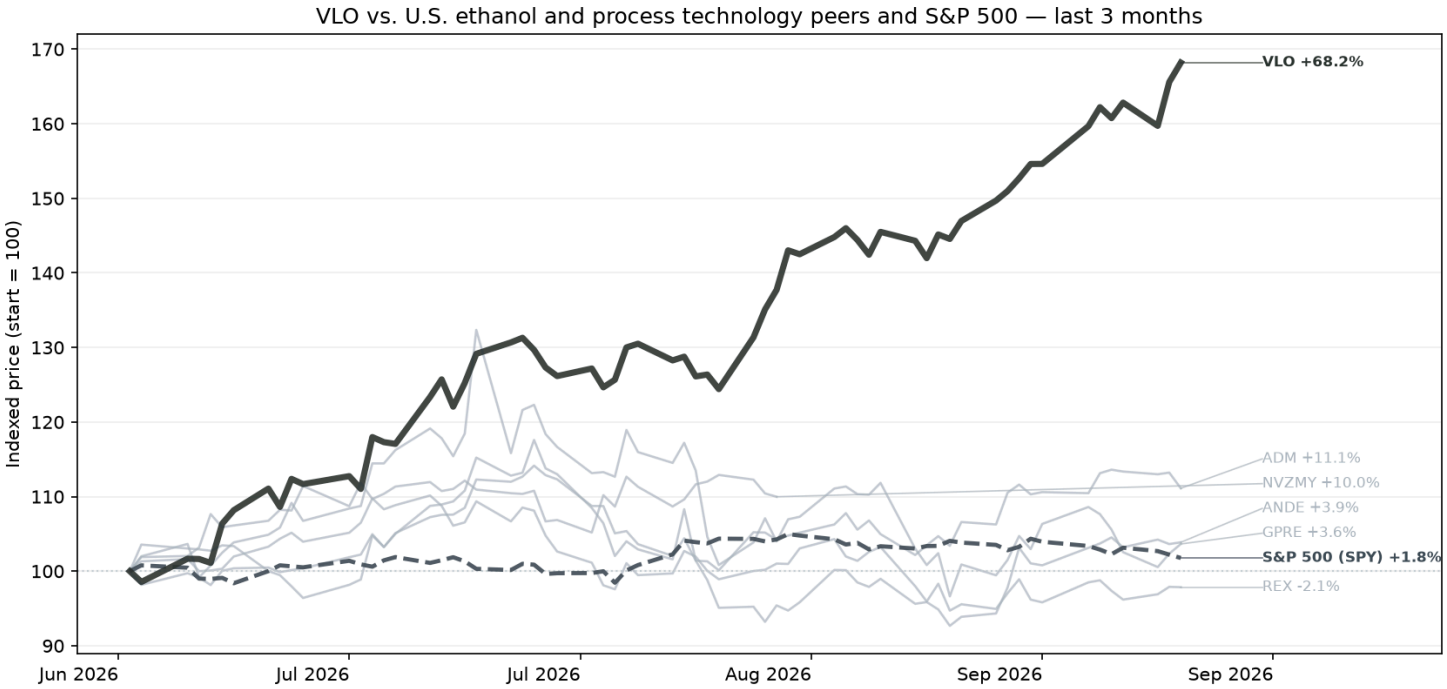

Andersons Inc is an agriculture and renewable fuels company. Its operations are classified into two reportable business segments: Agribusiness, which generates maximum revenue, and Renewables. The Agribusiness segment includes merchandising and managing logistics across various commodities, as well as being a manufacturer, distributor, and retailer of agricultural and related plant nutrients. The segment specializes in the movement of physical commodities such as whole grains, grain products, feed ingredients, and domestic fuel products, among other agricultural commodities. The Renewables segment mainly produces, purchases, and sells ethanol and co-products. Geographically, the company generates maximum revenue from the United States, followed by Canada, Mexico, and other markets.

Valero Energy (VLO)

U.S. ethanol and process technology, Fuel blending, refining, and retail · $99.7B · 3m +68.2% · 12m +146.4% · 24m +197.0%

Google Finance

World's second-largest corn-ethanol producer with a distinct Ethanol segment and a major blender.

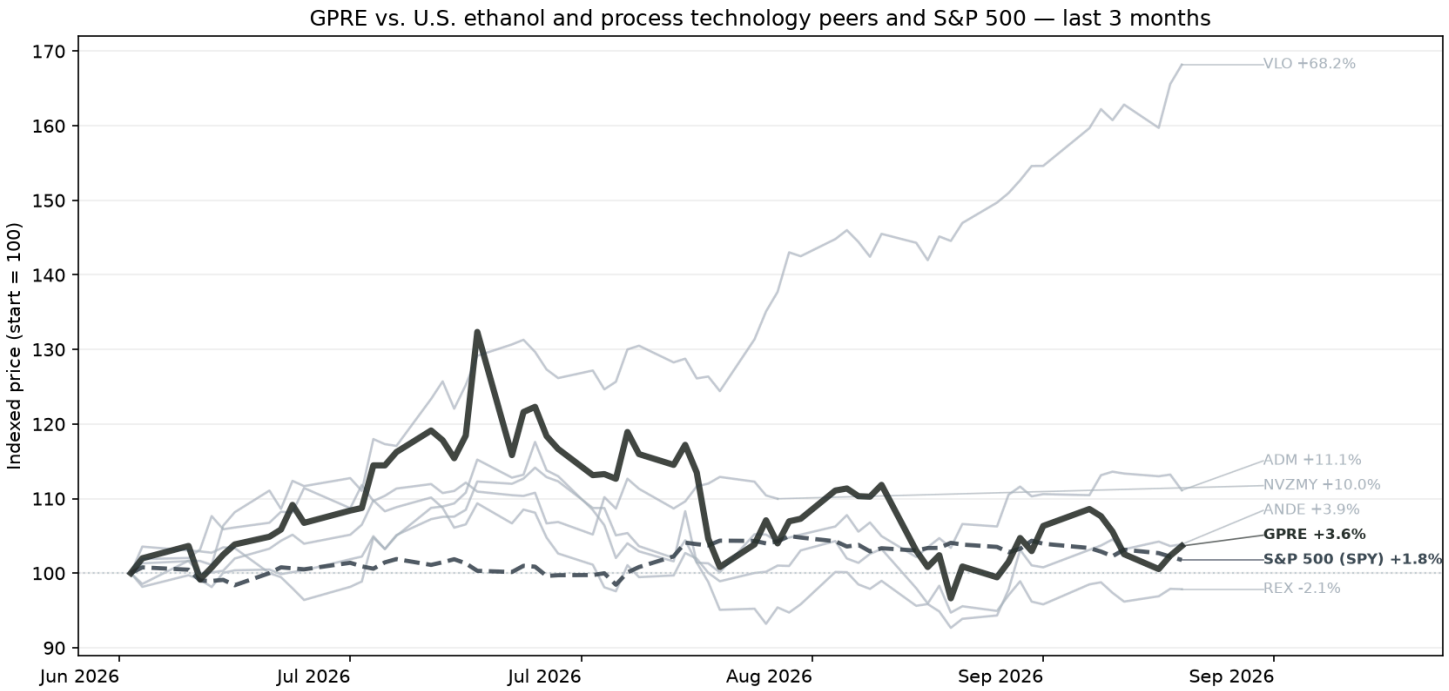

Valero Energy is one of the largest independent refiners in the United States. It operates 15 refineries, with a total throughput capacity of 3.2 million barrels a day in the US, Canada, and the United Kingdom. Valero also owns 12 ethanol plants with capacity of 1.6 billion gallons a year and holds a 50% stake in Diamond Green Diesel, which can produce 1.2 billion gallons per year of renewable diesel.

Green Plains (GPRE)

U.S. ethanol and process technology · $1.1B · 3m +3.6% · 12m +56.7% · 24m +12.6%

Google Finance

Largest U.S. ethanol pure play, with high-protein feed, corn oil, and Nebraska carbon-capture work.

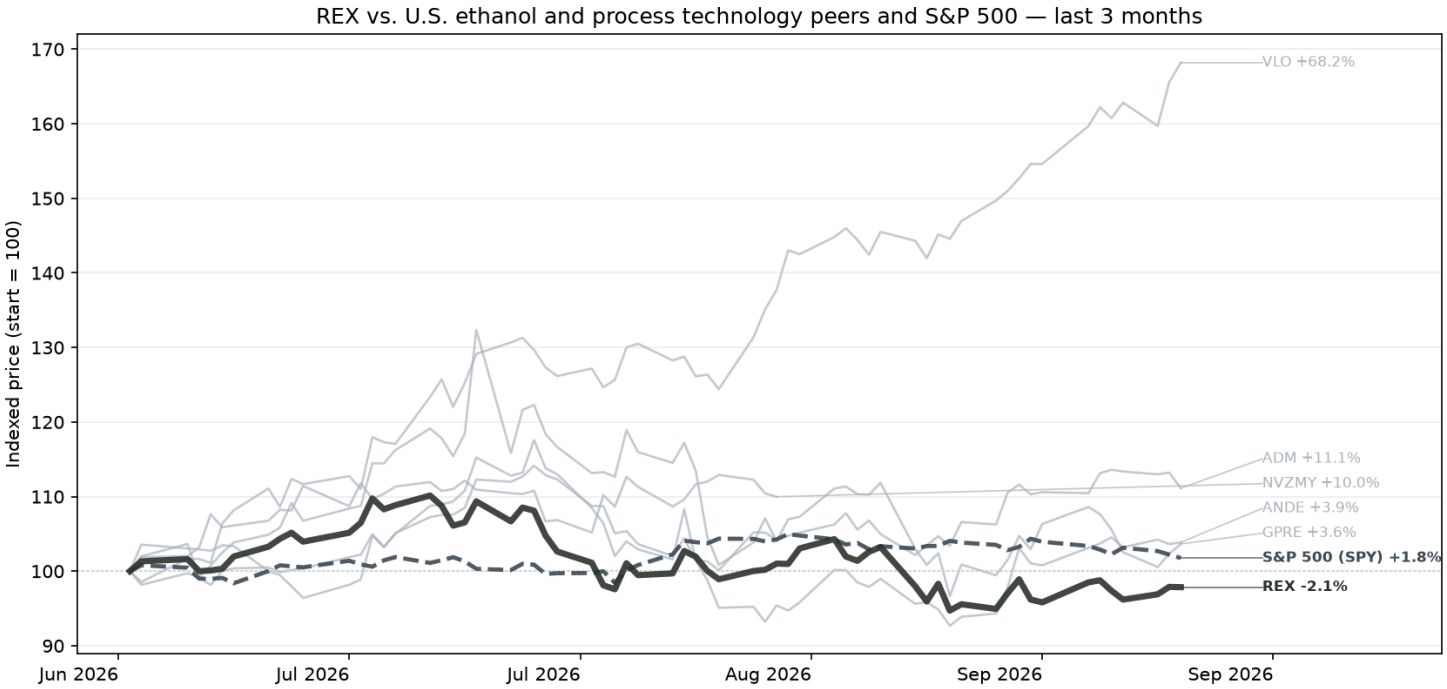

Green Plains Inc manufactures and sells ethanol and ethanol byproducts in two segments based on function. The ethanol production segment, which generates the majority of revenue, includes the production of ethanol, distillers grains, Ultra-High Protein and renewable corn oil. The agribusiness and energy services segment includes grain handling and storage, commodity marketing and merchant trading for company-produced and third-party ethanol, distillers grains, Ultra-High Protein, renewable corn oil, natural gas and other commodities.

REX American Resources (REX)

U.S. ethanol and process technology · $1.4B · 3m -2.1% · 12m +40.8% · 24m +86.4%

Google Finance

Holding company with interests in six Corn Belt ethanol plants; cleanest public crush-margin equity.

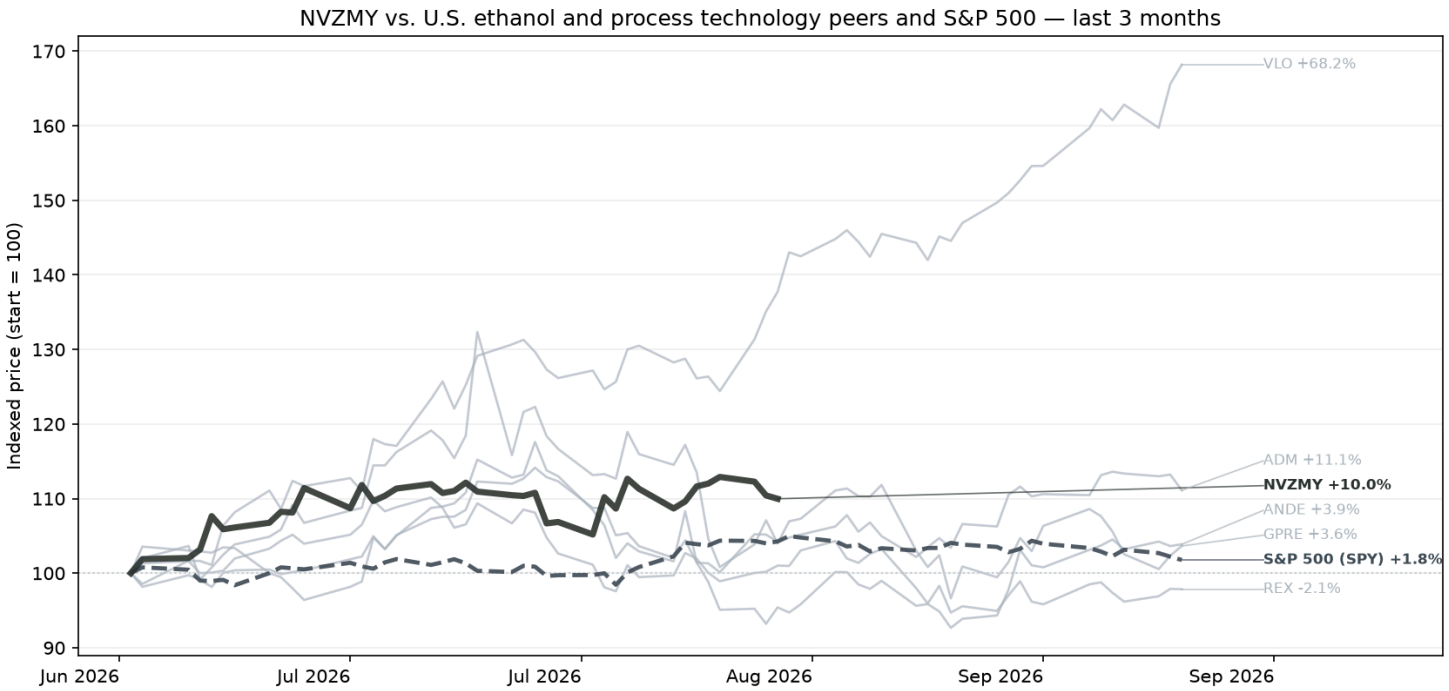

REX American Resources Corp operates as a holding company that engages in investments in alternative energy and ethanol production entities. Its operating segments include Ethanol and By-Products. Its products include Ethanol, dried distillers grains, modified distillers grains, Distillers corn oil, Modified distillers grains, and Other.

Novonesis (NVZMY)

Ingredion (INGR)

Wet milling, ingredients, and co-products · $6.8B · 3m -0.4% · 12m -20.5% · 24m -26.6%

Google Finance

Major corn wet miller producing sweeteners, starches, and specialty ingredients.

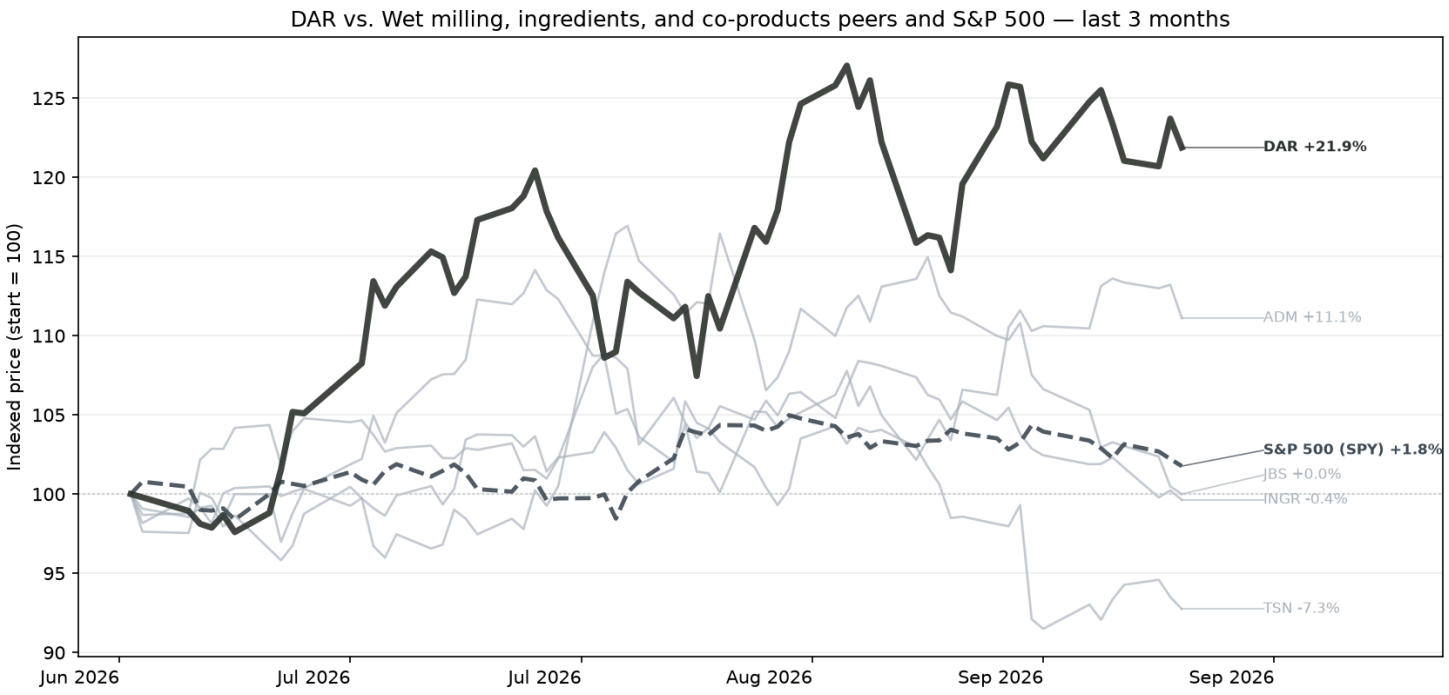

Ingredion is an ingredients provider for the food, beverage, brewing, and animal nutrition industries. The company processes corn, tapioca, potatoes, stevia, grains, fruits, gums, and vegetables into value-added ingredients. The company sells specialty ingredients that include starch-based texturizers and natural alternative sweeteners such as stevia. Ingredion also sells commodity ingredients that include sweeteners, such as high-fructose corn syrup, and starches, such as those used for sustainable packaging, as well as plant-based proteins. The company plans to acquire Tate & Lyle in an all-cash deal that should close in 2027.

Darling Ingredients (DAR)

Wet milling, ingredients, and co-products · $10.6B · 3m +21.9% · 12m +97.9% · 24m +84.9%

Google Finance

Rendering and used cooking oil; 50/50 owner of Diamond Green Diesel with Valero.

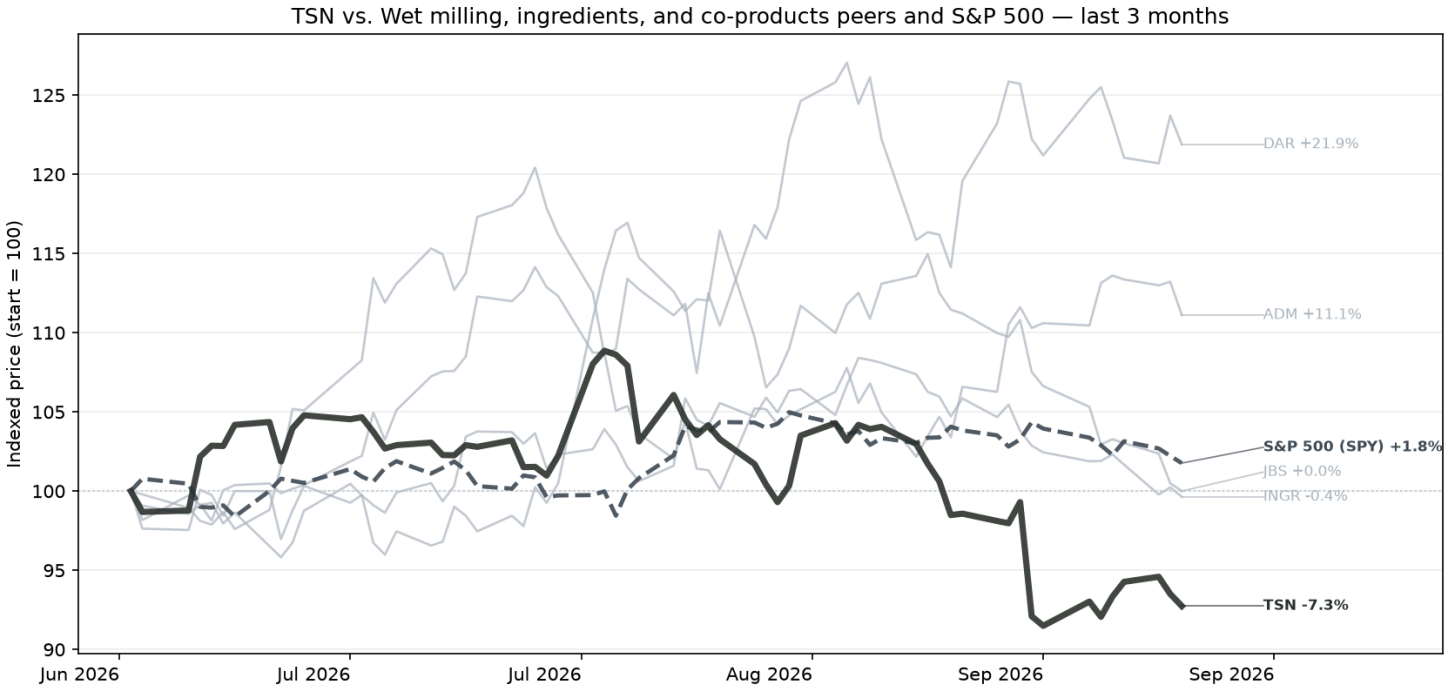

Darling Ingredients Inc is a developer and producer of sustainable natural ingredients from edible and inedible bio-nutrients, creating a wide range of ingredients and customized specialty solutions for customers in the pharmaceutical, food, pet food, animal feed, industrial, fuel, bioenergy and fertilizer industries. It processes by-products from the animal agriculture and food industries into ingredients and products for human nutrition, animal feed, crop inputs, and renewable energy applications. The company operates processing facilities across multiple countries and produces collagen, including gelatin and hydrolyzed collagen, as well as renewable energy products.

Tyson Foods (TSN)

Wet milling, ingredients, and co-products · $20.6B · 3m -7.3% · 12m -3.7% · 24m -15.7%

Google Finance

Largest U.S. protein company and a primary domestic sink for distillers grains.

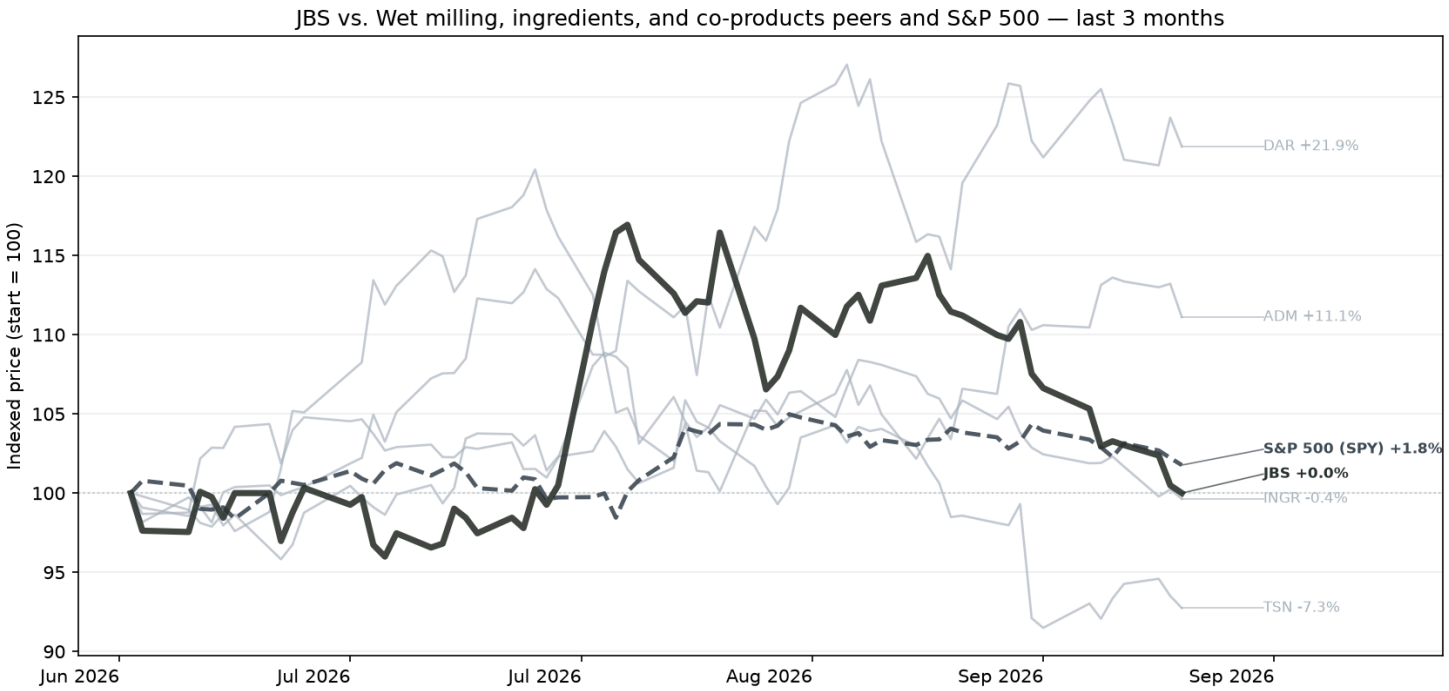

Tyson Foods is a protein-focused food producer, selling raw chicken, beef, pork, and prepared foods. Chicken and beef are its two largest segments, composing about 40% and 30% of sales, respectively. Prepared foods constituted 18% of fiscal 2025 sales and include brands like Tyson, Jimmy Dean, Hillshire Farm, Ball Park, and Sara Lee. However, most of these are in product categories rife with competition where Tyson does not have a massive market share lead. Tyson sells some products overseas, but the international segment accounts for just 4% of total revenue. The company is an active acquirer, with more recent years' purchases focused on international and food-service markets.

JBS (JBS)

Wet milling, ingredients, and co-products · $45.2B · 3m +0.0% · 12m -21.7% · 24m n/a

Google Finance

World's largest protein company and a major DDGS buyer in the U.S. and Brazil.

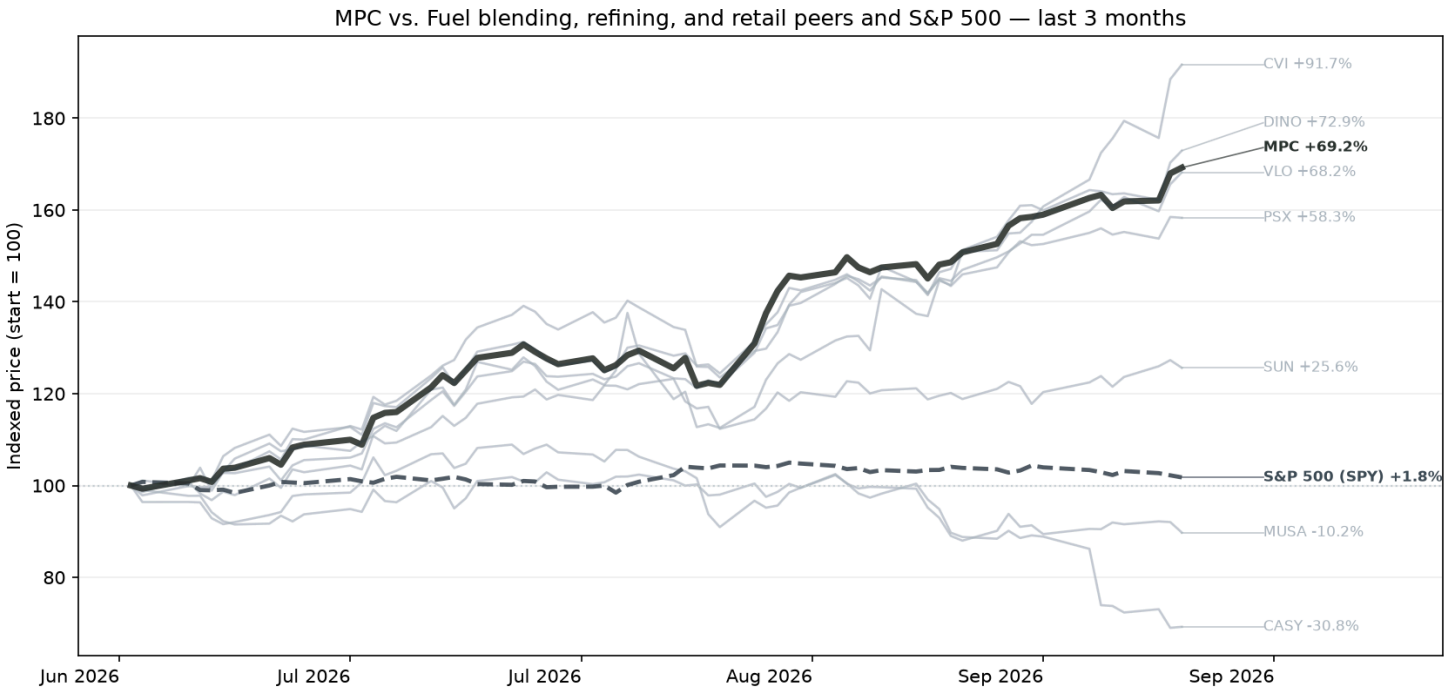

JBS NV is a protein food company, selling protein products, which include fresh and frozen cuts of beef, pork, lamb, fish, whole chickens, and chicken parts, to retailers, and foodservice companies. The food products are marketed under different brands such as Swift, Just Bare, Pilgrim's Pride, Sunnyvalley, Reserva Friboi, Great Southern, etc., globally. The company's reportable segments are Beef North America, which generates maximum revenue, Brazil, Seara, Pork USA, Pilgrim's Pride, Australia, and Others. Geographically, it derives majority of its revenue from United States of America.

Marathon Petroleum (MPC)

Fuel blending, refining, and retail · $101.3B · 3m +69.2% · 12m +124.1% · 24m +152.6%

Google Finance

Largest U.S. independent refiner and a major Midwest ethanol blender.

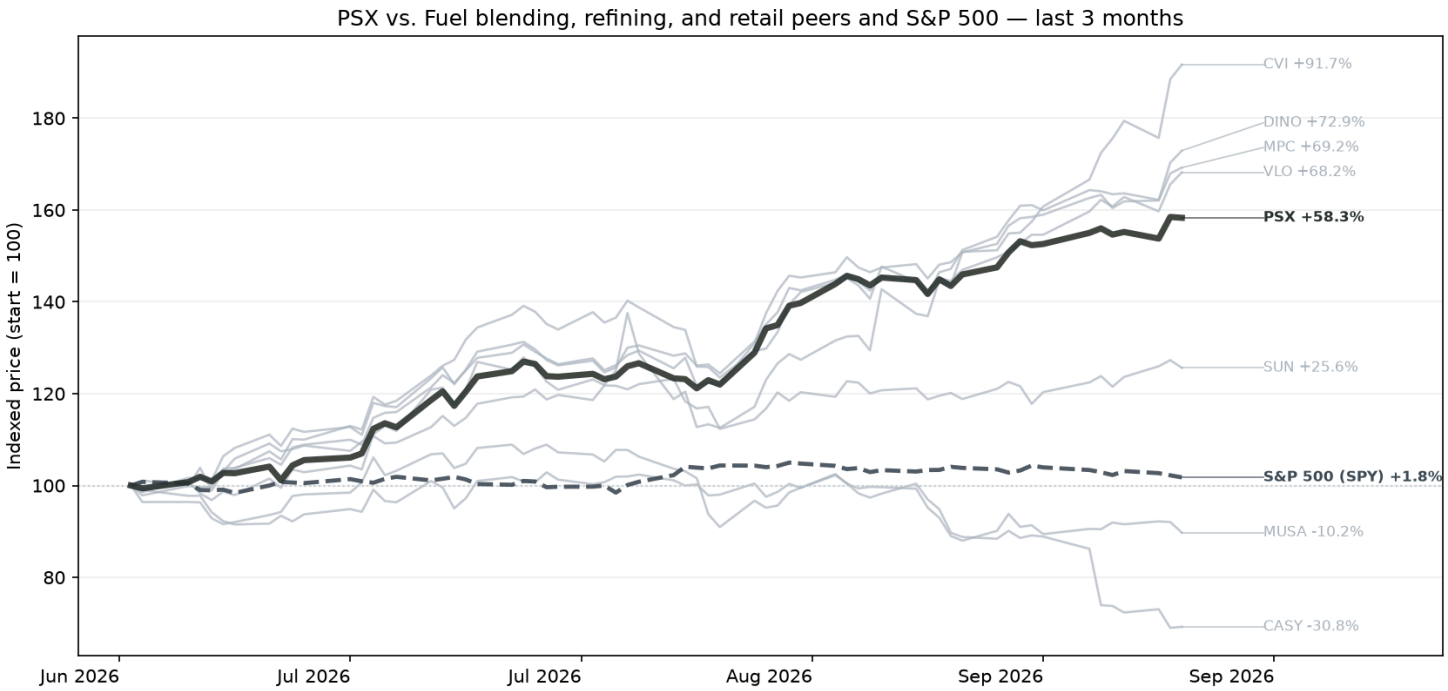

Marathon Petroleum is a leading integrated downstream and midstream energy company that operates 13 refineries in the Gulf Coast, Mid-Continent, and West Coast regions of the United States with an aggregate crude oil refining capacity of 3.0 million barrels per day. The company is one of the largest producers of renewable diesel in the US; its Dickinson, North Dakota facility has the capacity to produce 184 million gallons per year, and its Martinez, California, joint venture facility (a 50/50 partnership with Neste) reached its full capacity of 730 million gallons per year in late 2024. Marathon also owns the general partner and approximately 64% of MPLX LP, a large-cap master limited partnership that owns and operates midstream energy infrastructure and logistics assets.

Phillips 66 (PSX)

Fuel blending, refining, and retail · $96.7B · 3m +58.3% · 12m +98.8% · 24m +106.3%

Google Finance

Large blender and marketer with West Coast renewable-diesel capacity.

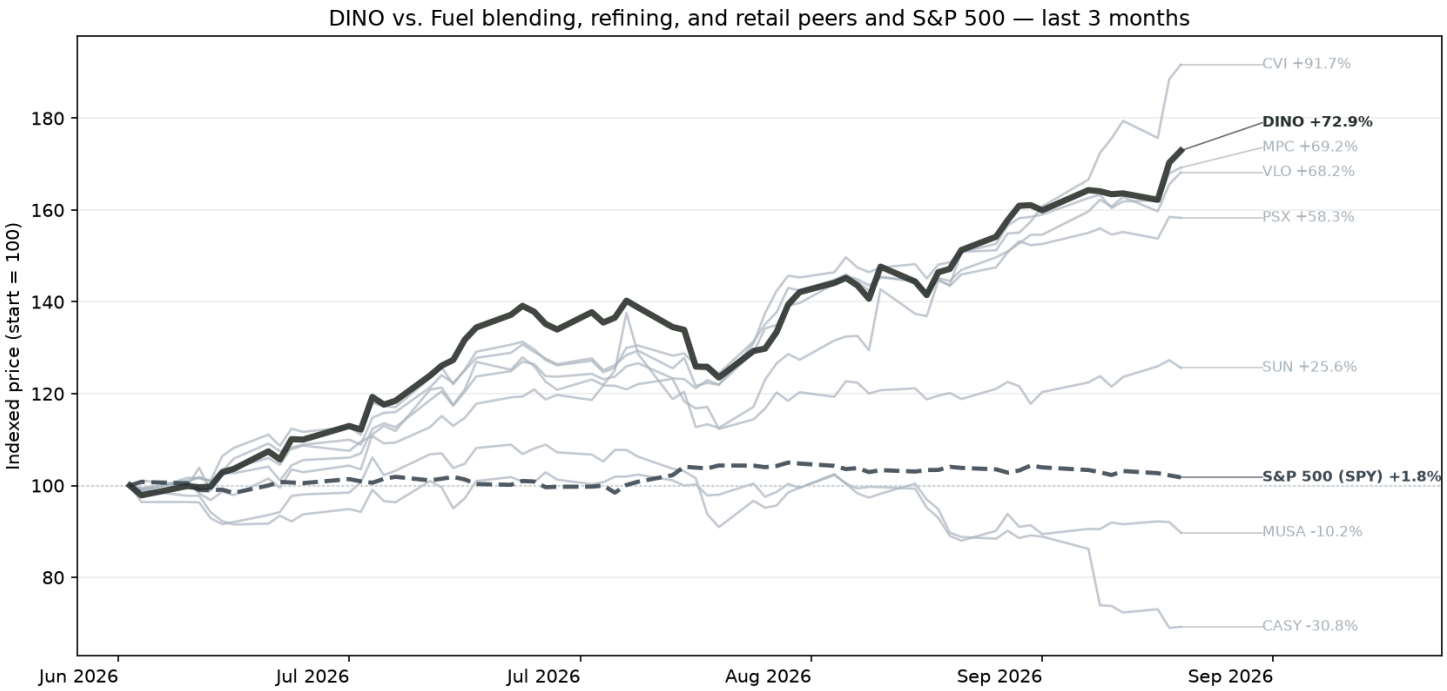

Phillips 66 is an independent refiner that owns or holds interest in 10 refineries with a total crude throughput capacity of 2.0 million barrels per day, or mmb/d, at the end of 2025. The midstream segment comprises extensive transportation and NGL processing assets. It includes 70,000 miles of crude oil, refined petroleum product, NGL and natural gas pipeline systems, and a comprehensive set of refined petroleum product, NGL and crude oil terminals, gathering and processing plants and fractionation facilities and various other storage and loading facilities. Its CPChem chemical joint venture operates facilities primarily in the United States and the Middle East and produces olefins and polyolefins.

HF Sinclair (DINO)

Fuel blending, refining, and retail · $16.8B · 3m +72.9% · 12m +116.5% · 24m +144.9%

Google Finance

Independent Mid-Continent and Rockies refiner with renewable diesel and RFS blending obligations.

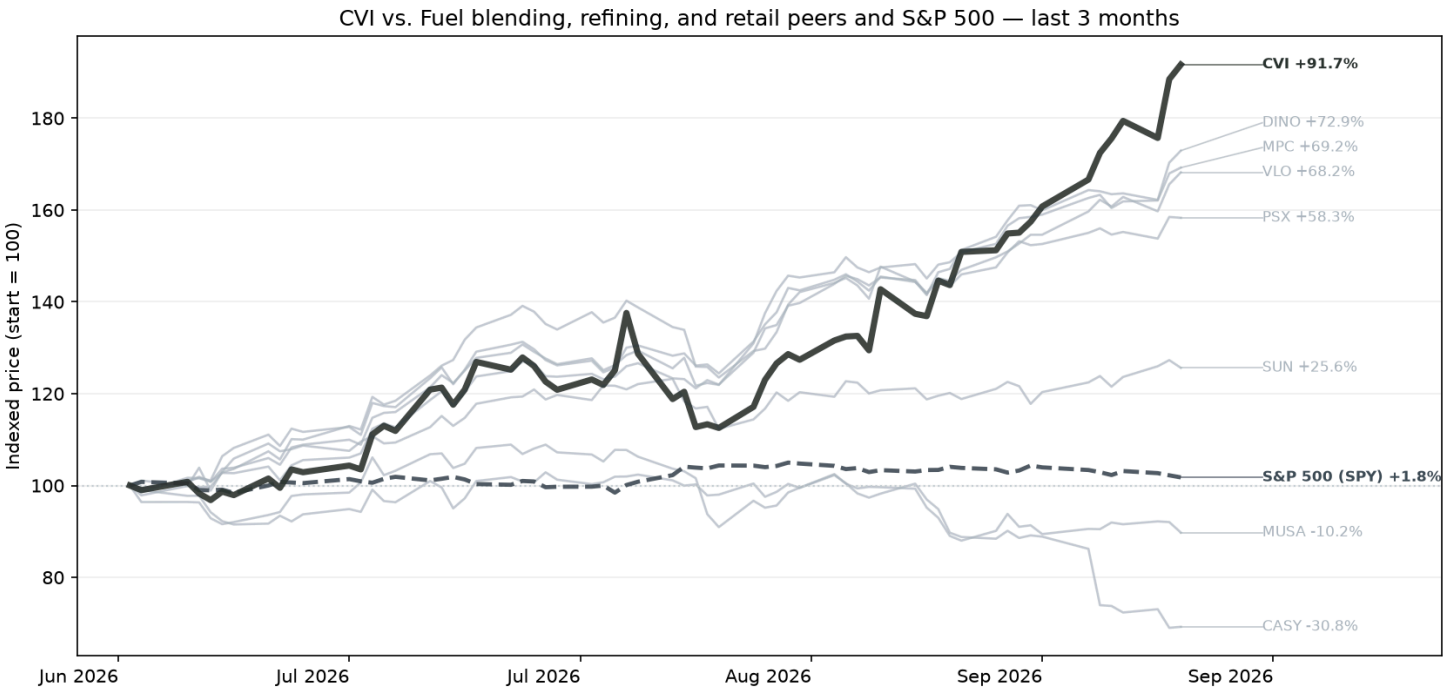

HF Sinclair is an integrated petroleum refiner that owns and operates seven refineries serving the Rockies, midcontinent, Southwest, and Pacific Northwest, with a total crude oil throughput capacity of 678,000 barrels per day. It can produce 380 million gallons of renewable diesel annually. It operates a marketing business with over 350 distributors and 1,700 branded wholesale sites across 30 states. It also owns and operates 4,500 miles of petroleum product pipelines and terminals principally in the Southwestern United States.

CVR Energy (CVI)

Fuel blending, refining, and retail · $3.7B · 3m +91.7% · 12m +60.3% · 24m +123.1%

Google Finance

Coffeyville, Kansas refiner in the corn complex with renewable diesel and a nitrogen affiliate.

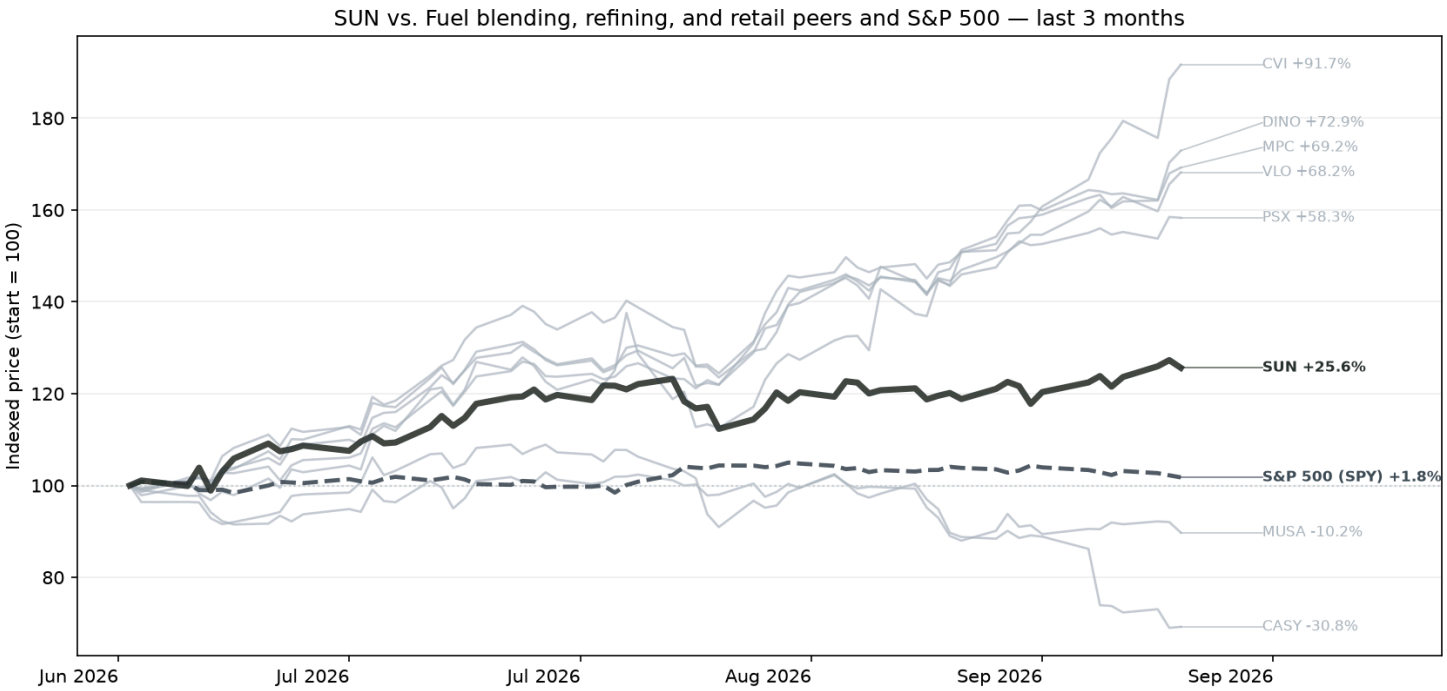

CVR Energy Inc is a holding company that engages in petroleum refining and nitrogen fertilizer manufacturing through its subsidiaries. Subsidiaries include several complex, full-coking crude oil refineries, along with a crude oil gathering system, pipelines, storage tanks, and marketing and supply. The company's refineries can process blends of a variety of crude oil ranging from heavy sour to light sweet crude oil. Crude oil for CVR's refineries is supplied through its wholly-owned gathering system and pipeline. From its refineries, CVR supplies products through tanker trucks directly to customers located in close geographic proximity and customers at throughput terminals. The company's customers include retailers, railroads, and farm cooperatives.

Sunoco LP (SUN)

Fuel blending, refining, and retail · $14.5B · 3m +25.6% · 12m +58.1% · 24m +45.5%

Google Finance

Fuel distributor and terminal operator that moves finished gasoline and ethanol.

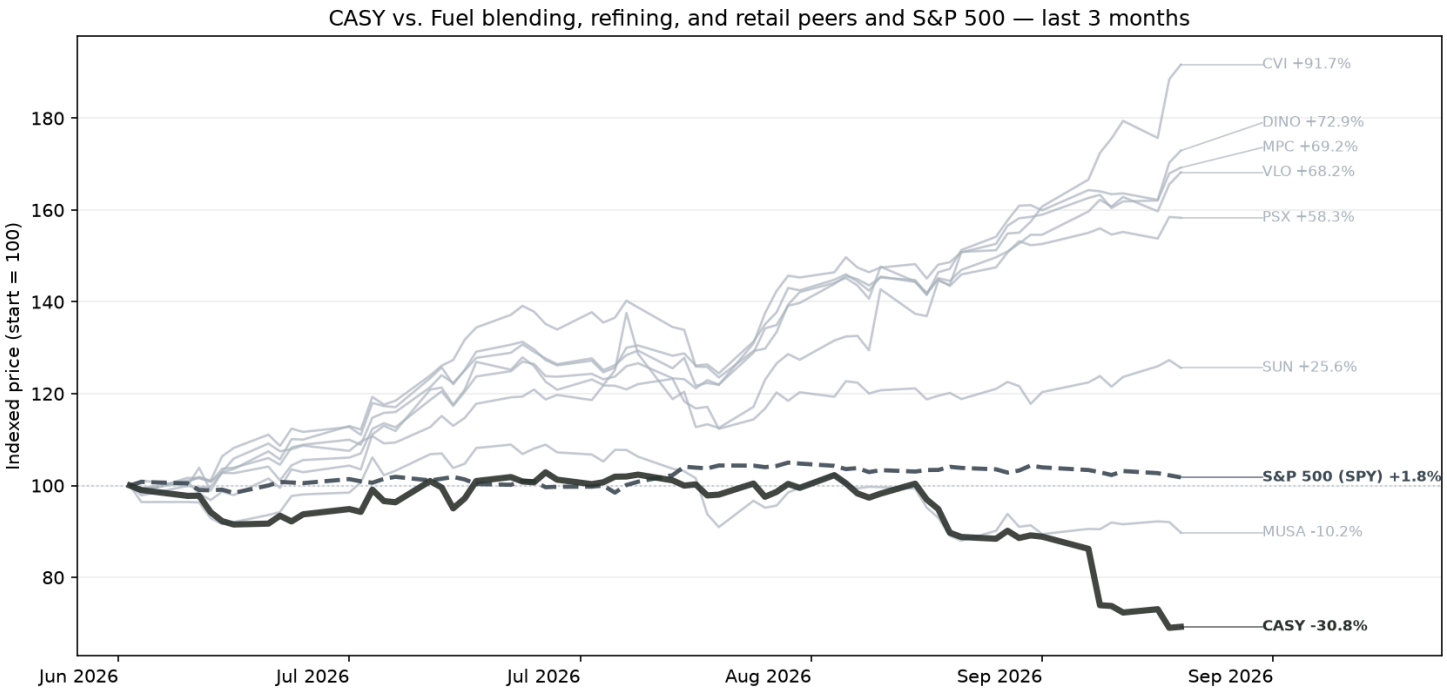

Sunoco LP is engaged in the distribution of motor fuels to independent dealers, distributors, and other commercial customers as well as the distribution of motor fuels to end-use customers at retail sites operated by commission agents. It is a growth-oriented master limited partnership (MLP) that operates as a wholesale and retail fuel distributor in the United States. The firm operates through the Fuel Distribution; Pipeline Systems; Refinery and Terminals segments. It generates the majority of its revenue from the Fuel Distribution segment. It distributes motor fuel to convenience stores, dealers, and commercial customers in various states.

Casey's General Stores (CASY)

Fuel blending, refining, and retail · $30.9B · 3m -30.8% · 12m +6.1% · 24m +56.9%

Google Finance

Corn Belt convenience-store chain with high E10/E15/E85 exposure.

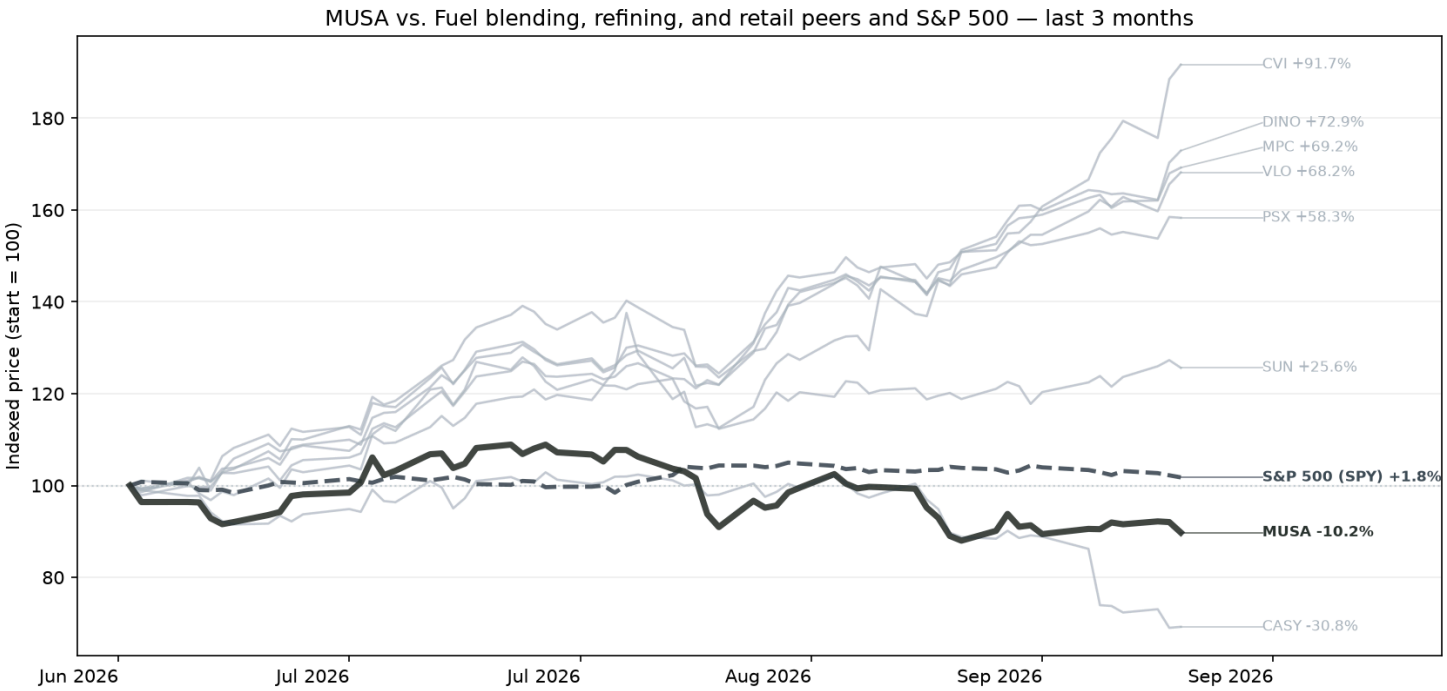

Casey's General Stores Inc, along with its subsidiaries, operates convenience stores mainly under the names Casey's, GoodStop (by Casey's), and Casey's General Store throughout various states in the USA, approximately half of which are located in Iowa, Missouri, and Illinois. These stores offer a broad selection of food items (which includes prepared foods such as regular and breakfast pizza, donuts, hot breakfast items, and hot and cold sandwiches), beverages, tobacco and nicotine products, groceries, health and beauty aids, automotive products, and other non-food items. The majority of the company's revenue is mainly derived from the retail sale of fuel and the products offered inside its stores.

Murphy USA (MUSA)

Fuel blending, refining, and retail · $10.4B · 3m -10.2% · 12m +29.0% · 24m -2.7%

Google Finance

High-volume fuel retailer and national ethanol blender.

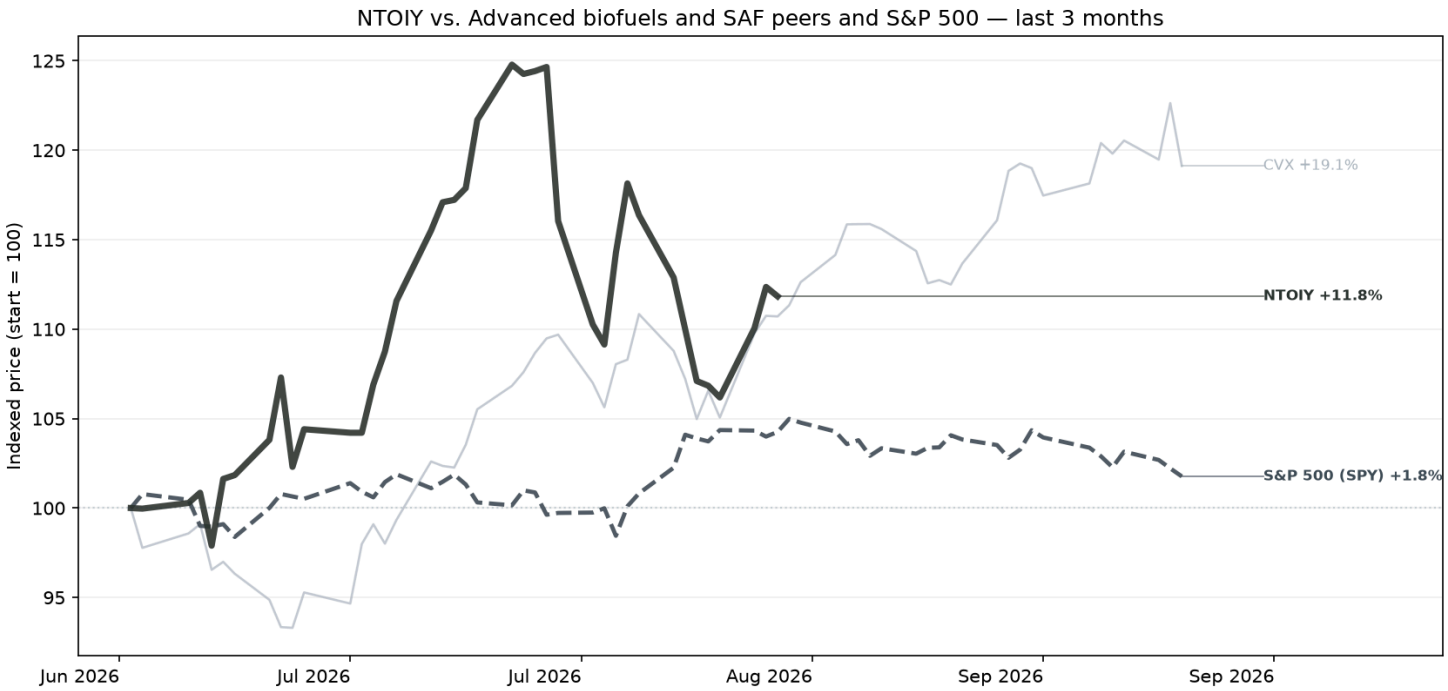

Murphy USA Inc is mainly engaged in the marketing of retail motor fuel products and convenience merchandise through a network of several retail stores in the Southwest, Southeast, Midwest, and Northeast United States. The majority of Murphy USA's stores are located in proximity to Walmart Supercenters, but it also operates standalone stores that market gasoline and other products under the Murphy USA, Murphy Express, and QuickChek brands. In addition, the company also markets fuel to unbranded wholesale customers through a mixture of company-owned and third-party product distribution terminals and pipeline positions. The firm generates maximum revenue through retail sales of petroleum products, and the rest from merchandise sales and wholesale of petroleum products.

Neste (NTOIY)

Advanced biofuels and SAF · n/a · 3m +11.8% · 12m +71.3% · 24m +89.8%

Google Finance

Largest global producer of renewable diesel and SAF; sets the price umbrella for corn oil.

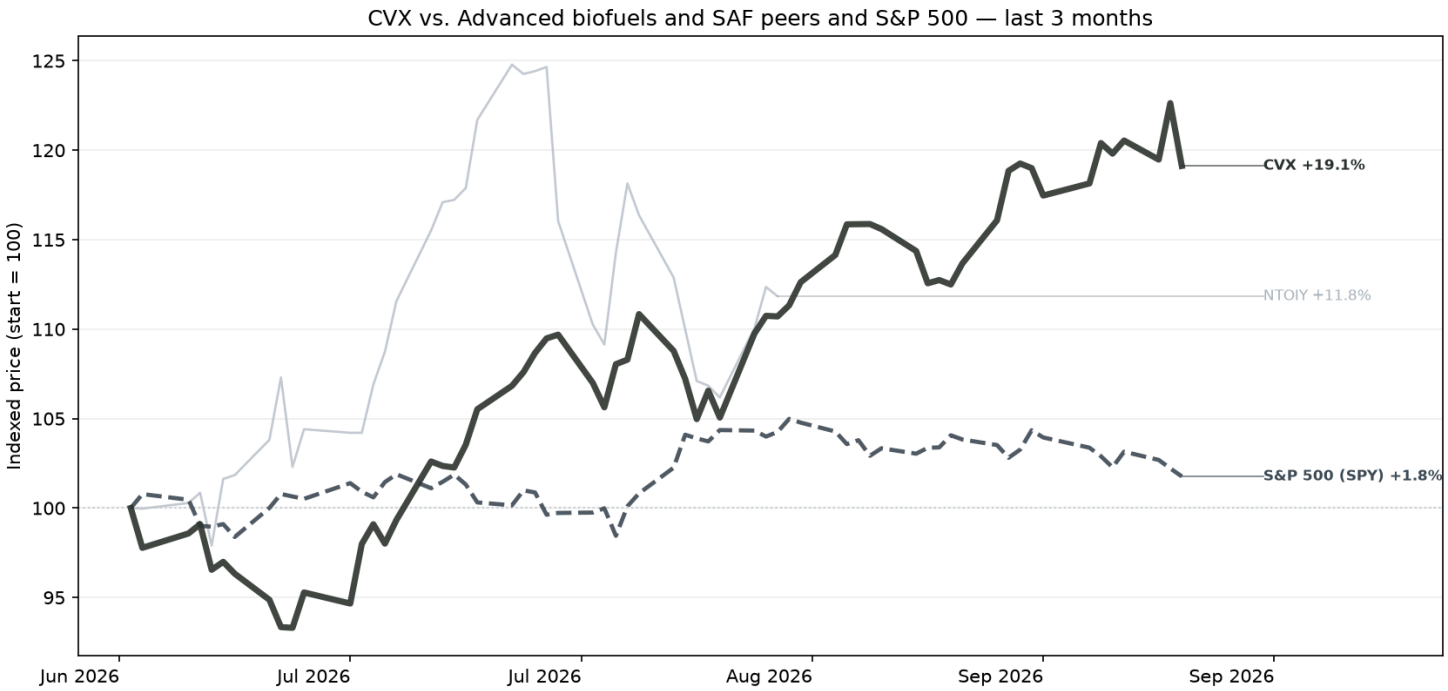

NESTE OYJ UNSP/ADR

Chevron (CVX)

Advanced biofuels and SAF · $403.6B · 3m +19.1% · 12m +32.1% · 24m +47.5%

Google Finance

Owner of Renewable Energy Group biodiesel and renewable-diesel plants that take corn oil at the margin.

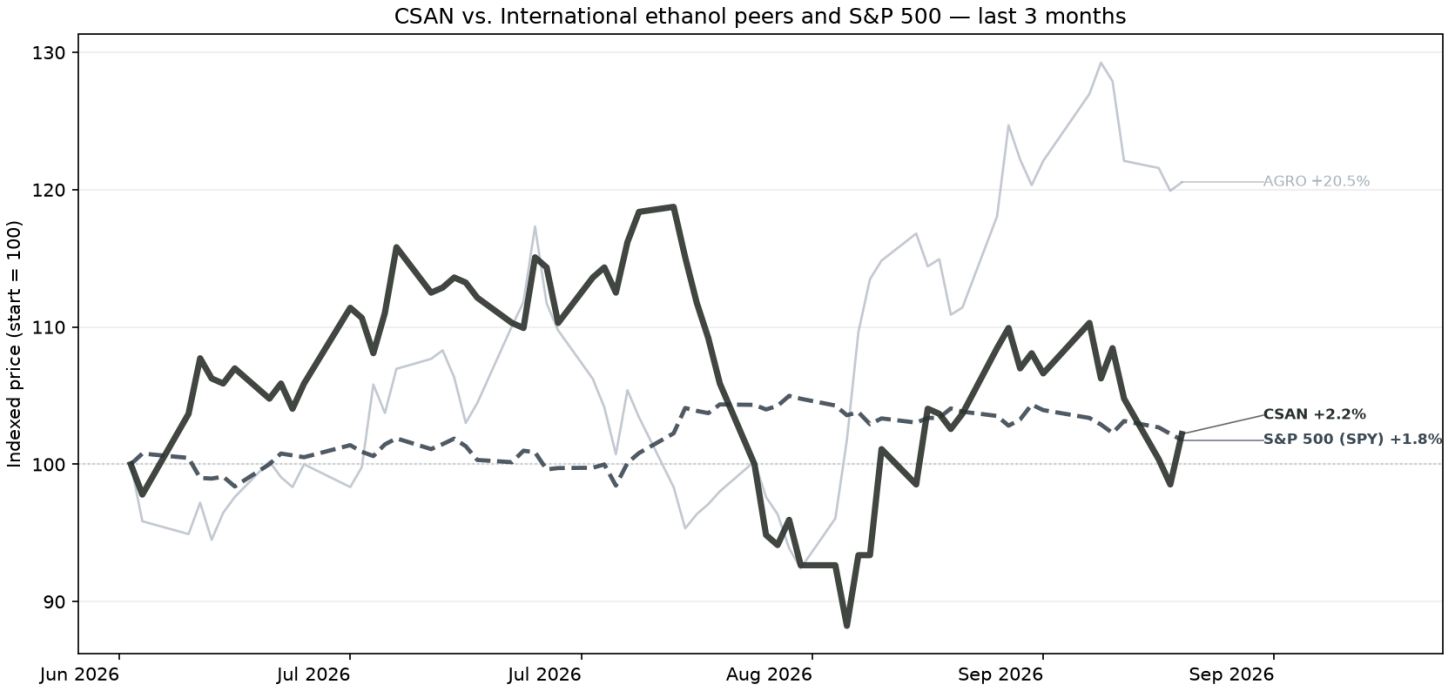

Chevron is an integrated energy company with exploration, production, and refining operations worldwide. It is the second-largest oil company in the United States with 2025 worldwide net oil-equivalent production of 3.7 million barrels per day, including 8.5 billion cubic feet per day of natural gas and 2.3 million barrels of liquids per day. Production takes place in North America, South America, Europe, Africa, Asia, and Australia. The company's refining networks arelocated in the United States and Asia, with a total worldwide refining capacity of 1.8 million barrels of oil a day at year-end 2025. Net proved reserves at year-end 2025 stood at 10.6 billion barrels of oil equivalent, consisting of 5.7 billion barrels of liquids and 29.2 trillion cubic feet of natural gas.

Cosan (CSAN)

International ethanol · $2.5B · 3m +2.2% · 12m -53.3% · 24m -71.3%

Google Finance

Brazilian holding company and the liquid U.S.-listed proxy for sugarcane ethanol via Raizen.

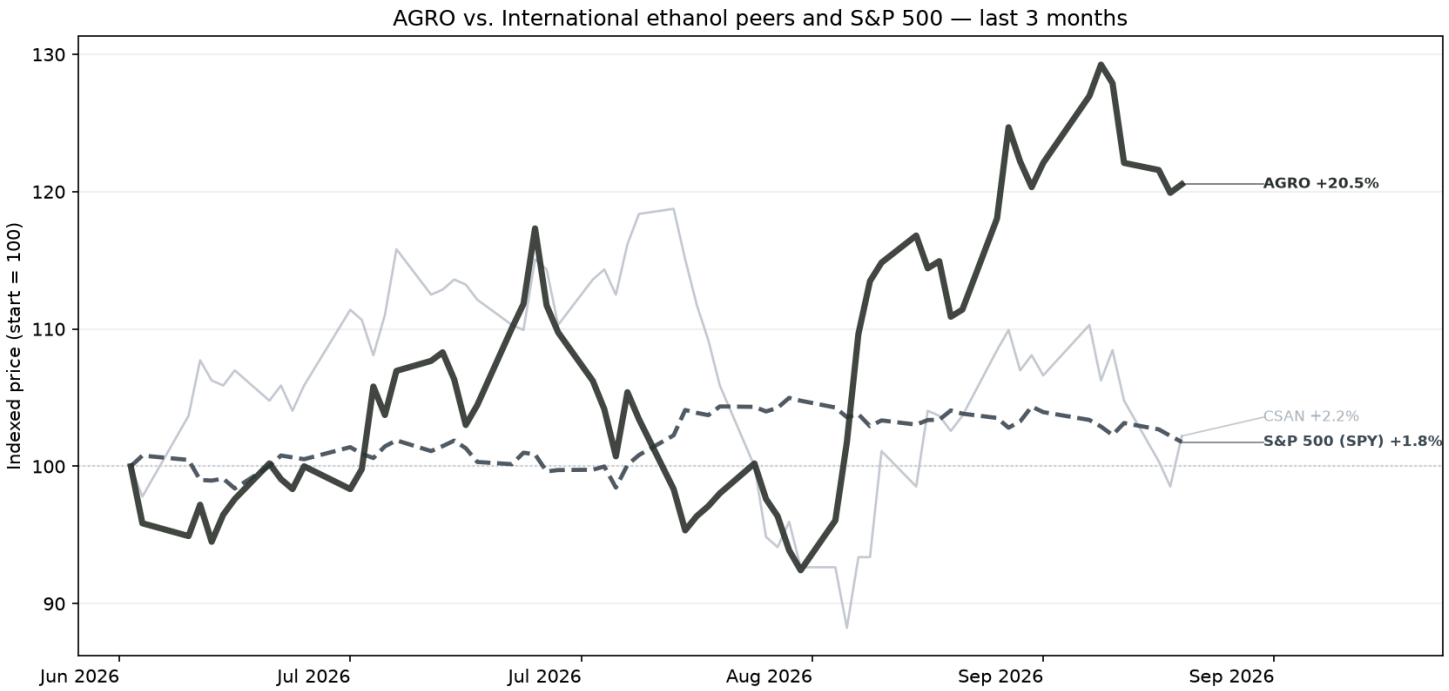

Cosan SA engages in several services throughout the energy and logistics sectors. Its reportable segments are Raizen, Compass, Moove, Rumo, and Radar. It generates the majority of its revenue from Raizen which operates in the production, commercialization, origination, and trading of ethanol, bioenergy, resale, and trading of electricity, renewable sources, marketing, origination, and trading of sugar and fuels, and lubricant.

Adecoagro (AGRO)

International ethanol · $1.5B · 3m +20.5% · 12m +42.4% · 24m +3.8%

South American farmland and sugar/ethanol producer with U.S.-listed equity.

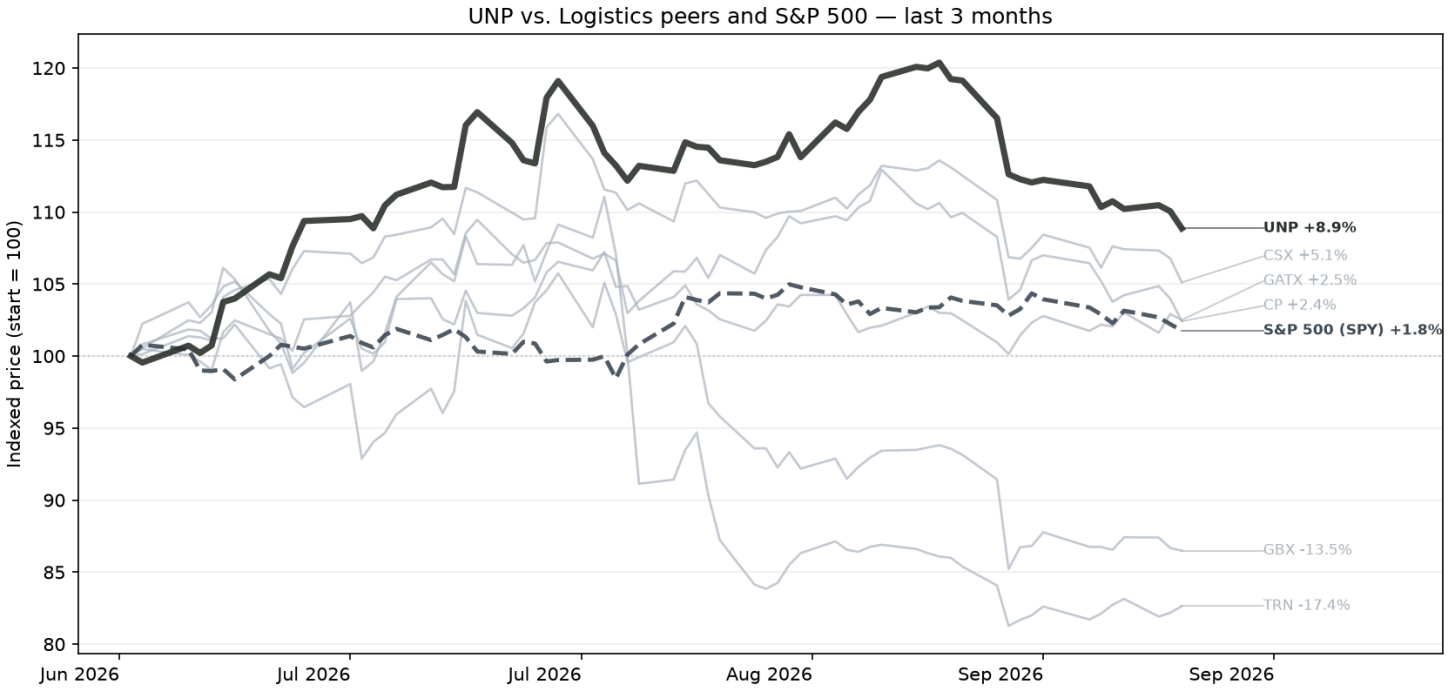

Adecoagro SA is a Luxembourg-based agricultural company. It is involved in a wide range of businesses, including farming crops and other agricultural products, dairy operations sugar, ethanol, energy production, and land transformation. The group operates in two lines of business, namely, Farming and Sugar, Ethanol and Energy. The Farming is further comprised of three reportable segments: Crops, Rice and Dairy. Sugar, Ethanol and Energy Segment, consists of cultivating sugarcane, which is processed in owned sugar mills, transformed into ethanol, sugar and electricity, in addition to biomethane and then marketed.

Union Pacific (UNP)

Logistics · $179.3B · 3m +8.9% · 12m +29.4% · 24m +10.8%

Google Finance

Primary western Class I for Corn Belt corn, ethanol unit trains, DDGS, and corn oil.

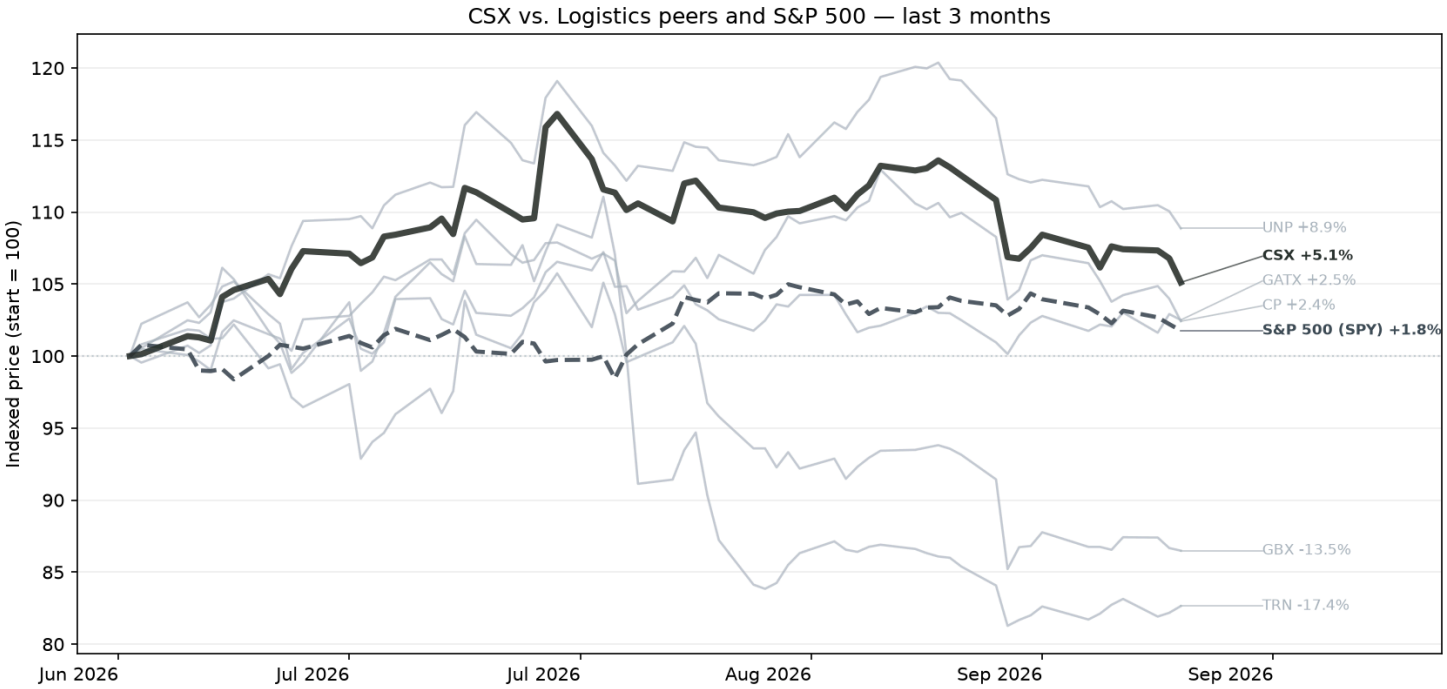

Omaha, Nebraska-based Union Pacific is the largest public railroad in North America. Operating on more than 30,000 miles of track in the western two-thirds of the US, Union Pacific generated $24.5 billion of revenue in 2025 by hauling coal, industrial products, intermodal containers, agricultural goods, chemicals, fertilizers, and automotive goods. Union Pacific owns about one-fourth of Mexican railroad Ferromex and historically derives roughly 10% of its revenue hauling freight to and from Mexico.

CSX (CSX)

Logistics · $93.9B · 3m +5.1% · 12m +46.2% · 24m +40.6%

Google Finance

Primary eastern Class I into Northeast and Southeast gasoline markets for ethanol unit trains.

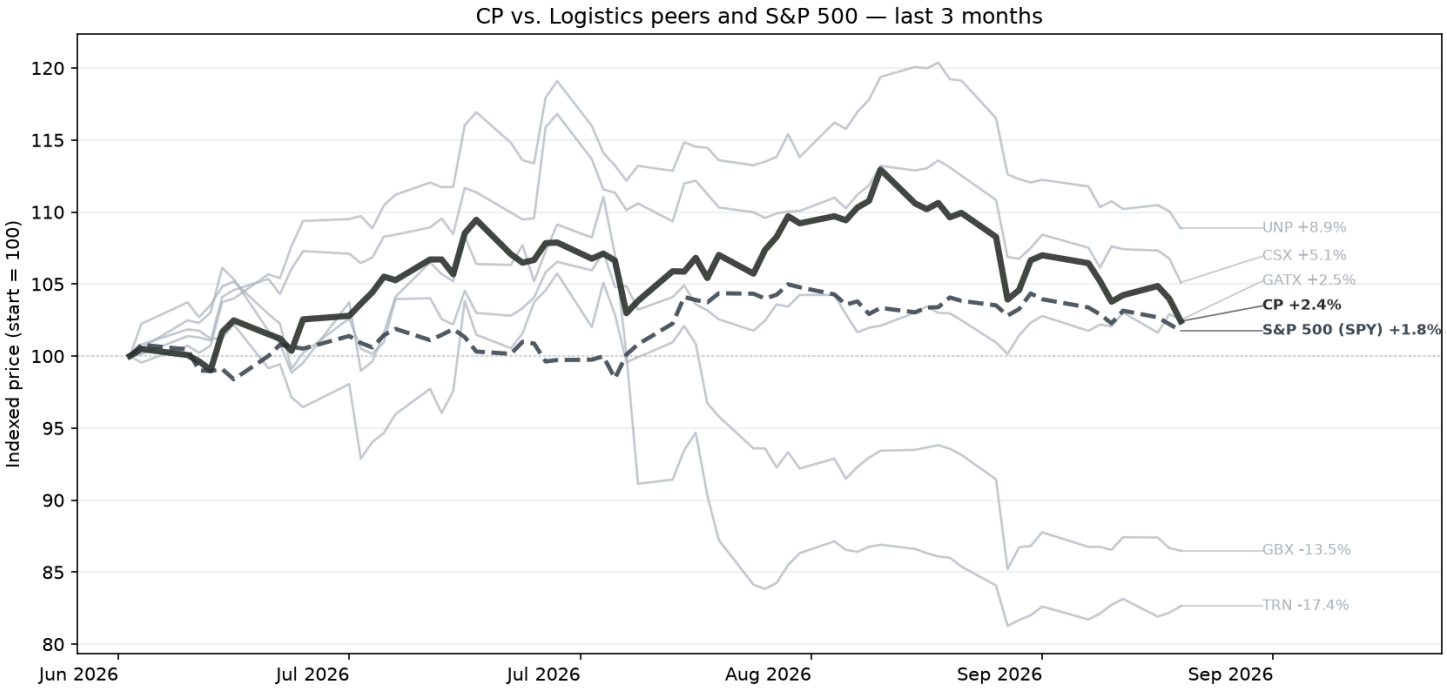

Operating in the Eastern United States, Class I railroad CSX generated revenue of nearly $14 billion in 2025. On its more than 21,000 miles of track, CSX hauls shipments of coal (16% of consolidated revenue), chemicals (17%), intermodal containers (16%), automotive cargo (7%), and a diverse mix of other bulk and industrial merchandise.

Canadian Pacific Kansas City (CP)

Logistics · $83.0B · 3m +2.4% · 12m +16.5% · 24m +1.2%

Google Finance

North-south railroad for Midwest corn and ethanol to the Gulf and Mexico.

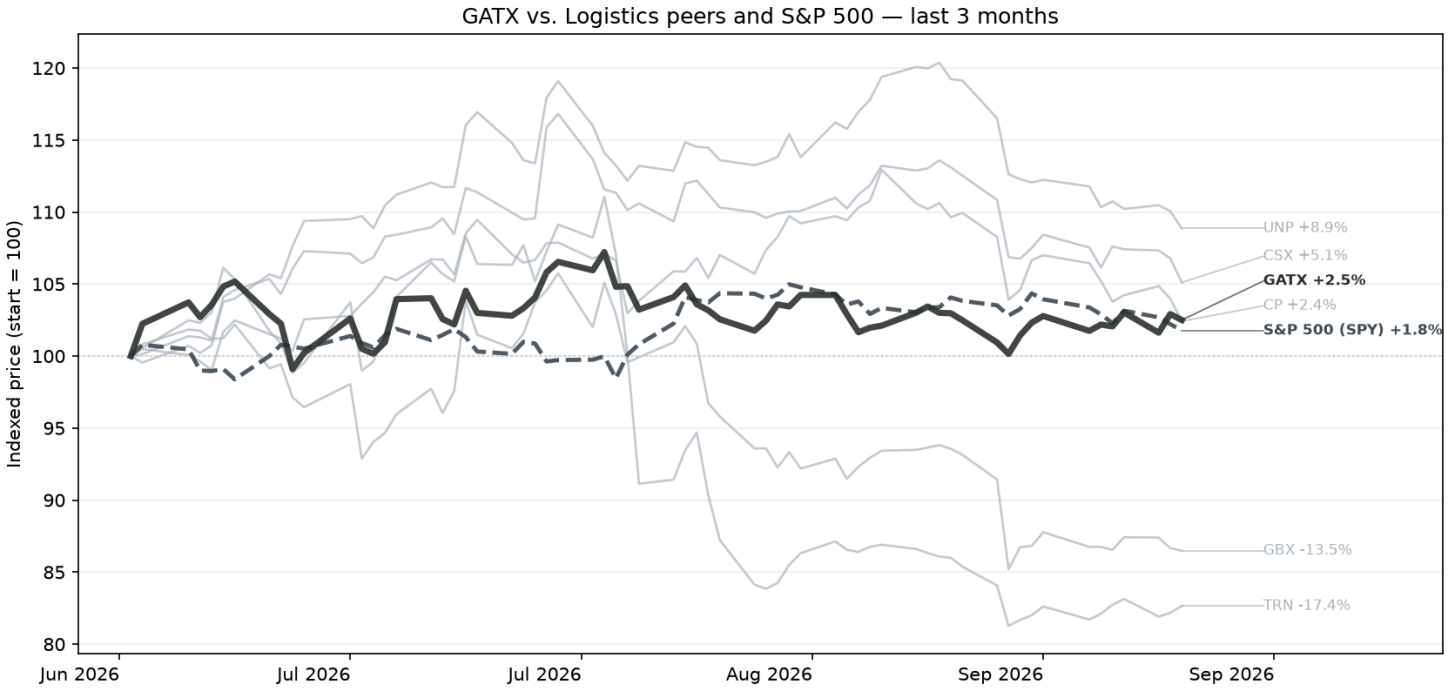

Canadian Pacific Kansas City is a Class I railroad operating on tracks that span most of Canada and into parts of the Midwestern and Northeastern United States. Following the April 2023 Kansas City Southern merger, CPKC operates new single-linehaul services from Canada and the Upper Midwest down through Texas, the Gulf of Mexico, and into Mexico. It also hauls cross-border and intra-Mexico freight via operating concessions on more than 3,000 miles of rail in Mexico. CPKC hauls shipments of grain, intermodal containers, energy products (like crude and frac sand), chemicals, plastics, coal, fertilizer and potash, automotive products, and a diverse mix of other merchandise.

GATX (GATX)

Logistics · $6.2B · 3m +2.5% · 12m +5.0% · 24m +29.1%

Google Finance

Largest public railcar lessor of ethanol tank cars and grain/DDGS hoppers.

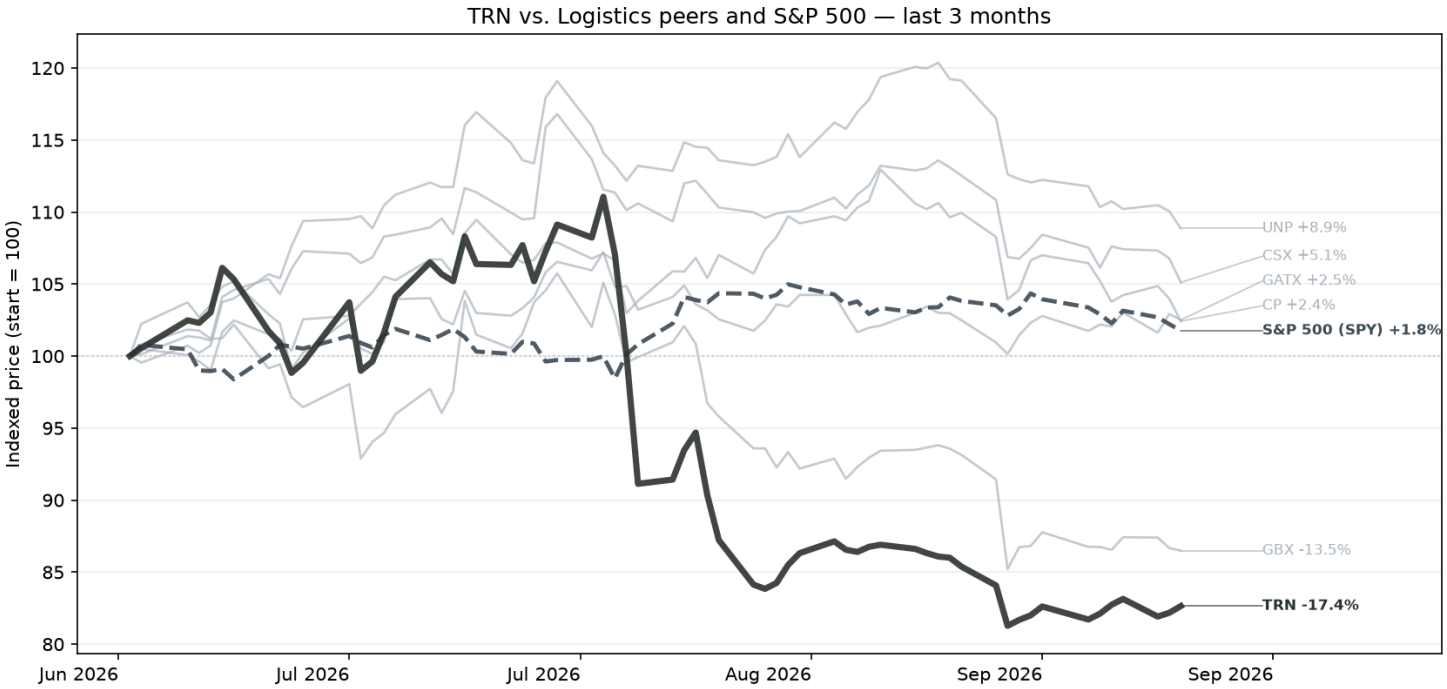

GATX Corp leases transportation assets, including railcars, aircraft spare engines, and tank containers, to customers in North America, Europe, and India. The company's reportable business segments are: Rail North America, Rail International, Engine Leasing, and Other. The majority of its revenue is generated from the Rail North America segment, which is composed of the company's operations in the United States, Canada, and Mexico. This segment mainly provides railcars pursuant to full-service leases under which it maintains the railcars, pays ad valorem taxes and insurance, and provides other ancillary services.

Trinity Industries (TRN)

Logistics · $2.4B · 3m -17.4% · 12m +2.1% · 24m -14.5%

Google Finance

Builds and leases covered hoppers and tank cars used for grain, DDGS, and ethanol.

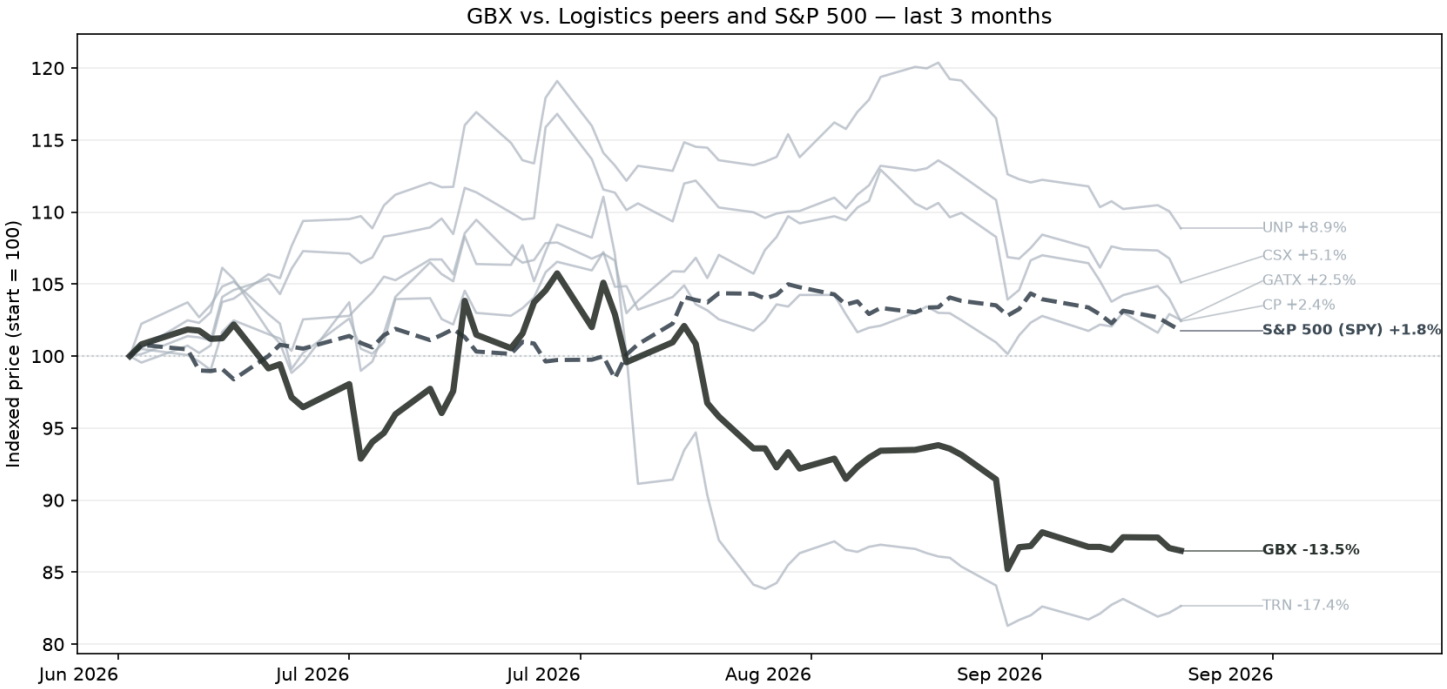

Trinity Industries Inc sells and leases railroad products and railcar maintenance services in North America. The company operates under the name TrinityRail in two main segments: railcar leasing and management services, which owns railcars and provides fleet management and administration services; rail products, which builds, sells, and modifies freight and tank railcars and their components; and all other, which sells highway products such as guardrail and other highway barriers. Customers include railroads, leasing companies, and shipping companies in agriculture, construction, consumer products, energy, and chemicals.

Greenbrier (GBX)

Logistics · $1.4B · 3m -13.5% · 12m -6.2% · 24m -13.4%

Google Finance

Builds tank cars used for ethanol, renewable fuels, and CO2.

Greenbrier Companies Inc supplies equipment and services to international freight transportation markets, designing and marketing freight railcars in North America, Europe, and Brazil through subsidiaries and joint ventures. It provides railcar wheel services, parts, maintenance, and conversion services in North America. The company owns a lease fleet sourced mainly from its manufacturing operations and offers railcar management, regulatory compliance, and leasing services to railroads and owners. It operates two segments: Manufacturing and Leasing & Fleet Management, with the majority of revenue from Manufacturing. The company operates in the U.S. and internationally, with the majority of revenue from the U.S. market.
